6. Will comply with all Federal Statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (P.L. 88–352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. §§ 1681–1683, and 1685–1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. § 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. §§ 6101–6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (P.L. 92–255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (P.L. 91–616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) §§ 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290dd–3 and 290ee–3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. § 3601 et seq.) as amended, relating to nondiscrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

7. Will comply, or has already complied, with the requirements of Titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91–646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.

8. Will comply with the provisions of the Hatch Act (5 U.S.C. §§ 1501–1508 and 7324–7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. §§ 276a to 276a–7), the Copeland Act (40 U.S.C. § 276c and 18 U.S.C. §§ 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. §§ 327–333), regarding labor standards for federally assisted construction subagreements.

10. Will comply, if applicable, with flood insurance purchase requirements of Section 102(a) of the Flood Disaster Protection Act of 1973 (P.L. 93–234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.

11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) institution of environmental quality control measures under the National Environmental Policy Act of 1969 (P.L. 91–190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. §§ 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under Section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. §7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (P.L. 93–523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (P.L. 93–205).

12. Will comply with the Wild and Scenic Rivers Act of 1968 (16 U.S.C. §§ 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.

13. Will assist the awarding agency in assuring compliance with Section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a–1 et seq.).

14. Will comply with P.L. 93–348 regarding the protection of human subjects involved in research,

development, and related activities supported by this award of assistance.

15. Will comply with the Laboratory Animal Welfare Act of 1966 (P.L. 89–544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.

16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. §§ 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.

17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.

18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

Date Submitted

U.S. Department of Health and Human Services; Certification Regarding Drug-Free Workplace Requirements; Grantees Other Than Individuals

By signing and/or submitting this application or grant agreement, the grantee is providing the certification set out below.

This certification is required by regulations implementing the Drug-Free Workplace Act of 1988, 45 CFR Part 76, Subpart F. The regulations, published in the May 25, 1990 **Federal Register**, require certification by grantees that they will maintain a drug-free workplace. The certification set out below is a material representation of fact upon which reliance will be placed when the Department of Health and Human Services (HHS) determines to award the grant. If it is later determined that the grantee knowingly rendered a false certification, or otherwise violates the requirements of the Drug-Free Workplace Act, HHS, in addition to any other remedies available to the Federal Government, may take action authorized under the Drug-Free Workplace Act. False certification or violation of the certification shall be grounds for suspension of payments, suspension or termination of grants, or governmentwide suspension or debarment.

Workplaces under grants, for grantees other than individuals, need not be identified on the certification. If known, they may be identified in the grant application. If the grantee does not identify the workplace at the time of application, or upon award, if there is no application, the grantee must keep the identity of the workplace(s) on file in its office and make the information available for Federal inspection. Failure to identify all known workplaces constitutes a violation of the grantee's drug-free workplace requirements.

Workplace identifications must include the actual address of buildings (or parts of buildings) or other sites where work under the grant takes place. Categorical descriptions may be used (e.g., all vehicles of a mass transit authority or State highway department while in operation, State employees in each local unemployment office, performers in concert halls or radio studios.)

If the workplace identified to HHS changes during the performance of the grant, the grantee shall inform the agency of the change(s), if it previously identified the workplaces in question (see above).

Definitions of terms in the Nonprocurement Suspension and Debarment common rule and Drug-Free Workplace common rule apply to this certification. Grantees' attention is called, in particular, to the following definitions from these rules:

"Contolled substance" means a controlled substance in Schedules I through V of the Controlled Substances Act (21 U.S.C. 812) and as further defined by regulation (21 CFR 1308.11 through 1308.15).

"Conviction" means a finding of guilt (including a plea of nolo contendere) or imposition of sentence, or both, by any judicial body charged with the responsibility to determine violations of the Federal or State criminal drug statutes;

"Criminal drug statute" means a Federal or non-Federal criminal statute involving the manufacture, distribution, dispensing, use, or possession of any controlled substance;

"Employee" means the employee of a grantee directly engaged in the performance of work under a grant, including: (i) All "direct charge" employees; (ii) all "indirect charge" employees unless their impact or involvement is insignificant to the performance of the grant; and, (iii) temporary personnel and consultants who are directly engaged in the performance of work under the grant and who are on the grantee's payroll. This definition does not include workers not on the payroll of the grantee (e.g., volunteers, even if used to meet a matching requirement; consultants or independent contractors not on the grantee's payroll; or employees of subrecipients or subcontractors in covered workplaces).

The grantee certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an ongoing drug-free awareness program to inform employees about:

(1) The dangers of drug abuse in the workplace; (2) The grantee's policy of maintaining a drug-free workplace; (3) Any available drug counseling, rehabilitation, and employee assistance programs; and, (4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will:

(1) Abide by the terms of the statement; and, (2) Notify the employer in writing of his or her conviction for a violation of criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the agency in writing, within ten calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to every grant officer or other designee on whose grant activity the convicted employee was working, unless the Federal agency has designated a central point for the receipt of such notices. Notice shall include the identification number(s) of each affected grant;

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted:

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or (2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e) and (f).

The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant (use attachments, if needed):

Place of Performance (Street address, City, County, State, ZIP Code)

Check _____ if there are workplaces on file that are not identified here.

Sections 76.630 (c) and (d)(2) and 76.635(a)(1) and (b) provide that a Federal agency may designate a central receipt point for STATE-WIDE AND STATE AGENCY-WIDE certifications, and for notification of criminal drug convictions. For the Department of Health and Human Services, the central receipt point is: Division of Grants Management and Oversight, Office of Management and Acquisition, Department of Health and Human Services, Room 517–D, 200 Independence Avenue, SW., Washington, DC 20201.

Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions

By signing and submitting this proposal, the applicant, defined as the primary participant in accordance with 45 CFR Part 76, certifies to the best of its knowledge and belief that its principals involved:

(a) are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal department or agency;

(b) have not within a 3-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) are not presently indicted or otherwise criminally or civilly charged by a government entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) have not within a 3-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.

The inability of a person to provide the certification required above will not necessarily result in denial of participation for this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certificatión. The certification or explanation will be considered in connection with the Department of Health and Human Services' (HHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction. The prospective primary participant agrees that by submitting this proposal, it will include the clause entitled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion—Lower Tier Covered Transaction", provided below, without modification in all lower tier covered transactions and in all solicitations for lower tier covered actions.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusions—Lower Tier Covered Transactions (To Be Supplied to Lower Tier Participants)

By signing and submitting this lower tier proposal, the prospective lower tier participant, as defined in 45 CFR Part 76, certified to the best of its knowledge and belief that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.

(b) Where the prospective lower tier participant is unable to certify to any of the above, such prospective participant shall attach an explanation to this proposal.

The prospective lower tier participant further agrees by submitting this proposal that it will include this clause entitled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusions—Lower Tier Covered Transactions" without modification in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

Certification Regarding Lobbying

Certification for Contracts, Grants Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Statement for Loan Guarantees and Loan Insurance

The undersigned states, to the best of his or her knowledge and belief, that:

If any funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this

commitment providing for the United States to insure or guarantee a loan, the undersigned shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

Submission of this statement is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required statement shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Instructions for Completion of SF–LLL, Disclosure of Lobbying Activities

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF–LLL–A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.

2. Identify the status of the covered Federal action.

3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.

4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.

5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.

6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.

7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.

8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP–DE–90–001."

9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.

10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.

(b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).

11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.

12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.

13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.

14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.

15. Check whether or not a SF–LLL–A Continuation Sheet(s) is attached.

16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0346–0046), Washington, D.C. 20503.

Appendix B—Program Performance Standards; National Runaway Switchboard

I. Overview of Program Performance Standards

The program performance standards established by the Bureau for its funded centers relate to the methods and processes by which the needs of runaway and homeless youth and their families are being met, as opposed to the outcome of the services provided on the clients served. The program performance standards, and the related criteria and indicators, as initially published in March 1977, were developed by the Bureau through a functional analysis of the service and administrative components of the runaway youth projects, and were revised based upon the comments and feedback provided by the FY 1975 funded projects; they have subsequently been further revised, based upon the experience of the Bureau and its funded centers in their implementation. The standards relate to the basic program components enumerated in section 317 of the Runaway and Homeless Youth Act and as further detailed in the Regulations and Program Guidance governing the implementation of the Act.

The Program Performance Standards are general principles against which a judgment can be made to determine whether a service or an administrative component has achieved a particular level of attainment.

Fourteen program performance standards, with related criteria, are established by the Bureau for the projects funded under the Runaway and Homeless Youth Act. Nine of these standards relate to service components (outreach, individual intake process, temporary shelter, individual and group counseling, family counseling, service linkages, aftercare services, recreational programs, and case disposition), and five to administrative functions or activities (staffing and staff development, youth participation, individual client files, ongoing project planning, and board of directors/ advisory body).

Although fiscal management is not included as a program performance standard, it is viewed by FYSB as being an essential element in the operation of its funded projects. Therefore, as validation visits are made, the regional ACYF specialist and/or staff from the Office of Fiscal Operations will also review the project's financial management activities.

FYSB views these program performance standards as constituting the minimum standards to which its funded projects should conform. The primary assumption underlying the program performance standards is that the service and administrative components which are encompassed within these standards are integral (but not sufficient in themselves) to a program of services which effectively addresses the crisis and long-term needs of runaway and homeless youth and their families.

The program performance standards (and the Program Performance Standards Self-Assessment Instrument) are designed to serve as a developmental tool, and are to be employed by both the project staff and the regional ACYF staff specialists in identifying those service and administrative components and activities of individual projects which require strengthening and/or development either through internal action on the part of staff or through the provision of external technical assistance.

II. Program Performance Standards and Criteria

The following constitute the program performance standards and criteria established by the Bureau for its funded centers. Each standard is numbered, and each criterion is listed after a lower case letter.

1. Outreach

The project shall conduct outreach efforts directed towards community agencies, youth and parents.

2. Individual Intake Process

The project shall conduct an individual intake process with each youth seeking services from the project. The individual intake process shall provide for:

a. Direct access to project services on a 24-hour basis.

b. The identification of the emergency service needs of each youth and the provision of the appropriate services either directly or through referrals to community agencies and individuals.

c. An explanation of the services which are available and the requirements for participation, and the securing of a voluntary commitment for each youth to participate in project services prior to admitting the youth into the project.

d. The recording of basic background information on each youth admitted into the project.

e. The assignment of primary responsibility to one staff member for coordinating the services provided to each youth.

f. The contact of the parent(s) or legal guardian of each youth provided temporary shelter within the timeframe established by State law or, in the absence of State requirements, preferably within 24 but within no more than 72 hours following the youth's admission into the project.

3. Temporary Shelter

The project shall provide temporary shelter and food to each youth admitted into the project and requesting such services.

a. Each facility in which temporary shelter is provided shall be in compliance with State and local licensing requirements.

b. Each facility in which temporary shelter is provided shall accommodate no more than 20 youth at any given time.

c. Temporary shelter shall normally not be provided for a period exceeding two weeks during a given stay at the project.

d. Each facility in which temporary shelter is provided shall make at least two meals per day available to youth served on a temporary shelter basis.

e. At least one adult shall be on the premises whenever youth are using the temporary shelter facility.

4. Individual and Group Counseling

The project shall provide individual and/or group counseling to each youth admitted into the project.

a. Individual and/or group counseling shall be available daily to each youth admitted into the project on a temporary shelter basis and requesting such counseling.

b. Individual and/or group counseling shall be available to each youth admitted into the project on a non-residential basis and requesting such counseling.

c. The individual and/or group counseling shall be provided by qualified staff.

5. Family Counseling

The project shall make family counseling available to each parent or legal guardian and youth admitted into the project.

a. Family counseling shall be provided to each parent or legal guardian and youth admitted into the project and requesting such services.

b. The family counseling shall be provided by qualified staff.

6. Service Linkages

The project shall establish and maintain linkages with community agencies and individuals for the provision of those services which are required by youth and/or their families but which are not provided directly by the centers.

a. Arrangements shall be made with community agencies and individuals for the provision of alternative living arrangements, medical services, psychological and/or psychiatric services, and the other assistance required by youth admitted into the project and/or by their families which are not provided directly by the project.

b. Specific efforts shall be conducted by the project directed toward establishing working relationships with law enforcement and other juvenile justice system personnel.

7. Aftercare Services

The project shall provide a continuity of services to all youth served on a temporary shelter basis and/or their families following the termination of such temporary shelter both directly and through referrals to other agencies and individuals.

8. Recreational Program

The project shall provide a recreational-leisure time schedule of activities for youth admitted to the project for residential care.

9. Case Disposition

The project shall determine, on an individual case basis, the disposition of each youth provided temporary shelter, and shall assure the safe arrival of each youth home or to an alternative living arrangement.

a. To the extent feasible, the project shall provide for the active involvement of the youth, the parent(s) or legal guardian, and the staff in determining what living arrangement constitutes the best interest of each youth.

b. The project shall assure the safe arrival of each youth home or to an alternative living arrangement, following the termination of the crisis services provided by the project, by arranging for the transportation of the youth if he/she will be residing within the area served by the project; or by arranging for the meeting and local transportation of the youth at his/her destination if he/she will be residing beyond the area served by the project.

c. The project shall verify the arrival of each youth who is not accompanied home or to an alternative living arrangement by the parent(s) or legal guardian, project staff or other agency staff within 12 hours after his/her scheduled arrival at his/her destination.

10. Staffing and Staff Development

Each center is required to develop and maintain a plan for staffing and staff development.

a. The project shall operate under an affirmative action plan.

b. The project shall maintain a written staffing plan which indicates the number of paid and volunteer staff in each job category.

c. The project shall maintain a written job description for each paid and volunteer staff function which describes both the major tasks to be performed and the qualifications required.

d. The project shall provide training to all paid and volunteer staff (including youth) in both the procedures employed by the project and in specific skill areas as determined by the project.

e. The project shall evaluate the performance of each paid and volunteer staff member on a regular basis.

f. Case supervision sessions, involving relevant project staff, shall be conducted at least weekly to review current cases and the types of counseling and other services which are being provided.

11. Youth Participation

The center shall actively involve youth in the design and delivery of the services provided by the project.

a. Youth shall be involved in the ongoing planning efforts conducted by the project.

b. Youth shall be involved in the delivery of the services provided by the project.

12. Individual Client Files

The project shall maintain an individual file on each youth admitted into the project.

a. The client file maintained on each youth should, at a minimum, include an intake form which minimally contains the basic background information needed by FYSB; counseling notations; information on the services provided both directly and through referrals to community agencies and individuals; disposition data; and, as applicable, any follow-up and evaluation data which are compiled by the center.

b. The file on each client shall be maintained by the project in a secure place and shall not be disclosed without the written permission of the client and his/her parent(s) or legal guardian except to project staff, to the funding agency(ies) and its (their) contractor(s), and to a court involved in the disposition of criminal charges against the youth.

13. Ongoing Center Planning

The center shall develop a written plan at least annually.

a. At least annually, the project shall review the crisis counseling, temporary shelter, and aftercare needs of the youth in the area served by the center and the existing services which are available to meet these needs.

b. The project shall conduct an ongoing evaluation of the impact of its services on the youth and families it serves.

c. At least annually, the project shall review and revise, as appropriate, its goals, objectives, and activities based upon the data generated through both the review of youth needs and existing services (13a) and the follow-up evaluations (13b).

d. The project's planning process shall be open to all paid and volunteer staff, youth, and members of the Board of Directors and/or Advisory Body.

14. Board of Directors/Advisory Body (Optional)

It is strongly recommended that the centers have a Board of Directors or Advisory Body.

a. The membership of the project's Board of Directors or Advisory Body shall be composed of a representative cross-section of the community, including youth, parents, and agency representatives.

b. Training shall be provided to the Board of Directors or Advisory Body designed to orient the members to the goals, objectives, and activities of the project.

c. The Board of Directors or Advisory Body shall review and approve the overall goals, objectives, and activities of the project, including the written plan developed under 13.

National Communication System

The National Runaway Switchboard/ National Communication System (NCS) is a toll-free, 24 hour a day confidential information, referral, and crisis counseling service for runaway and homeless youth and their families. The service is available throughout the United States, including Hawaii and Alaska. The System is authorized by Section 313 of the Runaway and Homeless Youth Act to assist runaway and homeless youth in communicating with their families and service providers. The NCS was initiated in FY 1974 as an eight month research and demonstration grant to Metro-Help, Inc. in Chicago, Illinois for the purpose of providing toll-free telephone services to runaway youth in the contiguous United

States. As a part of the national RHY service system, the NCS is designed to:

(1) Provide a neutral and accessible channel of communication in the United States (including Alaska and Hawaii) between runaway and homeless youth and their families;

(2) Refer runaway and homeless youth to agencies and/or resources in their communities (or immediate vicinity) for needed services or assistance; and

(3) Provide crisis intervention counseling to callers when needed.

Approximately 2.50 million youth and their families have been served by the NCS from 1975 to the present. The current grant to operate the System is held by the National Runaway Switchboard (formerly Metro-Help, Inc.), 3080 N. Lincoln Ave., Chicago, Illinois 60614; Lora Thomas, Executive Director; telephone (312) 880–9860. The toll-free number is 1–800–621–4000.

Part IV

Department of Health and Human Services

Administration for Children and Families

Youth Gang Drug Prevention Program; Availability of Funds and Request for Applications; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

[Program Announcement No. ACF-92-4]

Youth Gang Drug Prevention Program; Availability of Fiscal Year 1992 Funds and Request for Applications

AGENCY: Administration on Children, Youth and Families (ACYF); Administration for Children and Families (ACF).

ACTION: Announcement of the availability of funds and request for applications under the Youth Gang Drug Prevention Program.

SUMMARY: The Family and Youth Services Bureau (FYSB) of the Administration on Children, Youth and Families (ACYF) announces the availability of funds for competing discretionary grants under the Youth Gang Drug Prevention Program. The purpose of this program is to conduct community-based, comprehensive, and coordinated activities to reduce and prevent the involvement of youth in gangs that engage in illicit drug-related activities.

This announcement describes the grant application process and covers five demonstration priority areas: (A1) Community-Based Consortia; (A2) Adolescent Females at Risk of Gang Participation; (A3) Employment Programs for Youth at Risk of Gang Participation; (A4) New Immigrant and Refugee Youth Gangs; and (A5) Gangproofing Young Children; and three research priority areas: (B1) Gang Families; (B2) Effects of Violence on Young Children; and (B3) Identification of Factors Which Predispose a Youth to Avoid Gang Involvement.

DATES: The closing date for submittal of applications under this announcement is May 19, 1992.

ADDRESSES: Application receipt point: Youth Gang Drug Prevention Program, Department of Health and Human Services, Administration for Children and Families, Division of Discretionary Grants, room 341–F.2, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, Attn: Mary White, ACF–92–X.

FOR FURTHER INFORMATION CONTACT: Department of Health and Human Services, ACF/ACYF, Family and Youth Services Bureau, Division of Program Support, ATTN: Maria T. Candamil, P.O. Box 1182, Washington, DC 20013. Telephone (202) 245–0074.

SUPPLEMENTARY INFORMATION: This program announcement consists of three parts. Part I provides a brief history of youth gangs and their involvement with drugs; a summary of FYSB grants previously funded under this program, along with a discussion of how these grants have added to existing knowledge about gangs and enhanced FYSB's ability to provide prevention services to youth in at-risk situations; and a brief review of FYSB-funded activities in support of these grantees. Part II describes the review process under which applications will be considered. Part III details the programmatic priorities for which proposals are being solicited and describes the minimum requirements for each priority. Part IV provides information and instructions for the development and submission of applications.

The forms to be used for submitting an application follow part IV. Please copy and use these forms in submitting an application under this announcement. No additional application materials are available or needed to submit an application.

Applicants should note that grants to be awarded under this program announcement are subject to the availability of funds.

TABLE OF CONTENTS

Part I Introduction

A. Historical Perspective
B. Youth Gangs Today
C. Youth Gangs and Drugs
D. Youth Gang Drug Prevention Program

Part II The Review Process

A. Eligible Applicants
B. Review Process and Funding Decisions
C. Evaluation Criteria
(1) Objectives and Need for Assistance
(2) Results or Benefits Expected
(3) Approach
(4) Staff Background and Organization's Experience
D. Explanation of Priority Area Descriptions
E. Available Funds
F. Grantee Share of Project Costs
G. Cooperation in Evaluation Efforts
H. Closed Captioning for Audiovisual Efforts

Part III Priority Areas

A. Demonstration Projects
B. Research Projects

Part IV Instructions for the Development and Submission of Applications

A. Required Notification of the State Single Point of Contact
B. Deadline for Submittal of Applications
C. Paperwork Reduction Act of 1980
D. Instructions for Preparing the Application and Completing Application Forms
(1) SF 424
(2) SF 424A
(3) Project Summary Description
(4) Program Narrative Statement
(5) Organizational Capability Statement
(6) Part V—Assurances/Certifications
E. Components of a Complete Application
F. The Application Package
G. Checklist for a Complete Application

Appendices
I State Single Points of Contact

III SF 424A (REV 4/88)
IV Assurances—Non-Construction Programs
V Certification Regarding Lobbying
VI Certification Regarding Drug-Free Workplace Requirements
VII Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transactions

Part I—Introduction

A. Historical Perspective

Youth gangs are not a new phenomenon in this country. Dolan and Finney (1984) document the rise of young Irish street gangs operating in New York City in the late 1800s. At the same time Mexican gangs known as Palomillos crossed the border to settle in rural Texas. While the Irish gangs slowly became assimilated into the dominant society, gangs within the Mexican-American or Chicano culture became institutionalized within their own communities. One reason may be that the Chicano gangs were distinctive from the dominant society in terms of appearance and language. In addition, the Chicano culture saw membership and participation in gangs as a normal right of passage to adulthood for young males.

The post World War II era saw a resurgence of gangs spurred by a major shift in the population from rural areas to urban centers. Racial and ethnic minority youth sought out other members of their racial and ethnic minority group in their new urban environment and created gangs for support and self-protection. As Chicanos moved from rural to urban areas, they took their palomillo tradition with them. In its new environment the palomillo tradition took on a flashier, more urban appearance. It was called pachuco and was characterized by zoot-suit clothing and the use of an English-Spanish slang. In Los Angeles, the center of pachuco, violence erupted in race riots, the zoot suit wars, between returning Anglo servicemen and Chicano youth. The fact that many Chicano youth dressed according to the pachuco style, but were not members of a gang, did not save them from becoming victims of the violence (Moore 1985).

Black youth migrating from the rural south to northern urban centers such as Detroit, Chicago, Boston and Minneapolis went through a transformation very similar to that of the Chicano youth. Both groups formed turf gangs that gave the youth a sense of identity, and provided them with a

support system as well as a means of passage to adulthood. Inter-gang urban violence increased as more young people migrated into a neighborhood and gangs attempted to increase their turf.

B. Youth Gangs Today

In the late 1970s and early 1980s, youth gangs experienced another metamorphosis; many gangs started to specialize in marketing and distributing illegal drugs such as heroin, crack and cocaine. The Hoover Street Crips and the Bloods of Los Angeles are probably the best known of these gangs.

An interesting phenomenon is gang migration and franchising. The El Rukns, a Black gang which was originally established in Chicago in the late 1980s, unsuccessfully attempted to move its operations to St. Paul, Minnesota, after police pressure became too great in Chicago. The El Rukns failed to encourage large numbers of local youth to join the gang and thereby establish a strong base. Other Chicago gangs such as the Disciples, Vice Lords and the Latin Kings learned from the mistakes of El Rukns and established successful networks of affiliated gangs that stretch from Chicago to Minneapolis and St. Paul. This franchising effort has dramatically increased the gangs' abilities to traffic in drugs and weapons across the Midwest.

Among the most recent trends has been the emergence of new ethnic gangs which have developed as a result of the influx of third-world immigrants. Previously, Asian immigrants were primarily Chinese and Japanese who lived in well-defined areas in urban centers and maintained relatively closed communities. Problems such as crime and youth violence were kept within the community. The latest migration of immigrants consists of diverse subgroups of Southeast Asians, among them Amerasians, who are not residing in traditional Asian neighborhoods, but who are involved in youth gang activities.

Many Hispanic youth who immigrated to this country to escape totalitarian governments or war and poverty in their own countries (for example, Cuba and El Salvador) came unaccompanied. While some joined relatives or friends of their families, many soon had, or chose, to fend for themselves. As a substitute for their missing family support systems and as a survival mechanism they either joined existing Hispanic gangs or, in most cases, formed their own gangs which competed with the traditional Puerto Rican and Chicano gangs. Some established themselves in areas with little or no previous gang activity, such as Miami.

Recent studies by Spergel (1984) and others report the existence of youth gangs in every State. The prevalence of gangs and associated illicit drug-related activity is widespread. It is estimated that 300 cities (i.e., 13 percent of all U.S. cities with 10,000 or more inhabitants) are experiencing problems with youth gangs. While smaller cities and suburban areas are experiencing an increase in youth gang activities, the strongest presence is in major population centers.

In response to the Administration on Children, Youth and Families' (ACYF) first announcement on the availability of discretionary funds for the Youth Gang Drug Prevention Program, applications were received from public and private agencies in 36 States and the District of Columbia. While ACYF expected to receive applications from States that are traditionally associated with youth gangs (California, Illinois, and New York), almost one-third were from cities and towns in States not traditionally associated with youth gangs. Proposals were received from such States as Iowa, Idaho, Kentucky, Minnesota, Missouri, Ohio, Tennessee, and Wisconsin.

C. Youth Gangs and Drugs

Associated with the recent increase in youth gang formation is the increase in youth gang violence and involvement in the use and sale of drugs. Definitive national data are not available; however, it is evident that, since the mid-1980s, extensive drug use and sales by gang members have been on the increase in cities both large and small. While many jurisdictions still have traditional "turf-oriented" gangs, there is an increasing variety of gang patterns in many areas. For instance, Taylor (1990) describes Detroit's gangs as more entrepreneurial and business oriented. These gangs are frequently led by adults who use adolescent members to distribute and sell drugs. The gangs shun traditional gang trappings such as "colors", clothing styles and graffiti, since that would draw the attention of law enforcement officials. These gang members also eschew the use of "hard core" drugs (e.g., cocaine, crack, ice, and heroin), which they see as counterproductive to their business ventures.

Police and juvenile justice officials confirm that a significant number of gangs are more focused on the use and sale of illicit drugs than on traditional turf issues. Drug dealing gangs view turf not in terms of neighborhood but in terms of marketing areas, ranging from particular street corners in their neighborhoods to other communities throughout the country. As stated earlier, gang members form large urban areas, such as the Crips and the Bloods, are involved with interstate drug traffic. Evidence also suggests a franchising effort on their part to smaller communities around the country. In many areas, this activity has led to the emergence of new youth gangs and associated criminal activity among youth members in these smaller communities.

D. Youth Gang Drug Prevention Program

In response to these issues, Congress enacted the Drug Education and Prevention Relating to Youth Gangs program as part of the Anti-Drug Abuse Act of 1988, section 3501 of Public Law 100–690, 42 U.S.C. 11801 *et seq.* The specific purposes of Section 3501 are to:

1. Prevent and reduce the participation of youth in the activities of gangs that engage in illicit drug-related activities;

2. Promote the involvement of youth in lawful activities in communities in which such gangs commit drug-related crimes;

3. Prevent the abuse of drugs by youth, educate youth about such abuse, and refer for treatment and rehabilitation members of such gangs who abuse drugs;

4. Support activities of local police departments and other law enforcement agencies related to the conduct of educational outreach activities in communities in which gangs commit drug-related crimes;

5. Inform gang members and their families about the availability of treatment and rehabilitation services for drug abuse;

6. Facilitate Federal and State cooperation with local school officials to assist youth who are likely to participate in gangs that commit drug-related crimes; and

7. Facilitate coordination and cooperation among local education, juvenile justice, employment, and social services agencies, and drug abuse referral, treatment and rehabilitation programs for the purpose of preventing or reducing the participation of youth in activities of gangs that commit drug-related crimes.

The legislation specifically identifies ACYF as the administering agency to emphasize that the program is intended to be social service-based, rather than criminal justice-based. Indeed, a very similar program in the Anti-Drug Abuse Act of 1988, but with a criminal justice focus, was established as part of the Juvenile Justice and Delinquency

Prevention Act and is being administered by the Department of Justice.

Although authorized in FY 1988, the program received its first appropriation of $15 million in FY 1989. Since 1989, ACYF has awarded almost $28 million to fund 84 State and local efforts to respond to the nation's youth gang problem. These grants range from $1,000,000 community-based consortia projects in large urban centers, such as Denver and Los Angeles, to $50,000 planning projects in small communities, such as Caldwell, Idaho, and Santa Rosa, California.

These efforts are designed to:

- Expand ACYF's understanding of why youth become involved in gangs;
- Demonstrate and assess effective measures for preventing the futher recruitment and involvement of youth in at-risk situations in gang activities; and
- Develop successful, replicable model approaches that prevent youth involvement in gangs and illegal drug activities.

Since there in no single cause for youth's involvement in gangs, there is no single prevention model. Many agencies have focused on community organization activities in an effort to have the community solve its own problems. For example, one previously-funded agency instituted Community Support Groups which meet monthly on block and school safety issues and has developed a newsletter and a youth resource directory. Another agency uses block-by-block organizing to mobilize neighborhood residents against drug trafficking and gang violence. Residents operate "phone-trees" to gather information on new drug trafficking sites, graffiti, or gang meeting sites. This information is then relayed to law enforcement officials. Residents also march as a group through these areas to bring unwanted publicity to the dealers and gangs.

Other grantees center many of their activities around or in local schools. Many grantees conduct tutoring, recreation, outward bound activities, and cultural programs on school grounds or in nearby locations after normal school hours or during summer vacation. One grantee has instituted school-based leadership clubs and community-based outreach clubs. Another grantee organized a youth conference conducted by and for students who developed a series of recommendations to help stop violence and destructive behaviors. In another community, a grantee is working with two elementary schools to implement a self-esteem curriculum which includes planning for a successful journey; keeping your eye on your attitude; using your common sense; and making full use of your abilities.

Whether delinquency is explained in terms of choice, developmental, or social process theory, all three explanations link the impact of the family, its values, and its behaivors with the child's chances for delinquent or lawful behavior. Therefore, another popular approach being tested by many of the grantees is to empower families. Parenting classes are conducted to help teach parents effective techniques for dealing with discipline, setting goals, understanding their repsonsibilities and rights, and developing positive relationships with their children. One grantee has established a "School for Parents." In order to develop an effective curriculum, the instructors meet with the children of the enrollees to explore their particular needs. These needs provide the basis for the content of the school sessions for the parents. Another grantee's Board of Directors has taken a one-to-one approach through "Adopt a Family" under which they provide help to families in the areas of housing, financial matters, schooling or whatever the families need in order to achieve their goals for their children.

Gang activity is violent activity. Several grantees have, therefore, specifically focused on lessening the violence in their communities. One grantee held a Gang Summit which focused on developing a "peace plan" and code of conduct between rival gangs. As a follow-up, "Monday Night Meetings" were conducted every other week to get youth from various gangs together to work on conflict resolution, anger management, cultural awareness and other issues. Another grantee provides street outreach on a daily basis with hard-core gang members and acts as a mediator to resolve disputes before they lead to violence.

Finally, several grantees are using "rites of passage" programs as a substitute for gangs. These programs are based on the theoretical work of Herbert Block and Arthur Niederhoffer, who suggest that gangs provide a mechanism for bridging the gap between the freedom of childhood and the responsibilities of adulthood. Gang processes and functions parallel the puberty rites of primitive cultures. For example, tattoos, graffiti, modes of dress, participation in illegal activities, adoption of a "street" name and gang initiation ceremonies (a new member is physically beaten by some or all of the members) are similar to the rites and behavior patterns of primitive societies. These rites are designed to show that the youth has left childhood and has assumed a new identity within the adult group. Some grantees have designed positive activities that are centered around cultural values to help youth accomplish the transition from childhood to adulthood. One grantee developed a culturally-based leadership training program for 13-18 year olds. To participate in the program, the youth must be recommended by a faculty member, maintain a 2.0 grade point average, write an essay and have a parent/guardian attend an orientation meeting. The youth attend a 60 hour classroom course, including a 3-day live-in seminar, and are evaluated during a 60-hour field experience. The curriculum includes philosophy and styles of leadership, preceptions and beliefs, group process and dynamics, individual and group assessment processes, and yin/yang theory.

A major emphasis of the Youth Gang Drug Prevention Program has been on supporting the development of community-based consortia to conduct innovative, comprehensive approaches to the current and emerging problems of youth gangs and their involvement with illicit drugs. Each consortium is a broadbased partnership which draws upon the resources, expertise, energies and commitments of many different groups within the community.

Consortia lead agencies and their memberships vary widely. One consortium is headed by a State agency but includes city, school and community-based organizations of three separate political jurisdictions. Another consortium consists of several city agencies that are focusing their efforts on public housing developments. Several consortia which are headed by, and consist of only, community-based organizations have also been funded.

In order to help communities with emerging gang problems and to help communities with established gangs but with no cohesive prevention strategy, 12 community planning grants were awarded in FY 1990. It is hoped that by the end of the two-year funding period, these grantees will be able to build the framework for successful consortia and/or other intervention strategies.

Most grantees point to a dramatic increase in the number of youth who "wanna-be" members of gangs. Although these youth operate at the fringe of gangs, they are susceptible to being lured deeper into the gang and its illegal activities, at-risk of the violence surrounding the gang and apt to dabble in drug use and/or trafficking. These "wanna-be's" are young, starting their involvement at 8–9 years of age. For this reason, one grantee has developed a curriculum which uses puppetry and self-esteem building exercises to teach kindergartners through third graders gang awareness and drug prevention.

Evidence also indicates that there are more adolescent females actively participating in gangs and illegal drug activities than previously estimated (Campbell 1984 and Moore 1991). The problem of females involved in gang activities is national in scope and crosses racial and ethnic lines. Seven projects that were funded in 1990 to work specifically with adolescent females are all urban-based and tend to focus on a particular racial or ethnic group or sub-group (i.e., Native American, Puerto Rican, Chicano, African-American). One strategy that is being used successfully by these grantees is to build on the young girls' cultural heritage. In many instances a young girl's knowledge of what it means to be a woman in her community is based on negative stereotypes rather than on cultural accuracy and positive role models. These programs contain many of the same components as the programs that are traditionally delivered to boys in at-risk situations; however, they are focused on the gender-specific concerns of females such as the linkage between self-esteem and interpersonal relationships between the sexes.

Because of the lack of current data dealing with existing gangs and their involvement with illegal drugs, ACYF funded six field initiated research projects in FY 1990. These grants, which are focused on a specific community or State, will enhance FYSB's knowledge about youth gang dynamics by examining gang demographics, youth gang structures and operations, the extent of youth gang involvement in drug abuse, and the effects of gang membership on youth.

In addition to funding demonstration grants, ACYF has funded a contract to evaluate the Youth Gang Drug Prevention Program. The study has four objectives:

- To describe the implementation of prevention projects;
- To assess the influence of the policy environment on the prevention projects;
- To describe the activities of prevention projects and the youth who participated in them; and
- To assess the effectiveness of the prevention projects.

ACYF expects to receive preliminary findings by the end of FY 1992.

ACYF also funded a contract to provide training and technical assistance to grantees under the Youth Gang Drug Prevention Program. Technical assistance has included:

- Organizing a three day national conference for all grantees to improve their grant administration procedures and to share different approaches to youth gang prevention;
- Delivering on-site management and programmatic assistance;
- Helping a community organize and conduct a gang-awareness forum; and,
- Conducting a forum to deliberate on youth gang research findings from grantees and non-grantees.

Other agencies of the Federal government are also supporting numerous activities to prevent substance abuse and delinquency among at-risk youth. The Office of Substance Abuse Prevention (OSAP), Department of Health and Human Services; the Office of Juvenile Justice and Delinquency Control and the Bureau on Justice Assistance, Department of Justice; and the Office for Drug-Free Neighborhoods, Department of Housing and Urban Development are sources of information for such activities at the community level. For information on their programs, applicants may contact:

National Clearinghouse for Alcohol and Drug Information, 6000 Executive Boulevard, suite 402, Rockville, Maryland 20852, (301) 468–2600.

National Criminal Justice Reference Service, Box 6000, Department F, Rockville, Maryland 20850, (301) 251–5194.

HUD Drug Information and Strategy Clearinghouse, P.O. Box 6242, Rockville, Maryland 20850, (800) 245–2691—in Maryland (301) 251–6154.

Part II—The Review Process

A. Eligible Applicants

Before applications are reviewed, each application will be screened to determine that the applicant organization is an eligible applicant as specified under the selected priority area. Applications from organizations which do not meet the eligibility requirements for the priority area will not be considered or reviewed in the competition and the applicant will be so informed.

Any public (State, county, city, and housing authority) or non-profit private agency or organization (including community-based organizations and tenant organizations with demonstrated experience in this field), institution or other non-profit entity (including individuals) is eligible to apply under any of the priority areas. In support of the Department of Health and Human Services' (HHS) priority objective to target services to minority males, ACYF encourages applications under this announcement from agencies and organizations that have received coalition grants from the Office of Minority Health in HHS to continue their activities and implement new or expanded services to minority males. In the case of applications developed jointly by more than one organization, the applicant must identify only one organization as the lead organization and official applicant. The other participating organizations can be included as co-participants, subgrantees, or subcontractors.

Any non-profit agency which has not previously received HHS support must submit proof of non-profit status with its grant application. The non-profit agency can accomplish this by either making reference to its listing in the Internal Revenue Service's (IRS) most recent list of tax-exempt organizations or by submitting a copy of its letter from the IRS under IRS Code section 501(c)(3). ACF cannot fund a non-profit applicant without acceptable proof of its status.

B. Review Process and Funding Decisions

Applications that are submitted by the deadline date and are from eligible applicants will be reviewed and scored competitively. Experts in the field, generally persons from outside of the Federal government, will use the evaluation criteria listed later in this part to review and score the applications. The results of this review are a primary factor in making funding decisions.

ACYF reserves the option of discussing applications with, or referring them to, other Federal or non-Federal funding sources when this is determined to be in the best interest of the Federal government or the applicant. ACYF may also solicit comments from other Federal agencies, Central and Regional Office staff, interested foundations, national organizations, specialists, experts, States and the general public. The results of the competitive review will be analyzed by Federal staff and will be the primary factor taken into consideration by the Associate Commissioner, Family and Youth Services Bureau, who will recommend to the Commissioner of ACYF the programs to be funded.

To the extent possible, efforts will be made to ensure that funding decisions reflect an equitable distribution of assistance among the States and geographical regions of the country, rural and urban areas, and ethnic populations. Equitable distribution, however, recognizes that some parts of the country have a greater need for youth gang drug prevention services due

to higher numbers of youth actively involved in youth gangs and illegal drug activity. Section 3503 of the authorizing legislation requires ACYF to give priority to applicants in geographical areas in which frequent and severe drug-related crimes are committed by gangs whose membership is composed primarily of youth and whose applications demonstrate broad support of community-based organizations. In making funding decisions, the Commissioner may also take into account the need to avoid unnecessary duplication of effort.

C. Evaluation Criteria

The evaluation criteria correspond to the outline for the development of the Program Narrative Statement of the application. Applications will be reviewed by a panel of at least three reviewers, primarily experts from outside the Federal government, using the criteria described below. It is crucial that the Program Narrative Statement address each of the criteria in terms of the minimum requirements in the priority area description.

Reviewers will determine the strengths and weaknesses of each proposal in terms of the four evaluation criteria listed below, provide comments and assign numerical scores accordingly. The point value following each criterion heading indicates the maximum numerical weight that each section will be given in the review process.

1. Objectives and Need for Assistance (20 Points)

The application pinpoints any relevant physical, economic, social, financial, institutional, or other problems requiring a solution; demonstrates the need for the assistance; states the principal and subordinate objectives of the project; provides supporting documentation or other testimonies from concerned interests other than the applicant; and includes and/or footnotes relevant data based on the results of planning studies. It identifies the precise location of the project and area to be served by the proposed project. Maps and other graphic aids may be attached.

2. Results or Benefits Expected (20 Points)

The application identifies the results and benefits to be derived, the extent to which they are consistent with the objectives of the proposal and indicates the anticipated contributions to policy, practice, theory and/or research. The proposed project costs are reasonable in view of the expected results.

3. Approach (35 Points)

The application outlines a sound and workable plan of action pertaining to the scope of the project and details how the proposed work will be accomplished; cites factors which might accelerate or decelerate the work, giving acceptable reasons for taking this approach as opposed to others; describes and supports any unusual features of the project, such as design or technological innovations, reductions in cost or time, or extraordinary social and community involvements; and provides for projections of the accomplishments to be achieved. It lists the activities to be carried out in chronological order, showing a reasonable schedule of accomplishments and target dates.

To the extent applicable, the application identifies the kinds of data to be collected and maintained, and discusses the criteria to be used to evaluate the results and successes of the project. It describes the evaluation methodology that will be used to determine if the needs identified and discussed are being met and if the results and benefits identified are being achieved. The application also lists each organization, agency, consultant, or other key individuals or groups who will work on the project, along with a description of the activities and nature of their effort or contribution.

4. Staff Background and Organization's Experience (25 Points)

The application identifies the background of the project director/principal investigator and key project staff (including name, address, training, educational background, and other qualifying experience) and the experience of the organization to demonstrate the applicant's ability to effectively and efficiently administer this project. The application describes the relationship between this project and other work planned, anticipated or underway by the applicant with Federal assistance.

D. Explanation of Priority Area Descriptions

Each priority area description is composed of the following sections:

- *Purpose:* This section presents the basic focus and/or broad goal(s) of the priority area.
- *Background Information:* This section briefly discusses the legislative background, as well as the current state-of-the-art and/or current state-of-the-practice that supports the need for the particular priority area activity.
- *Minimum Requirements for Project Design:* This section presents the basic set of issues that must be addressed in the application. Typically, they relate to project design, evaluation, and community involvement. This section also asks for specific information on the proposed project. The inclusion and discussion of these items is important since this information will be used by the reviewers in evaluating the applications. Project products, continuation of the project effort after the Federal support ceases, and dissemination/utilization activities, if appropriate, are also addressed. All applications must include in their budgets a two-day trip to Washington, DC for the project director to attend a Grant Implementation Training Session. For planning purposes the training session will be held during the first quarter of the grant project period. Applicants should also be aware that the Family and Youth Services Bureau plans to conduct a national conference in the Washington DC area during October 1992. It is mandatory that at least the project director attend this three-day conference. All applications must include in their budgets funds for this conference.
- *Project Duration:* This section specifies the maximum allowable length of time for the project period; it refers to the maximum amount of time for which Federal funding is available.
- *Federal Share of Project Costs:* This section specifies the maximum amount of Federal support for the project.
- *Matching Requirement:* This section specifies the minimum non-Federal contribution, either through cash or in-kind match, that is required in proportion to the maximum Federal funds which can be requested for the project.

Please note that applicants that do not comply with the specific priority area requirements in the section on "Eligible Applicants" will not be included in the review process. Applicants should also note that non-responsiveness to the section "Minimum Requirements for Project Design" will result in a lower evaluation score by the panel of expert reviewers.

Applicants must clearly identify the specific priority area under which they wish to have their application considered and tailor their application accordingly. Previous experience has shown that an application which is broader and more general in concept than outlined in the priority area description is less likely to score as well as one which is more clearly focused on and directly responsive to the concerns of that specific priority area.

E. Available Funds

ACYF intends to award new grants for approximately $8.5 million under this announcement during fiscal year 1992, subject to the availability of funds. The size of the actual awards will vary. Each priority area description includes information on the maximum Federal share of the project costs and the anticipated number of projects to be funded.

The term "budget period" refers to the interval of time (usually 12 months) into which a multi-year period of assistance (project period) is divided for budgetary and funding purposes. The term "project period" refers to the total time a project is approved for support, including any extensions.

For multi-year projects, continued Federal funding beyond the first budget period is dependent upon proof of satisfactory performance and the availability of funds from future appropriations.

F. Grantee Share of Project Costs

Other than the exceptions described below, Federal funds will be provided to cover up to 75% of the total allowable project costs. Therefore, the non-Federal share must amount to at least 25% of the total (Federal plus non-Federal) project cost. This means that for every $3 in Federal funds received, up to the maximum amount allowable under each priority area, applicants must contribute at least $1. For example, the cost breakout for a project costing $100,000 to implement would be:

Federal request	Non-federal share	Total cost
$75,000 75%	$25,000 25%	$100,000 100%

Exception: Projects funded under Research Priority Areas B1–B3 do not require a non-Federal match.

G. Cooperation in Evaluation Efforts

Grantees funded under particular priority areas may be requested to cooperate in evaluation efforts funded by ACYF. A statement is included in the priority area description of those priority areas involving common ACYF-funded evaluators. The purpose of these evaluation activities is to learn from the combined experience of multiple projects funded under a particular priority area. To the degree possible, grantees under these priority areas will be expected to coordinate their data gathering efforts with one another, as appropriate, under the direction of the ACYF-supported evaluator.

H. Closed Captioning for Audiovisual Efforts

Applicants are encouraged to include "closed captioning" in the development of any audiovisual products.

Part III—Priority Areas

A. Demonstration Projects

A1. Community-Based Consortia

Purpose: ACYF intends to fund approximately 5–12 projects under this priority area to support the establishment of community-based consortia. The consortia will develop innovative, comprehensive approaches to youth gang and drug abuse prevention through the implementation of projects and activities in support of the purposes identified in section 3501 of the Anti-Drug Abuse Act of 1988. For this priority area, a community-based consortium is defined as a formal partnership among at least three city, county, town, neighborhood, or other local level organizations that have the capacity to generate sustained, collaborative, community-wide commitment and support for strategies which address the issues of youth gangs. Membership in these consortia should represent community-based organizations and local social service, employment, juvenile justice agencies and schools. Depending upon the type of activities to be carried out, the organizations represented by a consortium may include, but are not limited to, the following types of public and private sector organizations: Voluntary agencies, law enforcement agencies, local government agencies, recreation agencies, businesses, churches, foundations, medical facilities, resident/tenant councils (when serving public housing residents), institutions of higher education and established youth serving agencies such as Boys and Girls Clubs, YMCAs, and YWCAs.

Background: Preliminary results from the 16 Community-Based Consortia which were funded for 3 years beginning in FY 1989 have shown that broadbased partnerships which draw upon the resources, expertise, energies, commitment and ideas of many different groups and individuals are needed to undertake concerted efforts at the community level to prevent and divert children and youth from becoming members of gangs and to intervene in the lives of youth who are already involved in gangs.

ACYF is especially interested in funding applications that build on the knowledge gained from these initial grants. Consortia that are successful in terms of impacting community policy appear to be those which share decision-making among the consortium members. For example, some consortia have developed strong committee structures using a modified consensus decision-making process. The committees are responsible for ensuring that the project's objectives are met, resolving service and administrative issues, and designing long-term strategies.

ACYF has also found that successful consortia are those which provide a wide range of services for youth and their families and which involve the youth and their families in identifying and designing the types of services to be provided. For example, one consortium has sought continuous program input from the Resident Councils at each of the public housing sites in which it operates. By focusing multiple Federal, State and city funding sources on the needs of these residents, it has designed a comprehensive continuum of services for all members of the communities. While the ACYF grant provides funding for gang prevention activities for youth ages 8–16 such as after school tutoring, recreation and cultural activities, U.S. Department of Labor funds under the Job Training and Partnership Act program are used for GED classes and job preparation skills development for older youth and adults. The physical sites are funded through the U.S. Department of Housing and Urban Development.

The types of initiatives to be funded under this priority area will vary, depending on the size, demographic make-up, and need of each community. Since current grantees have demonstrated that public housing sites are often centers for gangs and their illegal activities, we strongly encourage applications by consortia that will be based in, and provide services to the residents of, public housing units.

All applicants must demonstrate a willingness to cooperate with a third party evaluation contractor to be funded by the ACYF, which will conduct assessments of their program and service delivery models. Such cooperation will involve periodically furnishing needed financial, service provision, and process-oriented data as required by the evaluation contractor and allowing the contractor reasonable access to obtain youth and family impact information. All data collected by participating programs and by the contractor will be kept confidential and restricted to the stated purposes of the program.

Minimum Requirements for Project Design: In addition to addressing the

criteria outlined in part II above, each applicant must address the following items in the program narrative section of their application.

—Identify the specific purpose(s) of the Anti-Drug Abuse Act that will be addressed by the consortium (see part I). (Objectives/Need)
—Provide a detailed discussion of emerging or current youth gang problems and issues in the target community, including data on the number, age, gender, ethnic background, and drug-related gang activity (if available) of the youth and families to be served. (Objectives/Need)
—Describe what makes the proposal innovative, including information on how it builds upon existing service delivery systems; expands service delivery capabilities; and/or differs from current services available within the community. If you are currently receiving an OSAP Community Partnership grant or an anti-crime community grant, describe how this project will differ from or collaborate with those services. (Objectives/Need)
—Provide an estimate of the number and characteristics of the youth and families to be served and the results expected from the services to be provided. (Results/Benefits)
—Describe any products that will be developed by the project to facilitate replication and utilization of the model(s) in other communities. (Results/Benefits)
—Describe how program planning and implementation will be documented so that information on successes and lessons learned can be disseminated and used in other communities. (Results/Benefits)
—Describe how the approach to be used in dealing with youth at-risk of gang involvement and their illegal drug activities is innovative; and how the applicant proposes to promote and support community ownership of and involvement in reducing the presence of gangs in the community. (Approach)
—Demonstrate how the applicant can assume leadership responsibility for coordinating the activities and disbursing funds to other members of the consortium within 60 days of the receipt of the award. Identify the organizational structure of the consortium including the overall leadership, guidance, decision-making procedures for consortium membership, and describe the methodology for ensuring coordination of consortium activities. (Approach)
—Provide a written agreement signed by each consortium member outlining each member's responsibilities and including a description of the services to be provided; the method of delivery; organizational capability for providing these services; the total amount of funds to be disbursed to each member; and the period of time covered by the agreement. (Approach)
—Provide a detailed description of the proposed prevention, intervention, diversion, education, youth involvement, treatment referral, outreach strategies and community-based collaboration and coordination efforts that will be carried out by consortium members. (Approach)
—Provide evidence that the proposed activities are appropriate and culturally relevant for the targeted population. (Approach)
—Provide a detailed plan showing how the consortium will generate the financial, programmatic, political and other types of support and commitment that will be required for its continued operation beyond the period of Federal support. (Approach)
—Provide an outline of the evaluation strategy that will be used to determine the effectiveness and impact of the consortium's activities. Components of the evaluation strategy should include: Data collection procedures, pre- and post-demographics for the target population, documentation of the implementation process and program impact measures. Approximately 5 percent of the grantee's proposed budget should be set aside for the evaluation effort. Preference will be given to applicants who propose a outside evaluator and a plan that identifies a similar community, neighborhood or housing project to serve as a comparison site. (Approach)
—Provide a detailed outline of the budget requirements for the project activities to be undertaken by each consortium member. (Approach)

Project Duration: The length of the project must not exceed five years. Support for years two through five will be contingent upon availability of Federal funds and satisfactory performance by the grantee.

Federal Share of Project Costs: Up to $750,000 a year, which equal a maximum of $3,750,000 for a 5-year period. Up to 10 percent of the Federal funds per year ($75,000) may be designated by the applicant for administrative costs related to coordination of consortium activities.

Matching Requirement: The minimum non-Federal matching requirement in proportion to the maximum Federal share of $750,000 per year is $250,000. Over the span of a 5-year project, the non-Federal matching requirement for a project whose maximum Federal share is $3,750,000 is $1,250,000. This constitutes 25 percent of the total project budget.

A2. Adolescent Females At Risk of Gang Participation

Purpose: Four to ten grants will be awarded to projects that develop models focusing exclusively on the delivery of prevention and intervention services to adolescent females who are at risk of, or are participating in, youth gangs and their illegal activities.

Background: In FY 1990, seven three-year demonstration grants were awarded under this priority area. These grantees, along with grantees funded under other priority areas, have corroborated our initial assertions regarding the increasing participation of adolescent females in youth gangs. Unfortunately, compared to the data on male gang members, there remains a paucity of information on female gang members. In addition there is a disparity in the services and the attention that is focused on young girls and their unique problems as they go through adolescence. This may be as a result of society's different expectations of young people based on gender.

ACYF emphasizes the importance of developing projects for girls during the critical stages of puberty that address their psychological and emotion needs. A report issued in 1991 by the American Association of University Women regarding the sense of self of girls and boys in elementary, middle and high schools found that approximately 60 percent of the girls enter adolescence with high self-esteem. However, only 29 percent of the girls at the middle and high school levels say that they were happy about themselves. The report also points out that society's gender stereotyping may also lead to lower levels of self-esteem by girls as they become more aware of how their families and communities view them.

Family dysfunction and community alienation may also be causal factors which contribute to a young girl joining a gang. Compounding the problem is the increase in autonomous female gangs and greater participation by females in violent activities. Support will be given to projects which identify and work with these female youth and their families to prevent and divert these females from gang involvement and the accompanying violence.

All applicants must demonstrate a willingness to cooperate with a third party evaluation contractor to be funded by the ACYF, which will conduct assessments of their program and service delivery models. Such cooperation will involve periodically furnishing needed financial, service provision, and process-oriented data as required by the evaluation contractor and allowing the contractor reasonable access to obtain youth and family impact information. All data collected by participating programs and by the contractor will be kept confidential and restricted to the stated purposes of the program.

Minimum Requirements for Project Design: In addition to addressing the criteria outlined in part II above, each applicant must address the following items in the program narrative section of the application.

—Identify the specific purpose(s) of the Anti-Drug Abuse Act that will be addressed by the grantee (see part I). (Objectives/Need)
—Provide a detailed discussion of the emerging or current youth gang problems and issues in the target community as they relate to adolescent females, including data on the number, age, ethnic background, and drug-related gang activity (if available) of the female youth and their families to be served (Objectives/Need)
—Identify and document the relevant issues to be addressed by the project such as: Lack of positive role models within the community; barriers to the fulfillment of parental roles; families in crisis; abuse and violence within the family; family substance abuse; different types of family structures; traditional family gang involvement and ethnic/cultural differences. (Objectives & Need)
—Describe the specific reasons why young girls join gangs in the target community and their social and economic interactions with male gang members. (Objectives/Need)
—Estimate the number and characteristics of the female youth population to be served and the results expected from the services to be provided. (Results/Benefits)
—Describe how the project will impact on the long-term future of the female participants' health, children (if any), welfare and how it will impact on their growing propensity to participate in violent criminal activities. (Results/Benefits)
—Describe any products that will be developed by the project to facilitate replication and utilization of the model(s) in other communities. (Results/Benefits)
—Describe how program planning and implementation will be documented so that information on successes and lessons learned can be disseminated and used in other communities. (Results/Benefits)
—Describe how the proposed model will lead to the prevention of female involvement in gangs; and how it will attempt to break the chain of female gang participation by developing activities that involve the adolescent female gang member and her family. The model should include a self-esteem component that will help to develop positive feelings among the participants about their own abilities and self-worth. (Approach)
—Provide a detailed description of the proposed prevention, intervention, diversion, education, youth involvement, treatment referral, outreach strategies and collaboration/coordination efforts that will be carried out by the grantee directly and those efforts to be carried out in conjunction with other agencies. (Approach)
—Provide a detailed outline of budget requirements for the project activities. (Approach)
—Provide evidence that the proposed activities are appropriate and culturally relevant for the targeted population. (Results/Benefits)
—Provide an outline of the evaluation strategy that will be used to determine the effectiveness and impact of the project's activities. Components of the evaluation strategy should include: Data collection procedures, pre- and post-demographics for the target population, documentation of the implementation process and program impact measures. Preference will be given to applicants who propose an evaluation plan that identifies a similar community, neighborhood or housing project to serve as a comparison site. Preference will be given to applicants who propose a outside evaluator. It is suggested that five percent of the Federal funds be set aside for the evaluation effort. (Approach)
—Provide a detailed plan regarding how the financial, programmatic, political and other types of support and commitments that will be required for the continued operation of the project beyond the period of Federal support will be generated. (Approach)

Duration of Project: The length of the project may not exceed three years. Support for years two and three will be based on the availability of Federal funds and the satisfactory performance of the grantee.

Federal Share of Project Costs: Up to $150,000 per year, which equals a maximum of $450,000 for a 3-year period.

Matching Requirement: The minimum non-Federal matching requirement in proportion to the maximum Federal share of $150,000 a year is $50,000. Over the span of a 3-year project, the non-Federal matching requirement for a project whose maximum Federal share is $450,000 is $150,000. This constitutes 25 percent of the total project budget.

A3. Employment Programs for Youth At Risk of Gang Participation

Purpose: ACYF intends to fund four to ten grants to plan and implement innovative models that provide older youth at risk of, or involved with, gangs an opportunity for job training and placement. ACYF encourages coordination with, and the participation of, local Private Industary Councils or other job training or job placement programs in the development of applications under this priority area.

Background: Most of the previously funded Youth Gang Drug Prevention projects have been targeted at younger children and adolescents. ACYF grantees have pointed out that older youth, ages 15–18, are frequently faced with barriers, such as a lack of employment skills, that contribute to their participating in the illegal money-making activities of gangs. Several grantees have shown that entrepreneurial and employment programs are not only effective motivators for older youth to avoid gang activities, but they are also effective in involving local business leaders in helping youth in at-risk situations. For example, one grantee developed a recycling program that provides work for the youth and financial benefits to local businesses. Another grantee has a two-year apprenticeship program under which students graduate as members of the local painter's union.

Since there are limited employment opportunities in neighborhoods with high gang activity, ACYF particularly encourages the development of projects that develop and establish small entrepreneurial projects or that establish apprenticeship programs that are linked to local trade associations.

All applicants must demonstrate a willingness to cooperate with a third party evaluation contractor to be funded by the ACYF, which will conduct assessments of their program and service delivery models. Such cooperation will involve periodically

furnishing needed financial, service provision, and process-oriented data as required by the evaluation contractor and allowing the contractor reasonable access to obtain youth and family impact information. All data collected by participating programs and by the contractor will be kept confidential and restricted to the stated purposes of the program

Minimum Requirements for Project Design: In addition to addressing the criteria outlined in part II above, each applicant must address the following items in the program narrative section of their application.

—Identify the specific purposes of the Anti-Drug Abuse Act that will be addressed by the project (see Part I). (Objectives/Need)
—Provide a detailed discussion of emerging or current youth gang problems and issues in the target community, including data on the number, age, gender, ethnic background, and drug-related gang activities (if available) of the youth and families to be served. (Objectives/Need)
—Describe what makes the proposal innovative, including information on how it builds upon the existing service delivery systems; creates new partnerships between youth serving agency(ies) and the business community; expands service delivery capabilities; and/or differs from current services available within the community. (Objectives/Need)
—Provide an estimate of the number and characteristics of the youth and families to be served and the results expected from the services provided. (Results/Benefits)
—Provide evidence that the project will result in increasing the employability of the youth in the labor market within the target area. (Results/Benefits)
—Describe any products that will be developed by the project to facilitate replication and utilization of the model(s) in other communities. (Results/Benefits)
—Provide evidence that the proposed entrepreneurial activity, if applicable, has market value in the community and that it will be financially independent at the end of the grant. (Results/Benefits)
—Provide a detailed description of the model to be implemented, including information on the activities to be undertaken which are designed to increase the employability of youth at risk of, or involved with, gangs. These descriptions should include information on prevention, intervention, diversion and education activities; youth involvement; referral to treatment; outreach strategies; and collaboration/coordination efforts with other agencies that will be carried out under the project. (Approach)
—Provide evidence that the proposed activities are appropriate and culturally relevant for the targeted population. (Approach)
—Provide written documentation of commitments from businesses and/or unions indicating the level of effort and participation they would allocate to the project. (Approach)
—Provide a detailed plan regarding how the applicant will generate the financial, programmatic, political and other types of support and commitments that will be required for the continued operation of the project beyond the period of Federal support. (Approach)
—Provide an outline of the evaluation strategy that will be used to determine the effectiveness and impact of the project's activities. Components of the evaluation strategy should include: Data collection procedures, pre- and post-demographics for the target population, documentation of the implementation process and program impact measures. Preference will be given to applicants who propose an evaluation plan that identifies a similar community, neighborhood or housing project to serve as a comparison site. Preference will be given to applicants who propose a outside evaluator. It is suggested that five percent of the Federal funds be set aside for the evaluation effort. (Approach)
—Provide a detailed outline of budget requirements for the project activities. (Approach)

Duration of Project: The length of the project may not exceed three years. Support for years two and three will be based on the availability of Federal funds and satisfactory performance of the grantee.

Federal Share of Project Costs: Up to $150,000 a year, which equals a maximum of $450,000 for a 3-year period.

Matching Requirement: The minimum non-Federal matching requirement in proportion to the maximum Federal share of $150,000 a year is $50,000. Over the span of a 3-year project, the non-Federal matching requirement for a project whose maximum Federal share is $450,000 is $150,000. This constitutes 25 percent of the total project budget.

A4. New Immigrant and Refugee Youth Gangs

Purpose: ACYF proposes to fund four to ten projects that focus on developing, implementing and testing culturally relevant prevention and early intervention approaches and products for working with new immigrant youth who are at-risk of, or participating in, youth gangs.

Background: Providing services to new immigrant and refugee youth, especially Southeast Asian, Central American and Caribbean youth, is particularly difficult. Part of the difficulty stems from the fact that many human service providers do not have staff who share the youths' culture and/or language. Even more problematic may be that these new immigrant and refugee youth have survived such traumatic experiences that their survival mechanism hinders their acculturation to this country. For example, based on their experiences in their own homeland most refugees mistrust law enforcement officials. This makes understanding and trusting our criminal justice system difficult for them.

While family relations are often difficult for all groups, refugees and immigrants face unique problems. For example, conflicts between parents who wish to maintain traditional norms/values and youth who want to adopt American norms/values diminish the ability of the family to provide a supportive environment for its members. In other instances youth are not accompanied by immediate family members and are unable to live with extended family members who would provide support, bonding and a culturally appropriate value system.

There also appears to be a dichotomy in the evolution of new immigrant gangs. Some grantees report that new immigrant gangs tend to fight each other (Vietnamese against Filipino) rather than against other traditional gangs (African-American, Hispanic), bringing rivalries and biases from their homelands to this country. Conversely, in some parts of the country new immigrant youth are starting to form pan-Asian gangs or to join African-American and Hispanic gangs.

ACYF intends to conduct a National Forum on New Immigrant and Refugee Youth Gangs during 1992. The forum will bring together human service and law enforcement experts who work with new immigrant and refugee youth involved with gangs in an attempt to identify specific problems facing these youth and strategies for addressing these problems. Grantees under this priority area will be required to attend and participate in this forum to be held in Washington, DC.

All applicants must demonstrate a willingness to cooperate with a third party evaluation contractor to be funded by the ACYF, which will conduct assessments of their program and service delivery models. Such cooperation will involve periodically furnishing needed financial, service provision, and process-oriented data as required by the evaluation contractor and allowing the contractor reasonable access to obtain youth and family impact information. All data collected by participating programs and by the contractor will be kept confidential and restricted to the stated purposes of the program.

Minimum Requirements for Project Design: In addition to addressing the criteria outlined in part II above, each applicant must address the following items in the program narrative section of their application.

—Identify the specific purpose(s) of the Anti-Drug Abuse Act that will be addressed by the project (see part I). (Objectives/Need)
—Provide a detailed discussion of the emerging or current new immigrant and refugee youth gang problems and issues in the target community, including data on the number, age, gender, ethnic background, and drug-related gang activities (if available) of the new immigrant youth and families to be served. (Objectives/Need)
—Provide an estimate of the number and characteristics of youth and families to be served and the results expected from the services to be provided. (Results/Benefits)
—Describe the materials and/or products that will be developed and tested for working with the youth's families and community. Merely translating current products into the youth's languages will not be considered sufficient. (Results/Benefits)
—Describe the methodology for developing a community support system that can meet the cultural, social, psychological and educational needs of the new immigrant youth; written commitments from participating agencies should be provided. Merely hiring bi-lingual staff to work with the youth is not considered fulfilling the requirements for developing a culturally relevant program. (Approach)
—Provide a detailed description of the model to be implemented that includes information on activities designed to increase services to new immigrant and refugee youth at risk of, or involved with, gangs. These include prevention, intervention, diversion and education activities; youth involvement; family involvement and empowerment; referral to treatment; outreach strategies; and collaboration/coordination efforts with other agencies that will be carried out. (Approach)
—Provide an outline of the evaluation strategy that will be used to determine the effectiveness and impact of the project's activities. Components of the evaluation strategy should include: Data collection procedures, pre- and post-demographics for the target population, documentation of the implementation process and program impact measures. Preference will be given to applicants who propose an evaluation plan that identifies a similar community, neighborhood or housing project to serve as a comparison site. Preference will be given to applicants who propose a outside evaluator. It is suggested that five percent of the Federal funds be set aside for the evaluation effort. (Approach)
—Provide a detailed outline of budget requirements for the project activities. (Approach)

Duration of Project: The length of the project must not exceed three years. Federal support for years two and three will be based on availability of Federal funds and satisfactory performance of the grantee.

Federal Share of Project Costs: Up to $150,000 a year, which equals a maximum of $450,000 for a 3-year period.

Matching Requirement: The minimum non-Federal matching requirement in proportion to the maximum Federal share of $150,000 a year is $50,000. Over the span of a 3-year project the non-Federal matching requirement for a project whose maximum Federal share is $450,000 is $150,000. This constitutes 25 percent of the total project budget.

A5. Gangproofing Young Children

Purpose: ACYF intends to fund four to ten projects to develop gang prevention programs for children, four to eight years old. The intent of these projects is to continue the positive emphasis begun in developmental preschool programs such as Head Start (which include program components such as parental involvement, education and health), through the first three years of elementary school in an effort to "gangproof" the children. We intend to fund applications that demonstrate how current curricula on safety, refusal skills and development of self-esteem will be adapted for gangproofing and expanded to a wider age range of children. Head Start grantees are encouraged to develop collaborative relationships with elementary schools and/or community-based organizations and submit applications under this priority area.

Background: This priority area focuses on preparing young children to aviod succumbing to the lure of gangs. Many children are exposed to or grow up in the midst of gangs and gang-related violence in their communities beginning at a very young age. Police and youth-serving agencies report that children, as young as 8 years old, are being recruited into gangs. A major reason for recruiting and involving them in the gang's illegal activities is that law enforcement agencies are less apt to suspect, detain and arrest young children than teenagers. Even if a young child is arrested and prosecuted for a crime, the courts and laws covering young children tend to be more lenient.

One method of preparing young children to face the temptation of gang involvement is to ensure that they grow up in a supportive environment. Increasing numbers of young children today are participating in early childhood programs prior to enrollment in elementary school. Key elements of these programs include helping the young child develop a strong sense of self-esteem, learning to interact positively with peers and authority figures, and increasing his/her desire to learn. In addition, many Head Start grantees have developed or are using curricula which focus on safety issues and refusal skills as a response to child abuse. Many early education programs also require a high level of parental involvement in the young child's development. This also increases the child's feelings of self-esteem and safety.

Unfortunately, the gains made by children in early childhood programs are frequently diminished as they progress through elementary school. One reason may be that most elementary schools do not require strong parental involvement in the child's school experience. Another reason may be that resource limitations at the elementary level may result in higher pupil-teacher ratios. Or, school policies may exist which discourage the inclusion of community-based resources within the elementary curriculum.

All applicants must demonstrate a willingness to cooperate with a third party evaluation contractor to be funded by the ACYF, which will conduct assessments of their program and service delivery models. Such

cooperation will involve periodically furnishing needed financial, service provision, and process-oriented data as required by the evaluation contractor and allowing the contractor reasonable access to obtain youth and family impact information. All data collected by participating programs and by the contractor will be kept confidential and restricted to the stated purposes of the program.

Minimum Requirements for Project Design: In addition to addressing the criteria outlined in part II above, each applicant must address the following items in the program narrative section of their application.

—Identify the specific purpose(s) of the Anti-Drug Abuse Act that will be addressed by the project (see part I). (Objectives/Need)
—Provide a detailed discussion of emerging or current youth gang problems and issues in the target community, including data on the number, age, gender, ethnic background, and drug-related gang activities (if available) of the youth and families to be served. (Objectives/Need)
—Identify and discuss the effect of youth gang problems on younger children in the community. (Objectives/Need)
—Identify local child development programs and elementary schools located in the areas to be served with high gang activity with which the applicant will work and describe the gang-related problems these organizations see young children facing. (Objectives/Need)
—Describe what makes the proposal innovative including information on how it builds upon existing service delivery systems and curricula; creates new partnerships among educators of young children; expands service delivery capabilities; and/or differs from current services available within the community. (Objectives/Need)
—Estimate the number and characteristics of children and families to be served and describe the results expected from the services to be provided. (Results/Benefits)
—Describe any products that will be developed by the project to facilitate replication and utilization of the model(s) in other communities. (Results/Benefits)
—Provide a detailed description of the model to be implemented that includes information on the activities to be undertaken designed to gangproof young children at risk of, or effected by, gangs. These include prevention, intervention, diversion and education activites; family involvement; referral to treatment; outreach strategies; and collaboration/coordination efforts with other agencies that will be carried out. Identify the relevant curriculum to be expanded or adapted in terms of audience and subject matter as part of the overall model. (Approach)
—Describe how the model to be employed will gangproof young children by teaching them to make safe and healthy choices, and how it will include the development of non-violent conflict negotiation skills and goal setting. Also to be included is information regarding how the model will change depending on the age and development level of the children. (Approach)
—Provide evidence that proposed activities are appropriate and culturally relevant for the targeted population. (Approach)
—Provide written agreements from the participating programs/schools, describing each organization's level of commitment. (Approach)
—Provide an outline of the evaluation strategy that will be used to determine the effectiveness and impact of the project's activities. Components of the evaluation strategy should include: Data collection procedures, pre- and post-demographics for the target population, documentation of the implementation process and program impact measures. Preference will be given to applicants who propose an evaluation plan that identifies a similar preschool program or elemenary school to serve as a comparison site. Preference will be given to applicants who propose an outside evaluator. It is suggested that five percent of the Federal funds be set aside for the evaluation effort. (Approach)
—Provide a detailed outline of budget requirements for the project activities. (Approach)

Duration of Project. The length of the project may not exceed three years. Federal support for years two and three will be based on the availability of Federal funds and satisfactory performance by the grantee.

Federal Share of Project Costs: Up to $150,000 a year, which equals a maximum of $450,000 for a 3-year period.

Matching Requirement: The minimum non-Federal matching requirement in proportion to the maximum Federal share of $150,000 a year is $50,000. Over the span of a 3-year project the non-Federal matching requirement for a project whose maximum Federal share is $450,000 is $150,000. This constitutes 25 percent of the total project budget.

B. Research Projects

B1. Gang Families

Purpose: ACYF intends to fund 3–5 grants to study the dynamics of families involved in gang activities, explore the development of paradigms that help us better understand how these families function, and recommend prevention and intervention strategies that should be incorporated into service models aimed at breaking the chain of illegal gang participation in families and communities.

Background: In FY 1990 ACYF solicited applications with the primary purpose of identifying factors which contribute to intergenerational gang participation and developing appropriate intervention models which take those factors into consideration. A secondary aim was to fund prevention projects that focus on family education, empowerment and involvement strategies. The seven grants funded in FY 1990 are primarily emphasizing family support and empowerment services rather than focusing on the particular needs of intergenerational gang families or communities.

In some families, there is a long-standing tradition of gang involvement by parents, uncles, aunts and extended family members who are "veteranos" or are still active in gang activities. These families maintain an environment in which gang affiliation is viewed as a positive component of the family's cultural system. In other families, the gang culture is transmitted from one sibling to another. Since children tend to model the behavior of those around them, there is a greater propensity for gang involvement to be transmitted from one generation to another or from one sibling to another in these families. Family support programs do not normally deal with the issue of how cultural values are transmitted across generations or among family members. It is important to identify ways in which family relationships can be maintained while at the same time attempting to modify those values which increase the risk of gang and drug involvement among family members.

It appears that one of the barriers to developing projects focused on the complexities of the gang family and community may be that very little research has been done in this area. Vigil (1990) looked at the ability of Mexican immigrant families to acculturate to the dominant American society and the impact on subsequent generations. He identified the inability of later generations to overcome barriers, adapt to the dominant society and prosper within it, as significant contributors to the groups' reliance on the gang subculture as a method of surviving and achieving some form of success.

Minimum Requirements for Project Design: In addition to addressing the criteria outlined in part II above, each applicant must address the following items in the program narrative section of their application.

—Identify the specific purpose(s) of the Anti-Drug Abuse Act that will be addressed by the project (see part I). (Objectives/Need)
—Provide a detailed discussion of emerging or current youth gang problems and issues in the target community, including data on the number, age, gender, ethnic background, and drug-related gang activities (if available) of the youth and families. Applicants must provide documented evidence of the presence of established gang activity for several generations within the community. (Objectives/Need)
—Provide evidence that the proposed research methodology will lead to strategies and methodologies for developing intervention models which focus on the gang family as a unit and on its individual members, especially adolescents. (Results/Benefits)
—Describe the products and reports that will be developed regarding/based on the research findings. (Results/Benefits)
—Describe the strategies to be employed for the dissemination of information on the methodology and findings in a manner that will be of use to service providers in the field. (Results/Benefits)
—Provide a detailed description of the research methodology to be used, including the identification of hypotheses; identification of sampling procedures; estimates of sample size; procedures to ensure the validity and reliability of the data collection and analysis; and information on how the findings will reflect the culture and environment in which families live. In developing the description of the families to be studied, attention should be given to the families' substance abuse history, reliance on drug-related income, child care practices, structures, rituals, ethnic/cultural backgrounds, methods of communication both intra-familial and inter-community, barriers to the fulfillment of parental roles, education and skill development, and the impact of sibling or other family member involvement in illegal gang activities. (Approach)
—Describe how the research methodology will capture information on the way culture or values are transmitted from one generation to the next; whether this is a formal or informal process; whether there are differences in transmitting culture or values related to gender; level of gang participation; level of participation in illegal activities; and status within gang hierarchy and/or position within the family unit. (Approach)
—Provide evidence that the proposed research methodology is appropriate and culturally relevant for the targeted population. (Approach)
—Provide a detailed outline of budget requirements for the project activities. (Approach)

Duration of Project: The length of the project is not to exceed three years. Federal support for years two and three will be based on the availability of Federal funds and satisfactory performance of the grantee.

Federal Share of Project Costs: Up to $100,000 a year, which equals a maximum of $300,000 for a 3-year period.

Matching Requirement: There is no matching requirement.

B2. Effects of Violence on Young Children

Purpose: ACYF intends to fund 3 to 5 grants that add to our knowledge about how to develop programs to help children who live in neighborhoods plagued with gang and drug activities to lead mentally and emotionally healthy lives.

Background: Despite the concern by researchers (Klein and Maxson 1991) that definitions of gang-related violence vary from jurisdiction to jurisdiction, it is evident that street violence is increasing and that it is dramatically impacting children and adolescents. Whether children and adolescents are involved in committing the violent acts, are victims of it, or are witness to it, their lives are deeply affected. Recently, the Department of Justice's Bureau of Justice Statistics interviewed 10,000 young people around the nation regarding their experience with violent crime. The study concluded that 2 percent of students aged 12 to 19 were victims of violent crime. The most affected group were 9th graders.

Youth gangs, whether turf-oriented or profit-motivated, are increasingly using violence. For example, the gang initiation process usually includes being "jumped in," i.e., the inductee is physically beaten by members in order to prove his bravery and fighting ability. Gangs that are involved in drug trafficking use violence to protect their marketing territory and to keep drug runners and dealers "honest." Youth gangs that specialize in extortion use violence to coerce their victims into submission.

Gang violence frequently affects innocent bystanders, especially children. Social learning theorists believe that children who see violent or aggressive individuals as being rewarded for their behavior will model themselves after them. This is of particular concern in minority communities where there is high unemployment and low educational levels among adult males. Success as a man is frequently measured in terms of agressive behavior, subverting the legal system, sexual promiscuity, and access to money or other indicators of financial success even though attained through illegal means. Therefore, children who see older adolescents admired by the community for their participation in violent gang activities are apt to use them as role models and to emulate their behavior. In addition, living amid the constant threat of violence affects children's cognitive, social and emotional development.

Minimum Requirements for Project Design: In addition to addressing the criteria outlined in part II above, each applicant must address the following items in the program narrative section of their application.

—Identify the specific purpose(s) of the Anti-Drug Abuse Act that will be addressed by the project (see part I). (Objectives/Need)
—Provide a detailed discussion of emerging or current youth gang problems and issues in the target community, including data on the number, age, gender, ethnic background, and drug-related gang activities (if available) of the youth and families to be served. Applicants should provide data on the numbers of young children living in the areas with documented high gang activity with whom they expect to work. (Objectives/Need)
—Provide evidence that the proposed research methodology will lead to information, strategies, and methodologies for developing prevention models which focus on ameliorating the effects of violence on young children. (Results/Benefits)
—Provide a description of the products and reports that will be developed

regarding/based on the research findings. (Results-Benefits)
—Provide a description of the strategies to be employed for the dissemination of information on the methodology and findings in a manner that will be of use to service providers in the field. For example, what methods can individuals who work with children (teachers, day care providers, therapists) employ to help children deal with their sense of fear, anxiety and rebelliousness in response to their violent environment. (Results/Benefits)
—Describe how the research methodology will capture information on the effect that gang violence has on a child's cognitive, emotional and social development and the effects of community-based trauma or counseling programs on young children who are victims of, or witnesses to, violent gang activity. (Approach)
—Provide a detailed description of the research methodology to be used, including the identification of hypotheses; identification of sampling procedures; estimates of sample size; procedures to ensure the validity and reliability of the data collected; procedures to ensure the integrity of the data analysis; and information on how the findings will reflect the culture and environment in which the children live. (Approach)
—Provide evidence that the proposed research methodology is appropriate and culturally relevant for the targeted population. (Approach)
—Provide a detailed outline of budget requirements for the project activities. (Approach)

Duration of Project: The length of the project is not to exceed three years. Federal support for years two and three will be based on the availability of Federal funds and satisfactory performance of the grantee.

Federal Share of Project Costs: Up to $100,000 a year, which equals a maximum of $300,000 for a 3-year period.

Matching Requirement: There is no matching requirement.

B3. Identification of Factors Which Predispose a Youth to Avoid Gang Involvement

Purpose: ACYF intends to fund 3 to 5 grants that focus on identifying the factors which allow a youth who lives in an area with an established (rather than emerging) high level of youth gang activity to remain independent of that lifestyle.

Background: Gang prevention work has typically dealt with identifying what factors distinguish young people who become involved in gangs from those who do not. Prevention activities are then directed toward helping youth build the skills that will enable them to avoid gang and criminal involvement.

Gang involvement has been linked to numerous factors such as poverty, broken homes, and lack of male role models. For instance, Copeland (1974) describes a typical member of a violent Black gang as an individual who is isolated from the social mainstream, is verbally nonexpressive, comes from a fatherless, devitalized family, and is an academic underachiever. Still, many young people who live under these conditions manage to elude gangs, drugs and criminal activity, thus suggesting that other determinants not only exist, but deserve serious consideration. Educators argue that emphasis needs to be placed on researching the social-psychological variables displayed by children who succeed in an otherwise negative environment (Pollard 1989).

Simon (1980) found demographic evidence to suggest a strong correlation between the victims and offenders of assault crimes. Victims who had been shot or stabbed were more likely to become involved in criminal activity than nonvictims. For juvenile victims, the correlation between victimization and subsequent commission of serious assaults as adults was significantly stronger.

Friedman, Mann, and Friedman in their 1975 study of 499 Black and white disadvantaged 15–18 year-old males attempted to elucidate the factors which differentiated street gang members from youth in comparable neighborhoods who remained independent of gangs. After considering 73 variables, they found that the variable most closely associated with gang affiliation was a high self-reported propensity for violence.

A variable such as the quality of childhood peer relationships has also been identified as a predicator of gang involvement. Hochhaus and Sousa (1988), while studying why youth belong to gangs, found that youth often cited companionship as a motivation for joining a gang. However, many youth who joined gangs found their relationships with most of the gang members to be superficial, cautious, and overall unsatisfying. Another study (Crockett, 1988) suggests that youth who had poor childhood peer relationships would join cliques, teams or gangs, but still had few close personal friends.

If the factors which enable children to avoid gang affiliation can be identified, such as the ability to form close peer relationships, perhaps prevention and intervention efforts can be more precisely targeted. Although some data exist which begin to identify the determinants of gang involvement, studies do not yet address the broad range of activities which are defined as "gang involvement" nor do they address the role of substance abuse in determining whether a youth will participate in a gang.

Traditionally, research into gang participation has looked at those factors which predispose or encourage a youth to join. However, attention needs to be given to identifying those factors which make youth invulnerable to the lure of gangs. What causes a young man or woman who grows up in a neighborhood with high gang and drug activity to eschew those types of affiliation and to seek positive experiences? Werner and Smith (1982; Werner 1989) studied children who overcame the odds despite having grown up in a negative environment. In a birth cohort study of 698 children in Kauai, Hawaii, they found that 10 percent of the children identified as being at-risk for negative outcomes developed into "competent and autonomous young adults." They credited individual characteristics (health, socially-oriented, inquisitive and motivated), family environments (four or fewer children) and broader environmental factors (positive role models and strong supportive peer relationships) as related to the children's resiliency and ability to achieve positive outcomes.

This priority area focuses on identifying the psycho-social factors which influence the young person to avoid gang involvement and to participate instead in positive activities. Lack of male role models, broken homes, crime and poverty are generally accepted as factors which will make a youth more likely to become gang-affiliated. However, no generally accepted reasons have been identified which explain why youth who live in a similarly underprivileged environment avoid gang involvement.

Minimum Requirements for Project Design: In addition to addressing the criteria outlined in part II above, each applicant must address the following items in the program narrative section of their application.

—Identify the specific purpose(s) of the Anti-Drug Abuse Act that will be addressed by the project (see part I). (Objectives/Need)
—Provide a detailed discussion of current youth gang problems and issues in the target community, including data on the number, age, gender, ethnic background, and drug-related gang activities (if available). (Objectives/Need)
—Provide evidence that the proposed research methodology will lead to information, strategies and methodologies for developing intervention models which focus on helping youth develop, or providing youth with, the basis for avoiding involvement in gangs and illegal drug activities. (Results/Benefits)
—Describe the products and reports that will be developed regarding/based on the research findings. (Results/Benefits)
—Describe the strategies to be employed in the dissemination of the information on methodology and findings in a manner that will be of use to service providers in the field. (Results/Benefits)
—Provide a detailed description of the research methodology to be used, including the identification of hypotheses, identification of sampling procedures; estimates of sample size; procedures to ensure the validity and reliability of the data collected; procedures to ensure the integrity of the data analysis; and information on how the findings will reflect the culture and environment in which the youth live. (Approach)
—Describe how the research methodology will capture information on the factors which prevent a youth from participating in the illegal activities of a gang. Factors should include, but not be limited to: family and peer relationships, family's history of criminal activity or gang participation, and the types of community supports available and used by the youth (recreational, cultural, social, educational). (Approach)
—Provide evidence that the proposed research methodology is appropriate and culturally relevant for the targeted population. (Approach)
—Provide a detailed outline of budget requirements for the project activites. (Approach)

Duration of Project: The length of the project is not to exceed three years. Federal support for years two and three will be based on the availability of Federal funds and satisfactory performance of the grantee.

Federal Share of Project Costs: Up to $100,000 a year, which equals a maximum of $300,000 for a 3-year period.

Matching Requirement: There is no matching requirement.

Part IV—Instructions for the Development and Submission of Applications

This part contains information and instructions for submitting applications in response to this announcement. Application forms are provided along with a checklist for assembling an application package. Please copy and use these forms in submitting an application.

Potential applicants should read this section carefully in conjunction with the information contained within the specific priority area under which the application is to be submitted. The priority area descriptions are provided in part III.

A. *Executive Order 12372—Notification Process:* This program is covered under Executive Order (E.O.) 12372, "Intergovernmental Review of Federal Programs," and 45 CFR part 100, "Intergovernmental Review of Department of Health and Human Services Programs and Activities." Under the Order, States may design their own processes for reviewing and commenting on proposed Federal assistance under covered programs. All States and territories except Alaska, Idaho, Kansas, Louisiana, Minnesota, Nebraska, Pennsylvania, Virginia, American Samoa, and Palau have elected to participate in the Executive Order process and have established Single Points of Contact (SPOCs). (See attached list of the Single Points of Contact for each State and Territory included in appendix I of this announcement.) Applicants from these ten areas need take no action regarding E.O. 12372. Applications for projects to be administered by Federally-recognized Indian Tribes are also exempt from the requirements of E.O. 12372.

Other applicants should contact their SPOC as soon as possible to alert them to the perspective application and receive any necessary instructions. Applicants must submit any required material to the SPOC as early as possible so that the program office can obtain and review SPOC comments as part of the award process. It is imperative that the applicant submit all required materials, if any, to the SPOC and indicate the date of this submittal (or date of contact if no submittal is required) on the SF–424, Block 16a. The Administration on Children and Families will notify the State of any applicant who fails to indicate SPOC contact (when required) on the application form.

SPOCs have 60 days from the grant application deadline date to comment on applications for financial assistance under this program. SPOCs are encouraged to eliminate the submission of routine endorsements as official recommendations. Additionally, SPOCs are requested to differentiate clearly between mere advisory comments and those official State process recommendations which they intend to trigger the "accomodate or explain" rule.

When comments are submitted directly to ACF, they should be addressed to: Youth Gang Drug Prevention Program, Department of Health and Human Services, Administration for Children and Families, Grants and Contracts Management, room 345–F.2, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

B. Deadline for Submittal of Applications

The closing date for receipt of applications under this announcement is May 19, 1992.

1. *Deadlines.* Applications shall be considered as meeting the deadline if they are either:

a. Received on or before the deadline date at the address specified in the application submission section of this announcement; or

b. Sent on or before the deadline date and received in time for the independent review under Chapter 1–62 of the HHS Grants Administration Manual. Applicants are cautioned to request a legibly dated U.S. Postal Service postmark or to obtain a legibly dated receipt from a commercial carrier of U.S. Postal Service. Private-metered postmarks shall not be acceptable as proof of timely mailing.

2. *Late Applications.* Applications which do not meet the criteria in the above paragraphs are considered late applications. The granting agency will notify each late applicant that its application will not be considered in the current competition.

3. *Extension of Deadline.* The Administration on Children, Youth and Families may extend the deadline for all applicants because of acts of God such as floods, hurricanes, etc. or when there is widespread disruption of the mail. However, if the granting agency does not extend the deadline for all applicants, it may not waive or extend the deadline for any applicant.

C. Paperwork Reduction Act of 1980

Under the Paperwork Reduction Act of 1980, Public Law 96–511, the Department is required to submit to the Office of Management and Budget (OMB) for review and approval any

reporting and recordkeeping requirements and regulations, including program announcements. This program announcement does not contain information collection requirements beyond those approved by OMB.

D. Instructions for Preparing the Application and Completing Application Forms

The SF 424, SF 424A, SF 424B and certifications have been reprinted for your convenience in preparing the application. You should reproduce single-sided copies of these forms from the reprinted forms in the announcement, typing your information onto the copies. Please do not use forms directly from the **Federal Register** announcement, as they are printed on both sides of the page.

Where specific information is not required under this program, N/A (not applicable) has been preprinted on the form. Prepare your application in accordance with the following instructions:

1. SF 424 Page 1, Application Cover Sheet

Read the following instructions before completing the application cover sheet. An explanation of each item is included. Complete only the items specified.

Top of Page. Enter the single priority area number under which the application is being submitted. An application should be submitted under only one priority area.

Item 1. "Type of Submission"—Preprinted on the form.

Item 2. "Date Submitted" and "Applicant Identifier"—Date application is submitted to ACYF and applicant's own internal control number, if applicable.

Item 3. "Date Received by State"—State use only (if applicable).

Item 4. "Date Received by Federal Agency"—Leave blank.

Item 5. "Applicant Information".

"Legal Name"—Enter the legal name of applicant organization. For applications developed jointly, enter the name of the lead organization only. There must be a single applicant for each application. Use abbreviations to limit the organization name to 50 characters, including spaces and punctuation.

"Organizational Unit"—Enter the name of the primary organizational unit which will actually carry out the project activity. Do not use the name of an individual as the applicant. If this is the same as the applicant organization, leave the organizational unit blank. Use abbreviations to limit this line to 30 characters, including spaces and punctuation.

"Address"—Enter the complete address that the organization actually uses to receive mail, since this is the address to which all correspondence will be sent. Do not include both street address and a P.O. Box number unless both must be used in mailing.

"Name and telephone number of the person to be contacted on matters involving this application (give area code)"—Enter the name and telephone number of a person who can respond to questions about the application. This person should be accessible at the address given here.

Item 6. "Employer Identification Number (EIN)"—Enter the employer identification number of the applicant organization, as assigned by the Internal Revenue Service, including if known the Central Registry System suffix.

Item 7. "Type of Applicant"—Self-explanatory.

Item 8. "Type of Application"—Preprinted on the form.

Item 9. "Name of Federal Agency"—Preprinted on the form.

Item 10. "Catalog of Federal Domestic Assistance Number"—Enter the Catalog of Federal Domestic Assistance (CFDA) number, 93.680, assigned to the program.

Item 11. "Descriptive Title of Applicant's Project"—Enter the project title. The title is generally short. It should be no more than 200 characters long, including spaces and punctuation, and should be typed in not more than four lines of 50 characters each. Use a short title which is descriptive of the project, not the priority area title.

Item 12. "Areas Affected by Project"—Enter the governmental unit where significant and meaningful impact could be observed. List only the largest unit or units affected, such as State, county, or city. If an entire unit is affected, list it rather than subunits.

Item 13. "Proposed Project"—Enter the desirable starting date for the project, beginning during or after June 1992, and the proposed completion date for the project. Applicants are advised to allow an additional 2–3 months start-up time beyond June 1992 in order to avoid the need for requesting an extension at a later date. Most awards made in response to this program announcement will have starting dates between June 1992 and October 1992. Projects may not exceed the maximum duration specified in the priority area description, generally between 36 to 60 months.

Item 14. "Congressional District of Applicant/Project"—Enter the number of the Congressional District where the applicant's principal office is located and the number of the Congressional district(s) where the project will be located. If statewide, a multi-State effort, or nationwide, enter "00."

Items 15a-g. "Estimated Funding"—Enter the amounts requested or to be contributed by Federal and non-Federal sources for the first 12 months only.

Item 15a. "Estimated Funding-Federal"—Enter the amount of Federal funds requested. This amount should be no greater than the maximum amount specified in the priority area description.

Items 15b-e. "Estimated Funding-Applicant, State, Local, Other"—Enter the amount(s) of funds from non-Federal sources that will be contributed to the proposed project. These items (b-e) are considered cost-sharing or "matching funds." The value of third party in-kind contributions should be included on appropriate lines as applicable. For more information regarding funding as well as exceptions to these rules, see part II, sections E and F and the specific priority area description in part III.

Item 15f. "Estimated Funding-Program Income"—Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or substract this amount from the total project amount entered under item 15g. Describe the nature, source and anticipated use of this income in the Project Narrative Statement.

Item 15g. "Estimated Funding-Total"—Enter the sum of items 15a-15e.

Item 16a. "Is Application Subject to Review By State Executive Order 12372 Process? Yes."—Enter the date the applicant contacted the SPOC regarding this application. Select the appropriate SPOC from the listing provided at the end of part IV. Review of the application is at the discretion of the SPOC. The SPOC will verify the date noted on the application. If there is a discrepancy in dates, the SPOC may request that the Federal agency delay any proposed funding until the full review time of 60 days is afforded.

Item 16b. "Is Application Subject to Review By State Executive Order 12372 Process? No."—Check the appropriate box if the application is not covered by E.O. 12372 or if the program has not been selected by the State for review.

Item 17. "Is the Applicant Delinquent on any Federal Debt?—Check the appropriate box. This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include audit disallowances, loans and taxes.

Item 18. "To the best of my knowledge and belief, all data in this application preapplication are true and correct. The document has been duly authorized by the governing body of the applicant and the applicant will comply with the attached assurances if the assistance is awarded."—To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for signature of this application by this individual as the offical representative must be on file in the applicant's office. It may be requested.

Item 18a-c. "Typed Name of Authorized Representative, Title, Telephone Number"—Enter the name, title and telephone number of the authorized representative of the applicant organization.

Item 18d. "Signature of Authorized Representative"—Signature of the authorized representative named in item 18a. At least one copy of the application must have an original signature. Use colored ink (not black) so that the original signature is easily identified.

Item 18e. "Date Signed"—Enter the date the application was signed by the authorized representative.

2. SF 424A—Budget Information—Non-Construction Programs

This is a form used by many Federal agencies. For this application, Sections A, B, C, and E are to be completed. Section D does not need to be completed.

Sections A and B should include the Federal as well as the non-Federal funding for the proposed project covering the first year budget period.

Section A—Budget Summary. This section includes a summary of the budget. On line 5, enter total Federal costs in column (e) and total non-Federal costs, including third party in-kind contributions, but not program income, in column (f). Enter the total of (e) and (f) in column (g).

Section B—Budget Categories. This budget, which includes the Federal as well an non-Federal funding for the proposed project, covers the first-year budget period. It should relate to item 15g, total funding, on the SF 424. Under column (5), enter the total requirements for funds (Federal and non-Federal) by object class category.

A separate budget justification should be included to explain fully and justify major items, as indicated below. The types of information to be included in the justification are indicated under each category. The budget justification should immediately follow the table of contents.

Personnel—Line 6a. Enter the total costs of salaries and wages of applicant/grantee staff. Do not include the costs of consultants, which should be included on line 6h, "Other."

Justification: Identify the principal investigator or project director, if known. Specify by title or name the percentage of time allocated to the project, the individual annual salaries, and the cost to the project (both Federal and non-Federal) of the organization's staff who will be working on the project.

Fringe Benefits—Line 6b. Enter the total costs of fringe benefits, unless treated as part of an approved indirect cost rate.

Justification: Provide a break-down of amounts and percentages that comprise fringe benefit costs, such as health insurance, FICA, retirement insurance, etc.

Travel—6c. Enter total costs of out-of-town travel (travel requiring per diem) for staff of the project. Do not enter costs for consultant's travel or local transportation, which should be included on Line 6h, "Other."

Justification: Include ther name(s) of traveler(s), total number of trips, destinations, length of stay, transportation costs and subsistence allowances.

Equipment—Line 6d. Enter the total costs of all equipment to be acquired by the project. For State and local governments, including Federally recognized Indian Tribes, "equipment" is non-expendable tangible personal property having a useful life of more than two years and an acquisition cost of $5,000 or more per unit. For all other applicants, the threshold for equipment is $500 or more per unit. The higher threshold for State and local governments became effective October 1, 1988, through the implementation of 45 CFR part 92, Uniform Administrative Requirements for Grants and Cooperative agreements to State and Local Governments.

Justification: Equipment to be purchased with Federal funds must be justified. The equipment must be required to conduct the project, and the applicant organization or its subgrantees must not have the equipment or a reasonable facsimile available to the project. The justification also must contain plans for future use of disposal of the equipment after the project ends.

Supplies—Line 6e. Enter the total costs of all tangible expendable personal property (supplies) other than those included on Line 6d.

Justification: Specify general categories of supplies and their costs.

Contractual—Line 6f. Enter the total costs of all contracts, including (1) procurement contracts (except those which belong on other lines such as equipment, supplies, etc.) and (2) contracts with secondary recipient organizations, including delegate agencies. Also include any contracts with organizations for the provision of technical assistance. Do not include payments to individuals on this line. If the name of the contractor, scope of work, and estimated total costs are not available or have not been negotiated, include on Line 6h, "Other."

Justification: Attach a list of contractors, indicating the names of the organizations, the purposes of the contracts, and the estimated dollar amounts of the awards as part of the budget justification. Whenever the applicant/grantee intends to delegate part or all of the program to another agency, the applicant/grantee must complete this section (section B, Budget Categories) for each delegate agency by agency title, along with the supporting information. The total cost of all such agencies will be part of the amount shown on Line 6f. Provide backup documentation identifying the name of contractor, purpose of contract, and major cost elements.

Construction—Line 6g. Leave blank. New construction is not allowable.

Other—Line 6h. Enter the total of all other costs. Where applicable, such costs may include, but are not limited to: Insurance; medical and dental costs; noncontractual fees and travel paid directly to individual consultants; local transportation (all travel which does not require per diem is considered local travel); space and equipment rentals; printing and publication; computer use; training costs, including tuition and stipends; training service costs, include wage payments to individuals and supportive service payments; and staff development costs. Note that costs identified as "miscellaneous" and "honoraria" are not allowable.

Justification: Specify the costs included.

Total Direct Charges—Line 6i. Enter the total of Lines 6a through 6h.

Indirect Charges—6j. Enter the total amount of indirect charges (costs). If no indirect costs are requested, enter "none." Generally, this line should be used when the applicant (except local governments) has a current indirect cost rate agreement approved by the Department of Health and Human Services or another Federal agency.

Local and State governments shall enter the amount of indirect costs determined in accordance with HHS requirements. When an indirect cost rate is requested, these costs are included in the indirect cost pool and should not be charged again as direct costs to the grant.

(c) Subtract (b*) from (a*). The remainder is what the applicant can claim as part of its matching cost contribution.

Justification: Enclose a copy of the indirect cost rate agreement. Applicants subject to the limitation on the Federal reimbursement of indirect costs for training grants should specify this.

Total—Line 6k. Enter the total amounts of lines 6i and 6j.

Program Income—Line 7. Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount.

Justification: Describe the nature, source, and anticipated use of program income in the Program Narrative Statement.

Section C—Non-Federal Resources. This section summarizes the amounts of non-Federal resources that will be applied to the grant. Enter this information under the column entitled "Totals" on line 12, Totals. In-kind contributions are defined in title 45 of the Code of Federal Regulations, § 74.51, as "property or services which benefit a grant-supported project or program and which are contributed by non-Federal third parties without charge to the grantee, the subgrantee, or a cost-type contractor under the grant or subgrant."

Justification: Describe third party in-kind contributions, if included.

Section D—Forecasted Cash Needs. Not applicable. Leave blank.

Section E—Budget Estimate of Federal Funds Needed For Balance of the Project.

Totals—Line 20. For projects that will have more than one budget period, enter the estimated required Federal funds for the second budget period (months 13 through 24) under column "(b) First." If a third budget period will be necessary, enter the Federal funds needed for months 25 through 36 under "(c) Second." Columns (d) and (e) are not applicable in most instances, since ACYF funding is almost always limited to a three-year maximum project period. They should remain blank.

Section F—Other Budget Information.

Direct Charges—Line 21. Not applicable.

Indirect Charges—Line 22. Enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied, and the total indirect expense.

Remarks—Line 23. You must enter your proposed non-Federal share of the project budget for each of the remaining years of the project.

3. Project Summary Description

Clearly mark this separate page with the applicant name as shown in item 5 of the SF 424, the priority area number as shown at the top of the SF 424, and the title of the project as shown in item 11 of the SF 424. The summary description should not exceed 1,200 characters, including words, spaces and punctuation. These 1,200 characters become part of the computer database on each project.

Care should be taken to produce a summary description which accurately and concisely reflects the proposal. It should describe the objectives of the project, the approaches to be used and the outcomes expected. The description should also include a list of major products that will result from the proposed project, such as software packages, materials, management procedures, data collection instruments, training packages, or videos (please note that audiovisuals should be closed captioned). The project summary description, together with the information on the SF 424, will constitute the project "abstract." It is the major source of information about the proposed project and is usually the first part of the application that the reviewers read in evaluating the application.

4. Program Narrative Statement

The Program Narrative Statement is a very important part of an application. It should be clear, concise, and address the specific requirements mentioned under the priority area description in part III. The narrative should also provide information concerning how the application meets the evaluation criteria (see Section C, Part II), using the following headings:

(a) *Objectives and Need for Assistance;*

(b) *Results and Benefits Expected;*

(c) *Approach;* and

(d) *Staff Background and Organization's Experience.*

The narrative should be typed double-spaced on a single-side of an 8½" x 11" plain white paper, with 1" margins on all sides. All pages of the narrative (including charts, references/footnotes, tables, maps, exhibits, etc.) must be sequentially numbered, beginning with "Objectives and Need for Assistance" as page number one. Mechanically reducing an application typed on legal size paper to 8½" x 11" paper should not be done in order to meet the size requirement.

The length of the application, including the application forms and all attachments, should not exceed 60 pages. A page is a single side of an 8½" x 11" sheet of paper. Applicants are requested not to send pamphlets, brochures or other printed material along with their application as these pose xeroxing difficulties. These materials, if submitted, will not be included in the review process if they exceed the 60-page limit. Each page of the application will be counted to determine the total length.

5. Organizational Capability Statement

The Organizational Capability Statement should consist of a brief (two to three pages) background description of how the applicant organization (or the unit within the organization that will have responsibility for the project) is organized, the types and quantity of services it provides, and/or the research and management capabilities it possesses. This description should cover capabilities not included in the Program Narrative Statement. It may include descriptions of any current or previous relevant experience, or describe the competence of the project team and its demonstrated ability to produce a final product that is readily comprehensible and usable. An organization chart showing the relationship of the project to the current organization should be included.

6. Part V—Assurances/Certifications

Applicants are required to file an SF 424B, Assurances—Non-construction Programs and the Certification Regarding Lobbying. Both must be signed and returned with the application. In addition, applicants must provide certifications regarding: (1) Drug-Free Workplace Requirements; and (2) Debarment and Other Responsibilities. These two certifications are self-explanatory. Copies of these assurances/certifications are reprinted at the end of this announcement and should be reproduced, as necessary. A duly authorized representative of the applicant organization must certify that the applicant is in compliance with these assurances/certifications. A signature on the SF 424 indicates compliance with the Drug Free Workplace Requirements, and Debarment and Other Responsibilities certifications.

For research projects in which human subjects may be at risk, a Protection of Human Subjects Assurance may be required. If there is a question regarding the applicability of this assurance, contact the Office for Research Risks of the National Institutes of Health at (301) 496–7041.

E. Components of a Complete Application

A complete application consists of the following items in this order:

1. Application for Federal Assistance Standard Form 424, REV 4–88);
2. Budget Information—Non-Construction Programs (Standard Form 424A, REV 4–88);
3. Table of Contents;
4. Budget justification for Section B—Budget Categories;
5. Letter from the Internal Revenue Service to prove non-profit status, if necessary;
6. Copy of the applicant's approved indirect cost rate agreement, if appropriate;
7. Project summary description and listing of key works;
8. Program Narrative Statement, organized in four sections addressing the following areas: (a) Objectives and need for assistance, (b) results or benefits expected, (c) approach, and (d) staff background and organization's experience;
9. Organizational capability statement, including an organization chart;
10. Any appendices/attachments;
11. Assurances—Non-Construction Programs (Standard Form 424B, REV 4–88);
12. Certification Regarding Lobbying; and
13. Certification of Protection of Human Subjects, if necessary.
14. Certification Regarding Drug-Free Workplace Requirements

F. The Application Package

Each application package must include an original and two copies of the complete application. Each copy should be stapled securely (front and back if necessary) in the upper left-hand corner. All pages of the narrative (including charts, tables, maps, exhibits, etc.) must be sequentially numbered, beginning with page one. In order to facilitate handling, please do not use covers, binders or tabs. Do not include extraneous materials as attachments, such as agency promotion brochures, slides, types, film clips, minutes of meetings, survey instruments or articles of incorporation.

Do not include a self-addressed, stamped acknowledgment card. All applicants will be notified automatically about the receipt of their application and of the four digit identification number assigned to their application. This number and the priority area must be referred to in ALL subsequent communication with ACYF concerning the application. If acknowledgment of receipt of your application is not received within eight weeks after the deadline date, please notify ACYF by telephone at (202) 882–9016.

G. Checklist for a Complete Application

The checklist below is for your use to ensure that your application package has been properly prepared.

____One original, signed and dated application, plus two copies. Applications for different priority areas are packaged separately;

____Application is from an organization which is eligible under the eligibility requirements defined in the priority area description (screening requirement);

____Application length does not exceed 60 pages, unless otherwise specified in the priority area description.

Application includes:

____Application for Federal Assistance (Standard Form 424, REV 4–88);

____A completed SPOC certification with the date of SPOC contact entered in line 16, page 1 of the SF 424;

____Budget information—Non-Construction Programs (Standard Form 424A, REV 4–88);

____Table of Contents;

____Budget justification;

____Letter from Internal Revenue Service to prove non-profit status, if necessary;

____Indirect cost rate agreement, if necessary;

____Project summary description and key words;

____Program Narrative Statement;

____Organizational Capability Statement;

____Apprendices/attachments, if necessary;

____Assurances—Non-Construction Programs (Standard Form 424B, REV 4–88);

____Certification Regarding Lobbying; and

____Certification of Protection of Human Subjects, if necessary.

(Catalog of Federal Domestic Assistance Program Number 93.660, Drug Abuse Education and Prevention Relating to Youth Gangs)

Approved: March 9, 1992.

Wade F. Horn,

Commissioner, Administration on Children, Youth and Families.

a. Typed Name of Authorized Representative	b. Title	c. Telephone number
d. Signature of Authorized Representative		e. Date Signed

Previous Editions Not Usable

Standard Form 424 (REV 4-88)
Prescribed by OMB Circular A-102

Authorized for Local Reproduction

Instructions for the SF 424

This is a standard form used by applicants as a required facesheet for preapplication and applications submitted for Federal assistance. It will be used by Federal agencies to obtain applicant certification that States which have established a review and comment procedure in response to Executive Order 12372 and have selected the program to be included in their process, have been given an opportunity to review the applicant's submission.

Item and Entry

1. Self-explanatory.
2. Date application submitted to Federal agency (or State if applicable) & applicant's control number (if applicable).
3. State use only (if applicable).
4. If this application is to continue or revise an existing award, enter present Federal identifier number. If for a new poject, leave blank.
5. Legal name of applicant, name of primary organizational unit which will undertake the assistance activity, complete address of the applicant, and name and telephone number of the person to contact on matters related to this application.
6. Enter Employer Identification Number (EIN) as assigned by the Internal Revenue Service.
7. Enter the appropriate letter in the space provided.
8. Check appropriate box and enter appropriate letter(s) in the space(s) provided:

——"New" means a new assistance award.
——"Continuation" means an extension for an additional funding/budget period for a project with a projected completion date.
——"Revision" means any change in the Federal Government's financial obligation or contingent liability from an existing obligation.

9. Name of Federal agency from which asistance is being requested with this application.
10. Use the Catalog of Federal Domestic Assistance number and title of the program under which assistance is requested.
11. Enter a brief descriptive title of the project. If more than one program is involved, you should append an explanation on a separate sheet. If appropriate (e.g., construction or real property projects), attach a map showing project location. For preapplications, use a separate sheet to provide a summary description of this project.
12. List only the largest political entities affected (e.g., State, counties, cities).
13. Self-explanatory.
14. List the applicant's Congressional District and any District(s) affected by the program or project.
15. Amount requested or to be contributed during the first funding/budget period by each contributor. Value of in-kind contributions should be included on appropriate lines as applicable. If the action will result in a dollar change to an existing award, indicate *only* the amount of the change. For decreases, enclose the amounts in parentheses. If both basic and supplemental amounts are included, show breakdown on an attached sheet. For multiple program funding, use totals and show breakdown using same categories as item 15.
16. Applicants should contact the State Single Point of Contact (SPOC) for Federal Executive Order 12372 to determine whether the application is subject to the State intergovernmental review process.
17. This question applies to the applicant organization, not the person who signs as the authorized representative. Categories of debt include delinquent audit disallowances, loans and taxes.
18. To be signed by the authorized representative of the applicant. A copy of the governing body's authorization for you to sign this application as official representative must be on file in the applicant's office. (Certain Federal agencies may require that this authorization be submitted as part of the application.)

Instructions for the SF-424A

General Instructions

This form is designed so that application can be made for funds from one or more grant programs. In preparing the budget, adhere to any existing Federal grantor agency guidelines which prescribe how and whether budgeted amounts should be separately shown for different functions or activities within the program. For some programs, grantor agencies may require budgets to be separately shown by function or activity. For other programs, grantor agencies may require a breakdown by function or activity. Sections A, B, C, and D should include budget estimates for the whole project except when applying for assistance which requires Federal authorization in annual or other funding period increments. In the latter case, Sections A, B, C, and D should provide the budget for the first budget period (usually a year) and Section E should present the need for Federal assistance in the subsequent budget periods. All applications should contain a breakdown by the object class categories shown in Lines a-k of Section B.

Section A. Budget Summary

Lines 1–4, Columns (a) and (b)

For applications pertaining to a *single* Federal grant program (Federal Domestic Assistance Catalog number) and *not requiring* a functional or activity breakdown, enter on Line 1 under Column (a) the catalog program title and the catalog number in Column (b).

For applications pertaining to a *single* program *requiring* budget amounts by multiple functions or activities, enter the name of each activity or function on each line in Column (a), and enter the catalog number in Column (b). For applications pertaining to multiple programs where none of the programs require a breakdown by function or activity, enter the catalog program title on each line in *Column* (a) and the respective catalog number on each line in Column (b).

For applications pertaining to *multiple* programs where one or more programs *require* a breakdown by function or activity, prepare a separate sheet for each program requiring the breakdown. Additional sheets should be used when one form does not provide adequate space for all breakdown of data required. However, when more than one sheet is used, the first page should provide the summary totals by programs.

Lines 1–4, Columns (c) through (g.) (continued)

For new applications, leave Columns (c) and (d) blank. For each line entry in Columns (a) and (b), enter in Columns (e), (f), and (g) the apropriate amounts of funds needed to support the project for the first funding period (usually a year).

Lines 1–4, Columns (c) through (g.) (continued)

For continuing grant program applications, submit these forms before the end of each funding period as required by the grantor agency. Enter in Columns (c) and (d) the estimated amounts of funds which will remain unobligated at the end of the grant funding period only if the Federal grantor agency instructions provide for this. Otherwise, leave these columns blank. Enter in columns (e) and (f) the amounts of funds needed for the upcoming period. The amount(s) in Column (g) should be the sum of amounts in Columns (e) and (f).

For supplemental grants and changes to existing grants, do not use Columns (c) and (d). Enter in Column (e) the amount of the increase or decrease of Federal funds and enter in Column (f) the amount of the increase or decrease of non-Federal funds. In Column (g) enter the new total budgeted amount (Federal and non-Federal) which includes the total previous authorized budgeted amounts plus or minus, as appropriate, the amounts shown in Columns (e) and (f). The amount(s) in Column (g) should not equal the sum of amounts in Column (e) and (f).

Line 5—Show the totals for all columns used.

Section B Budget Categories

In the column headings (1) through (4), enter the titles of the same programs, functions, and activities shown on Lines 1–4, Column (a), Section A. When additional sheets are prepared for Section A, provide similar column headings on each sheet. For each program, function or activity, fill in the total requirements for funds (both Federal and non-Federal) by object class categories.

Lines 6a-i—Show the totals of Lines 6a to 6h in each column.

Line 6j—Show the amount of indirect cost.

Line 6k—Enter the total of amounts on Lines 6i and 6j. For all applications for new grants and continuation grants the total amount in column (5), Line 6k, should be the same as the total amount shown in Section A, Column (g), Line 5. For supplemental grants and changes to grants, the total amount of the increase or decrease as shown in Columns (1)–(4), Line 6k should be the same as the sum of the amounts in Section A, Columns (e) and (f) on Line 5.

Line 7—Enter the estimated amount of income, if any, expected to be generated from this project. Do not add or subtract this amount from the total project amount. Show under the program narrative statement the nature and source of income. The estimated amount of program income may be considered by the Federal grantor agency in determining the total amount of the grant.

Section C. Non-Federal-Resources

Lines 8–11—Enter amounts of non-Federal resources that will be used on the grant. If in-kind contributions are included, provide a brief explanation on a separate sheet.

Column (a)—Enter the program titles identical to Column (a), Section A. A breakdown by function or activity is not necessary.

Column (b)—Enter the contribution to be made by the applicant.

Column (c)—Enter the amount of the State's cash and in-kind contribution if the applicant is not a State or State agency. Applicants which are a State or State agencies should leave this column blank.

Column (d)—Enter the amount of cash and in-kind contributions to be made from all other sources.

Column (e)—Enter totals of Columns (b), (c), and (d).

Line 12—Enter the total for each of Columns (b)–(e). The amount in Column (e) should be equal to the amount on Line 5, Column (f), Section A.

Section D. Forecasted Cash Needs

Line 13—Enter the amount of cash needed by quarter from the grantor agency during the first year.

Line 14—Enter the amount of cash from all other sources needed by quarter during the first year.

Line 15—Enter the totals of amounts on Lines 13 and 14.

Section E. Budget Estimates of Federal Funds Needed for Balance of the Project

Lines 16–19—Enter in Column (a) the same grant program titles shown in Column (a), Section A. A breakdown by function or activity is not necessary. For new applications and continuation grant applications, enter in the proper columns amounts of Federal funds which will be needed to complete the program or project over the succeeding funding periods (usually in years). This section need not be completed for revisions (amendments, changes, or supplements) to funds for the current year of existing grants.

If more than four lines are needed to list the program titles, submit additional schedules as necessary.

Line 20—Enter the total for each of the Column (b)–(e). When additional schedules are prepared for this Section, annotate accordingly and show the overall totals on this line.

Section F. Other Budget Information

Line 21—Use this space to explain amounts for individual direct object-class cost categories that may appear to be out of the ordinary or to explain the details as required by the Federal grantor agency.

Line 22—Enter the type of indirect rate (provisional, predetermined, final or fixed) that will be in effect during the funding period, the estimated amount of the base to which the rate is applied, and the total indirect expense.

Line 23—Provide any other explanations or comments deemed necessary.

Appendix IV

OMB Approval No. 0348-0040

Assurances—Non-Construction Programs

Note: Certain of these assurances may not be applicable to your project or program. If you have questions, please contact the awarding agency. Further, certain Federal awarding agencies may require applicants to certify to additional assurances. If such is the case, you will be notified.

As the duly authorized representative of the applicant I certify that the applicant:

1. Has the legal authority to apply for Federal assistance, and the institutional, managerial and financial capability (including funds sufficient to pay the non-Federal share of project costs) to ensure proper planning, management and completion of the project described in this application.

2. Will give the awarding agency, the Comptroller General of the United States, and if appropriate, the State, through any authorized representative, access to and the right to examine all records, books, papers, or documents related to the award; and will establish a proper accounting system in accordance with generally accepted accounting standards or agency directives.

3. Will establish safeguards to prohibit employees from using their positions for a purpose that constitutes or presents the appearance of personal or organizational conflict of interest, or personal gain.

4. Will initiate and complete the work within the applicable time frame after receipt of approval of the awarding agency.

5. Will comply with the Intergovernmental Personnel Act of 1970 (42 U.S.C. 4728–4763) relating to prescribed standards for merit systems for programs funded under one of the nineteen statutes or regulations specified in appendix A of OPM's Standards for a Merit System of Personnel Administration (5 CFR part 900, subpart F).

6. Will comply with all Federal statutes relating to nondiscrimination. These include but are not limited to: (a) Title VI of the Civil Rights Act of 1964 (Pub. L. 88–352) which prohibits discrimination on the basis of race, color or national origin; (b) Title IX of the Education Amendments of 1972, as amended (20 U.S.C. 1681–1683, and 1685–1686), which prohibits discrimination on the basis of sex; (c) Section 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794), which prohibits discrimination on the basis of handicaps; (d) the Age Discrimination Act of 1975, as amended (42 U.S.C. 6101–6107), which prohibits discrimination on the basis of age; (e) the Drug Abuse Office and Treatment Act of 1972 (Pub. L. 92–255), as amended, relating to nondiscrimination on the basis of drug abuse; (f) the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970 (Pub. L. 91–616), as amended, relating to nondiscrimination on the basis of alcohol abuse or alcoholism; (g) Sections 523 and 527 of the Public Health Service Act of 1912 (42 U.S.C. 290 dd–3 and 290 ee–3), as amended, relating to confidentiality of alcohol and drug abuse patient records; (h) Title VIII of the Civil Rights Act of 1968 (42 U.S.C. 3601 et seq.), as amended, relating to non-discrimination in the sale, rental or financing of housing; (i) any other nondiscrimination provisions in the specific statute(s) under which application for Federal assistance is being made; and (j) the requirements of any other nondiscrimination statute(s) which may apply to the application.

7. Will comply, or has already complied, with the requirements of titles II and III of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Pub. L. 91–646) which provide for fair and equitable treatment of persons displaced or whose property is acquired as a result of Federal or federally assisted programs. These requirements apply to all interests in real property acquired for project purposes regardless of Federal participation in purchases.

8. Will comply with the provisions of the Hatch Act (5 U.S.C. 1501–1508 and 7324–7328) which limit the political activities of employees whose principal employment activities are funded in whole or in part with Federal funds.

9. Will comply, as applicable, with the provisions of the Davis-Bacon Act (40 U.S.C. 276a to 276a–7), the Copeland Act (40 U.S.C. 276c and 18 U.S.C. 874), and the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333), regarding labor standards for federally assisted construction subagreements.

10. Will comply, if applicable, with flood insurance purchase requirements of section 102(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) which requires recipients in a special flood hazard area to participate in the program and to purchase flood insurance if the total cost of insurable construction and acquisition is $10,000 or more.

11. Will comply with environmental standards which may be prescribed pursuant to the following: (a) Institution of environmental quality control measures under the National Environmental Policy Act of 1969 (Pub. L. 91–190) and Executive Order (EO) 11514; (b) notification of violating facilities pursuant to EO 11738; (c) protection of wetlands pursuant to EO 11990; (d) evaluation of flood hazards in floodplains in accordance with EO 11988; (e) assurance of project consistency with the approved State management program developed under the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.); (f) conformity of Federal actions to State (Clear Air) Implementation Plans under section 176(c) of the Clear Air Act of 1955, as amended (42 U.S.C. 7401 et seq.); (g) protection of underground sources of drinking water under the Safe Drinking Water Act of 1974, as amended, (Pub. L. 93–523); and (h) protection of endangered species under the Endangered Species Act of 1973, as amended, (Pub. L. 93–205).

12. Will comply with the Wild and Scenic rivers Act of 1968 (16 U.S.C. 1271 et seq.) related to protecting components or potential components of the national wild and scenic rivers system.

13. Will assist the awarding agency in assuring compliance with section 106 of the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470), EO 11593 (identification and protection of historic properties), and the Archaeological and Historic Preservation Act of 1974 (16 U.S.C. 469a–1 et seq.).

14. Will comply with Public Law 93–348 regarding the protection of human subjects involved in research,

development, and related activities supported by this award of assistance.

15. Will comply with the Laboratory Animal Welfare Act of 1966 (Pub. L. 89–544, as amended, 7 U.S.C. 2131 et seq.) pertaining to the care, handling, and treatment of warm blooded animals held for research, teaching, or other activities supported by this award of assistance.

16. Will comply with the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4801 et seq.) which prohibits the use of lead based paint in construction or rehabilitation of residence structures.

17. Will cause to be performed the required financial and compliance audits in accordance with the Single Audit Act of 1984.

18. Will comply with all applicable requirements of all other Federal laws, executive orders, regulations and policies governing this program.

Appendix V—Certification Regarding Lobbying

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan or cooperative agreement, the undersigned shall complete and submit Standard Form–LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

Statement for Loan Guarantees and Loan Insurance

The undersigned states, to the best of his or her knowledge and belief, that:

If any funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this commitment providing for the United States to insure or guarantee a loan, the undersigned shall complete and submit Standard Form–LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

Submission of this statement is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required statement shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

BILLING CODE 4130-01-C

Instructions for Completion of SF–LLL, Disclosure of Lobbying Activities

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF–LLL–A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.

2. Identify the status of the covered Federal action.

3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.

4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.

5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.

6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.

7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.

8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP–DE–90–001."

9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.

10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.

(b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).

11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.

12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.

13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.

14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.

15. Check whether or not a SF–LLL–A Continuation Sheet(s) is attached.

16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348–0046), Washington, D.C. 20503.

Appendix VI

U.S. Department of Health and Human Services Certificaiton Regarding Drug-Free Workplace Requirements Grantees Other Than Individuals

By signing and/or submitting this application or grant agreement, the grantee is providing the certification set out below.

This certification is required by regulations implementing the Drug-Free Workplace Act of 1988, 45 CFR part 76, subpart F. The regulations, published in the May 25, 1990 **Federal Register**, require certification by grantees that they will maintain a drug-free workplace. The certification set out below is a material representation of fact upon which reliance will be placed when the Department of Health and Human Services (HHS) determines to award the grant. If it is later determined that the grantee knowingly rendered a false certification, or otherwise violates the requirements of the Drug-Free Workplace Act, HHS, in addition to any other remedies available to the Federal Government, may taken action authorized under the Drug-Free Workplace Act. False certification or violation of the certification shall be grounds for suspension of payments, suspension or termination of grants, or governmentwide suspension or debarment.

Workplaces under grants, for grantees other than individuals, need not be identified on the certification. If known, they may be identified in the grant application. If the grantee does not identify the workplaces at the time of application, or upon award, if there is no application, the grantee must keep the identity of the workplace(s) on file in its office and make the information available for Federal inspection. Failure to identify all known workplaces constitutes a violation of the grantee's durg-free workplace requirements.

Workplace identifications must include the actual address of buildings (or parts of buildings) or other sites where work under the grant takes place. Categorical descriptions may be used (e.g., all vehicles of a mass transit authority or State highway department while in operation; State employees in each local unemployment office, performers in concert halls or radio studios.)

If the workplace identified to HHS changes during the performance of the grant, the grantee shall inform the agency of the change(s), if it previously identified the workplaces in question (see above).

Definitions of terms in the Nonprocurement Suspension and Debarment common rule and Drug-Free Workplace common rule apply to this certification. Grantees' attention is called, in particular, to the following definitions from these rules:

Controlled substance means a controlled substance in Schedules I through V of the Controlled Substances Act (21 USC 812) and as further defined by regulation (21 CFR 1308.11 through 1308.15).

Conviction means a finding of guilt (including a plea of nolo contendere) or imposition of sentence, or both, by any judicial body charged with the responsibility to determine violations of the Federal or State criminal drug statutes;

Criminal drug statute means a Federal or non-Federal criminal statute involving the manufacture, distribution, dispensing, use, or possession of any controlled substance;

Employee means the employee of a grantee directly engaged in the performance of work under a grant, including: (i) All "direct charge" employees; (ii) all "indirect charge" employees unless their impact or involvement is insignificant to the performance of the grant; and, (iii) temporary personnel and consultants who are directly engaged in the performance of work under the grant and who are on the grantee's payroll. This definition does not include workers not on the payroll of the grantee (e.g., volunteers, even if used to meet a matching requirement; consultants or independent contractors not on the grantee's payroll; or employees of subrecipients or subcontractors in covered workplaces).

The grantee certifies that it will or will continue to provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing an ongoing drug-free awareness program to inform employees about:

(1) The dangers of durg abuse in the workplace; (2) The grantee's policy of maintaining a drug-free workplace; (3) Any available drug counseling, rehabilitation, and employee assistance programs; and, (4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will:

(1) Abide by the terms of the statement; and, (2) Notify the employer in writing of his or her conviction for a violation of a criminal drug statute occurring in the workplace no later than five calendar days after such conviction;

(e) Notifying the agency in writing, within ten calendar days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction. Employers of convicted employees must provide notice, including position title, to every grant officer of other designee on whose grant activity the convicted employee was working, unless the Federal agency has designated a central point for the receipt of such notices. Notice shall include the identification number(s) of each affected grant;

(f) Taking one of the following actions, within 30 calendar days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted:

(1) Taking appropriate personnel action against such an employee, up to and including termination, consistent with the requirements of the Rehabilitation Act of 1973, as amended; or, (2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e) and (f).

The grantee may insert in the space provided below the site(s) for the performance of work done in connection with the specific grant (use attachments, if needed):

Place of Performance (Street address, City, County, State, ZIP Code)_____ Check_____ if there are workplaces on file that are not identified here.

Sections 76.630(c) and (d)(2) and 76.635(a)(1) and (b) provide that a Federal agency may designate a central receipt point for STATE-WIDE AND STATE AGENCY-WIDE certifications, and for notification of criminal drug convictions. For the Department of Health and Human Services, the central receipt point is: Division of Grants Management and Oversight, Office of Management and Acquisition, Department of Health and Human Services, room 517–D, 200 Independence Avenue SW., Washington, DC 20201.

Appendix VII

Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions

By signing and submitting this proposal, the applicant, defined as the primary participant in accordance with 45 CFR part 76, certifies to the best of its knowledge and believe that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from covered transactions by any Federal Department or agency;

(b) Have not within a 3-year period preceding this proposal been convicted of or had a civil judgment rendered against them for commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public (Federal, State, or local) transaction or contract under a public transaction; violation of Federal or State antitrust statutes or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property;

(c) Are not presently indicted or otherwise criminally or civilly charged by a governmental entity (Federal, State or local) with commission of any of the offenses enumerated in paragraph (1)(b) of this certification; and

(d) Have not within a 3-year period preceding this application/proposal had one or more public transactions (Federal, State, or local) terminated for cause or default.

The inability of a person to provide the certification required above will not necessarily result in denial of participation in this covered transaction. If necessary, the prospective participant shall submit an explanation of why it cannot provide the certification. The certification or explanation will be considered in connection with the Department of Health and Human Services (HHS) determination whether to enter into this transaction. However, failure of the prospective primary participant to furnish a certification or an explanation shall disqualify such person from participation in this transaction.

The prospective primary participant agrees that by submitting this proposal, it will include the clause entitled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion—Lower Tier Covered Transaction." provided below without modification in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion—Lower Tier Covered Transactions

(To Be Supplied to Lower Tier Participants)

By signing and submitting this lower tier proposal, the prospective lower tier participant, as defined in 45 CFR part 76, certifies to the best of its knowledge and belief that it and its principals:

(a) Are not presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any federal department or agency.

(b) Where the prospective lower tier participant is unable to certify to any of the above, such prospective participant shall attach an explanation to this proposal.

The prospective lower tier participant further agrees by submitting this proposal that it will include this clause entitled "certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion—Lower Tier Covered Transactions. "without modification in all lower tier covered transactions and in all solicitations for lower tier covered transactions.

Part V

Department of Transportation

Federal Highway Administration

23 CFR Part 658

Truck Size and Weight; Restrictions on Longer Combination Vehicles (LCV's) and Vehicles With Two or More Cargo Carrying Units; Proposed Rule

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 658

[FHWA Docket No. 92-15]

RIN 2125-AC86

Truck Size and Weight; Restrictions on Longer Combination Vehicles (LCV's) and Vehicles With Two or More Cargo Carrying Units

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 restricts the operation of longer combination vehicles on the Interstate Highway System and commercial motor vehicle combinations with two or more cargo carrying units on the National Network to the type of vehicles in use on or before June 1, 1991, subject to whatever State rules, regulations or restrictions were in effect on that date. The ISTEA also includes special variances from the June 1 date for Alaska, Ohio and Wyoming, which are discussed in this document. A preliminary list of these vehicles and restrictions is being published today for public comment.

This NPRM also includes (1) a proposal to allow States to make temporary minor adjustments in approved routes and operating restrictions for these vehicles and (2) a definition of loads which cannot be easily dismantled or divided.

DATES: Comments on this docket must be received on or before May 4, 1992.

ADDRESSES: Submit written, signed comments to FHWA Docket No. 92-15, Federal Highway Administration, room 4232, HCC-10, Office of the Chief Counsel, 400 Seventh Street, SW., Washington, DC 20590. Commenters may, in addition to submitting "hard copies" of their comments, submit a floppy disk (either 1.2Mb or 360 KB density) in a format that is compatible with the word processing program WordPerfect (5.1). All comments received, as well as material submitted by the States used in preparing this notice, will be available for examination at the above address between 8:30 a.m. and 3:30 p.m., e.t., Monday through Friday, except legal holidays. Those desiring notification of receipt of comments must include a self-addressed, stamped envelope or postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Klimek, Office of Motor Carrier Information Management and Analysis, at (202) 366-2212 or Mr. Charles Medalen, Office of the Chief Counsel, at (202) 366-1354, Federal Highway Administration, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: Section 1023 of the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) required States, within 60 days of adoption, to submit to the Secretary, for publication in the **Federal Register** 30 days thereafter, a complete list of (1) all operations of longer combination vehicles (LCV's) being conducted as of June 1, 1991; (2) State laws, regulations and any other limitations and conditions, including routing specific and configuration specific designations governing the operation of LCV's; and (3) a copy of such laws, regulations, limitations and conditions. LCV's are defined in the ISTEA as:

> Any combination of a truck tractor and 2 or more trailers or semitrailers which operates on the Interstate System at a gross vehicle weight greater than 80,000 pounds.

Similarly, section 4006 will also require the States to submit a complete list of State length limitations applicable to commercial motor vehicle (CMV) combinations with two or more cargo carrying units in effect on or before June 1, 1991. This section prohibits States from allowing the operation (by statute, regulation, permit or other means) of CMV's with cargo carrying unit lengths that exceed the length, by specific configuration, allowed and in actual, lawful operation on a regular or periodic basis (including continuing seasonal operation) on the National Network (NN) in that State on or before June 1, 1991. National Network is as defined in 23 CFR 658.5(f).

Sections 1023 and 4006 provide that no statute or regulation shall be included on the list submitted by a State or published by the Secretary merely on the grounds that it authorized, or could have authorized, by permit or otherwise, the operation of CMV combinations not in actual operation on a regular or periodic basis on or before June 1, 1991.

States may continue to issue special permits, in accordance with applicable State laws, for those vehicles and loads which cannot be easily dismantled or divided.

A cargo carrying unit is defined as any portion of a CMV combination (other than the truck tractor) used for the carrying of cargo. These units include a trailer, semitrailer or the cargo carrying section of a single unit truck.

Section 4006 also defines the length of the cargo carrying units as the distance from the front of the first cargo unit to the rear of the last cargo unit. Historically, few States controlled this distance, relying instead on either an overall combination length or length controls on the individual units. Accordingly, in compiling the cargo carrying unit lengths listed in appendix D, assumptions have been made regarding the distance between units and distance allotted for the driver's cab.

In making the length determinations the following guidelines have been observed. For combinations including a truck tractor which are subject only to an overall vehicle length requirement, the cargo carrying unit length has generally been estimated at 10 feet less than the overall length. If both overall length and unit maximum lengths are controlled, the sum of the unit maximums plus 4 feet between units will first be compared against the overall length. If the sum of unit maximums plus the 4-foot spacing is less than the overall length minus 10 feet for the tractor, then the length is estimated at overall length minus 10 feet. If the sum of unit lengths plus spacing is greater than the overall length minus 10 feet, the unit length plus spacing sum will be established as the cargo carrying length. However, in order to allow for a 7-foot cab, the shortest tractor likely to be used in over-the-road operations, the cargo carrying unit length will never be allowed to exceed the overall vehicle length minus 7 feet. For truck-trailer combinations, 7 feet will be allowed for cab space, making the cargo carrying unit length for these combinations no greater than the overall combination length minus 7 feet. Comments are invited on these guidelines.

In response to this legislation, the FHWA, through its field offices, sent each State a questionnaire to aid it in supplying the required information. The form indicated that if a State did not allow LCV's or CMV combinations with two trailers over 28.5 feet long or with more than two trailers, it need supply no further information.

The intent of the ISTEA is to prohibit the use of vehicle combinations with cargo unit lengths or overall lengths exceeding those allowed on June 1, 1991. The Surface Transportation Assistance Act of 1982 (STAA) [Pub. L. 97-424, 96 Stat. 2097] required States to allow the operation of twin 28-foot units, and many also allow the grandfathered 28.5-foot length. Since these vehicles were

necessarily legal in all States on June 1, 1991, and in operation virtually everywhere, the FHWA believes it would serve no purpose to list them despite the fact that they have two cargo carrying units. The same is true of certain other vehicles described as follows.

A CMV combination consisting of a truck-trailer or truck-semitrailer is currently a legal vehicle in all States. The only difference among States is the length control placed on the combination. In addition, certain of these combinations are known as maxi-cube vehicles. Congress has required States to allow maxi-cubes on the NN highways, within specific length parameters.

Accordingly, in preparing the interim list required in section 4006(a) of the ISTEA (proposed appendix D to part 658), the FHWA has decided not to list certain vehicle combinations. Consequently, the operations of these vehicles will not be affected by the ISTEA freeze, and no additional information regarding conditions, routes or authority to operate is required.

These excepted combinations are as follows:

1. *Truck tractor-semitrailer-semitrailer* and *truck tractor-semitrailer-trailer* configurations with a maximum length of the cargo carrying units of 62 feet or less are subject to the provisions of 23 CFR part 658. These are the twin 28-foot units authorized by the STAA and the 28-foot B-train doubles authorized as specialized equipment by the FHWA.

2. *Other STAA vehicles*—no State needs to report on the following vehicles, all of which are specialized equipment authorized by the FHWA, on the authority of section 411(d) of the STAA:

a. Saddlemount combinations 75 feet or less in length;

b. Grandfathered dromedary equipped truck tractor-semitrailer combinations; and

c. Automobile or boat transporter combinations 65 feet or less in length (75 feet if stinger steered).

3. *Truck-trailer* and *truck-semitrailer* combinations (except as maxi-cubes) are presently allowed to operate in all States subject to varying overall length limit controls. Many of these vehicles are used in construction or farming, e.g., dump trucks with tag-along trailers and straight trucks with hopper trailers or flatbeds. We do not believe Congress intended to include such vehicles, used locally for relatively short distances and often on secondary roads, within the scope of the ISTEA freeze. However, additional information regarding conditions, routes or authority to operate is required for these configurations if the cargo carrying length of these vehicles is greater than 65 feet. We believe most combinations with a cargo carrying length greater than 65 feet are likely to be over-the-road CMV's.

4. Maxi-cubes, i.e., *truck-trailer* and *truck-semitrailer* combinations with an overall length of 65 feet or less, are specialized equipment and must be allowed to operate everywhere on the NN. In addition, the report issued by the House Appropriations Committee on the FY 1991 Department of Transportation Appropriations Act made it clear that Congress intended to allow a maximum cargo carrying unit length of 60 feet [H.R. Rep. No. 584, 101st Cong., 2d Sess. 78-79 (1990)]. As the name implies, maxi-cubes have enclosed cargo units with unusually high volume capacity.

In responding to our request for the LCV information, many States included vehicles which are legal but will not be listed in appendix D for the reasons given above. The following describe, by State, the vehicles being excluded.

Vehicles Excluded From Appendix D

California:

1. Doubles with an overall length of 65 feet or less.

Colorado:

1. Western double wherein each trailer is 28.5 feet or less in length.

Delaware:

1. Tractor-semitrailer-trailer where each trailer and semitrailer is 29 feet or less in length. The length of the cargo carrying units is 62 feet or less.

Florida:

1. Tractor-semitrailer combinations where the semitrailer is 57.5 feet or less in length. These vehicles were not referenced in the ISTEA.

2. Maxi-cubes allowed by 49 CFR 2311.

Georgia:

1. Truck pulling a maximum 15-foot-long trailer. The maximum overall length is 55 feet 7 inches.

Hawaii:

1. Doubles with an overall cargo carrying unit length of 65 feet or less.

Idaho:

1. Truck tractor-semitrailer-trailer with each of the cargo carrying units having a length of 28.5 feet or less.

Indiana:

1. Combination of three or more vehicles coupled together with a length not to exceed 65 feet.

2. Combination of two vehicles coupled together with a length not to exceed 60 feet.

3. Tractor with a maximum 28.5-foot semitrailer and a maximum 28.5-foot full trailer.

4. Maxi-cube vehicle with an overall length of 65 feet.

Louisiana:

1. Truck and trailer with an overall length restricted to 65 feet, cargo carrying length limited to 58 feet.

Maryland:

1. Maxi-cube consisting of a truck pulling a trailer having a maximum length of 34 feet. The maximum overall length of the combination is 65 feet.

2. Truck pulling a trailer having a maximum length of 28 feet. The maximum overall length of the combination vehicle is 60 feet.

Massachusetts:

1. Truck and trailer with a maximum cargo carrying length of 45.5 feet.

Michigan:

1. For a truck tractor-semitrailer-trailer with either cargo unit exceeding 28.5 feet in length, Michigan statutes allow an overall length of the two trailers as measured from the front of the first trailer to the rear of the second trailer of 58 feet including load.

Missouri:

1. Any vehicle combination other than 28-foot doubles, the 53-foot semitrailer in tow with a truck tractor, and buses operated on Interstate and primary highways plus 10-mile access where the overall length is 65 feet or less. The allowed length is reduced to 55 feet when the 10-mile access limit is exceeded.

Nebraska:

1. Truck and full trailer where the maximum overall length is 65 feet.

Oklahoma:

1. A recreational vehicle pulling two trailers with an overall length of 65 feet. The total length of the cargo carrying units is 58 feet or less.

2. Pickup or light truck pulling two recreational-related trailers. Overall length is 70 feet or less, and the length of the cargo carrying unit is 63 feet or less.

Oregon:

1. Canadian B-Train (covered by description in appendix D for "Rocky Mountain Double").

2. Truck tractor-semitrailer equipped with a dromedary box on the tractor.

3. Specialized equipment authorized by the STAA of 1982, including automobile and boat transporters and saddlemounts.

South Dakota:

1. Specialized equipment authorized by the STAA of 1982, including automobile and boat transporters and saddlemount combinations.

2. Pickup or light truck pulling two recreational-related trailers. Overall

length is 78 feet or less. The maximum length of the second trailer is 24 feet.

3. Heavy haul combination consisting of a four-axle truck tractor pulling a two-axle semitrailer which is noncargo carrying, but supports part of the load of the second three-axle semitrailer. The second semitrailer is the primary load carrying unit and is followed by a third two-axle trailer which also supports part of the load of the second semitrailer. The overall length of the combination vehicle is 110 feet or less.

Tennessee:

1. Truck and trailer with a maximum overall length of 65 feet.

2. Tractor-semitrailer with a kingpin to end of trailer length not to exceed 50 feet, provided the kingpin to center of rear axle(s) length does not exceed 41 feet.

3. Wrecker towing disabled vehicles.

4. Truck tractor pulling a 53-foot cotton seed module.

Wisconsin:

1. Truck-trailer-trailer where each trailer is a pressurized or nonpressurized tank unit. The overall length is 60 feet or less.

2. Truck and three trailers wherein each trailer carries warning signs used exclusively for highway maintenance or construction. The overall length is 60 feet or less.

3. Farm tractor and two trailers where the trailers are used primarily as implements of husbandry in connection with seasonal agricultural activities. The overall length is 60 feet or less.

4. Truck and three or fewer trailer-type vehicles designed to carry passengers on educational or recreational excursions. The overall length is 50 feet or less.

Wyoming:

1. A truck-trailer combination with a cargo length of 65 feet or less.

All of the above vehicles are covered by the exceptions noted in appendix D, and therefore are not included in the listing.

Any State which relied on the FHWA questionnaire and assumed that it had to supply information only about CMV's with two or more trailers may have been misled. The questionnaire overlooked CMV's with two cargo carrying units where one was not a trailer, such as a straight truck pulling a trailer, even though such vehicle combinations clearly have two or more cargo carrying units. States should furnish the FHWA with information on these vehicles and any other combinations with two or more cargo carrying units which were allowed to operate on the NN on or before June 1, 1991, if the cargo carrying length of the combination exceeds 65 feet. If this information is not provided by May 4, 1992, so that the Agency can include it in the second NPRM interim list, the State could ultimately be prohibited from allowing any further use of such vehicles on the NN highways in the State.

The ISTEA includes three narrow exceptions to the June 1, 1991, freeze date. Wyoming may allow the operation of additional vehicle configurations not in actual operation on June 1, 1991, provided they are authorized by State law not later than November 3, 1992. These configurations must also comply with the Federal single-axle, tandem-axle and bridge formula weight limits.

Ohio may allow LCV's with three cargo carrying units of 28.5 feet each (not including the truck tractor) not in actual operation on June 1, 1991, to be operated within its boundaries on the 1-mile segment of Ohio State Route 7 which begins at, and extends south of, Exit 16 on the Ohio Turnpike.

Alaska may continue to allow the operation of LCV's which were not in actual operation on June 1, 1991, but which were in actual operation prior to July 6, 1991. It may also continue to allow the operation of CMV's with two or more cargo carrying units which were not in actual operation on June 1, 1991, but which were in actual operation prior to July 6, 1991.

In addition to the lists of vehicle configurations, the ISTEA also required each State to submit a copy of all its statutes, regulations, limitations and conditions which apply to the operation of each of the LCV's or extra-length vehicles reported as in use on or before June 1, 1991.

The content of the States' responses to this request covers the full range of what could be supplied, both in terms of items covered and volume of material. The diversity of the contents of the responses is so great that before any list is finalized there is a need for increased uniformity, both in terms of items covered and the type of information provided for a specific item. For example, some States indicate only that a permit is required while others also included the current fee structure. In other instances, a State describes operational conditions for triple trailer combinations by saying, "See appendix A." Appendix A in turn is a lengthy document which includes all possible contingencies and applies to all types of extra-length vehicles. In such instances, the FHWA has attempted to summarize what could otherwise be an extremely complicated and lengthy set of conditions.

One of the subheadings for each LCV or extra-length vehicle described in proposed appendices C and D, respectively, of 23 CFR part 658 is "Operational Conditions." This information was taken directly from the State responses to the questionnaire, regardless of content. In those cases where another document was referenced, the FHWA has attempted to summarize that document. Because of the differences in State-provided responses, there is little consistency as to coverage or depth. Therefore, in addition to asking for comments on this NPRM, we are asking the States and all other sources, including industry trade groups, for additional information to provide consistency in the reporting among States.

In finalizing appendices C and D the FHWA intends to publish the restrictions and conditions in a manner which uniformly presents the information for each State. Accordingly, we are asking those States which allow LCV's or extra-length vehicles to provide the operational conditions subdivided as follows:

1. The weight—list the maximum single-axle, tandem-axle and gross weight, as well as any axle spacing requirements for each combination vehicle.

2. The driver—describe any special training, experience or licensing requirements required to handle the combination vehicle described.

3. The vehicle—describe any special requirements that apply, such as horsepower, braking ability, off-tracking limits or order of trailers.

4. Permit requirements—indicate whether a permit is required and, if so, its duration, type, i.e., whether it is for a single or multiple trip, and if a fee is charged.

5. Access requirements—recognizing that approved operating routes are listed separately, describe any conditions which would restrict vehicle access between terminals and approved highways, i.e., describe what, if any, "reasonable access" conditions exist for the combination described.

We ask that affected States respond with this information by May 4, 1992. If the information is part of a booklet or other publication, we ask that the States succinctly summarize the information for each heading and provide a copy of the source document to the docket. In order to make the final list of limitations and conditions as complete and accurate as possible, a second NPRM will be published seeking comment on the information obtained in response to this request.

Operators of the vehicles described in appendices C and/or D are cautioned, however, that any such operation must be in full compliance with applicable State regulations. The "Operational Conditions" described in appendices C and/or D are intended to be an informational summary of the major conditions for the public at large. They are not to be used as the basis for actual operations.

List of ISTEA Vehicle Operations and Conditions Submitted by States

A summary of the material furnished by the States is shown in appendices C and D to 23 CFR, part 658. Information on LCV's (section 1023 of the ISTEA) is in appendix C and data on vehicles with two or more cargo carrying units (section 4006) are in appendix D. The actual State submissions are on file at the FHWA Headquarters, room 4232, and may be viewed there from 8:30 a.m. to 3:30 p.m., e.t., Monday through Friday, except on holidays.

In addition to seeking comments on the content of this proposed rule, the FHWA is also interested in comments concerning the format of the information presented. Any comments on how this information might be presented in a clearer, more concise manner, while fulfilling the requirements of the ISTEA, are also invited.

Minor Adjustments to Listed Information

Sections 1023 and 4006 of the ISTEA allow States to make minor adjustments of a temporary and emergency nature to route designations and vehicle operating restrictions in effect on June 1, 1991. They also direct the Secretary to issue regulations establishing criteria for the States to follow in making such adjustments. The Secretary must be notified within 30 days of any further restrictions or prohibitions imposed by States on the operation of vehicles subject to the ISTEA.

Minor adjustments must be both emergency and temporary. According to the Conference Report on the ISTEA [H.R. Conf. Rep. No. 404, 102d Cong., 1st Sess. 314 (1991)], the nature of such adjustments is intended to be temporary and very limited; for example, in the case of a bridge failure that would require the rerouting of ISTEA vehicles to highways where they would otherwise be prohibited. Since it is impossible to foresee all types of emergencies that might necessitate a minor adjustment, the proposed regulation would simply require a State to give the FHWA Administrator a detailed description of the emergency requiring an adjustment which exceeds 30 days. Emergency adjustments with a duration of 30 days or less need not be reported to the Administrator. Adjustments lasting more than 1 year would not be considered to be of a temporary or emergency nature. Minor adjustments for the same emergency would not be permitted to be broken into periods of less than 1 year to extend the emergency for a period longer than that. Similarly, an emergency would not be permitted to be broken into 30-day or shorter periods to avoid reporting.

Further Restrictions on ISTEA Vehicles

The ISTEA provides that State restrictions or prohibitions on the operation of LCV's and CMV's with two or more cargo carrying units after June 1, 1991, must be consistent with sections 411, 412, and 416(a) of the STAA. This means States may not prohibit twin trailer combinations with trailers not over 28 feet long (28.5 if grandfathered) from operating on the NN or reasonable access routes. States may not restrict the width of vehicles on the NN or reasonable access routes to less than 102.36 inches. The FHWA may require further information or clarification about subsequent State restrictions or prohibitions on ISTEA vehicles before publishing the information in the **Federal Register**.

Definition of Loads Which Cannot Be Easily Dismantled or Divided

With only a few exceptions, section 4006(a) of the ISTEA freezes the length of vehicles with two or more cargo carrying units at the length allowed on June 1, 1991. However, there is an exception for nondivisible loads. States may issue permits for vehicles with loads that exceed the length allowed in 1991 if the load cannot be easily dismantled or divided. The Conference Report on the ISTEA [*Id.* at 441] states that the types of loads envisioned by this provision are long loads, e.g., missiles or bridge sections on two or more connected flatbed trucks.

The exemption would also apply to very large objects moved on a series of dollies, each of which is technically a cargo carrying unit. Because Congress has authorized the States, in identical terms, to issue overweight and oversize permits "for those vehicles and loads which cannot be easily dismantled or divided" [23 U.S.C. 127(a); section 4006(a) of the ISTEA, to be codified at 49 U.S.C. app. 2311(j)(1)], the FHWA is proposing a definition of "nondivisible load" which would be equally applicable to an overweight and an oversize load. Briefly, a load would be considered nondivisible if dividing it into small or lighter components would destroy its value or cause the shipper or motor carrier significant additional expense to dismantle. This permit authority is not a "loophole," but a limited exception for specific purposes. Assume, for example, that a State did not allow "Turnpike Doubles" on June 1, 1991, but that a motor carrier later wanted to transport two industrial boilers, each of which required a 45-foot-long cargo unit, as part of a "Turnpike Double" combination with one boiler on each cargo unit. A "Turnpike Double" is a common name for a truck tractor-semitrailer-trailer CMV where the semitrailer and trailer are generally each at least 40 feet long and of equal length. Although each boiler is certainly nondivisible, the vehicle combination can easily be split into two tractor trailer units with no effect on the cargo. The combination, therefore, would not qualify for a nondivisible load permit. On the other hand, a permit would be appropriate to move a prefabricated bridge span longer than the maximum length of cargo carrying units allowed on June 1. A nondivisible load permit could also be used for a relatively small cargo carried on a single trailer, e.g., an electrical generator, that would produce a gross vehicle weight above 80,000 pounds. But if each trailer in a conventional double carried one generator and the combination weighed 85,000 pounds, a nondivisible load permit could not be issued because separating the load for shipment on two vehicles would neither destroy its value nor constitute a significant additional cost.

Meaning of "On or Before"

The ISTEA specifies that LCV's may continue to be used only if "in actual operation on a regular or periodic basis (including seasonal operations) on or before June 1, 1991, * * *" [section 1023(b), amending 23 U.S.C. 127(d)(1)(A)]. However, in the same section, amending 23 U.S.C. 127(d)(1)(B), it provides that all such operations shall continue to be subject to rules "in force on June 1, 1991."

The question is whether a State could allow triple trailer combinations, for example, in lawful use at some earlier time but unlawful as of June 1, 1991, to be used after that date. Under the proposed rule, the answer would be that it could not. "On or before" relates to LCV's used on a periodic basis so that even if not in actual use on that date, they nevertheless were authorized to operate on a periodic or other basis on that date.

Procedure to Review and Correct Final List

Sections 1023 and 4006 of the ISTEA provide a review and correction

procedure for the final lists of ISTEA vehicles, to be published as appendices C and D to 23 CFR part 658. Any person or State may request that the Secretary review the final list to determine if there is cause to believe that it contains a mistake. The Secretary may also make such a review. If the Secretary believes an error exists, he or she must commence a proceeding to determine if the list should be corrected, and if so, make the correction.

Rulemaking Analyses and Notices, Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

The FHWA has determined that this action is not major within the meaning of Executive Order 12291 or significant within the meaning of Department of Transportation regulatory policies and procedures. It is anticipated that the economic impact of this rulemaking will be minimal; therefore, a full regulatory evaluation is not required.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act [5 U.S.C. 601 *et seq.*], the FHWA has evaluated the effects of this rule on small entities. Based on the evaluation, the FHWA hereby certifies that this action will not have a significant economic impact on a substantial number of small entities. This action merely lists applicable limitations by specific vehicle combination, by State, in effect on June 1, 1991, and will not further restrict the operation of any vehicle in lawful operation on or before June 1, 1991, and subject to those limitations.

Executive Order 12612 (Federalism Assessment)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this action does not have sufficient federalism implications to warrant the preparation of a federalism assessment. Although its effect will be to prevent the expansion of the ISTEA vehicle network beyond that which States allowed on June 1, 1991, there is no indication at this time that the States planned any significant expansion of that network which would be impeded by these regulations. This action merely implements requirements of the ISTEA.

Executive Order 12372 (Intergovernmental Review)

Catalog of Federal Domestic Assistance Program Number 20.217, Motor Carrier Safety. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities do not apply to this program.

Paperwork Reduction

This action does not contain a collection of information requirement for purposes of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

National Environmental Policy Act

The Agency has analyzed this action for the purpose of the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and has determined that this action would not have any effect on the quality of the environment.

Regulation Identification Number

A regulation identification number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

List of Subjects in 23 CFR Part 658

Grant programs—transportation, Highways and roads, Motor carrier size and weight.

Issued on: March 10, 1992.

T. D. Larson,

Administrator.

In consideration of the foregoing, the FHWA proposes to amend chapter I of title 23, Code of Federal Regulations, part 658 as set forth below.

PART 658—TRUCK SIZE AND WEIGHT, ROUTE DESIGNATIONS—LENGTH, WIDTH, AND WEIGHT LIMITATIONS

1. The authority citation for 23 CFR part 658 is revised to read as follows:

Authority: 23 U.S.C. 127; 49 U.S.C. App. 2311, 2312, 2313, and 2316; 23 U.S.C. 315; and 49 CFR 1.48.

2. Section 658.5 is amended by adding paragraphs (u), (v) and (w) to read as follows:

§ 658.5 Definitions.

* * * * *

(u) *Longer combination vehicle.* As used in this part, longer combination vehicle (LCV) means any combination of a truck tractor and two or more trailers or semitrailers which operates on the Interstate System at a gross vehicle weight greater than 80,000 pounds.

(v) *Cargo carrying unit.* As used in this part, cargo carrying unit means any portion of a commercial motor vehicle combination (other than a truck tractor) used for the carrying of cargo, including a trailer, semitrailer or the cargo carrying section of a single unit truck.

(w) *Nondivisible load.* As used in this part, nondivisible load means any load with carrying vehicle heavier or longer than the legal limit which cannot be separated into two or more lighter or smaller components without destroying the value of the shipment or imposing significant additional costs on the shipper or motor carrier to dismantle the load.

3. Part 658 is amended by adding § 658.23 as follows:

§ 658.23 LCV freeze; cargo carrying unit freeze.

(a)(1) Except as otherwise provided in this section, a State may allow the operation of longer combination vehicles only as listed in appendix C of this part.

(2) Except as otherwise provided in this section, a State may not allow the operation on the National Network of any commercial motor vehicle combination with two or more cargo carrying units (not including the truck tractor) whose cargo carrying units exceed:

(i) The maximum combination trailer, semitrailer or other type of length limitation authorized by State law or regulation of that State on or before June 1, 1991; or

(ii) The length of the cargo carrying units of those commercial motor vehicle combinations, by specific configuration, in actual, lawful operation on a regular or periodic basis (including continuing seasonal operation) in that State on or before June 1, 1991, as listed in appendix D of this part.

(b) Wyoming shall notify the Federal Highway Administrator within 30 days after November 3, 1992, if additional vehicle configurations were authorized by legislation prior to that date. The notification shall include a copy of the legislation and a description of the vehicle length and weight restrictions and other operating conditions imposed.

(c) For specific safety purposes and road construction, a State may make minor adjustments of a temporary and emergency nature to route designations and vehicle operating restrictions applicable to combinations subject to sections 1023 and 4006 of the ISTEA and in effect on June 1, 1991 (for Wyoming November 3, 1992, and Alaska July 6, 1991). Adjustments which last 30 days or less may be made without notifying the Administrator. In case of minor adjustments which exceed 30 days in length, a State must notify the Administrator in writing by the end of the 30th day giving a description of the emergency, the date on which it began and the date on which it will end. Consecutive adjustments totaling more than 30 days must also be reported to the Administrator. If the adjustment involves route designations, the State must list in detail the new route on which vehicles otherwise subject to the freeze imposed by sections 1023 and 4006 of the ISTEA are allowed to operate. If the adjustment involves vehicle operating restrictions the State must list the restrictions that have been removed or modified. Upon receipt of the notification, the Administrator will publish a notice of adjustment, with an expiration date, in the Federal Register. No adjustment may be maintained for longer than 1 year. If the FHWA determines that minor adjustments made by a State are not legitimately attributable to road or bridge construction or safety, the Administrator will so inform the State, and the original conditions of the freeze must be reimposed immediately. Failure to do so may subject the State to a penalty pursuant to 23 U.S.C. 141.

(d) States further restricting or prohibiting the operation of vehicles subject to sections 1023 and 4006 of the ISTEA after June 1, 1991, shall notify the Administrator within 30 days after the restriction is effective. The Administrator will publish the restriction in the Federal Register as an amendment to appendix C and/or D of this part, as appropriate. Failure to provide such notification may subject the State to a penalty pursuant to 23 U.S.C. 141.

(e) The Administrator, on his or her own motion or upon a request by any person (including a State), shall review the information set forth in appendices C and/or D of this part to this part. If the Administrator determines there is cause to believe that a mistake was made in the accuracy of the information contained in appendix C and/or D of this part, the Administrator shall commence a proceeding to determine whether the information published should be corrected. If the Administrator determines that there is a mistake in the accuracy of the information contained in appendix C and/or D of this part, the Administrator shall publish in the Federal Register the appropriate corrections to reflect that determination.

4. Part 658 is amended by adding appendices C and D to read as follows:

Appendix C to Part 658—Trucks Over 80,000 Pounds on the Interstate System

This appendix contains information by State regarding the status of commercial motor vehicle combinations consisting of a truck tractor and two or more trailers or semitrailers, lawfully operating on the Interstate System, with a gross weight in excess of 80,000 pounds. For those 22 States in which the described vehicle was allowed on a regular or periodic basis (including seasonal operations) on or before June 1, 1991, additional information summarizing the operational conditions, routes and legal citations is also provided. The term "Interstate System" as used herein refers to the National System of Interstate and Defense Highways, renamed to the Dwight D. Eisenhower System of Interstate and Defense Highways by Public Law 101-427.

State: Alaska.

Operational Conditions: On the National Network (NN), Longer Combination Vehicles (LCV's) except triples may operate without a permit, speed or time-of-day restrictions. Triple trailer combinations must obtain a permit and pay a permit fee. All LCV's with an overall length greater than 75 feet are required to display "Oversize" signs front and rear. During the annual spring thaw, all commercial vehicles, including LCV's, are restricted on the amount of weight that each axle grouping is allowed to carry. The Alaska Department of Transportation and Public Facilities (DOT & PF) makes the determination on the percentage and the portion(s) of the highways affected. Weather restrictions are imposed when hazardous conditions exist as determined by the Alaska DOT & PF and the Alaska Department of Public Safety, Division of State Troopers.

Routes:

	From	To
AK-1	Anchorage (Potter Weigh Station).	Palmer (Palmer-Wasilla Highway Junction)
AK-2 [1]	Fairbanks (Gaffney Road Junction).	Delta Junction (MP 1412 Alaska Highway).
AK-3	From its Junction with AK-1.	Fairbanks (Gaffney Road Junction).

[1] AK-2 is not open to triple trailer combinations.

Administrative Permit Manual

State: Arizona.

Operational Conditions: On all listed routes, the company must have a Certificate of Compliance on file and a permit in the possession of the driver when operating a longer combination vehicle (LCV).

All companies must have an active safety program. All drivers are required to comply with Motor Carrier Safety Regulations of the U.S. DOT and title 28, Arizona Revised Statutes.

LCV's shall not exceed the legal or posted speed, whichever is lower.

LCV's are allowed continuous travel except during adverse weather conditions, at which time movement of LCV's is prohibited.

All LCV's are restricted to a 20-mile border area from any adjacent State which allows such combinations of length and gross vehicle weight.

Routes:

	From	To
I-15	Nevada State Line	Utah State Line.

ARS 28-1011.F	

State: Colorado.

Operational Conditions: Longer Combination Vehicles (LCV's) must purchase an annual permit pursuant to C.R.S. 42-4-404.5(1). To operate at greater than 80,000 pounds, LCV's must purchase an overweight permit pursuant to C.R.S. 42-4-409(11)(a)(II)

(A), (B) or (C) and comply with Rule 4–15 in the Extra-Legal Vehicles and Loads Rules. LCV's must comply with the rules and regulations for the Operation of Longer Combination Vehicles on Designated State Highway Segments. The rules address all restrictions and requirements that are imposed on LCV's. However, instead of complying with Rule 5–1 in the Longer Combination Vehicle Rules, LCV's operating at greater than 80,000 pounds must comply with Rule 4–1–5 in the Extra-Legal Vehicles and Loads Rules concerning hours of operation restrictions.

Routes:

	From	To
I–25	Colorado-New Mexico State Line.	Colorado-Wyoming State Line.
I–70	US 40 and SH 26 in Denver	Colorado-Kansas State Line.
I–70	Colorado-Utah State Line.	Jct. SH 13 in Rifle.

I–270	Jct. I–70 in Denver	Jct. I–76 in Denver

Legal Citations: LCV's must comply with all applicable statutes, such as C.R.S. 42–4–406(2)(b)(I) and (2)(c) axle weight limitations, C.R.S. 42–4–402(1) width, C.R.S. 42–4–404(1) height and C.R.S. 42–4–409(11)(a)(II) (A), (B) or (C) overweight permits. LCV's must comply with Rule 4–1–5 in the Extra-Legal Vehicles and Loads Rules and with the Longer Combination Vehicle Rules.

State: Idaho.

Operational Conditions: Permits are required. Permit duration is 1 year from the date of issuance. There are extra-length, excess-weight and (if the vehicle operates on the Interstate System) extra-length/excess-weight permits.

The maximum number of units allowed in a combination vehicle is one tractor and three cargo units.

Vehicles under permit must comply with the Calculated Maximum Off-Track (CMOT) Formula (shown below).

$CMOT = R - [R^2 - (A^2 + B^2 + C^2 + D^2 + E^2)]^{1/2}$

$R = 165 - 4 = 161$

A, B, C, D, E, etc. equals measurements between points of articulation or pivot. Squared dimensions to stinger steer points of articulation are negative.

Vehicles under permit must also comply with axle weight, width and length and limits of Idaho Code, section 49–1001.

Maximum weight: Registered weight up to 105,500 pounds.

Maximum width: 8 feet 6 inches.

Maximum length: 105 feet and CMOT of 8.75 feet (Interstate routes)

Routes: All Interstate routes. Access between Interstate and breakdown areas only via interchanges designated for combinations with CMOT of 6.5 to 8.5 feet.

Rule 4
Indiana Code 9–8–1–16
Indiana Code 8–15–2
135 Indiana Administrative Code 2

State: Kansas.

Operational Conditions: Permits are not required for operation on the Kansas Turnpike. A permit is required for access between the turnpike and motor freight terminals located within a 10-mile radius of each toll booth, except at the northeastern end of the turnpike where a 20-mile radius is allowed. A fee per company and a permit for each power unit is required for special vehicle combinations (SVC), i.e., "triples." Access permits are valid for 6 months, while SVC permits are valid for 1 year.

The maximum number of units in a combination vehicle is three cargo carrying units plus one tractor.

The maximum combination vehicle length is 119 feet overall length. Authorization from the Chief Engineer/Manager or Highway Patrol Captain is required for loads and vehicles longer than 119 feet. SVC trailers are limited to 28.5 feet in length.

The maximum vehicle width is 12.5 feet for vehicles and loads for both day and night operation. The maximum vehicle height is 14 feet. Vehicles and loads activating high load detectors must stop and cannot proceed without authorization. The maximum vehicle weight is 120,000 pounds on the turnpike; however, SVC's have a maximum weight of 110,000 pounds and must comply with the Federal bridge formula. The maximum axle weight is 20,000 pounds on a single axle and 34,000 pounds on a tandem axle.

SVC permits can include any restrictions deemed necessary, including specific routes and hours, days and/or seasons of operation. Rules and regulations can be promulgated regarding driver qualifications, vehicle equipment and operational standards. SVC's cannot be dispatched or operated during adverse weather conditions. All axles, except steering axles, must have dual wheels and all vehicles must be able to achieve and maintain a speed of 40 miles per hour on all grades. Drop and lift axles are prohibited. A minimum of six and a maximum of nine axles are required. All but the steering axle must be equipped with an antispray device. The heaviest trailers are to be placed forward. Following distance is 100 feet for every 10 miles per hour. SVC's must travel in the right lane, except for passing. Hazardous cargo is prohibited. Convex mirrors are required on both sides of the cab. Drivers must have a CDL with appropriate endorsements: 2-years experience driving tractor semitrailers, 1 year driving doubles, have completed SVC driving training and a company road test. Equipment must comply with the requirements of 49 CFR 390–399.

The turnpike has no time-of-day travel restrictions, however, SVC's cannot operate on holidays or during holiday weekends.

Routes: SVC's are allowed to travel the entire length of the turnpike. However, SVC's are restricted on I–70 to travel only from a truck terminal located within 5 miles of Goodland to the Kansas-Colorado State Line, and on US 69 Alternate from Baxter Springs to the Kansas-Oklahoma State Line. The Interstate Route designation of the turnpike is as follows.

	From	To
I–35	Oklahoma State Line.	Kansas Turnpike Authority (KTA). Milepost 127.
I–70	KTA Milepost 162	KTA Milepost 223.
I–335	KTA Milepost 127	KTA Milepost 177.
I–470	KTA Milepost 177	KTA Milepost 182.

State: Massachusetts.

Operational Conditions: Both the tractor manufacturer for each tractor used in tandem trailer operations on the turnpike and the permittee shall certify to the Massachusetts Turnpike Authority (MTA) prior to the approval of a tractor that it is capable of hauling the maximum permissible gross load to be transported by the permittee at a speed not less than 20 miles per hour on all portions of the turnpike system.

Brake Regulation

1. The brakes on any vehicle or dolly converter or combination of vehicles used in tandem trailer operations shall comply with Federal regulations as stated in 49 CFR 393, subpart C, as revised, and effective on the date of entry upon or use of the turnpike.

2. In addition, any vehicle or dolly converter or combination of vehicles used in tandem trailer operations shall meet the requirements of the provisions of the Massachusetts Motor Vehicle Law.

3. On units of tandem trailer combinations certified on and after June 1, 1968, the brake application line of every tandem combination shall be equipped with suitable devices to accelerate application and release of the brakes of the towed vehicles, and these devices shall be so arranged that the brake application signal does not pass directly through more than one trailer, but is dead-ended at the rear of the trailer or alternatively at the dolly, and the application signal then is retransmitted to the dolly and the second trailer. The devices required above for retransmission of the application signal shall be closely connected to and supplied by air reservoirs which have their air supplied to them by the emergency line. In the event of rupture of the application line on the towed vehicle of any tandem combination, the loss of brake application shall be limited upstream of the loss to those vehicles between the rupture and the first retransmission device.

Axles

A tractor used to haul a tandem trailer combination with a gross weight of more than 110,000 pounds shall be equipped with tandem rear axles, each of which shall be engaged to bear its full share of the load on the roadway surface.

Tandem Assembly

In the assembly of tandem combinations prior to their operation on the turnpike, the permittee shall ascertain the total gross weight of each trailer of the proposed combination. In the event that the gross weight of the trailers vary by more than 20 percent, the permittee shall couple them for each trip according to their gross weight, that is with the heaviest trailer coupled to the tractor.

Indication That Trailers Form One Unit

When the distance between the rear of one semitrailer and the front of the following semitrailer is 10 feet or more, the dolly shall be equipped with a device, or the trailers shall be connected along the sides with suitable material, which will indicate to other turnpike users that the trailers are connected and are in effect one unit. Such devices or connections shall be approved by the MTA prior to use on a tandem trailer combination.

Shifting and Swerving

Coupling devices shall be so designed, constructed and installed and the vehicles in a tandem trailer combination traveling on a level, smooth, paved surface will follow in the path of the towing vehicle without shifting or swerving from side to side over 3 inches to each side of the path of the towing vehicle when it is moving in a straight line.

Registration of Drivers

Proposed drivers of tandem trailer combinations shall be registered by the MTA prior to driving such equipment on the turnpike. Applications for registration shall include all specified driving, safety and physical examination records and be accompanied by an official abstract of the driving record of the individual for whom it is being submitted. Drivers of tandem trailer combinations are required to prove to the MTA a minimum of 5 years of tractor trailer driving experience.

Speed Regulations

Tandem trailer combinations shall comply with the existing speed regulations for trucks and shall be subject to the rigid enforcement of the 55 miles per hour speed limit, or any lower speed limit posted due to adverse weather or road conditions for such vehicles on the turnpike.

Distance Between Vehicles

A minimum distance of 500 feet, or approximately two delineator spaces, shall be maintained under normal conditions between a tandem trailer combination and a vehicle traveling in front of it in the same travel lane, except when passing occurs.

Passing

A tandem trailer unit may pass another vehicle traveling in the same direction only if the speed differential will allow the tandem trailer unit to complete the maneuver and return to the normal driving lane within a distance of 1 mile.

Turnpike Regulations

Except as noted herein, and in the Tandem Trailer Permit, all rules and regulations governing the use and occupancy of the turnpike shall apply to the operation of tandem trailer combinations on the turnpike.

Miscellaneous Powers

The MTA may revoke or temporarily suspend at will any permit issued for the operation of tandem combinations on the turnpike, at its sole discretion, in whole or in part. If the MTA temporarily suspends tandem trailer operations at any time for any reason, including reasons of inclement weather, reconstruction MTA or other conditions, the instructions of the Authority and of the Massachusetts State Police shall be complied with immediately.

Makeup-Breakup Areas

Tandem trailer units shall be assembled and disassembled only in special makeup-breakup areas designated for this purpose by the MTA; no combination consisting of a truck tractor, first semitrailer and dolly, with or without a second semitrailer, shall exit from the turnpike into a publicly maintained highway within the Commonwealth of Massachusetts, except where other laws or local regulations permit.

State: Montana.

Operational Conditions: Any vehicle carrying a divisible load over 80,000 pounds must comply with the bridge formula and purchase a restricted route permit. An exception to the Federal bridge formula requirement is allowed for vehicles traveling on I–15 between Canada and Shelby, Montana under the authority of the Memorandum of Understanding which exists between Montana and the Canadian Province of Alberta.

These vehicles are allowed to travel 24 hours a day, 7 days a week. In addition, there are no special requirements for the drivers of these vehicles. All over-dimensional loads are prohibited from travel when adverse weather conditions pose a threat to public safety.

Routes: All Interstate routes.

State: Nebraska.

Operational Conditions: Permits for which a fee is charged are required for operation on the Interstate System only. Axle weight limits are 20,000 pounds for single axle and 34,000 pounds for tandem axle. Lift axles, which may be raised or lowered from within the vehicle or which have controls that may be reached from within the vehicle, and dummy axles will be disregarded in determining lawful weight.

(1) No wheel of a vehicle or trailer equipped with pneumatic, solid rubber or cushion tires shall carry a gross load in excess of 10,000 pounds on any road or highway nor shall any axle carry a gross load in excess of 20,000 pounds on any road or highway.

(2) No group of two or more consecutive axles shall carry a load in pounds in excess of the value given in the following table corresponding to the distance in feet between the extreme axles of the group, measured longitudinally to the nearest foot, except that the maximum load carried on any group of two or more axles shall not exceed 80,000 pounds on the National System of Interstate and Defense Highways unless the Director-State Engineer authorizes a greater weight.

60				85,500	90,000	95,000

(3) The distance between axles shall be measured to the nearest foot. When a fraction is exactly one-half foot the next larger whole number shall be used, except that (a) any group of three axles shall be restricted to a maximum load of 34,000 pounds unless the distance between the extremes of the first and third axles is at least 96 inches and (b) the maximum gross load on any group of two axles, the distance between the extremes of which is more than 8 feet but less than 8 feet 6 inches, shall be 38,000 pounds.

(4) The weight limitations of wheel and axle loads shall be restricted to the extent deemed necessary by the Nebraska Department of Roads for a reasonable period where road subgrades or pavements are weak or are materially weakened by climatic conditions.

(5) Vehicles equipped with a greater number of axles than provided in the table shall be legal if they do not exceed the maximum load upon any wheel or axle, the maximum load upon any group of two or more consecutive axles, the total gross weight or any of such weights as provided in paragraphs (2) and (4) of this section on Nebraska.

(6) This section shall not apply to a vehicle that has been issued a permit pursuant to section 39-6,181.

(7) Any two consecutive axles, the centers of which are more than 40 inches and not more than 96 inches apart, measured to the nearest inch between any two adjacent axles in the series shall be defined as tandem axles and the gross weight transmitted to the road surface through such series shall not exceed 34,000 pounds. No axle of the series shall exceed the maximum weight permitted under this section for a single axle.

Provisions Applicable for the Movement of Multi-Unit Combinations of Trailers and Semitrailers Requiring Special Permits in Nebraska

Definitions

Extra-Long Vehicle Combinations: For the purpose of these rules and regulations, extra-long vehicle combinations may include the following vehicle combinations:

A vehicle combination consisting of a truck tractor, semitrailer and two trailers having an overall length of not more than 105 feet, the semitrailer and trailers of which must be of approximately equal lengths.

A vehicle combination consisting of a truck tractor, semitrailer and single trailer having an overall length of not more than 105 feet, the semitrailer and trailers of which must be of approximately equal lengths.

A vehicle combination consisting of a truck tractor, semitrailer and single trailer, one trailer of which is not more than 48 feet long and the other trailer of which is not more than 28 feet long nor less than 26 feet long. The entire combination of which is not more than 95 feet long. In this combination, the shorter trailer shall be operated as the rear trailer.

Trailer shall mean any vehicle, with or without motive power, designed for the carrying of property and for being drawn by a motor vehicle and so constructed that no part of its weight rests upon the towing vehicle; and for the purpose of these rules and regulations, a semitrailer used with a converter dolly shall be considered a trailer.

A location within 6 miles of the Interstate System that is approved by the permit and that is to be used by the permittee for assembling or disassembling extra-long vehicle combinations.

Highways, roads or streets upon which the permittee will be allowed to move an extra-long vehicle combination when moving from or to a designated staging area and to or from the Interstate System and the area of the interchanges of the Interstate System which may be traveled by the permittee. No extra-long vehicle permits will be issued to allow travel east of Nebraska Highway 50 on the Interstate System. Except as designated on the permit, in case of deteriorating weather conditions, emergency or breakdown, vehicles moving by authority of an extra-long vehicle permit shall not be permitted to reenter the Interstate System.

The Nebraska Department of Roads, at its discretion, may issue permits for the operation of extra-long vehicle combinations when unladen, but only over a designated route on the Interstate System and from a staging area located not more than 6 miles from the Interstate System.

No departure from, amendment, alteration or change of the routes designated on the extra-long vehicle combination permit shall be allowed. If the permit holder desires to travel on any route not designated on its permit the Nebraska Department of Roads must approve, in writing, an amendment authorizing the additional route.

Inspection of Permit and Vehicle: As a condition of the issuance of an extra-long vehicle combination permit, applicant must agree that the operator of the vehicle operating under the authority of an extra-long vehicle combination permit will submit to an inspection of the permit and of the vehicle at any time such vehicle is on Nebraska highways, whether or not there is reason to believe that such vehicle is in violation of the permit or the Nebraska motor vehicle laws. A copy of the permit must be carried in the power unit of the extra-long vehicle combination.

The granting of a permit by the Nebraska Department of Roads may contain restrictions or prohibit operations as determined necessary by the Department of Roads. Movement shall be made during daylight hours (sunrise to sunset). No movement shall be permitted on Saturdays, Sundays, holidays or long holidays as defined in the Department of Roads' rules and regulations pertaining to the issuing of over-dimensional and overweight permits. No movement will be permitted when the ground winds, in the vicinity or on the highways over which the extra-long vehicle combinations may move, exceed a velocity of 25 miles per hour, nor during steady rain, snow, sleet, ice or other conditions that cause the pavement to be slippery or when visibility is less than 800 feet. Should any of these conditions be encountered after commencement of the move, the driver shall cease operations by moving the extra-long vehicle combination from the roadway at the first point that the vehicle can be safely removed to prohibit the hazardous operation of the combination and to provide for safety of other highway users. Movement of extra-long vehicle combinations during any of the aforesaid prohibited times shall be grounds for revocation of the permit.

Application For Extra-Long Vehicle Combination Permit

An annual permit application shall be made on the Standard Form Number RM-425 furnished by the Nebraska Department of Roads and shall be submitted to the State of Nebraska, Department of Roads, Permit Office, Lincoln, Nebraska. Permits will only be issued from the Lincoln Permit Office, Monday through Friday from 8 a.m. to 12 p.m. and 1 p.m. to 5 p.m. when open for business. Permittee shall give at least 5 working days for processing of any extra-long vehicle combination permits.

The permit application must list all truck tractors to be operated under the registered permit, as well as the license number of such vehicles, the State of issuance of the license, number of such vehicles, the vehicle identification numbers and the drivers who will operate under the requested permit. Only trucks owned or leased exclusively to the permit applicant for the entire term of the requested permit and only drivers under the control and supervision of the applicant may be listed on such applications. An annual permit is required for each qualified carrier company or individual. In the event the permittee desires to change the information listed on its permit application regarding vehicles or drivers, it may do so by written notice to the Nebraska Department of Roads in Lincoln. Such notice shall be by means of registered or personally delivered mail and shall not be effective for a period of 2 calendar days from the receipt of such notice by Nebraska Department of Roads.

Applicants for an extra-long vehicle combination permit must certify in writing to the Nebraska Department of Roads that the driver of a vehicle which is permitted to move by authority of such permit has complied with all Federal Motor Carrier Safety Regulations and all State laws, rules and regulations pertaining to drivers and drivers' licenses. Applicants must notify the Nebraska Department of Roads, in writing, of traffic citations issued to any driver for improper operation of an extra-long vehicle combination within 5 days of the issuance of said citation.

The owner or operator of each extra-long vehicle combination shall have on file with the Nebraska Department of Roads, an insurance certificate with a company authorized to do business in Nebraska, in an amount of not less than $1 million for public liability and property damage. The insurance certificate must contain a provision stating that the insurance company will give at least 30 days written notice to the Nebraska Department of Roads in case of cancellation.

Additional Restrictions Pertaining to Movement of Extra-Long Vehicle Combinations

From November 15 to April 15 of each year, the permittee must contact the Nebraska Department of Roads in Lincoln, Nebraska, between the hours of 8 a.m. and 5 p.m. on any day the Nebraska Department of Roads is open for business and within 3 hours prior to commencing travel to obtain authorization for movement that day. From April 16 through November 14 of each year, the permittee must contact the Nebraska Department of Roads in Lincoln, Nebraska, between the hours of 8 a.m. and 5 p.m. on any day that the Nebraska Department of Roads is open for business and within three days of commencing travel to obtain authorization for movement. The Department of Roads will at that time issue an authorization number, record the time of the call, the driver of the vehicle to be moved and the route to be traveled.

A sign may be required to be displayed at least 8 feet above the roadway surface on the rear-most vehicle of the combination of the vehicles. The sign shall be of yellow reflectorized material with reflectorized black letters of not less than 10 inches high, and must conform to the diagram set forth Nebraska's Exhibit A (not included).

The granting of a permit shall not constitute a waiver of any license (tonnage) requirements imposed by the State of Nebraska.

The granting of a permit pursuant to these rules and regulations shall not waive any liability or responsibility of the applicant which might accrue for property damages.

including damage to the highways, or for personal injuries resulting from the operation of extra-long vehicle combinations.

A distance of at least 500 feet must be maintained between all vehicles and any two extra-long combination of vehicles when operating on Nebraska streets or highways, except when one extra-long combination of vehicles is passing another.

All vehicles in an extra-long combination of vehicles and all devices used to couple vehicles in the extra-long vehicle combination must be designed, constructed and installed so that each towed vehicle follows the alignment of the towing vehicle without shifting or swerving more than 3 inches to the right or left of the alignment when the combination is moving in a straight line on a level, smooth, paved highway during calm, dry weather conditions.

Extra-long vehicle combinations of not more than three cargo units shall have not less than six axles nor more than nine axles.

In addition to any other accident reports required by State or Federal laws, all accidents involving extra-long vehicle combinations shall be reported in writing by the permittee to the Nebraska Department of Roads, Permit Office, P.O. Box 94759, Lincoln, Nebraska 68509 within 5 business days of such accident.

The Nebraska Department of Roads may impose additional restrictions and requirements not set forth in these rules and regulations as a condition for the operation of the extra-long vehicle combinations over particular highways or sections of particular highways in this State. The Nebraska Department of Roads shall revoke or amend a decision to allow the operation of an extra-long vehicle combination on any highway of this State if changed circumstances or conditions render the operation of the combination of vehicles impracticable or unsafe.

Routes: All Interstate Highways.

Nebraska Dept. of Roads Rules and Regulations, title 408, chapter 1

State: Nevada.

Operational Conditions: Permitted vehicles may have total overall lengths between 70 feet and 105 feet, when consisting of not more than three trailers or a truck and two trailers. No trailer shall be longer than 48 feet. If a trailer is 48 feet the other trailer cannot exceed 42 feet. Maximum weight not to exceed 129,000 pounds using uncapped Federal Bridge Formula B.

Identifying devices must be carried and displayed. Nevada regulations establish standards for the operation of such vehicles including:

(a) Types and number of vehicles to be permitted in combination;

(b) Horsepower of a motor truck;

(c) Operating speeds;

(d) Braking ability; and

(e) Driver qualifications.

66–7–410 NMSA 1978

State: New York.

Operational Conditions: Tandem trailer combinations in excess of the limits of section 385 of the New York State Vehicle and Traffic Law may operate on the thruway system under a Tandem Trailer Permit issued by the New York State Thruway Authority upon application to it by the prospective permittee on Form TA–6807, subject to certain provisions as follows:

Definition of a Tandem

A complete tandem trailer combination shall consist of a tractor, first semitrailer, dolly and second semitrailer; tractor, first semitrailer and dolly or other such combination as may be approved by the Authority. No semitrailer, including any load thereon, shall be in excess of 48 feet. The total length of the combination, including the tractor, semitrailers and dolly, shall not exceed 114 feet.

Also, tandem combinations not utilizing a converter dolly, but a sliding fifth wheel attached to the lead trailer commonly referred to as "B–Train" combination, will require separate Thruway Engineer Services approval prior to initial tandem run. Special provisions regarding B–Train's will be reviewed at time of application or request for use on the thruway.

Weight Limits

Any such combinations of vehicles may not exceed a total maximum gross weight of 143,000 pounds. The maximum gross weight of the unit of tractor and first semitrailer shall not exceed 80,000 pounds. The maximum gross weight that may be carried upon any combination of units is limited by the maximum gross weight that can be carried upon each unit and the axles thereof as provided in section 385 of the New York State Vehicle and Traffic Law.

Thruway requirements for maximum gross weights of tandem combinations exceeding 138,000 pounds:

1. Gross weight in excess of 138,000 pounds must have a tandem-axle dolly to meet the nine axle requirement.

2. The maximum permissible gross weight for B-Train combinations is 127,000 pounds.

Hazardous Materials

Special restrictions, along with 49 CFR part 397 of the Federal Motor Carrier Safety Regulations, are applicable to the transportation of hazardous materials.

All radioactive material and Class A and B explosives are prohibited. Other hazardous materials, classifications 2 through 9, as defined in the U.S. DOT, section 173.2, may be carried in tandem combinations, but the total volume of such material in a tandem combination shall not exceed the total volume that could be carried in a single trailer.

All provisions of the Federal Motor Carrier Safety Regulations shall be observed at all times. All unattended tandem combinations containing or including the power unit shall have the shipping papers of each trailer unit in the vehicle, available and accessible for review. All single trailers or trailer combinations shall display appropriate placarding as required.

Over-Dimension Regulations

All over-dimensional and weight regulations of the Authority shall apply to such units unless specifically excluded under the terms of the Tandem Trailer Permit of these regulations.

Safety Training

Prior to the issuance of a Tandem Operator Certification, company management and operating personnel must comply with safety training requirements set by the Authority.

The Authority has established a program of safety training seminars for all certified tandem companies and company safety patrols. The safety-intensive classes are tailored to the individual needs of each company and offered at no charge during normal business hours with lectures, video presentations and hands-on demonstrations. Authority personnel will cover the following subjects:

1. Proper tandem hookups.
2. On-the-road operations.
3. Professional driver safety attitudes.
4. Tandem Rules & Regulations.
5. Certification procedures.
6. Expediting paperwork.
7. Accident/incident investigations.
8. Disabled vehicle procedures.
9. Hazardous materials regulations.
10. Sharing the road with other drivers.
11. Tandem area usage.
12. Federal Motor Carrier Safety Regulations Parts 383, 392, 395, 396.

Certification of Tractors

Both the tractor manufacturer for each tractor used in tandem trailer operations on the Thruway and the permittee shall certify to the Authority prior to the approval of the tractor that it is capable of hauling the maximum permissible gross load to be transported by the permittee at a speed on not less than 20 miles per hour on all portions of the thruway system.

Companies leasing equipment requiring certification for use in tandem operations are responsible for certification and maintenance of all equipment.

Brake Regulations

(1) The brakes on any vehicle or dolly converter or combination of vehicles used in tandem trailer operations shall comply with the Federal regulations as stated in 49 CFR 393, as amended.

(2) In addition, any vehicle or dolly converter or combination of vehicles used in tandem trailer operations shall meet the additional applicable requirements of the provisions of the New York State and Traffic Law.

(3) On units of tandem trailer combinations certified on and after June 1, 1968, the brake application line of every tandem combination shall be equipped with suitable devices to accelerate application and release of the brakes of the towed vehicles, and these devices shall be so arranged that the brake application signal does not pass directly through more than one trailer but is dead-ended at the rear of the lead trailer or, alternatively at the dolly, and the application signal then retransmitted to the dolly and the second trailer. The devices required above for retransmission of the application signal shall be closely connected to and supplied by air reservoirs which have their air supplied to them by the emergency line. In the event of rupture of the application line on the towed vehicles of any tandem combination, the loss of brake application shall be limited to those vehicles between the rupture and the first transmission device.

Axle Type

A tractor which will be used to haul a tandem trailer combination with a total gross weight of more than 110,000 pounds shall be equipped with tandem rear axles, both with driving power, or other axle configuration as may be approved by the Authority.

A tractor which will be used to haul a tandem trailer combination with a total gross weight of 110,000 pounds or less may be a two axle tractor with a single drive axle.

Any tandem combination utilizing single wheel tires commonly referred to as "Super Singles" instead of conventional dual wheel is required to utilize triple-axle tractors, dual-axle trailers and dual-axle dollies.

Tandem Assembly

In the assembly of tandem combinations prior to their operation on the thruway, the permittee shall ascertain the total gross weight of each trailer of the proposed combination. When the gross weight of the two trailers in a tandem combination vary more than 20 percent, the heavier of the two must be placed in the lead position.

Dollies

Every converter dolly certified on and after June 1, 1968, used to convert a semitrailer to a full trailer may have either single or tandem axles at the option of the permittee. However, single-axle dollies may not utilize low profile tires. Tandems grossing in excess of 138,000 pounds must have a tandem-axle dolly to meet the nine-axle requirement.

When the distance between the rear of the first semitrailer and the front of the following semitrailer is 10 feet or more, the dolly shall be equipped with a device, or the trailers shall be connected along the sides with suitable material, which will indicate to other thruway users that the trailers are connected and are in effect one unit. Such devices or connection shall be approved by the Authority prior to use on a tandem trailer combination.

Any tandem combination utilizing single wheel tires, commonly referred to as "Super Singles," instead of conventional dual wheels is required to utilize triple-axle tractors, dual-axle trailers and dual-axle dollies.

Also, tandem combinations not utilizing a converter dolly, but a sliding fifth wheel attached to the lead trailer commonly referred to as "B-Train" combination, will require separate Thruway Engineer Service approval prior to initial tandem run. Special provisions regarding B-Trains will be reviewed at time of application or request for use on the thruway.

Driver forms required for permit	Quantity
(TA–6818) Application for special permit to operate tandem trailer vehicle	3
Accident reports (within last five years)	1
Medical certificate (within last two years)	2
Motor vehicle driver's ten year abstract (original-certified copy, dated within last 3 months) not required by New York State licensed operators	

Speed Limit

Tandem trailer combinations shall comply with the existing speed regulations for trucks and shall be subject to the rigid enforcement of 55 miles per hour speed limit, or any lower speed limit posted due to adverse weather or road conditions for such vehicles on the thruway. Radar detection devices are not permitted in tandem operations on the thruway.

Operational Safety

A minimum distance of 500 feet, or approximately four delineator spaces, shall be maintained under normal conditions between a tandem trailer combination and a vehicle traveling in front of it in the same travel lane, except when passing occurs. All tandem operators are required to wear safety belts when operating a tandem combination.

Passing Vehicles

A tandem trailer combination may pass another vehicle traveling in the same direction, only if the speed differential will allow the tandem trailer combination to safely complete the maneuver and return to the normal driving lane within a distance of 1 mile.

Public Authorities Law—Title 9, Sec. 350, et. seq. (section 361 is most relevant)

New York State Thruway Authority Rules & Regulations, sections 100.6, 100.8 and 103.13

New York State Vehicle & Traffic Law, sections 385 and 1630

State: North Dakota.

Operational Conditions: Single-trip permits are required only when exceeding 80,000 pounds gross vehicle weight (GVW).

Weather restrictions—movements of longer combination vehicles (LCV's) are prohibited when:

1. Road surfaces, due to ice, snow, slush or frost present a slippery condition which may be hazardous to the operation of the unit or to other highway users;

2. Wind or other conditions may cause the unit or any part thereof to swerve, whip, sway or fail to follow substantially in the path of the towing vehicle; or

3. Visibility is reduced due to snow, ice, sleet, fog, mist, rain, dust or smoke.

The North Dakota Highway Patrol may restrict or prohibit operations during periods when in its judgment traffic, weather or other safety conditions make travel unsafe.

Weight distribution by trailer:

1. In any three-unit combination, the lighter trailer must always be operated as the rear trailer, except when the gross weight differential with the other trailer does not exceed 5,000 pounds.

2. In any four-unit combination, the lightest trailer must always be operated as the rear trailer. The other two trailers must be arranged as provided in the above paragraph.

Signing requirement—the last trailer in any combination must have an "Overlength" sign mounted on the rear. The "Overlength" sign must be a minimum 12 inches in height and 60 inches in length. The lettering must be 8 inches in height with 1-inch brush strokes. The letters must be black on yellow background. A "LONG LOAD" sign may be used in lieu of the overlength sign. Beginning January 1, 1995, the "LONG LOAD" sign is mandatory.

Legal width—8 feet 6 inches on all highways.

Legal height—13 feet 6 inches.

Legal length—A single unit with two or more axles including the load thereon shall not exceed a length of 50 feet. A combination of two units including the load thereon shall not exceed a length of 75 feet. A combination of three or four units including the load thereon may exceed 75 feet in length but shall not exceed 110 feet in length when traveling on four-lane divided highways and those highways designated by the Highway Commissioner and local authorities as to the highways under their respective jurisdictions. All such combinations are subject to safety rules adopted by the Highway Commissioner. The length of a trailer or semitrailer including the load thereon may not exceed 53 feet except that trailers and semitrailers titled and registered in North Dakota prior to July 1, 1987, and towed vehicles may not exceed a length of 60 feet. A truck tractor and semitrailer or truck tractor-semitrailer-trailer when operated on the Interstate System or parts of the Federal-aid and primary system designated by the Highway Commissioner shall comply with the following:

Legal weight limitations

A. Gross Vehicle Weight (GVW).

1. The GVW of any vehicle or combination of vehicles is determined by the following weight formula:

$$W = 500(LN/N-1+12N+36)$$

where on the Interstate System W equals maximum weight in pounds carried on any group of two or more axles; L equals distance in feet between the extremes of any group of two or more consecutive axles; and N equals number of axles in the group under consideration, except that two consecutive sets of tandem axles may carry a gross load of 34,000 pounds each, providing the overall distance between the first and last axles of the consecutive sets of tandem axles is at least 36 feet; and where on highways other than the Interstate System W equals the maximum gross weight in pounds on any vehicle or combination of vehicles; L equals distance in feet between the two extreme axles on any vehicle or combination of vehicles; and N equals the number of axles of any vehicle or combination of vehicles under consideration.

2. The maximum GVW on State highways is 105,500 pounds unless otherwise posted. On the Interstate System the maximum GVW is 80,000 pounds. On all other highways the maximum GVW is 80,000 pounds unless designated for more, not to exceed 105,500 pounds.

B. Axle Weight.

1. No single axle shall carry a gross weight in excess of 20,000 pounds. Axles spaced 40 inches or less apart are considered one axle. Axles spaced 8 feet apart or over are considered as individual axles. The gross weight of two individual axles may be restricted by the weight formula except that on highways other than the Interstate, two axles spaced 8 feet apart or more may have a combined gross weight not to exceed 40,000 pounds. Spacing between axles shall be measured from axle center to axle center.

2. Axles spaced over 40 inches apart and less than 8 feet apart shall not carry a gross weight in excess of 17,000 pounds per axle. The gross weight of three or more axles in a grouping is determined by the measurement between the extreme axle centers except that on highways other than the Interstate, groupings of three or more axles may have a gross weight not to exceed 48,000 pounds.

3. During the spring breakup season or on otherwise posted highways, reductions in the above axle weights may be specified. Axle weights may also be reduced by the Bridge Load Limitations Map.

C. Wheel Weight.

1. The weight in pounds on any one wheel shall not exceed one-half the allowable axle weight. Dual tires are considered one wheel.

D. Tire Weight.

1. The weight per inch width of tire shall not exceed 550 pounds. The width of tire for solid tires shall be the rim width; for pneumatic tires, the manufacturer's width.

Minimum power requirement—The power unit shall have adequate power and traction to maintain a minimum speed of 15 miles per hour on all grades.

Routes: All Interstate highways.

North Dakota Century Code, section 39-12-04

North Dakota Administrative Code, article 37-06

State: Ohio

Operational Conditions: Operations of both long double combinations and triple combination vehicles on the turnpike are subject to the provisions of a special permit.

Dimensional and Weight Limitations and Permit Information

No Permits Required for vehicles that do not exceed the following dimensional and weight limits:

Width: 8 feet 6 inches (102 inches)
Height: 14 feet
Length: (total in feet)

	Feet
Single Units:	
Trucks and two-axle buses	40
Buses with three or more axles	45
Combinations:	
Tractor-semitrailer	75 **
Tractor-semitrailer-semitrailer (short doubles)	75 *
Other combinations of vehicles coupled together (includes house trailers, etc.)	65 *

* Length includes overhang but does not include safety devices or bumpers attached to the front or rear of such combinations.

** Highway vehicle carriers may have up to 4 feet overhang in the rear and 3 feet overhang in front (82 feet maximum).

Longer Combination Vehicles (LCV): The maximum gross weight for long double combinations (in excess of 90 feet but not exceeding 112 feet in length) is 127,400 pounds and for triple trailer combinations (in excess of 90 feet but not exceeding 105 feet in length) it is 115,000 pounds. Operating permits are required and subject to compliance with provisions established by the Ohio Turnpike Commission, for the operation of an LCV on the turnpike. For information and details of the provision requirements, a letter setting forth all of the pertinent facts relative to obtaining a long double combination or triple trailer combination operating permit should be addressed to the Executive Director of the Ohio Turnpike Commission.

	Pounds
Weight:	
Maximum Single Axle Weight	21,000
Maximum Tandem Axle Weight (4 feet or less)	24,000
Maximum Tandem Axle Weight (over 4 feet but less than 8 feet)	34,000
Maximum Gross Weight	90,000

No permits will be issued to any vehicles exceeding weight or height limits. Any overdimension will require the use of a permit. Permits are issued at the toll plazas. These permit charges are in addition to the regular toll charges for the weight class of the vehicle.

Travel under permit may be made at any time of the day or night if the vehicle does not exceed the following dimensions:

Width: 10 feet
Height: 14 feet (maximum allowed)
Length: (overall) 80 feet (82 feet with overhangs for vehicle carriers) with no single unit, or component thereof exceeding 60 feet. Travel under permits issued to vehicles in excess of the dimensions listed above is restricted to daylight hours, Monday through Saturday noon, and is prohibited on holidays or on the day before or the day after a holiday.

Nighttime: Travel is, however, subject to the following regulations and restrictions:

1. Overdimensional vehicles permitted to travel at night shall have all lights and reflectors required by the U.S Department of Transportation, Federal Highway Administration rules and regulations which require, in addition to other lights, two tail lights and two stop lights.

2. Vehicles having an overhanging load in excess of 4 feet beyond the bed or body of the vehicle shall be restricted to daylight travel.

Provisions Covering Permits for Operation for Longer Combination Vehicles (LCV's) Long Double Trailer Combinations in Excess of 90 Feet in Length on the Ohio Turnpike

Long double trailer combinations in excess of 90 feet in length (double) may operate on the turnpike under a "Long Double Trailer Permit" (Permit) issued by the Ohio Turnpike Commission subject to compliance by the permittee with the following provisions:

1. *General Conditions*

a. A double shall consist of a tractor, first semitrailer, a dolly and a second semitrailer. Neither the first semitrailer nor the second semitrailer shall be longer than 48 feet in length; mixed trailer length combinations are not permitted. The minimum length permitted to operate as a Double shall be 90 feet and the maximum length of such a double shall not exceed 112 feet. The number of axles of a double shall be a minimum of five and a maximum of nine.

b. The total gross weight for a double shall not exceed 127,400 pounds. The gross load of a Double shall not exceed the sum of the allowable gross loads on the axles, which are as follows:

	Pounds
Maximum gross weight on any one axle	21,000
Maximum combined axle load (less than 4 feet apart)	24,000
Maximum combined axle load of any two successive axles (more than 4 but less than 8 feet apart)	34,000

2. *Equipment*

a. A tractor used in the operation of a double shall be capable of hauling a maximum weight, as specified in section 1, paragraph b of these provisions, at a speed of not less than 40 miles per hour on all portions of the turnpike.

b. Each unit used for towing other units in a double shall have sufficient structural strength to insure the safe and secure attachment of any coupling device used to tow other units. The forward semitrailer must be reinforced and the permittee must certify that it is strong enough for satisfactory attachment of the rear coupling device so that it can tow a trailer and dolly safely.

c. Coupling devices shall be so designed, constructed and installed, and the vehicles in a double shall be designed and constructed, as to insure that any towed vehicles when traveling on a level, smooth, paved surface will follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side of the path of the towing vehicle when the latter is moving in a straight line.

d. Units used in a double shall be equipped with coupling devices as required per current applicable Economic and Safety regulations of the Public Utilities Commission (PUCO) and Federal Motor Carrier Safety Regulations and as further provided herein.

e. A double shall be equipped with brakes as required as follows and per current applicable Economic and Safety regulations of the PUCO and Federal Motor Carrier Safety Regulations. The brakes on a double shall also comply with the following:

(1) A double shall be equipped with full air brakes or air-activated hydraulic brakes on the tractor and either air or electric brakes on the trailers.

(2) A double, at all times and under all conditions of loading, upon application of the service (foot) brake shall be capable of: developing a brake force that is not less than 43.5 percent of the gross combination weight; decelerating to a stop from not more than 20 miles per hour at not less than 14 feet per second; stopping from a speed of 20 miles per hour in not more than 30 feet, such distance to be measured from the point at which movement of the service brake pedal or control begins. Tests for deceleration and stopping distance shall be made on a substantially level (not to exceed plus or minus 1 percent grade), dry, smooth, hard surface that is free from loose material.

(3) The parking brakes shall be capable of being applied by the driver's muscular effort or by spring action. Their operation may be assisted by the service brakes or other source of power provided that failure of the service brakes or other power assisting mechanism will not prevent the parking brakes from being applied in conformance with the foregoing requirements. The parking brakes shall be so designed that when once applied they shall remain in the applied position despite exhaustion of any source of energy or leakage of any kind.

(4) Every unit in a double shall be equipped with brakes acting on all wheels, which shall include the front axle of the power unit.

(5) Brake hoses shall conform to the appropriate specification set forth in the Society of Automotive Engineers Standards for "Hydraulic Hose" or "Automotive Air Brake Hose and Hose Assemblies."

(6) Every tractor used in the double shall be equipped with a reserve capacity, or reservoir for air storage, to insure that with the engine stopped, a full service brake application may be made without depleting such reservoir pressure by more than 30 percent when such reservoir is fully charged with air at maximum pressure as regulated by the vehicle's air compressor governor cutout setting. Each such reservoir shall be provided with a means for readily draining it of accumulated oil or water.

(7) Every tractor used in the double utilizing compressed air for the operation of

its own brakes or the brakes of other vehicles in a double, shall be provided with a warning signal readily audible or visible to the driver, which signal will operate at any time the air reservoir pressure of such vehicle is below 50 percent of the air compressor governor cutout pressure. In addition, each such vehicle shall be equipped with a pressure gauge arranged to indicate, in pounds per square inch, the pressure available for braking.

(8) The brakes on a double shall be designed and equipped so that braking action shall take place on all wheels as nearly simultaneously as possible to reduce to a minimum of any possible tendency of a double to move out of alignment when stopping.

f. The distance between the rearmost axle of a semitrailer and the front axle of the next semitrailer in a coupled double unit shall not exceed 12 feet 6 inches. In no event shall the distance between the semitrailers coupled in a double exceed 9 feet.

g. A double must be equipped with adequate, properly maintained, spray-suppressant mud flaps on all axles except the steering axle.

3. *Equipment Certification*

a. A certification number will be issued by the Ohio Turnpike Commission for each approved tractor. The certification number shall be placed at a designated location on the tractor. The certification numbers are to be 3-inch-high block letters and are to be black in color (another color may be used in order to obtain sufficient contrast between the tractor and number color, subject to approval of the Commission). The Commission shall issue a certification card for each approved tractor, the certification shall be carried in the cab of the tractor in a place readily available for inspection.

4. *Driver's Certification*

a. Applications for drivers of doubles shall be made by the permittee on a form provided by the Ohio Turnpike Commission prior to driving on the turnpike. No such unit shall be driven on the turnpike by any person other than a driver approved by the Commission.

(1)(A) Drivers must be over 26 years of age, in good health and shall have not less than 5 years experience driving tractor-trailer or tractor-short double trailer motor vehicles. Such driving experience shall include experience throughout the four seasons.

(B) Drivers must comply with the applicable current requirements of the Federal Motor Carrier Safety Regulations, Federal Hazardous Materials Regulations and the Economic and Safety regulations of the PUCO, as well as the requirements found herein.

(2)(A) An application for certification of a driver must include all information concerning the applicant's driving and safety record, as well as an official abstract of his driving record and copies of all accident reports for the last 5 years.

(B) The application must include evidence that the driver has undergone a biennial physical examination of the type required by the rules of the PUCO and Federal Motor Carrier Safety Regulations.

(C) Driver certification must be renewed annually.

5. *Operating Conditions*

a. A permit fee is charged.

b. Tolls charged for a double will be the same as for other vehicles currently being based on total gross weight as determined automatically by the toll plaza scales, computerized classification system and toll rate schedule, (except that Class 10 rates will be charged for units with a gross weight between 90,000 and 115,000 pounds and Class 11 rates charged for all units over 115,000 pounds gross weight), plus a fee for each trip.

c. In the assembly of a double prior to operation on the turnpike, the permittee shall ascertain the total gross weight of each trailer of the proposed double. In the event that the gross weights of the trailers vary by more than 20 percent the permittee shall couple them according to their gross weights with the heavier trailer coupled to the tractor.

d. A minimum distance of 500 feet shall be maintained between double LCV units and/or triple units except when overtaking and passing another vehicle. A double shall remain in the right-hand outside lane except when passing or when emergency or work-zone conditions exist.

e. When, in the opinion of the Commission, the weather conditions are such that operation of a double is inadvisable the Commission will notify the permittee that travel is prohibited for a certain period of time.

Routes	From	To

(No travel is permitted on any Interstate route in Ohio that is under the jurisdiction of the Ohio Department of Transportation)

Legal Citations: Statutory authority, as contained in Chapter 5537 of the Ohio Revised Code, to regulate the dimensions and weights of vehicles using the turnpike.

State: Oklahoma

Operational Conditions:

Size and Weight Permit

A permit is required for operation of doubles whose units are greater than 29 feet in length. The maximum unit length is 59.5 feet. Permit movements are limited to travel from one-half hour before sunrise to one-half hour after sunset, 7 days a week, subject to the following restrictions:

(1) No travel is allowed on specified holidays, beginning at noon the day preceding the holiday. Specified holidays are: New Year's Day, Memorial Day, Independence Day, Thanksgiving Day and Christmas Day.

(2) Permit loads may move on other holidays if the permit is purchased by 4:30 p.m. prior to the holiday.

(3) Movement of permitted loads is restricted on the Interstate System in Cleveland, Oklahoma and Tulsa Counties from 7 a.m. to 9 a.m. and from 4 p.m. to 6 a.m., Monday through Friday.

Permits may be issued for travel on the Oklahoma turnpikes, not to exceed the following limits. The maximum weight on all turnpikes is 108,000 pounds. Permits shall not be issued for travel on the turnpikes unless a minimum speed of 40 miles per hour can be maintained.

Special Vehicle Combinations

A special vehicle combination (SVC) shall consist of a truck tractor-semitrailer combination towing two complete trailers or semitrailers. No semitrailer or trailer used in such a combination shall have a length greater than 29 feet nor shall a SVC exceed the weight limitations imposed by statute.

No person shall operate or permit the operation of a SVC within Oklahoma without a current SVC permit issued by the Department of Public Safety, Size and Weight Permit Division. Such permits may only be used for operation upon Federal-aid Interstate highways or four-lane divided Federal-aid primary highways and for access or egress between points of origin or destination. Egress or access shall not exceed 5 statute miles.

A copy of a valid SVC permit shall be carried at all times in the authorized vehicle.

All SVC permit holders and drivers must comply totally with the latest Federal Motor Carrier Safety Regulations, 49 CFR, parts 390–397, except where Oklahoma rules contain provisions which are not in conflict with Federal requirements and are more stringent.

The driver must be under the control and supervision of the holder of the SVC permit, or have been issued the same.

The permit holder shall ensure that the driver meets the requirements listed below prior to operating any SVC in this State:

(1) The driver must fully comply with the driver requirements contained in the Federal Motor Carrier Safety Regulations.

(2) A driver must have had at least 2 years of experience driving truck-trailer combinations.

(3) Valid documentation indicating driver compliance with the above driver requirements shall be in the possession of the driver while operating an SVC.

(4) The permit holder shall certify to the U.S. DOT that the driver is qualified and has valid documentation of same in his possession prior to the issuance of an SVC permit.

A completed and signed application will be accompanied by the tendering of an annual fee for each permit issued.

Each licensee shall insure that the operation of SVC's complies with the following rules in addition to other equipment requirements established by State or Federal laws or rules.

All truck tractors shall be powered to provide adequate acceleration and hill climbing ability under normal operation conditions, and to operate on level grades at speeds compatible with other traffic. The ability to maintain a minimum speed of 40 miles per hour under normal operation conditions on a grade over which the combination is operated is required.

All braking systems must comply with State and Federal requirements. In addition, fast air transmission and release valves must

be provided on all trailers, semitrailers and converter dolly axles. A grade force limiting valve, sometimes called a "slippery road" valve, may be provided on the steering axle if Federal Motor Carrier Safety Regulations would so allow. Indiscriminate use of engine retarder brakes is prohibited.

Mud flaps or splash guards are to meet the requirements of the procedures established below and shall be followed when operating an SVC in this State.

A minimum distance of 500 feet shall be maintained between SCV's and other vehicles except when overtaking and passing. Except when passing another vehicle in the same direction, or when emergency conditions exist, an SVC shall remain at all times in the right hand outside lane.

Extreme caution in the operation of an SVC shall be exercised when hazardous conditions such as those caused by snow, wind, ice, sleet, fog, mist, rain, dust or smoke adversely affect control, visibility or traction. Speed shall be reduced when such conditions exist. When conditions become sufficiently dangerous the company or driver shall discontinue operations and shall not resume until the vehicle can be safely operated. The State may restrict or prohibit operations during periods when, in the State's judgment, traffic, weather or other safety conditions make such operations unsafe or inadvisable.

Transportation by SVC, Class A and B explosives; Class A poisons and Class 1, 2 and 3 radioactive material or any other material deemed to be unduly hazardous by the U.S. DOT is prohibited. This prohibition does not include the transportation of gasoline, fuel oil or heating oil or other such petroleum products.

All multiple trailer combinations must be stable at all times during normal braking and normal operation. A multiple trailer combination when traveling on a level, smooth, paved surface must follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side when the towing vehicle is moving in a straight line.

The total weight on any single axle shall not exceed 20,000 pounds. The total axle weight on any tandem axle shall not exceed 34,000 pounds. The total weight on any group of two or more consecutive axles shall not exceed the amounts shown in Table 1. Gross combination weight shall not exceed 90,000 pounds. All SVC's must be properly registered. An Interstate permit to operate on the Interstate System in Oklahoma is required, if registered above 80,000 pounds.

The heaviest trailer or semitrailer should be placed in front with the lightest at the rear. In no case shall either trailer or semitrailer be placed ahead of another trailer or semitrailer which carries an appreciably heavier load. An empty trailer or semitrailer will not precede a loaded trailer or semitrailer.

Special Permit Loads

An annual special authorization permit may be issued for any vehicle transporting a load in excess of 80,000 pounds, but not exceeding 90,000 pounds, for movement upon or touching the Interstate System; provided such vehicle meets the axle requirements as provided for in Table 1.

Vehicles meeting the axle requirements of Table 1 must have a special authorization permit; otherwise, they will be limited to 80,000 pounds gross weight on the Interstate System.

There is a fee for an annual special authorization permit. Except as otherwise provided for by this chapter, no vehicle, with or without load, shall have a total outside width in excess of 102 inches excluding both tire bulge and approved safety devices when operated on the Interstate System or on any road or highway in this State having a surface width of 20 feet or more. The total gross weight in pounds imposed by a vehicle or combination of vehicles shall not exceed the value given in the following table corresponding to the distance in feet between the extreme axles of the group measured longitudinally to the nearest foot.

TABLE 1.—OKLAHOMA ALLOWABLE AXLE GROUP WEIGHT

DPS Regulation 595:30–1–11(f)(1).

DPS Regulation 595:30–3–1 through 595:30–5–1.

State: Oregon.

Operational Conditions: Vehicle combinations known as truck tractor-semitrailer-trailer or "Oregon Doubles" and truck tractor-semitrailer-trailer-trailer or "Triples" are eligible for divisible load permits to operate with a gross weight up to and including 105,500 pounds. These permits limit weight to 600 pounds per inch of tire width, 20,000-pound single axle, 34,000-pound tandem axles or the table of weights for Oregon. Permits for these vehicles are valid for 1 year annually from the date of issue. The permits require use of splash and spray suppressant devices when operating in rainy weather, trailer placement by weight (lightest to the rear) and only on specific routes. Movement is not allowed when road surfaces are hazardous due to ice or snow, or when other atmospheric conditions make travel unsafe. A classified driver license for the appropriate combination of vehicles is required. Truck speed in Oregon is limited to 55 miles per hour; however, there are no time-of-travel restrictions.

ORS 810.040

ORS 810.050

ORS 810.060

ORS 818.010 through 818.235

State: South Dakota.

Operational Conditions: Longer combination vehicles with a gross weight exceeding 80,000 pounds must obtain a permit. All permits are on a single-trip basis. These are issued in two categories:

(1) For vehicle combinations exceeding 80,000 pounds, but not to exceed Federal Bridge Formula B, and with overall length not to exceed 81 feet 6 inches nor any individual trailer length to exceed 45 feet.

(2) Permits for vehicle combinations exceeding 80,000 pounds but not to exceed 129,000 pounds gross vehicle weight or Federal Bridge Formula B.

An overweight permit is not valid when the road surface is slippery due to snow, ice, slush or frost, or when Highway Patrol officers determine that weather conditions make travel unsafe.

State: Utah.
Operational Conditions:
(1) Permit is required.
(2) Carrier must be in compliance with all safety requirements prior to obtaining a permit.
(3) Adverse weather conditions—extreme caution must be exercised in the dispatching and operation of vehicles during adverse weather. Failure to comply will revoke the permit.
(4) Speed must be reduced when adverse weather is encountered.
Routes: All Interstate routes.
Legal Citations:
Utah Code (Statute) 27-12-148 and 27-12-151
Utah Regulations for Legal and Permitted Vehicles, Section 400
State: Washington.
Operational Conditions: Washington allows vehicle weighing more than 80,000 pounds with two trailers extending up to 68 feet overall length of the cargo boxes to operate on all State highways. Single trailers exceeding 60 feet, however, must acquire an overlength permit. Operation of combinations, solely based on these length parameters, is not restricted by time of day, weather, route or speed.
Trailers exceeding 60 feet, but not exceeding 68 feet, shall acquire an annual overlength permit. Operating conditions are the same for permitted doubles as they are for the 60-foot or less doubles. A special endorsement is required on the driver's license to pull doubles.
Vehicles must follow axle weight limit controls (20,000-pound single axle, 34,000-pound tandem axle) and the Federal bridge formula for gross weight.

Appendix D to Part 658—Trucks Over STAA Lengths on the National Network

This appendix contains information, by State, regarding the length of cargo carrying units of commercial motor vehicle (CMV) combinations with two or more cargo carrying units lawfully operating on the National Network (NN), on a regular or periodic basis (including seasonal operation) on or before June 1, 1991. The length of the cargo carrying units is defined as the distance from the front of the first cargo unit to the rear of the last cargo unit.

The term "Interstate System" as used herein refers to the National System of Interstate and Defense Highways, renamed the Dwight D. Eisenhower System of Interstate and Defense Highways by Public Law 101-427. Four categories of combinations are identified for purposes of this listing:

1. CMV combination with two trailers or semitrailers either of which is over 28.5 feet long, but which normally operates with a long semitrailer plus a shorter trailer, commonly known as a "Rocky Mountain Double;"
2. CMV combination with two trailers or semitrailers, both of which exceed 40 feet in length, commonly known as a "Turnpike Double;"
3. CMV combination with more than two trailers or semitrailers, commonly known as a "Triple;" and
4. CMV combinations with two or more cargo carrying units not included in descriptions 1, 2, or 3. Listed for each State by combination type is either:
a. The maximum cargo carrying length (shown in feet);
b. That such vehicle was not allowed (as indicated by a "NO"); or
c. A notation that the State submission contains vehicles covered by the exclusion guidelines described below.

Exclusions:

1. *Truck tractor-semitrailer-semitrailer* and *Truck tractor-semitrailer-trailer* configurations with a maximum length of the cargo carrying units of 62 feet or less are subject to the provisions of 23 CFR part 658. No additional information regarding conditions, routes or authority to operate is required.
2. *Truck-trailer* and *Truck-semitrailer* maxi-cube configurations with an overall length of 65 feet or less and a maximum length of cargo carrying units of 60 feet or less come under the intent of Congress with respect to allowing maxi-cube vehicles to operate on the NN. No additional information regarding conditions, routes or authority to operate is required.
3. *Truck-trailer* and *Truck-semitrailer* combinations (except as maxi-cubes) are presently allowed to run in all States subject to varying overall length limit controls. Additional information regarding conditions, routes or authority to operate is only required for these combinations if the cargo carrying length of these vehicles is greater than 65 feet.

For every State where there is a length number in the table that follows, additional information is provided.

[E] Estimated.

[1] State submission contains vehicles covered by exclusion guidelines.

[2] State submission includes multiple vehicles in this category—see individual State listings.

[3] Wyoming has until November 3, 1992, to determine this length.

State: Alaska.
Combination: Rocky Mountain Double.
Length of the Cargo Carrying Units: 95 feet.
Operational Conditions: On the National Network, longer combination vehicles (LCV's) of this combination are allowed to operate with no requirement for permits, speed or time of day. LCV's with an overall length greater than 75 feet are required to display "OVERSIZE" signs front and rear. During the spring thaw all commercial vehicles, including LCV's, are restricted on the amount that each axle grouping is allowed to carry. The Alaska Department of Transportation and Public Facilities (DOT & PF) makes the determination on the percentage and the portion(s) of the highways affected. Weather restrictions are imposed when hazardous conditions exist as determined by the Alaska DOT & PF and the Department of Public Safety, Division of State Troopers.
Routes:

From	To
AK-1—Anchorage (Potter Weigh Station).	Palmer (Palmer-Wasilla Highway Junction).
AK-2—Fairbanks (Gaffney Road Junction.	Delta Junction (MP 1412 Alaska Highway).
AK-3—From its junction with AK-1.	Fairbanks (Gaffney Road Junction).

Legal Citations: 17 AAC 35, 17 AAC 25, Administrative Permit Manual.
State: Alaska.
Combination: Turnpike Double.
Length of the Cargo Carrying Units: 95 feet.
Operational Conditions: Same as for Alaska Rocky Mountain Doubles.
Routes: Same as for Alaska Rocky Mountain Doubles.
Legal Citations: Same as for Alaska Rocky Mountain Doubles.
State: Alaska.
Combination: Triple.
Length of the Cargo Carrying Units: 110 feet (28.5 feet for each trailer).
Operational Conditions: Longer Combination Vehicles (LCV's) of this combination are allowed to operate on the National Network, under experimental use of the State Highway System. A permit is required with specified duration of not less than 3 months nor more than 18 months. There is a permit fee.
Vehicles with an overall length in excess of 75 feet must display "OVERSIZE" signs front and rear.
Drivers of triples must have 10 years of experience in Alaska and certified training in triples operation.
Axle weights are restricted during the spring thaw.
Weather restrictions are imposed when hazardous conditions exist, as determined by the Alaska DOT & PF and the Department of Public Safety, Divison of State Troopers.
Triple trailer combinations are allowed to operate during the following hours:
1 a.m. Sunday to 12 p.m. Sunday
7 p.m. Sunday to 6 a.m. Monday
8 p.m. Monday to 7 a.m. Tuesday
8 p.m. Tuesday to 8 p.m. Wednesday
Routes:

From	To
AK-1—Anchorage (Potter Weigh Station).	Junction of AK-1 and AK-3 (5 miles S. of Palmer).
AK-3—From its Junction with AK-1.	Fairbanks (Gaffney Road Junction).

Legal Citations: 17 AAC 35, 17 AAC 25, Administrative Permit Manual.
State: Alaska.
Combination: Truck-trailer.
Length of the Cargo Carrying Units: 83 feet.
Operational Conditions: Vehicles of this combination are allowed to operate on the National Network with no requirements of permits, speed or time of day. Vehicles of this combination with an overall length greater than 75 feet are required to display "OVERSIZE" signs front and rear. During the spring thaw all commercial vehicles are restricted on the amount that each axle grouping is allowed to carry. The Alaska Department of Transportation and Public Facilties (DOT & PF) makes the determination on the percentage and the portion(s) of the highways affected. Weather restrictions are imposed when hazardous conditions exist as determined by the Alaska DOT & PF and the Department of Safety, Division of State Troopers.

State: Arizona.
Combination: Rocky Mountain Double.
Length of the Cargo Carrying Units: 92 feet.
Operational Conditions: On all listed routes, the company must have a Certificate of Compliance on file and a permit in the possession of the driver when operating this type of combination. All companies must have an active safety program.
All drivers are required to comply with Motor Carrier Safety Regulations of the U.S. DOT and title 28, Arizona Revised Statutes.
Longer Combination Vehicles (LCV's) shall not exceed the legal or posted speed, whichever is lower. LCV's are allowed continuous travel, except during adverse weather conditions when the movement of LCV's is prohibited. All LCV's are restricted to a 20-mile border area from any adjacent State which allows such combinations of length and gross vehicle weight.
Permits issued under ARS 28–1011.M are annual permits only. This permit is valid on all listed routes within the 20-mile border area.
Gross Weight—111,000 pounds.
Axle weights must comply with appropriate statutes.
Length is 92 feet as per memo dated June 23, 1989. When permits are issued under ARS 28–1011.N, these permits are valid on all listed routes, except Interstate 15, US 89 and SR 68 within the 20-mile border area.
Gross weight of 121,000 pounds with nine axles, or 123,500 pounds with 10 axles. Length is 92 feet as per memo date June 8, 1990.
When permits are issued under ARS 28–1004.G, the permits are valid on Interstate 15, US 89A and SR 389 within the 20-mile border area.
Gross weight is 111,000 pounds.
Axles must comply with appropriate statutes.
Length is 92 feet as per memo dated June 23, 1989.

State: Colorado.
Combination: Rocky Mountain Double.
Length of the Cargo Carrying Units: 85 feet.
Operational Conditions: *Longer Combination Vehicles, Greater Than 80,000 Pounds*—LCV's must purchase an annual permit for a fee pursuant to C.R.S. 42–4–404.5(1). To operate at greater than 80,000 pounds, LCV's must purchase an overweight permit pursuant to C.R.S. 42–4–409(11)(a)(II)(A), (B), or (C) and comply with rule 4–15 in the Extra-Legal Vehicles and Loads Rules. LCV's must comply with the Rules and Regulations for the Operation of Longer Combination Vehicles on Designated State Highway Segments. The rules address all restrictions and requirements that are imposed on LCV's. However, instead of complying with Rule 5–1 in the Longer Combination Vehicle Rules, LCV's operating at greater than 80,000 pounds must comply with Rule 4–1–5 in the Extra-Legal Vehicles and Loads Rules concerning hours of operation restrictions. *Longer Combination Vehicles, 80,000 Pounds or Less*—LCV's must purchase an annual permit pursuant to C.R.S. 42–4–404.5(1). LCV's must comply with the Rules and Regulations for the Operation of Longer Combination Vehicles on Designated State Highway Segments. The rules address all restrictions and requirements that are imposed on LCV's.

Hours of Operation: A LCV shall not operate on the following designated highway segments during the hours of 7 a.m. to 9 a.m. and from 4 p.m. to 6 p.m., Monday through Friday, for Colorado Springs, Denver and Pueblo (LCV's operating above the legal maximum weight are subject to different hours of operation restrictions. Refer to rules pertaining to Extra-Legal Vehicles or Loads).

Colorado Springs—I–25 from SH 83 (Academy Blvd. South) to SH 83 (Academy Blvd. North)
Denver—I–25 from I–225 to SH 128 (120th Ave.)
I–70 from US 40/SH26 to I–225
I–76 from I–25 to SH 85
I–225 from I–25 to I–70
I–270 from I–76 to I–70
Pueblo—I–25 from Lake Ave. (Exit #94) to SH 47/SH 50 (Exit #101)

Routes: I–25 from the Colorado-New Mexico State Line to the Colorado-Wyoming State Line.
I–70 from the junction of US 40 and SH 26, in Denver, to the Colorado-Kansas State Line
I–76 from the junction of I–25, in Denver, to the Colorado-Nebraska State Line
I–270 from the junction of I–70 to the junction of I–76
I–225 from the junction of I–25 to the junction of I–70
I–70 from the Colorado-Utah State Line to the junction of SH 13

SH 133, in Delta County, from milepoint 6.9 to milepoint 9.7 (Non-Interstate Highway)

Ingress and Egress: LCV's can be permitted to go to the following facilities: (1) Manufacturing or distribution centers, warehouses or truck terminals that are located in an area where industrial uses are permitted and (2) construction sites. This off-highway-segment travel is limited to a maximum of 10 miles, which shall be measured by the most direct travel rather than by the radius from the facility to the designated route. The ingress and egress route(s) between the designated State highway segment and the facility must be approved in advance by the public entity (CDOT, municipality or county) having jurisdiction for the roadway(s) that make up the route(s).

Legal Citations: LCV's must comply with all applicable statutes, such as C.R.S. 42–4–406(2)(b)(I) and (2)(c) axle weight limitations, C.R.S. 42–4–402(1) width, C.R.S 42–4–404(1) height, C.R.S. 42–4–409(11)(a)(II)(A), (B), or (C) overweight permits (*) and C.R.S. 42–4–407(1)(c)(III)(A) and (B) Federal Bridge formula (**). LCV's must comply with Rule 4–15 in the Extra-Legal Vehicles and Loads Rules (I) and with the Longer Combination Vehicle Rules.

* applies only to LCV's operating at greater than 80,000 pounds.

** applies only to LCV's operating at 80,000 pounds or less.

State: Florida.
Combination: Rocky Mountain Double.
Length of the Cargo Carrying Units: 106 feet.
Operational Conditions: All overdimensional and weight regulations of the Florida Turnpike Authority shall apply to such units unless specifically excluded under the terms of the Tandem Trailer Permit or these regulations.

A tractor used in the tandem trailer operations shall be capable of hauling the maximum gross load to be transported by a permittee at a speed of not less than 40 miles per hour on all portions of the turnpike system, excepting that portion of the roadway, as posted in 1988, between milepost 234 and milepost 238 where a minimum speed of 30 miles per hour will be permitted.

A tractor, which will be used to haul a complete tandem trailer combination with a total gross weight of 110,000 pounds or more, shall be equipped with tandem rear axles, neither of which shall be a retractable type axle. All axles shall be equipped with operating brakes. Tractors with single drive axles shall be certified by the operator and manufacturer as having the capacity to control loads in excess of 110,000 pounds. When the above tandem-axle tractor is required, a tandem-axle dolly converter must be used.

Proposed drivers of tandem trailer units shall be registered by the Florida Turnpike Authority prior to driving such equipment on the turnpike system.

A minimum distance of 500 feet shall be maintained, under normal conditions, between a tandem trailer unit and a vehicle traveling in front of it in the same travel lane, except when passing occurs.

A tandem trailer unit may pass another vehicle traveling in the same direction only if the speed differential will allow the tandem trailer unit to complete the maneuver and return to the normal driving lane within a distance of 1 mile.

Except as noted herein and in the Tandem Trailer Permit, all rules and regulations governing the use and occupancy of the turnpike system shall apply to the operation of tandem trailer units on the turnpike system.

State: Idaho.
Combination: Rocky Mountain Double.
Length of the Cargo Carrying Units: 95 feet (State estimate).
Operational Conditions: Idaho's permit system for longer combination vehicles (LCV's) does not limit individual vehicle or combined trailer lengths within the combination. The rules provide for routes which accomodate maximum combination lengths of 85 feet and 105 feet based on calculated maximum off-tracking. Permits are required. Permit duration is 1 year from the date of issuance. There are extra-length permit, excess-weight permit and extra-length/excess-weight permit fees—only if the vehicle operates on the Interstate System.

The maximum number of units allowed in a combination vehicle is one tractor and three cargo units.

Vehicles under permit must comply with the Calculated Maximum Off-Track (CMOT) Formula (shown below).

$CMOT = R - [R^2 - (A^2 + B^2 + C^2 + D^2 + E^2)]^{1/2}$
$R = 165 - 4 = 161$

A, B, C, D, E, etc. = measurements between points of articulation or pivot. Squared dimensions to stinger steer points of articulation are negative.

Vehicles under permit must also comply with axle and axle group weight limits of Idaho Code, section 49–1001.

Maximum weight: registered weight up to 105,500 pounds.

Maximum width: 8 feet 6 inches

Routes: All National Network routes.

Operational Conditions: Trailer combinations may operate on the toll road only under an annual tandem permit issued by the Indiana Department of Highways (IDOH) General Manager and subject to compliance by the permittee with 135 IAC 2-7. The permissible number of axles on a tandem trailer combination shall be a minimum of five and a maximum of nine.

The maximum gross weight for a trailer combination shall be governed by the formula—80,000 pounds plus 1,070 pounds per foot for each foot of combination length (front bumper to end of combination) in excess of 60 feet. However, any such combination of vehicles may not exceed a total maximum gross weight of 127,400 pounds. The gross load of a combination of vehicles shall not exceed the sum of allowable gross loads on the axles, which are as follows:

Maximum gross weight on any one axle—22,400 pounds, (axles measuring less than 40 inches between axle centers are considered one axle).

Maximum combined axle load of any two successive axles, spaced more than 40 inches apart but less than 9 feet apart—36,000 pounds.

No such combinations will be permitted to leave the toll road for travel as combinations upon the State highways of Indiana without a permit from the IDOH. Maximum gross weight and axle weight of vehicles leaving the toll road as singles to travel upon the public highways of Indiana must comply with the Indiana State law. All other maximum dimensions of 135 IAC 2 for the control and regulation of traffic on the toll road shall apply.

A responsible officer of the applicant shall certify to the IDOH, prior to the approval of a truck tractor, that the vehicle proposed to be furnished and used for specified gross loads will comply with and meet all minimum safety and performance factors of the IDOH.

The distance between trailers coupled in combination shall not exceed 9 feet. In the assembly of trailer combinations, prior to their operation on the Indiana Toll Road, the permittee shall ascertain the total gross weight of each trailer of the proposed combination. The permittee shall couple them according to their gross weights with the heaviest trailer coupled to the tractor and lightest trailer in the rear. Trailer combinations shall comply with existing speed regulations. A minimum speed of 45 miles per hour must be maintained on the toll road, under normal conditions, except on entry and exit ramps. A minimum distance of 500 feet shall be maintained, under normal conditions between trailer combinations and a vehicle traveling in front of it in the same travel lane, except when passing occurs. Trailer combinations may pass another vehicle traveling in the same direction only if the speed differential will allow the trailer combination to complete the maneuver and return to the normal driving lane within a distance of 1 mile. Trailer combinations shall not pass another vehicle traveling the same direction within 1 mile of any service area or interchange.

Application for permission to operate trailer combinations on the toll road shall be filed with the IDOH on forms provided, including a description of each vehicle making up trailer combinations.

(1) Upon approval, by the IDOH's General Manager, of the application for a truck tractor to operate in trailer combination service, an identification number issued by the IDOH shall be stenciled at a designated location on that truck tractor.

(2) In addition, upon approval of a truck tractor, a certificate shall be issued by the IDOH for the truck tractor as approved. Such certificate shall be suitably protected and carried in the cab of the truck tractor in a place where it shall be readily available for inspection.

Drivers shall possess the minimum qualifications as required by the State of Indiana for drivers operating vehicles within the State as further provided herein:

(1) Drivers of trailer combinations on the toll road must be not less than 26 years of age, must be in good health, and shall have not less than 5 years of provable experience in driving semitrailer or tandem trailer type motor vehicles. Such driving experience shall include experience throughout the four seasons.

(2) An applicant will be rejected if:

(a) His license has been revoked more than once in the past 10 years;

(b) His license has been suspended more than twice in the past 10 years;

(c) His record of major traffic violations shows more than five points in the preceding 2 years or seven points in the preceding 3 years; or

(d) His record of chargeable (preventable) accidents shows more than two in the preceding 5 years or more than one in the preceding 2 years on the toll road, or more than two in the preceding 2 years off the toll road. In any case, the maximum total is two in the preceding 2 years.

A proposed driver of trailer combinations shall make application on the prescribed form, which includes the driver's driving and safety record. The application must be accompanied by an official abstract of his driving record.

In the event of any accidents during the 5 years immediately preceding the application, copies of reports of all such accidents must be submitted. In addition, the driver must have a physical examination not less than every 2 years, and a copy of the physical examination certificate must accompany his application. Upon approval by the IDOH, an identification card bearing a permit number will be issued to the driver. The driver must carry the card with him at all times while operating tandem trailer combinations on the toll road for presentation upon request by toll road personnel or a police officer.

Permission to operate trailer combinations on the toll road may be temporarily suspended by the IDOH at any time due to weather conditions, unfavorable road conditions, holiday traffic and any other emergency conditions.

Applicants for trailer combination operating permits shall furnish to the IDOH a certificate attesting to the fact that public liability insurance affording coverages of not less than $500,000/$1 million for all damages arising from bodily injury, including death, and $100,000/$500,000 for property damage, including damage to toll road property and facilities has been secured by the applicant. The named insured thereon shall include the IDOH, its officers, agents and employees. The certificate shall indicate that the policy contains an endorsement reading as follows:

"The inclusion of the Indiana Department of Highways, Toll Road Division, as an additional named insured shall not exclude coverage of liability of the named insured for damage of property of the additional named insured, or for injury to or death of any person working with or for the additional named insured."

Such certificate shall also provide that the coverage under the policy may not be cancelled without 30-days prior notice to the IDOH.

Except as noted herein and in the trailer combination permit, all rules and regulations for the control and regulation of traffic on the toll road shall apply to the operation of trailer combinations on the toll road.

State: Indiana.

Combination: "Turnpike Double".

Length of the Cargo Carrying Units: 106 feet.

Operational Conditions: Same as for Indiana Rocky Mountain Doubles.

Routes: Same as for Indiana Rocky Mountain Doubles.

Legal Citations: Same as for Indiana Rocky Mountain Doubles.

State: Indiana.

Combination: "Triple".

Length of the Cargo Carrying Units: 104.5 feet.

Operational Conditions: Trailer combinations may operate on the toll road only under an annual tandem permit issued by the Indiana Department of Highways (IDOH) General Manager and subject to compliance by the permittee with 135 IAC 2-7. The permissible number of axles on a tandem trailer combination shall be a minimum of five and a maximum of nine.

Triple trailer combinations—A triple trailer combination shall consist of a truck tractor, semitrailer and two trailers. Neither the semitrailer nor either of the two trailers shall be longer than 28 feet and 6 inches in length. The permissable number of axles of a triple trailer combination shall be a minimum of seven and a maximum of nine. The maximum gross weight for a trailer combination shall be governed by the formula—80,000 pounds plus 1,070 pounds per foot for each foot of combination length (front bumper to end of combination) in excess of 60 feet. However, any such combination of vehicles may not exceed a total maximum gross weight of 127,400 pounds. The gross load of a combination of vehicles shall not exceed the sum of allowable gross loads on the axles, which are as follows:

Maximum gross weight on any one axle—22,400 pounds, (axles measuring less than 40 inches between axle centers are considered one axle).

Maximum combined axle load of any two successive axles, spaced more than 40 inches apart but less than 9 feet apart—36,000 pounds.

No such combinations will be permitted to leave the toll road for travel as combinations upon the State highways of Indiana without a permit from the IDOH. Maximum gross weight and axle weight of vehicles leaving the toll road as singles to travel upon the public highways of Indiana must comply with the Indiana State law. All other maximum dimensions of 135 IAC 2 for the control and regulation of traffic on the toll road shall apply.

A responsible officer of the applicant shall certify to the IDOH, prior to the approval of a truck tractor, that the vehicle proposed to be furnished and used for specified gross loads will comply with and meet all minimum safety and performance factors of the IDOH.

The distance between trailers coupled in combination shall not exceed 9 feet. In the assembly of trailer combinations, prior to their operation on the Indiana Toll Road, the permittee shall ascertain the total gross weight of each trailer of the proposed combination. The permittee shall couple them according to their gross weights with the heaviest trailer coupled to the tractor and lightest trailer in the rear. Trailer combinations shall comply with existing speed regulations. A minimum speed of 45 miles per hour must be maintained on the toll road, under normal conditions, except on entry and exit ramps. A minimum distance of 500 feet shall be maintained, under normal conditions, between trailer combinations and a vehicle traveling in front of it in the same travel lane, except when passing occurs. Trailer combinations may pass another vehicle traveling in the same direction only if the speed differential will allow the trailer combination to complete the maneuver and return to the normal driving lane within a distance of 1 mile. Trailer combinations shall not pass another vehicle traveling the same direction within 1 mile of any service area or interchange.

Application for permission to operate trailer combinations on the toll road shall be filed with the IDOH on forms provided, including a description of each vehicle making up trailer combinations.

(1) Upon approval, by the IDOH's General Manager, of the application for a truck tractor to operate in trailer combination service, an identification number issued by the IDOH shall be stenciled at a designated location on that truck tractor.

(2) In addition, upon approval of a truck tractor, a certificate shall be issued by the IDOH for the truck tractor as approved. Such certificate shall be suitably protected and carried in the cab of the truck tractor in a place where it shall be readily available for inspection.

Drivers shall possess the minimum qualifications as required by the State of Indiana for drivers operating vehicles within the State as further provided herein:

(1) Drivers of trailer combinations on the toll road must be not less than 26 years of age, must be in good health, and shall have not less than 5 years of provable experience in driving semitrailer or tandem trailer type motor vehicles. Such driving experience shall include experience throughout the four seasons.

Indiana Toll Road plus 15 miles access, subject to Indiana DOH approval.

Legal Citations: Indiana Code 9-8-1-16, Indiana Code 8-15-2, 135 Indiana Administrative Code 2.

State: Kansas.

Combination: Rocky Mountain Double.

Length of the Cargo Carrying Units: 109 feet.

Operational Conditions: Permits are not required for operation on the Kansas Turnpike. A permit fee is required for access between the turnpike and motor freight terminals located within a 10-mile radius of each toll booth, except at the northeastern end of the turnpike where a 20-mile radius is allowed. A per-company and per-power-unit permit is required for special vehicle combinations (SVC), i.e., Triples. Access permits are valid for 6 months, while SVC permits are valid for 1 year.

The maximum number of units in a combination vehicle is three cargo carrying units plus one tractor. The maximum vehicle overall length is 119 feet. Authorization from the Chief Engineer/Manager or Highway Patrol Captain is required for loads and vehicles longer than 119 feet. SVC trailers are limited to 28.5 feet in length. The maximum vehicle width is 12.5 feet for vehicles and loads for both day and night operation. The

maximum vehicle height is 14 feet. Vehicles and loads activating high load detectors must stop and cannot proceed without authorization. The maximum vehicle weight is 120,000 pounds on the turnpike; however, SVC's have a maximum weight of 110,000 pounds and must comply with the Federal bridge formula. The maximum axle weight is 20,000 pounds on a single axle and 34,000 pounds on a tandem axle.

SVC permits may include any restrictions deemed necessary, including specific routes and hours, days and/or seasons of operation. Rules and regulations can be promulgated regarding driver qualifications, vehicle equipment and operational standards. SVC's cannot be dispatched or operated during adverse weather conditions. All axles, except steering axles, must have dual wheels and must be able to achieve and maintain a speed of 40 miles per hour on all grades. Drop and lift axles are prohibited. A minumum of six and a maximum of nine axles are required. All but the steering axle must be equipped with antispray devices. The heaviest trailers are to be placed forward. Following distance is 100 feet for every 10 miles per hour. SVC's must travel in the right lane except for passing. Hazardous cargo is prohibited. Convex mirrors are required on both sides of the cab. Drivers must have a CDL with appropriate endorsements: 2-years experience driving tractor semitrailers, 1 year driving doubles, have completed SCV driving training and a company road test. Equipment must comply with the requirements of 49 CFR 300-399.

The turnpike has no time-of-day travel restrictions; however, SVC's cannot operate on holidays or during holiday weekends. There are no turnpike route limits, however, SVC's are restricted to travel only on I-70 from a motor-freight truck terminal located within 5 miles of Goodland to the Kansas-Colorado State Line and on US 69 Alternate from Baxter Springs motor-freight terminal to the Kansas-Oklahoma State Line.

Routes: SVC's are allowed to travel the entire length of the Turnpike. However, SVC's are restricted on I-70 to travel only from a motor-freight truck terminal located within 5 miles of Goodland to the Kansas-Colorado State Line, and on US 69 Alternate from Baxter Springs to the Kansas-Oklahoma State Line. The Interstate Route designation of the Turnpike is as follows.

	From	To
I-35	Oklahoma State Line	Kansas Turnpike Authority (KTA) Milepost 127.
I-70	KTA Milepost 162.	KTA Milepost 223.
I-335	KTA Milepost 127	KTA Milepost 177.
I-470	KTA Milepost 177.	KTA Milepost 182.

State: Massachusetts.
Combination: Turnpike Double.
Length of the Cargo Carrying Units: 114 feet.
Operational Conditions: Both the tractor manufacturer for each tractor used in tandem trailer operations on the turnpike and the permittee shall certify to the Massachusetts Turnpike Authority (MTA), prior to the approval of a tractor that it is capable of hauling the maximum permissible gross load to be transported by the permittee at a speed not less than 20 miles per hour on all portions of the turnpike system.

Brake Regulation

1. The brakes on any vehicle or dolly converter or combination of vehicles used in tandem trailer operations shall comply with Federal regulations as stated in 49 CFR 393(C), as revised, and effective on the date of entry upon or use of the turnpike.

2. In addition, any vehicle or dolly converter or combination of vehicles used in tandem trailer operations shall meet the requirements of the provisions of the Massachusetts Motor Vehicle Law.

3. On units of tandem trailer combinations certified on and after June 1, 1966, the brake application line of every tandem combination shall be equipped with suitable devices to accelerate application and release of the brakes of the towed vehicles, and these devices shall be so arranged that the brake application signal does not pass directly through more than one trailer, but is dead-ended at the rear of the trailer or alternatively at the dolly, and the application signal then is retransmitted to the dolly and the second trailer. The devices required above for retransmission of the application signal shall be closely connected to and supplied by air reservoirs which have their air supplied to them by the emergency line. In the event of a rupture of the application line on the towed vehicle of any tandem combination, the loss of brake application shall be limited upstream of the loss to those vehicles between the rupture and the first retransmission device.

Axles

A tractor used to haul a tandem trailer combination with a gross weight of more than 110,000 pounds shall be equipped with tandem rear axles, each of which shall be engaged to bear its full share of the load on the roadway surface.

Tandem Assembly

In the assembly of tandem combinations prior to their operation on the turnpike, the permittee shall ascertain the total gross weight of each trailer of the proposed combination. In the event that the gross weight of the trailers vary by more than 20 percent, the permittee shall couple them for each trip according to their gross weight, that is with the heaviest trailer coupled to the tractor.

Indication That Trailers Form One Unit

When the distance between the rear of the one semitrailer and the front of the following semitrailer is 10 feet or more, the dolly shall be equipped with a device, or the trailers shall be connected along the sides with suitable material, which will indicate to other turnpike users that the trailers are connected and are in effect one unit. Such devices or connections shall be approved by the MTA prior to use on a tandem trailer combination.

Shifting and Swerving

Coupling devices shall be so designed, constructed and installed and the vehicles in a tandem trailer combination traveling on a level, smooth, paved surface will follow in the path of the towing vehicle without shifting or swerving from side to side over 3 inches to each side of the path of the towing vehicle when it is moving in a straight line.

Registration of Drivers

Proposed drivers of tandem trailer combinations shall be registered by the MTA prior to driving such equipment on the turnpike. Applications for registration shall include all specified driving, safety and physical examination records and be accompanied by an official abstract of the driving record of the individual for who it is being submitted. Drivers of tandem trailer combinations are required to prove to the MTA a minimum of 5 years of tractor trailer driving experience.

Speed Regulations

Tandem trailer combinations shall comply with the existing speed regulations for trucks and shall be subject to the rigid enforcement of the 55 miles per hour speed limit, or any lower speed limit posted due to adverse weather or road conditions for such vehicles on the turnpike.

Distance Between Vehicles

A minimum distance of 500 feet, or approximately two delineator spaces, shall be maintained under normal conditions between a tandem trailer combination and a vehicle traveling in front of it in the same travel lane, except when passing occurs.

Passing

A tandem trailer unit may pass another vehicle traveling in the same direction only if the speed differential will allow the tandem trailer unit to complete the maneuver and return to the normal driving lane within a distance of 1 mile.

Turnpike Regulations

Except as noted herein, and in the Tandem Trailer Permit, all rules and regulations governing the use and occupancy of the turnpike shall apply to the operation of tandem trailer combinations on the turnpike.

Miscellaneous Powers

The MTA may revoke or temporarily suspend at will any permit issued for the operation of tandem combinations on the turnpike, at its sole discretion, in whole or in part. If the MTA shall temporarily suspend tandem trailer operations at any time for any reason, including reasons of inclement weather, reconstruction or other conditions, the instructions of the MTA and of the Massachusetts State Police shall be complied with immediately.

Makeup-Breakup Areas

Tandem trailer units shall be assembled and disassembled only in special makeup-breakup areas designated for this purpose by the MTA; no combination consisting of a truck tractor, first semitrailer and dolly, with or without a second semitrailer, shall exit from the turnpike into a publicly maintained highway within the Commonwealth of Massachusetts, except where other laws or local regulations permit.

State: Montana.
Combination: Rocky Mountain Double.
Length of the Cargo Carrying Units: 81 feet.
Operational Conditions: Vehicle combinations must conform to posted speed limits. Vehicle combinations may operate 24 hours a day, 7 days a week on all highways. Operations are restricted during adverse weather conditions, when such operation affects the safety of the traveling public.
Routes: All National Network routes except US 87 from milepost 79.3 to milepost 82.5.
Legal Citations: 61-10-124 MCA; 61-10-121 MCA; ARM 18.8.509.

State: Montana.
Combination: Turnpike Double.
Length of the Cargo Carrying Units: 90 feet.
Operational Conditions: "Turnpike Doubles" with a 100-foot overall length are limited to the Interstate System plus a 2-mile access provision to and from the Interstate. On all other highways "Turnpike Doubles" are limited to a 95-foot overall length. All "Turnpike Doubles" are restricted to the posted speed limits and cannot operate during adverse weather conditions if such travel affects the safety of the public.
Routes: All National Network routes except US 87 from milepost 79.3 to milepost 82.5.
Legal Citations: 61-10-124(4) MCA; 61-10-121 MCA.

State: Montana.
Combination: Triple.
Length of the Cargo Carrying Units: 100 feet.
Operational Conditions: Triple units are allowed only on routes that are part of the Interstate System. "Triples" are granted a 2-mile access provision off the Interstate for services or loading. Provisions may be granted at the discretion of the Administrator of the Motor Services Division for access beyond the 2-mile radius of the Interstate.
Triple operations are subject to a variety of equipment specifications. In addition, drivers of triple vehicle combinations are required to be certified. The certification process includes an actual road test under all types of driving conditions familiar to Montana.
Routes: Triples may operate on the following National Network routes. The entire length of Interstate routes 15, 90, 94 plus the 2-mile access provision discussed under "Operational Conditions."
Legal Citations: 61-10-124(6) MCA, ARM 18.8.517; 61-10-146(12) MCA, ARM 18.8.516; 61-10-121 MCA.

State: Montana.
Combination: Truck-trailer-trailer.
Length of the Cargo Carrying Units: 103 feet.
Operational Conditions: Maximum overall dimensions for truck-trailer-trailer combinations are as follows:

a. 110-foot overall length on the Interstate, only with a conventional truck, with a 2-mile access provision.
b. 105-foot overall length on the Interstate, only with a cab-over-engine truck, with a 2-mile access provision.
c. 95-foot overall length on two-lane highways.

Routes: All National Network routes except US 87 from milepost 79.3 to milepost 82.5.
Legal Citations: 61-10-124 MCA; 61-10-121 MCA; ARM 18-8-509.

State: Nebraska.
Combination: Rocky Mountain Double.
Length of the Cargo Carrying Units: 85 feet.
Double trailers not exceeding a total length of 65 feet may travel without restriction as to route or as to relative trailer dimension. Double trailers over 65 feet may travel empty, but only with permits subject to the limitations set forth in the Rules and Regulations of the State of Nebraska Department of Roads.
Operational Conditions: Permits, for which a fee is charged, are required for operation on the Interstate and Defense Highway System only. Axle weight limits are 20,000 pounds for single axle and 34,000 pounds for tandem axle. Lift axles, which may be raised or lowered from within the vehicle or which have controls that may be reached from within the vehicle, and dummy axles will be disregarded in determining lawful weight.

(1) No wheel of a vehicle or trailer equipped with pneumatic, solid rubber or cushion tires shall carry a gross load in excess of 10,000 pounds on any road or highway nor shall any axle carry a gross load in excess of 20,000 pounds on any road or highway.
(2) No group of two or more consecutive axles shall carry a load in pounds in excess of the value given in the following table corresponding to the distance in feet between the extreme axles of the group, measured longitudinally to the nearest foot, except that the maximum load carried on any group of two or more axles shall not

exceed 80,000 pounds on the Interstate System unless the Director-State Engineer authorizes a greater weight.

TABLE 1.—ALLOWABLE AXLE GROUP WEIGHT

Axle spacing (ft)	Maximum Load (lbs) by Axle Group

60				85,500	90,000	95,000

(3) The distance between axles shall be measured to the nearest foot. When a fraction is exactly 1/2 foot the next larger whole number shall be used, except that (a) any group of three axles shall be restricted to a maximum load of 34,000 pounds unless the distance between the extremes of the first and third axles is at least 96 inches and (b) the maximum gross load on any group of two axles, the distance between the extremes of which is more than 8 feet but less than 8 feet 6 inches, shall be 36,000 pounds.

(4) The weight limitations of wheel and axle loads shall be restricted to the extent deemed necessary by the Nebraska Department of Roads for a reasonable period where road subgrades or pavements are weak or are materially weakened by climatic conditions.

(5) Vehicles equipped with a greater number of axles than provided in the tables shall be legal if they do not exceed the maximum load upon any wheel or axle, the maximum load upon any group of two or more consecutive axles, the total gross weight or any of such weights as provided in subsections (2) and (4) of this section.

(6) This section shall not apply to a vehicle that has been issued a permit pursuant to section 39–6,181.

(7) Any two consecutive axles, the centers of which are more than 40 inches and not more than 96 inches apart, measured to the nearest inch between any two adjacent axles in the series shall be defined as tandem axles and the gross weight transmitted to the road surface through such series shall not exceed 34,000 pounds. No axle of the series shall exceed the maximum weight permitted under this section for a single axle.

Provisions Applicable for the Movement of Multi-Unit Combinations of Trailers and Semi-Trailers Requiring Special Permits

Definitions:

Extra-Long Vehicle Combinations: For the purpose of these rules and regulations, extra-long vehicle combinations may include the following vehicle combinations:

A vehicle combination consisting of a truck tractor, semitrailer and two trailers having an overall length of not more than 105 feet, the semitrailer and trailers of which must be of approximately equal lengths.

A vehicle combination consisting of a truck tractor, semitrailer and single trailer having an overall length of not more than 105 feet, the semitrailer and trailers of which must be of approximately equal lengths.

A vehicle combination consisting of a truck tractor, semitrailer and single trailer, one trailer of which is not more than 48 feet long and the other trailer of which is not more than 28 feet long nor less than 26 feet long. The entire combination of which is not more than 95 feet long. In this combination, the shorter trailer shall be operated as the rear trailer.

Trailer shall mean any vehicle, with or without motive power, designed for the carrying of property and for being drawn by a motor vehicle and so constructed that no part of its weight rests upon the towing vehicle; and for the purpose of these rules and regulations, a semitrailer used with a converter dolly shall be considered a trailer.

A location within 6 miles of the Interstate System that is approved by the permit and that is to be used by the permittee for assembling or disassembling extra-long vehicle combinations.

Highways, roads or streets upon which the permittee will be allowed to move an extra-long vehicle combination when moving from or to a designated staging area and to or from the Interstate System and the area of the interchanges of the Interstate System which may be traveled by the permittee. No extra-long vehicle permits will be issued to allow travel east of Nebraska Highway 50 on the Interstate System. Except as designated on the permit, in case of deteriorating weather conditions, emergency or breakdown, vehicles moving by authority of an extra-long vehicle permit shall not be permitted to reenter the Interstate System.

The Nebraska Department of Roads, at its discretion, may issue permits for the operation of extra-long vehicle combinations when unladen, but only over a designated route on the Interstate System and from a staging area located not more than 6 miles from the Interstate System.

No departure from, amendment, alteration or change of the routes designated on the extra-long vehicle combination permit shall be allowed. If the permit holder desires to travel on any route not designated on its permit the Nebraska Department of Roads must approve, in writing, an amendment authorizing the additional route.

Inspection of Permit and Vehicle: As a condition of the issuance of an extra-long vehicle combination permit, applicant must agree that the operator of the vehicle operating under the authority of an extra-long vehicle combination permit will submit to an inspection of the permit and of the vehicle at any time such vehicle is on Nebraska highways, whether or not there is reason to believe that such vehicle is in violation of the permit or the Nebraska motor vehicle laws. A copy of the permit must be carried in the power unit of the extra-long vehicle combination.

The granting of a permit by the Nebraska Department of Roads may contain restrictions or prohibit operations as determined necessary by the Department of Roads. Movement shall be made during daylight hours (sunrise to sunset). No movement shall be permitted on Saturday, Sunday, holidays or long holidays as defined in the Department of Roads' rules and regulations pertaining to the issuing of over-dimensional and overweight permits. No movement will be permitted when the ground winds, in the vicinity or on the highways over which the extra-long vehicle combinations may move, exceed a velocity of 25 miles per hour, nor during steady rain, snow, sleet, ice or other conditions that cause the pavement to be slippery or when visibility is less than 800 feet. Should any of these conditions be encountered after commencement of the move, the driver shall cease operations by moving the extra-long vehicle combination from the roadway at the first point that the vehicle can be safely removed to prohibit the hazardous operation of the combination and to provide for safety of other highway users. Movement of extra-long vehicle combinations during any of the aforesaid prohibited times shall be grounds for revocation of the permit.

Application for Extra-Long Vehicle Combination Permit

An annual permit application shall be made on the Standard Form Number RM–425 furnished by the Nebraska Department of Roads and shall be submitted to the State of Nebraska, Department of Roads, Permit Office, Lincoln, Nebraska. Permits will only be issued from the Lincoln Permit Office, Monday through Friday from 8 a.m. to 12 p.m. and 1 p.m. to 5 p.m. when open for business. Permittee shall give at least 5 working days for processing of any extra-long vehicle combination permits.

The permit application must list all truck tractors to be operated under the registered permit, as well as the license number of such vehicles, the State of issuance of the license, number of such vehicles, the vehicle identification numbers and the drivers who will operate under the requested permit. Only trucks owned or leased exclusively to the permit applicant for the entire term of the requested permit and only drivers under the control and supervision of the applicant may be listed on such applications. An annual permit is required for each qualified carrier company or individual. In the event the permittee desires to change the information listed on its permit application regarding vehicles or drivers, it may do so by written notice to the Nebraska Department of Roads in Lincoln. Such notice shall be by means of registered or personally delivered mail and shall not be effective for a period of 2 calendar days from the receipt of such notice by Nebraska Department of Roads.

Applicants for an extra-long vehicle combination permit must certify in writing to the Nebraska Department of Roads that the driver of a vehicle which is permitted to move by authority of such permit has complied with all Federal Motor Carrier Safety Regulations and all State laws, rules and regulations pertaining to drivers and drivers' licenses. Applicants must notify the Nebraska Department of Roads, in writing, of traffic citations issued to any driver for improper operation of an extra-long vehicle combination within 5 days of the issuance of said citation.

The owner or operator of each extra-long vehicle combination shall have on file with the Nebraska Department of Roads, an insurance certificate with a company authorized to do business in Nebraska, in an amount of not less than $1,000,000 for public liability and property damage. The insurance certificate must contain a provision stating that the insurance company will give at least 30 days written notice to the Nebraska Department of Roads in case of cancellation.

Additional Restrictions Pertaining to Movement of Extra-Long Vehicle Combinations

From November 15 to April 15 of each year, the permittee must contact the Nebraska Department of Roads in Lincoln, Nebraska, between the hours of 8 a.m. and 5 p.m. on any day the Nebraska Department of Roads is open for business and within 3 hours prior to commencing travel to obtain authorization for movement that day. From April 16 through November 14 of each year, the permittee must contact the Nebraska Department of Roads in Lincoln, Nebraska, between the hours of 8 a.m. and 5 p.m. on any day that the Nebraska Department of Roads is open for business and within three days of commencing travel to obtain authorization for movement. The Department of Roads will at that time issue an authorization number, record the time of the call, the driver of the vehicle to be moved and the route to be traveled.

A sign may be required to be displayed at least 8 feet above the roadway surface on the rear-most vehicle of the combination of the vehicles. The sign shall be of yellow reflectorized material with reflectorized black letters of not less than 10 inches high, and must conform to the diagram set forth in Nebraska's Exhibit A (not included).

The granting of a permit shall not constitute a waiver of any license (tonnage) requirements imposed by the State of Nebraska.

The granting of a permit pursuant to these rules and regulations shall not waive any liability or responsibility of the applicant which might accrue for property damages, including damage to the highways, or for personal injuries resulting from the operation of extra-long vehicle combinations.

A distance of a least 500 feet must be maintained between all vehicles and any two extra-long combination of vehicles when operating on Nebraska streets or highways.

except when one extra-long combination of vehicles is passing another.

All vehicles in an extra-long combination of vehicles and all devices used to couple vehicles in the extra-long vehicle combination must be designed, constructed and installed so that each towed vehicle follows the alignment of the towing vehicle without shifting or swerving more than 3 inches to the right or left of the alignment when the combination is moving in a straight line on a level, smooth, paved highway during calm, dry weather conditions.

Extra-long vehicle combinations of not more than three cargo units shall have not less than six axles nor more than nine axles.

In addition to any other accident reports required by State or Federal laws, all accidents involving extra-long vehicle combinations shall be reported in writing by the permittee to the Nebraska Department of Roads, Permit Office, P.O. Box 94759, Lincoln, Nebraska 68509 within 5 business days of such accident.

The Nebraska Department of Roads may impose additional restrictions and requirements not set forth in these rules and regulations as a condition for the operation of the extra-long vehicle combinations over particular highways or sections of particular highways in this State. The Nebraska Department of Roads shall revoke or amend a decision to allow the operation of an extra-long vehicle combination on any highway of this State if changed circumstances or conditions render the operation of the combination of vehicles impracticable or unsafe.

Routes: Vehicles requiring permits are restricted to I–80 from west of Nebraska Highway 50 to the Wyoming border. There are no route restrictions for vehicles not requiring permits.

Legal Citations: Neb. Rev. Stat. § 39–6.179 (Reissue 1988) (Double trailers under 65 feet); Neb. Rev. Stat. § 39–6.179.01 (Reissue 1988) (Double trailers over 65 feet); Nebraska Department of Roads Rules and Regulations, Title 408, Chapter 1 (Double over 65 feet).

State: Nebraska.
Combination: Turnpike Double.
Length of the Cargo Carrying Units: 95 feet.
Operational Conditions: Same conditions as for Nebraska Rocky Mountain Doubles, except that the trailers must be of approximately equal length.
Routes: Same routes as for Nebraska Rocky Mountain Doubles.
Legal Citations: Same as for Nebraska Rocky Mountain Doubles.

State: Nebraska.
Combination: Triple.
Length of the Cargo Carrying Units: 95 feet.
Operational Conditions: Triple trailer units are allowed only when empty and in compliance with the restrictions set out in appendix C to part 658.
Routes: Vehicles requiring permits are restricted to I–80 from west of Nebraska Highway 50 to the Wyoming border. There are no route restrictions for vehicles not requiring permits.
Legal Citations: Neb. Rev. Stat. § 39–6.179.01 (Reissue 1988); Nebraska Department of Roads Rules and Regulations; title 408, chapter 1.

State: Nebraska.
Combination: Truck and trailer—75 feet overall length.
Length of the Cargo Carrying Units: Truck and trailer—48 feet.
Operational Conditions: One truck and one trailer, loaded or unloaded, used in transporting a combine to be engaged in harvesting, while being transported into or through the State during daylight hours and the total length does not exceed 75 feet including load.
Routes: All State routes.
Legal Citations: Neb. Rev. Stat. § 39–6,179.

State: Nevada.
Combination: Rocky Mountain Double.
Length of the Cargo Carrying Units: 95 feet.
Operational Conditions: Permitted vehicles with total overall length of over 70 feet and up to 105 feet, consisting of not more than three trailers or a truck and two trailers. No trailer longer than 48 feet. If one trailer is 48 feet the other trailer cannot exceed 42 feet. Maximum weight not to exceed 129,000 pounds using uncapped Bridge Formula B.
Identifying devices must be carried and displayed. Nevada regulations establish standards for the operation of such vehicles including:
(a) Types and number of vehicles to be permitted in combination;
(b) Horsepower of a motor truck;
(c) Operating speeds;
(d) Braking ability; and
(e) Driver qualifications.
Routes: All National Network Routes.

State: New York.
Combination: Rocky Mountain Double.
Length of the Cargo Carrying Units: 102 feet.
Operational Conditions: Tandem trailer combinations in excess of the limits of section 385 of the New York State Vehicle and Traffic Law, may operate on the thruway system under a Tandem Trailer Permit issued by the New York State Thruway Authority upon application to it by the prospective permittee on Form TA–6807, subject to certain provisions as follows:

Definition of a Tandem

A complete tandem trailer combination shall consist of a tractor, first semitrailer, dolly and second semitrailer; tractor, first semitrailer and dolly or other such combination as may be approved by the Authority. No semitrailer, including any load thereon shall be in excess of 48 feet. The total length of the combination, including the tractor, semitrailers and dolly shall not exceed 114 feet.

Also, tandem combinations not utilizing a converter dolly, but a sliding fifth wheel attached to the lead trailer commonly referred to as "B-Train" combination, will require separate Thruway Engineer Services approval prior to initial tandem run. Special provisions regarding B-Train's will be reviewed at time of application or request for use on the thruway.

Weight Limits

Any such combinations of vehicles may not exceed a total maximum gross weight of 143,000 pounds. The maximum gross weight of the unit of tractor and first semitrailer shall not exceed 80,000 pounds. The maximum gross weight that may be carried upon any combination of units is limited by the maximum gross weight that can be carried upon each unit and the axles thereof as provided in section 385 of the New York State Vehicle and Traffic Law.

The maximum gross weight for the unit of tractor and first semitrailer exceeding 80,000 pounds is governed by section 385 of the New York State Vehicle and Traffic Law, as amended.

Thruway requirements for maximum gross weights of tandem combinations exceeding 138,000 pounds:

1. Tandem combinations grossing in excess of 138,000 pounds must have a tandem-axle dolly to meet the nine axle requirement.
2. The maximum permissible gross weight for B-Train combinations is 127,000 pounds.

Hazardous Materials

Special restrictions are applicable to the transportation of hazardous materials along with part 397 of the Federal Motor Carrier Safety Regulations.

All radioactive material and explosives Class A and B are prohibited.

Other hazardous materials, classifications 2 through 9, as defined in the U.S. DOT, § 173.2, may be carried in tandem combinations, but the total volume of such material in a tandem combination shall not exceed the total volume that could be carried in a single trailer.

All provisions of the Federal Motor Carrier Safety Regulations shall be observed at all times. All unattended tandem combinations containing or including the power unit shall have the shipping papers of each trailer unit in the vehicle, available and accessible for review. All single trailers or trailer combinations shall display appropriate placarding as required.

Over-Dimension Regulations

All over-dimensional and weight regulations of the Authority shall apply to such units unless specifically excluded under the terms of the Tandem Trailer Permit of these regulations.

Safety Training

Prior to the issuance of a Tandem Operator Certification, company management and operating personnel must comply with safety training requirements set by the Authority.

The Authority has established a program of safety training seminars for all certified tandem companies and company safety patrols. The safety-intensive classes are tailored to the individual needs of each company and offered at no charge during normal business hours with lectures, video presentations and hands-on demonstrations. Authority personnel will cover the following subjects:

1. Proper tandem hookups.
2. On-the-road operations.
3. Professional driver safety attitudes.
4. Tandem Rules and Regulations.
5. Certification procedures.
6. Expediting paperwork.
7. Accident/incident investigations.
8. Disabled vehicle procedures.
9. Hazardous materials regulations.
10. Sharing the road with other drivers.
11. Tandem area usage.
12. Federal Motor Carrier Safety Regulations parts 383, 392, 395, 396.

Certification of Tractors

Both the tractor manufacturer for each tractor used in tandem trailer operations on the thruway and the permittee shall certify to the Authority prior to the approval of the tractor that it is capable of hauling the maximum permissible gross load to be transported by the permittee at a speed on not less than 20 miles per hour on all portions of the thruway system.

Companies leasing equipment requiring certification for use in tandem operations are responsible for certification and maintenance of all equipment.

Brake Regulations

(1) The brakes on any vehicle or dolly converter or combination of vehicles used in tandem trailer operations shall comply with the Federal regulations as stated in 49 CFR part 393, as amended.

(2) In addition, any vehicle or dolly converter or combination of vehicles used in tandem trailer operations shall meet the additional applicable requirements of the provisions of the New York State and Traffic Law.

(3) On units of tandem trailer combinations certified on and after June 1, 1968, the brake application line of every tandem combination shall be equipped with suitable devices to accelerate application and release of the brakes of the towed vehicles, and these devices shall be so arranged that the brake application signal does not pass directly through more than one trailer but is deadened at the rear of the lead trailer or, alternatively at the dolly, and the application signal then retransmitted to the dolly and the second trailer. The devices required above for retransmission of the application signal shall be closely connected to and supplied by air reservoirs which have their air supplied to them by the emergency line. In the event of rupture of the application line on the towed vehicles of any tandem combination, the loss of brake application shall be limited up stream of the loss to those vehicles between the rupture and the first transmission device.

Axle Type

A tractor which will be used to haul a tandem trailer combination with a total gross weight of more than 110,000 pounds shall be equipped with tandem rear axles, both with driving power, or other axle configuration as may be approved by the Authority.

A tractor which will be used to haul a tandem trailer combination with a total gross weight of 110,000 pounds or less may be a two axle tractor with a single drive axle.

Any tandem combination utilizing single wheel tires commonly referred to as "Super Singles" instead of conventional dual wheel are required to utilize triple-axle tractors, dual-axle trailers and dual-axle dollies.

Tandem Assembly

In the assembly of tandem combinations prior to their operation on the thruway, the permittee shall ascertain the total gross weight of each trailer of the proposed combination. When the gross weight of the two trailers in a tandem combination vary more than 20 percent, the heavier of the two must be placed in the lead position.

Dollies

Every converter dolly certified on and after June 1, 1968, used to convert a semitrailer to a full trailer may have either single or tandem-axles at the option of the permittee. However, single-axle dollies may not utilize low profile tires. Tandems grossing in excess of 138,000 pounds must have a tandem-axle dolly to meet the nine-axle requirement.

When the distance between the rear of the first semitrailer and the front of the following semitrailer is 10 feet or more, the dolly shall be equipped with a device, or the trailers shall be connected along the sides with suitable material, which will indicate to other thruway users that the trailers are connected and are in effect one unit. Such devices or connection shall be approved by the Authority prior to use on a tandem trailer combination.

Also, tandem combinations not utilizing a converter dolly, but a sliding fifth wheel attached to the lead trailer commonly referred to as "B-Train" combination, will require separate Thruway Engineer Service approval prior to initial tandem run. Special provisions regarding B-Trains will be reviewed at time of application or request for use on the thruway.

Drivers—Driver Forms Required for Permit

Application for special permit to operate tandem trailer vehicle must be accompanied by accident reports over the last 5 years, a medical certificate within the last 2 years and a motor vehicle driver's 10-year abstract (Original-Certified copy, dated within last 3 months). The abstract is not required for New York State licensed operators.

Speed Limit

Tandem trailer combinations shall comply with the existing speed regulations for trucks and shall be subject to the rigid enforcement of 55 miles per hour speed limit, or any lower speed limit posted due to adverse weather or road conditions for such vehicles on the thruway. Radar detection devices are not permitted in tandem operations on the thruway.

Operational Safety

A minimum distance of 500 feet, or approximately four delineator spaces, shall be maintained under normal conditions between a tandem trailer combination and a vehicle traveling in front of it in the same travel lane, except when passing occurs. All tandem operators are required to wear safety belts when operating a tandem combination.

Passing Vehicles

A tandem trailer combination may pass another vehicle traveling in the same direction, only if the speed differential will allow the tandem trailer combination to safely complete the maneuver and return to the normal driving lane within a distance of 1 mile.

Routes:
IR 87 between the Bronx-Westchester County Line and IR 90 (Thruway Exit 24).
IR 90 between the New York-Pennsylvania State Line (Thruway Exit B1) and IR 87 (Thruway Exit 24).
IR 90 between IR 90 (Thruway Exit B1) and the New York-Massachusetts State Line.
IR 190 between IR 90 (Thruway Exit 53) and the New York-Canada border at the Lewiston-Queenston Bridge.
Route NY 912M (Berkshire Connection of the New York State Thruway) between IR 87 (Thruway Exit 21A) and IR 90 (Exit B1).
IR 87 Section of the New York State Thruway:
Exit 21B—Roadway between IR 87 the New York State Turnpike Authority (NYSTA) Exit 21B toll booth at Exit 21B and the access road to Route US 9W. Route US 9W between the access road and a point 1500 feet north.
IR 90 (Berkshire Spur) Section of the New York State Thruway:
Exit B1—Route US 9 between the southern most access ramp and a point 0.8 miles north.
Exit B3—Within a radius of 2000 feet of any exit or entrance designated B3 to the New York State Thruway, Berkshire section, at Route NY 22.
IR 90 Section of the New York State Thruway:
Exit 28—Within a radius of 1500 feet of any NYSTA toll booth at Fultonville, New York.
Exit 32—Route NY 233 between IR 90 and a point 0.6 miles north at Westmoreland in Oneida County.
Exit 44—Rout NY 332 between IR 90 and Collett Road. Collett Road between Route NY 332 and 6070 Collett Road, a distance of 0.8 ± miles.
Exit 52—A.) Walden Avenue between IR 90 and a point 0.8 miles west. Route NY 240 (Harlem Road) between Walden Avenue and a point 0.9 miles south B.) Walden Avenue

between IR 90 and a point 0.5 miles east. A roadway purchased from Sorrento Cheese, Inc. by the Town of Cheektowaga between Walden Avenue and a point 1040 feet south.

Exit 54—Routh NY 400 between IR 90 and Route NY 277. Route NY 277 between Route NY 400 and a point 0.5 miles north.

Exit 56—Within a radius of 1.2 miles from the New York State Turnpike Authority (NYSTA) toll booth on an access road to be built between the toll booth and the present eastern terminus of Route NY 179 at South Park Avenue, over Route NY 179 and Old Mile Strip Road to the truck terminal entrance on Old Mile Strip Road at a point approximately 2,430 feet southeast of the intersection of Old Mile Strip Road, or across Lake Avenue at the northern end of the truck terminal.

IR 190 (Niagara) Section of the New York State Thruway:

Exit N1—Dingens Street between IR 190 at Ogden Street and a point 0.8 miles west. James E. Casey Drive between Dingens Street and a point 0.45 miles north.

Exit N5—Louisiana Street between IR 190 and a point 0.7 miles south. South Street between Louisiana Street and Hamburg Street, a distance of 0.25 miles.

Exit N15—Route NY 325 (Sheridan Drive) between IR 190 and a point 0.1 miles east. Kenmore Avenue between Sheridan Drive and a point 0.4 miles south.

Exit N17—A) Route NY 266 (River Road) Between IR 190 and a point 1.5 miles northerly. B) Route NY 266 (River Road) between IR 190 and a point 1700 feet south of the southern most access road to the NYSTA.

New York State Vehicle and Traffic Laws, sections 385 and 1630.

State: New York.

Combination: Turnpike Double.

Length of the Cargo Carrying Units: 102 feet.

Operational Conditions: Same as for New York Rocky Mountain Doubles.

Routes: Same as for New York Rocky Mountain Doubles.

Legal Citations: Same as for New York Rocky Mountain Doubles.

State: North Dakota.

Combination: Rocky Mountain Double.

Length of the Cargo Carrying Units: 110 feet.

Operational Conditions: No permits are required if less than 80,000 pounds Gross Vehicle Weight. Weather restrictions (37–06–04–06, NDAC), weight distribution on trailers (37–06–04, NDAC), signing requirements (37–06–04–05, NDAC). Single trip permits are required only when exceeding 80,000 pounds Gross Vehicle Weight (GVW).

Weather restrictions—movements of longer combination vehicles (LCV's) are prohibited when:

1. road surfaces, due to ice, snow, slush or frost present a slippery condition which may be hazardous to the operation of the unit or to other highway users;

2. wind or other conditions may cause the unit or any part thereof to swerve, whip, sway or fail to follow substantially in the path of the towing vehicle; or

3. visibility is reduced due to snow, ice, sleet, fog, mist, rain, dust or smoke.

The North Dakota highway patrol may restrict or prohibit operations during periods when in its judgment traffic, weather or other safety conditions make travel unsafe.

Weight Distribution by Trailer:

1. In any three-unit combination, the lighter trailer must always be operated as the rear trailer, except when the gross weight differential with the other trailer does not exceed 5,000 pounds.

2. In any four-unit combination, the lightest trailer must always be operated as the rear trailer. The other two trailers must be arranged as provided in the above paragraph.

Signing requirement—the last trailer in any combination must have an "OVERLENGTH" sign mounted on the rear. The "OVERLENGTH" sign must be a minimum 12 inches in height and 60 inches in length. The lettering must be 8 inches in height with 1-inch brush strokes. The letters must be black on yellow background. A "LONG LOAD" sign may be used in lieu of the overlength sign. Beginning January 1, 1995, the "LONG LOAD" sign is mandatory.

Legal width—8 feet 6 inches on all highways.

Legal height—13 feet 6 inches.

Legal length—A single unit vehicle with two or more axles including the load thereon shall not exceed a length of 50 feet. A combination of two units including the load thereon shall not exceed a length of 75 feet. A combination of three or four units including the load thereon shall not exceed a length of 75 feet subject to safety rules adopted by the North Dakota Highway Commissioner. A combination of two, three or four units including the load thereon may exceed 75 feet in length but shall not exceed 110 feet in length when traveling on four-lane divided highways and those highways designated by the Highway Commissioner and local authorities as to the highways under their respective jurisdictions. All such combinations are subject to safety rules adopted by the Highway Commissioner. The length of a trailer or semitrailer including the load thereon may not exceed 53 feet except that trailers and semitrailers titled and registered in North Dakota prior to July 1, 1987, and towed vehicles may not exceed a length of 60 feet. A truck tractor and semitrailer or truck tractor-semitrailer-trailer when operated on the Interstate System or parts of the Federal-aid and primary system designated by the Highway Commissioner.

Legal Weight Limitations

A. Gross Vehicle Weight (GVW):

1. The GVW of any vehicle or combination of vehicles is determined by the following weight formula: $W = 500(LN/N-1 + 12N + 36)$ whereon the Interstate System W equals maximum weight in pounds carried on any group of two or more axles; L equals distance in feet between the extremes of any group of two or more consecutive axles; and N equals number of axles in the group under consideration, except that two consecutive sets of tandem axles may carry a gross load of 34,000 pounds each, providing the overall distance between the first and last axles of the consecutive sets of tandem axles is at least 36 feet; and where on highways other than the Interstate System W equals the maximum gross weight in pounds on any vehicle or combination of vehicles; L equals distance in feet between the two extreme axles on any vehicle or combination of vehicles; and N equals the number of axles of any vehicle or combination of vehicles under consideration.

2. The maximum GVW on State highways is 105,500 pounds unless otherwise posted. On the Interstate System the maximum GVW is 80,000 pounds. On all other highways the maximum GVW is 80,000 pounds unless designated for more, not to exceed 105,500 pounds.

B. Axle Weight:

1. No single axle shall carry a gross weight in excess of 20,000 pounds. Axles spaced 40 inches or less apart are considered one axle. Axles spaced 8 feet apart or over are considered as individual axles. The gross weight of two individual axles may be restricted by the weight formula except that on highways other than the Interstate, two axles spaced 8 feet apart or more may have a combined gross weight not to exceed 40,000 pounds. Spacing between axles shall be measured from axle center to axle center.

2. Axles spaced over 40 inches apart and less than 8 feet apart shall not carry a gross weight in excess of 17,000 pounds per axle. The gross weight of three or more axles in a grouping is determined by the measurement between the extreme axle centers except that on highways other than the Interstate, groupings of three or more axles may have a gross weight not to exceed 48,000 pounds.

3. During the spring breakup season or on otherwise posted highways, reductions in the above axle weights may be specified. Axle weights may also be reduced by the Bridge Load Limitations Map.

C. Wheel Weight:

1. The weight in pounds on any one wheel shall not exceed one-half the allowable axle weight. Dual tires are considered one wheel.

D. Tire Weight:

1. The weight per inch width of tire shall not exceed 550 pounds. The width of tire for solid tires shall be the rim width; for pneumatic tires, the manufacturer's width.

Minimum power requirement—The power unit shall have adequate power and traction to maintain a minimum speed of 15 miles per hour on all grades.

State: North Dakota.

Combination: Truck-trailer; Truck-trailer-trailer.

Length of the Cargo Carrying Units: 103 feet.

Operational Conditions: Same as for North Dakota Rocky Mountain Doubles.

Routes: Same as for North Dakota Rocky Mountain Doubles.

Legal Citations: Same as for North Dakota Rocky Mountain Doubles.

State: Ohio.

Combination: Rocky Mountain Double.

Length of the Cargo Carrying Units: 80 feet.

Operational Conditions: For each trip, an LCV as described above must obtain a permit at the entering toll plaza if it exceeds 75 feet in overall length. In addition to the normal toll charge for the vehicle as determined by weight class, a permit fee with an additional overlength fee per mile traveled is charged. Operations, of both long double combinations and triple combination vehicles, on the turnpike are subject to the provisions of a special permit.

Dimensional and Weight Limitations and Permit Information

No Permits Required for vehicles that do not exceed the following dimensional and weight limits:

Width: 8 feet 6 inches (102 inches).

Height: maximum 14 feet.

Length: (total).

Single Units

Trucks and two-axle buses, 40 feet.

Buses with three or more axles, 45 feet.

Combinations

Tractor-semitrailer, 75 feet.**

Tractor-semitrailer-semitrailer (short doubles), 75 feet.*

Other combinations of vehicles coupled together (includes house trailers, etc.), 65 feet.*

Long Combination Vehicles (LCV): Long double combinations (in excess of 90 feet but not exceeding 112 feet in length, maximum gross weight allowed 127,400 pounds) and triple trailer combinations (in excess of 90 feet but not exceeding 105 feet in length, maximum gross weight allowed 115,000 pounds). Operating permits are available, subject to compliance with provisions established by the Ohio Turnpike Commission, for the operation of a LCV on the turnpike. For information and details of the provision requirements, a letter setting forth all of the pertinent facts relative to obtaining a long double combination or triple trailer combination operating permit should be addressed to the Executive Director of the Ohio Turnpike Commission.

Weight

Maximum Single Axle Weight, 21,000 pounds.

Maximum Gross Weight, 90,000 pounds.

Tandem Axle Weight (4 feet or less), 24,000 pounds.

Tandem Axle Weight (over 4 feet but less than 8 feet), 34,000 pounds.

No permits will be issued to any vehicles exceeding weight or height limits. Any overdimension will require the use of a permit. Permits are issued at the toll plazas. Charges for these permits are computed as follows:

There is a basic charge for a single trip permit, plus a fee per mile for each foot (and/or each fractional part of a foot) of overwidth, and a fee for each foot (and/or each fractional part of a foot) of overlength and a fee per mile for each foot (or fractional part of a foot) of overheight. These permit charges are in addition to the regular toll charges for the weight class of the vehicle.

Travel under permit may be made at any time of the day or night if the vehicle does not exceed the following dimensions:

Width—10 feet.

Height—14 feet.

Length—(overall) 60 feet (62 feet with overhangs for vehicle carriers) with no single unit, or component thereof exceeding 60 feet. Travel under permits issued to vehicles in excess of the dimensions listed above is restricted to daylight hours, Monday through Saturday noon, and is prohibited on holidays or on the day before or the day after a holiday. *Nighttime* travel is, however, subject to the following regulations and restrictions:

(1) Overdimensional vehicles permitted to travel at night shall have all lights and reflectors required by the U.S Department of Transportation, Federal Highway Administration Rules and Regulations which require, in addition to other lights, two tail lights and two stop lights.

(2) Vehicles having an overhanging load in excess of 4 feet beyond the bed or body of the vehicle shall be restricted to daylight travel.

Provisions Covering Permits for Operation for Longer Combination Vehicles (LCV's) Long Double Trailer Combinations in Excess of 90 Feet in Length on the Ohio Turnpike

Long double trailer combinations in excess of 90 feet in length (double) may operate on the turnpike under a "long double trailer permit" (permit) issued by the Ohio Turnpike Commission subject to compliance by the permittee with the following provisions:

1. General Conditions

a. A double shall consist of a tractor, first semitrailer, a dolly and a second semitrailer. Neither the first semitrailer nor the second semitrailer shall be longer than 48 feet in length; mixed trailer length combinations are not permitted. The minimum length permitted to operate as a double shall be 90 feet and the maximum length of such a double shall not exceed 112 feet. The number of axles of a double shall be a minimum of five and a maximum of nine.

b. The total gross weight for a double shall not exceed 127,400 pounds. The gross load of a double shall not exceed the sum of the allowable gross loads on the axles, which are as follows:

Maximum gross weight on any one axle, 21,000 pounds.

Maximum combined axle load of any two successive axles, spaced 4 feet or less apart, 24,000 pounds.

Maximum combined axle load of any two successive axles, spaced more than 4 feet apart but less than 8 feet apart, 34,000 pounds.

2. Equipment

a. A tractor used in the operation of a double shall be capable of hauling a maximum weight, as specified in section 1, paragraph b of these provisions, at a speed of not less than 40 miles per hour on all portions of the turnpike.

b. Each unit used for towing other units in a double shall have sufficient structural strength to insure the safe and secure attachment of any coupling device used to tow other units. The forward semitrailer must be reinforced and the permittee must certify that it is strong enough for satisfactory attachment of the rear coupling device so that it can tow a trailer and dolly safely.

c. Coupling devices shall be so designed, constructed and installed, and the vehicles in a double shall be designed and constructed, as to insure that any towed vehicles when traveling on a level, smooth, paved surface will follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side of the path of the towing vehicle when the latter is moving in a straight line.

d. Units used in a double shall be equipped with coupling devices as required per current applicable Economic and Safety regulations of the Public Utilities Commission (PUCO), and Federal Motor Carrier Safety Regulations and as further provided herein.

e. A double shall be equipped with brakes as required as follows and per current applicable Economic and Safety regulations of the PUCO, and Federal Motor Carrier Safety Regulations. The brakes on a double shall also comply with the following:

(1) A double shall be equipped with full air brakes or air activated hydraulic brakes on the tractor and either air or electric brakes on the trailers.

(2) A double, at all times and under all conditions of loading, upon application of the service (foot) brake shall be capable of: developing a brake force that is not less than 43.5 percent of the gross combination weight; decelerating to a stop from not more than 20 miles per hour at not less than 14 feet per second; stopping from a speed of 20 miles per hour in not more than 30 feet, such distance to be measured from the point at which movement of the service brake pedal or control begins. Tests for deceleration and stopping distance shall be made on substantially level (not to exceed plus or minus 1 percent grade), dry, smooth, hard surface that is free from loose material.

(3) The parking brakes shall be capable of being applied by the driver's muscular effort

* Length includes overhang but does not include safety devices or bumpers attached to the front or rear of such combinations.

** Highway vehicle carriers may have up to 4 feet overhang in the rear and 3 feet overhang in front (82 feet maximum).

or by spring action. Their operation may be assisted by the service brakes or other source of power provided that failure of the service brakes or other power assisting mechanism will not prevent the parking brakes from being applied in conformance with the foregoing requirements. The parking brakes shall be so designed that when once applied they shall remain in the applied position despite exhaustion of any source of energy or leakage of any kind.

(4) Every unit in a double shall be equipped with brakes acting on all wheels, which shall include the front axle of the power unit.

(5) Brake hose shall conform to the appropriate specification set forth in the Society of Automotive Engineers Standards for "Hydraulic Hose" or "Automotive Air Brake Hose and Hose Assemblies."

(6) Every tractor used in the double shall be equipped with a reserve capacity, or reservoir for air storage, to insure that, with the engine stopped, a full service brake application may be made without depleting such reservoir pressure by more than 30 percent when such reservoir is fully charged with air at maximum pressure as regulated by the vehicle's air compressor governor cutout setting. Each such reservoir shall be provided with a means for readily draining it of accumulated oil or water.

(7) Every tractor used in the double utilizing compressed air for the operation of its own brakes or the brakes of other vehicles in a Double, shall be provided with a warning signal readily audible or visible to the driver, which signal will operate at any time the air reservoir pressure of such vehicle is below 50 percent of the air compressor governor cut-out pressure. In addition, each such vehicle shall be equipped with a pressure gauge arranged to indicate, in pounds per square inch, the pressure available for braking.

(8) The brakes on a double shall be designed and equipped so that braking action shall take place on all wheels as nearly simultaneously as possible to reduce to a minimum any possible tendency of a double to move out of alignment when stopping.

f. The distance between the rearmost axle of a semitrailer and the front axle of the next semitrailer in a coupled double unit, shall not exceed 12 feet 6 inches. In no event shall the distance between the semitrailers coupled in a double exceed 9 feet.

g. A double must be equipped with adequate, properly maintained, spray-suppressant mud flaps, on all axles except the steering axle.

3. Equipment Certification

a. A certification number will be issued by the Ohio Turnpike Commission for each approved tractor. The certification number shall be placed at a designated location on the tractor. The certification numbers are to be 3-inch high block letters and are to be black in color (another color may be used in order to obtain sufficient contrast between the tractor and number color, subject to approval of the Commission). The Commission shall issue a certification card for each approved tractor, the certification shall be carried in the cab of the tractor in a place readily available for inspection.

4. Driver Certification

a. Applications for drivers of a double shall be made by the permittee on a form provided by the Ohio Turnpike Commission prior to driving on the turnpike. No such unit shall be driven on the turnpike by any person other than a driver approved by the Commission.

(1)(A) Drivers must be over 26 years of age, in good health and shall have not less than 5 years experience driving tractor-trailer or tractor short double trailer motor vehicles. Such driving experience shall include experience throughout the four seasons.

(B) Drivers must comply with the applicable current requirements of the Federal Motor Carrier Safety Regulations and Federal Hazardous Materials Regulatons and the Economic and Safety regulations of the PUCO, as well as the requirements found herein.

(2)(A) An application for certification of a driver must include all information concerning the applicant's driving and safety record, as well as an official abstract of his driving record and copies of all accident reports for the last 5 years.

(B) The application must include evidence that the driver has undergone biennial physical examination of the type required by the rules of the PUCO and Federal Motor Carrier Safety Regulations.

(C) Driver certification must be renewed annually.

5. Operating Conditions

a. A permit fee is charged.

b. Tolls charged for a double will be the same as for other vehicles currently being based on total gross weight as determined automatically by the toll plaza scales, computerized classification system and toll rate schedule (except that Class 10 rates will be charged for units with a gross weight between 90,000 and 115,000 pounds and Class 11 rates charged for all units over 115,000 pounds gross weight), plus a fee for each trip.

c. In the assembly of a double prior to their operation on the turnpike, the permittee shall ascertain the total gross weight of each trailer of the proposed double. In the event that the gross weights of the trailers vary by more than 20 percent the permittee shall couple them according to their gross weights with the heavier trailer coupled to the tractor.

d. A minimum distance of 500 feet shall be maintained between double LCV units and/or Triple units wxcept when overtaking and passing another vehicle. Except when passing or when emergency or work-zone conditions exist, a double shall remain in the right-hand outside lane.

e. When, in the opinion of the Commission, the weather conditions are such that operation of a double is inadvisable, the Commission will notify the permittee that travel is prohibited for a certain period of time.

Provisions Covering Permits for Operation for Longer Combination Vehicles (LCV's) Long Double Trailer Combinations in Excess of 90 Feet in Length on the Ohio Turnpike

Long double trailer combinations in excess of 90 feet in length (Double) may operate on the turnpike under a "Long double Trailer Permit" (Permit) issued by the Ohio Turnpike Commission subject to compliance by the permittee with the following provisions:

1. General Conditions

a. A double shall consist of a tractor, first semitrailer, a dolly and a second semitrailer. Neither the first semitrailer nor the second semitrailer shall be longer than 48 feet in length; mixed trailer length combinations are not permitted. The minimum length permitted to operate as a double shall be 90 feet and the maximum length of such a double shall not exceed 112 feet. The number of axles of a double shall be a minmum of five and a maximum of nine.

b. The total gross weight for a double shall not exceed 127,400 pounds. The gross load of a double shall not exceed the sum of the allowable gross loads on the axles, which are as follows:

Maximum gross weight on any one axle, 21,000 pounds.

Maximum combined axle load of any two successive axles, spaced 4 feet or less apart, 24,000 pounds.

Maximum combined axle load of any two successive axles, spaced more than 4 feet apart but less than 8 feet apart, 34,000 pounds.

2. Equipment

a. A tractor used in the operation of a double shall be capable of hauling a maximum weight, as specified in section 1, paragraph b of these provisions, at a speed of not less than 40 miles per hour on all portions of the turnpike.

b. Each unit used for towing other units in a double shall have sufficient structural strength to insure the safe and secure attachment of any coupling device used to tow other units. The forward semitrailer must be reinforced and the permittee must certify that it is strong enough for satisfactory attachment of the rear coupling device so that it can tow a trailer and dolly safely.

c. Coupling devices shall be so designed, constructed and installed, and the vehicles in a double shall be designed and constructed, as to insure that any towed vehicles when traveling on a level, smooth, paved surface will follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side of the path of the towing vehicle when the latter is moving in a straight line.

d. Units used in a double shall be equipped with coupling devices as required per current applicable Economic and Safety regulations of the PUCO, and Federal Motor Carrier Safety Regulations and as further provided herein.

e. A double shall be equipped with brakes as required as follows and per current applicable Economic and Safety regulations of the PUCO, and Federal Motor Carrier Safety Regulations. The brakes on a double shall also comply with the following:

(1) A double shall be equipped with full air brakes or air activated hydraulic brakes on the tractor and either air or electric brakes on the trailers.

(2) A double, at all times and under all conditions of loading, upon application of the service (foot) brake shall be capable of: developing a brake force that is not less than 43.5 percent of the gross combination weight; decelerating to a stop from not more than 20 miles per hour at not less than 14 feet per second; stopping from a speed of 20 miles per hour in not more than 30 feet, such distance to be measured from the point at which movement of the service brake pedal or control begins. Tests for deceleration and stopping distance shall be made on substantially level (not to exceed plus or minus 1 percent grade), dry, smooth, hard surface that is free from loose material.

(3) The parking brakes shall be capable of being applied by the driver's muscular effort or by spring action. Their operation may be assisted by the service brakes or other source of power provided that failure of the service brakes or other power assisting mechanism will not prevent the parking brakes from being applied in conformance with the foregoing requirements. The parking brakes shall be so designed that when once applied they shall remain in the applied position despite exhaustion of any source of energy or leakage of any kind.

(4) Every unit in a double shall be equipped with brakes acting on all wheels, which shall include the front axle of the power unit.

(5) Brake hose shall conform to the appropriate specification set forth in the Society of Automotive Engineers Standards for "Hydraulic Hose" or "Automotive Air Brake Hose and Hose Assemblies."

(6) Every tractor used in the double shall be equipped with a reserve capacity, or reservoir for air storage, to insure that, with the engine stopped, a full service brake application may be made without depleting such reservoir pressure by more than 30 percent when such reservoir is fully charged with air at maximum pressure as regulated by the vehicle's air compressor governor cutout setting. Each such reservoir shall be provided with a means for readily draining it of accumulated oil or water.

(7) Every tractor used in the double utilizing compressed air for the operation of its own brakes or the brakes of other vehicles in a double, shall be provided with a warning signal readily audible or visible to the driver, which signal will operate at any time the air reservoir pressure of such vehicle is below 50 percent of the air compressor governor cut-out pressure. In addition, each such vehicle shall be equipped with a pressure gauge arranged to indicate, in pounds per square inch, the pressure available for braking.

(8) The brakes on a double shall be designed and equipped so that braking action shall take place on all wheels as nearly simultaneously as possible to reduce to a minimum any possible tendency of a double to move out of alignment when stopping.

f. The distance between the rearmost axle of a semitrailer and the front axle of the next semitrailer in a coupled double unit, shall not exceed 12 feet 6 inches. In no event shall the distance between the semitrailers coupled in a double exceed 9 feet.

g. A double must be equipped with adequate, properly maintained, spray-suppressant mud flaps, on all axles except the steering axle.

3. Equipment Certification

a. A certification number will be issued by the Ohio Turnpike Commission for each approved tractor. The certification number shall be placed at a designated location on the tractor. The certification numbers are to be 3-inch-high block letters and are to be black in color (another color may be used in order to obtain sufficient contrast between the tractor and number color, subject to approval of the Commission). The Commission shall issue a certification card for each approved tractor, the certification shall be carried in the cab of the tractor in a place readily available for inspection.

4. Driver Certification

a. Applications for drivers of a double shall be made by the permittee on a form provided by the Ohio Turnpike Commission prior to driving on the turnpike. No such unit shall be driven on the turnpike by any person other than a driver approved by the Commission.

Size and Weight Permit

A permit is required for operation of doubles whose units are greater than 29 feet in length. The maximum unit length is 59.5 feet. Permit movements are limited to travel from one-half hour before sunrise to one-half hour after sunset, 7 days a week, subject to the following restrictions:

(1) No travel is allowed on specified holidays, beginning at noon the day preceding the holiday. Specified holidays are: New Year's Day, Memorial Day, Independence Day, Thanksgiving Day and Christmas Day.

(2) Permit loads may move on other holidays if the permit is purchased by 4:30 p.m. prior to the holiday.

(3) Movement of permitted loads is restricted on the Interstate System in Cleveland, Oklahoma and Tulsa Counties from 7 a.m. to 9 a.m. and from 4 p.m. to 6 p.m., Monday through Friday.

Permits may be issued for travel on the Oklahoma turnpikes, not to exceed the following limits. The maximum weight on all turnpikes is 108,000 pounds. Permits shall not be issued for travel on the turnpikes unless a minimum speed of 40 miles per hour can be maintained.

Special Vehicle Combinations

A Special Vehicle Combination (SVC) shall consist of a truck tractor-semitrailer combination towing two complete trailers or semitrailers. No semitrailer or trailer used in such a combination shall have a length greater than 29 feet nor shall a SVC exceed the weight limitations imposed by statute.

No person shall operate or permit the operation of a SVC within Oklahoma without a current SVC permit issued by the Department of Public Safety, Size and Weight Permit Division. Such permits may only be used for operation upon Federal-aid Interstate highways or four-lane divided Federal-aid primary highways and for access or egress between points of origin or destination. Egress or access shall not exceed 5 statute miles.

A copy of a valid SVC permit shall be carried at all times in the authorized vehicle.

All SVC permit holders and drivers must comply totally with the latest Federal Motor Carriers Safety Regulations, 49 CFR, parts 390-397 of the U.S. Department of Transportation (U.S. DOT), except where Oklahoma rules contain provisions which are not in conflict with Federal requirements and are more stringent.

The driver must be under the control and supervision of the holder of the SVC permit, or have been issued the same.

The permit holder shall ensure that the driver meets the requirements listed below prior to operating any SVC in this State:

(1) The driver must fully comply with the driver's requirements contained in the Federal Motor Carrier Safety Regulations.

(2) A driver must have had at least 2 years of experience driving truck-trailer combinations.

(3) Valid documentation indicating driver compliance with the above driver requirements shall be in the possession of the driver while operating a SVC.

(4) The permit holder shall certify to the U.S. DOT that the driver is qualified and has valid documentation of same in his possession prior to the issuance of a SVC permit.

A completed and signed application will be accompanied by the tendering of an annual fee for each permit issued.

Each licensee shall insure that the operation of SVC's complies with the following rules in addition to other equipment requirements established by State or Federal laws or rules.

All truck tractors shall be powered to provide adequate acceleration and hill climbing ability under normal operation conditions, and to operate on level grades at speeds compatible with other traffic. The ability to maintain a minimum speed of 40 miles per hour under normal operation conditions on a grade over which the combination is operated is required.

All braking systems must comply with State and Federal requirements. In addition, fast air transmission and release valves must be provided on all trailers, semitrailers and converter dolly axles. A grade force limiting valve, sometimes called a "slippery road" valve, may be provided on the steering axle if Federal Motor Carrier Safety Regulations would so allow. Indiscriminate use of engine retarder brakes is prohibited.

Mud flaps or splash guards meeting the requirements of the procedures established below shall be followed when operating a SVC in this State.

A minimum distance of 500 feet shall be maintained between SCV's and other vehicles except when overtaking and passing. Except when passing another vehicle in the same direction, or when emergency conditions exist, a SVC shall remain at all times in the right hand outside lane.

Extreme caution in the operation of a SVC shall be exercised when hazardous conditions such as those caused by snow, wind, ice, sleet, fog, mist, rain, dust or smoke adversely affect control, visibility or traction. Speed shall be reduced when such conditions exist. When conditions become sufficiently dangerous the company or driver shall discontinue operations and shall not resume until the vehicle can be safely operated. The State may restrict or prohibit operations during periods, when in the State's judgment traffic, weather or other safety conditions make such operations unsafe or inadvisable.

Transportation by SVC, Class A and B explosives; Class A poisons and Class 1, 2 and 3 radioactive material or any other material deemed to be unduly hazardous by the U.S. DOT is prohibited. This prohibition does not include the transportation of gasoline, fuel, oil or heating oil or other such petroleum products.

All multiple trailer combinations must be stable at all times during normal braking and normal operation. A multiple trailer combination when traveling on a level, smooth, paved surface must follow in the path of the towing vehicle without shifting or swerving more than 3 inches to either side when the towing vehicle is moving in a straight line.

The total weight on any single axle shall not exceed 20,000 pounds. The total axle weight on any tandem axle shall not exceed 34,000 pounds. The total weight on any group of two or more consecutive axles shall not exceed the amounts shown in Table 1. Gross combination weight shall not exceed 90,000 pounds. All SVC's must be properly registered. An Interstate permit to operate on the Interstate System in Oklahoma is required, if registered above 80,000 pounds.

The heaviest trailer or semitrailer should be placed in front with the lightest at the rear. In no case, shall either trailer or semitrailer be placed ahead of another trailer or semitrailer which carries an appreciably heavier load. An empty trailer or semitrailer will not precede a loaded trailer or semitrailer.

Special Permit Loads

An annual special authorization permit may be issued for any vehicle transporting a load in excess of 80,000 pounds, but not exceeding 90,000 pounds, for movement upon or touching the Interstate System; provided such vehicle meets the axle requirements as provided for in Table 1.

Vehicles meeting the axle requirements of Table 1 must have a special authorization permit; otherwise, they will be limited to 80,000 pounds gross weight on the Interstate System.

There is a fee for an annual special authorization permit issued, pursuant to paragraph 1, per vehicle. Except as otherwise provided for by this chapter, no vehicle, with or without load, shall have a total outside width in excess of 102 inches excluding both tire bulge and approved safety devices when operated on the Interstate System or on any road or highway in this State having a surface width of 20 feet or more. The total gross weight in pounds imposed by a vehicle or combination of vehicles shall not exceed the value given in the following table corresponding to the distance in feet between the extreme axles of the group measured longitudinally to the nearest foot.

TABLE 1.—OKLAHOMA ALLOWABLE AXLE GROUP WEIGHT

Axle spacing (ft)	Maximum load (lbs) by axle group				
	2 Axles	3 Axles	4 Axles	5 Axles	6 Axles
4	34,000

State: Oregon.

Combination: Rocky Mountain Double.

Length of the Cargo Carrying Units: 68 feet.

Note: In Oregon these combinations are also known as "Oregon Doubles."

Operational Conditions: The lead semitrailer may be up to 40 feet long. The trailing trailer may be up to 35 feet long. However, the 68-foot cargo carrying unit length is the primary control. This vehicle combination is eligible for a divisible load permit to operate with gross weight up to and including 105,500 pounds. There is a permit fee. In addition, vehicles are subject to weight-mile taxes pursuant to ORS Chapter 767. These permits limit weight to 600 pounds per inch of tire width, 20,000-pound axles, 34,000-pound tandem axles or the table of weight shown in Permit Weight Table 2 (not included). Permit Weight Table 2 is an extension of the legal table of weights for Oregon. Permits for these vehicles are issued annually from the date of issue. The permits require use of splash and spray suppressant devices when operating in rainy weather, trailer placement by weight (lightest to the rear) and only on specific routes. Movement is not allowed when road surfaces are hazardous due to ice or snow, or when other atmospheric conditions make travel unsafe. A classified driver license for the appropriate combination of vehicles is required. Truck speed in Oregon is limited to 55 miles per hour, but there are no time of travel restrictions.

Routes: All National Network routes.

State: Oregon.

Combination: Triple.

Length of the Cargo Carrying Units: 95 feet

Operational Conditions: Triple trailer combinations are eligible for permits, including divisible load weight, to operate with gross weight up to and including 105,500 pounds. There is a permit fee. In addition, vehicles are subject to weight-mile tax through ORS Chapter 767. These permits limit weight to 600 pounds per inch of tire width, 20,000-pound axles, 34,000-pound tandem axles or the table of weight shown in Permit Weight Table 2 (not included). Permit Weight Table 2 is an extension of the legal table of weights for Oregon. Permits for these vehicles are valid for 1 year from the date of issue. The permits require use of splash and spray suppressant devices when operating in rainy weather, trailer placement by weight (lightest to the rear) and only on specific routes. Movement is not allowed when road surfaces are hazardous due to ice or snow, or when other atmospheric conditions make travel unsafe. A classified driver license with a triple trailer endorsement is required. Truck speed in Oregon is limited to 55 miles per hour, and there are no time of travel restrictions.

Routes: To be determined.

State: South Dakota.

Combination: Rocky Mountain Double.

Length of the Cargo Carrying Units: 81 feet 6 inches.

Operational Conditions: Weight limited by Bridge Gross Weight Formula. Unit allowed to exceed 80,000 pound limit on Interstate with single trip self-issuing permit. The weight of the second unit may not exceed the weight of the first unit by more than 3,000 pounds. If towbar exceeds 19 feet, it must be lighted at night and flagged during daylight hours.

Length limitation is exclusive of safety and energy conservation devices, including but not limited to mirrors, turn signal lamps, hand holds, flexible fender extensions and mud flaps.

The power unit must be of sufficient horsepower to maintain a minimum speed of 40 miles per hour when pulling fully loaded trailers. LCV maximum speed is 55 miles per hour.

State: Washington.

Combination: Rocky Mountain Double.

Length of the Cargo Carrying Units: 68 feet.

Operational Conditions: Washington allows two trailers extending up to 68 feet or less to operate on all State highways. However, trailers exceeding 60 feet must acquire an overlength permit. Operation of combinations, solely based on these length parameters, is not restricted by time of day, weather, route or speed.

Trailers exceeding 60 feet, but not exceeding 68 feet, shall acquire an annual overlength permit. Operating conditions are the same for permitted doubles as they are for 60-foot or less doubles. A special endorsement is required on the driver's license to pull doubles.

Routes: All National Network routes except SR 410 in the vicinity of Mt. Rainier National Park.

Legal Citations: RCW 46.44.030 (legal combination); RCW 46.44.09841 (permits).

State: Washington.

Combination: Truck tractor with dromedary box-semitrailer-trailer.

Length of the Cargo Carrying Units: 68 feet.

Operational Conditions: Washington allows a number of tractor-trailer combinations, all within the required parameter outlined below, but with the added stipulation that the overall combination, including power unit, must not exceed 75 feet. This allows for a variety of trailer length combinations positioned to comply with the Federal bridge formula. There are no restrictions on the operation of these combinations based on length alone.

Washington allows two trailers extending up to 68 feet or less to operate on all State highways. However, trailers exceeding 60 feet must acquire an overlength permit. Operation of combinations, solely based on these length parameters, is not restricted by time of day, weather, route or speed.

Trailers exceeding 60 feet, but not exceeding 68 feet, shall acquire an annual overlength permit. Operating conditions are the same for permitted doubles as they are for 60-foot or less doubles. A driver's license endorsement is required when pulling doubles.

Combination: Truck-trailer.

Length of the Cargo Carrying Units: 78 feet.

Operational Conditions: No single vehicle shall exceed 60 feet in length within an overall limit of 85 feet.

Routes: All National Network routes.

Legal Citations: WS 31-5-1002.

State: Wyoming.

Combination: Truck tractor-semitrailer-semitrailer (B-Train).

Length of the Cargo Carrying Units: 75 feet.

Operational Conditions: The longest semitrailer shall be first, the overall vehicle length is 85 feet.

Routes: All National Network routes.

Legal Citations: WS 31-5-1002.

Department of the Interior

Bureau of Indian Affairs

FY 1992 Indian Child Welfare Act Grant Program; Availability of Funds; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Fiscal Year 1992 Indian Child Welfare Act (ICWA) Grant Program; Availability of Title II ICWA Funds

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Correction.

SUMMARY: In the **Federal Register** notice document 92-5465 beginning on page 8554 in the issue of Tuesday, March 10, 1992, vol. 57, No. 47, make the following correction:

On page 8554 in the second column, Part II. Available Funds, paragraph two should read: Subject to the availability of funds through appropriations for this program in FY 1992, grants within the following categories will be awarded to individual tribes, organizations, or to consortia of tribes and organizations, provided the applicant's service area population includes the minimum child population requirement of 50 children under the age of 18 years.

Dated: March 16, 1992.

Eddie F. Brown,

Assistant Secretary—Indian Affairs.

Part VII

Department of Education

Robert C. Byrd Honors Scholarship Program; Notice of Final Procedures for Implementing the Program in FY 1992

DEPARTMENT OF EDUCATION

Robert C. Byrd Honors Scholarship Program

AGENCY: Department of Education.

ACTION: Notice of the final procedures for implementing the Robert C. Byrd Honors Scholarship Program in fiscal year 1992.

SUMMARY: The Secretary establishes procedures necessary to implement certain aspects of the Robert C. Byrd Honors Scholarship Program (the Byrd Scholarship Program) in fiscal year 1992 in accordance with the provisions of the program statute (title IV, part A, subpart 6 of the Higher Education Act of 1965, as amended, 20 U.S.C. 1070d–31, *et seq.*) and the program regulations, published at 54 FR 12549 and codified at 34 CFR part 654, as superseded by Public Law 102–170, the Department of Education Appropriations Act, 1992 (1992 appropriations act). Grant awards to the States for fiscal year 1992 are governed by applicable provisions of the program statute, the program regulations, the General Education Provisions Act, the Education Department General Administrative Regulations, and the procedures in this Notice.

EFFECTIVE DATE: This Notice takes effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments. If you want to know the effective date of this notice, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Fred H. Sellers, Chief, State Grant Section (room 4018, ROB #3), Office of Student Financial Assistance, U.S. Department of Education, 400 Maryland Avenue, SW., Washington, DC 20202–5447, telephone (202) 708–4607. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1–800–877–8339 (in the Washington, DC 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: Under the Byrd Scholarship Program, the Secretary makes available, through grants to the States, scholarships to outstanding high school graduates for the first year of study at institutions of higher education. This program supports AMERICA 2000, the President's strategy for moving the Nation toward the National Education Goals, by rewarding outstanding academic achievement in high school and encouraging continued achievement in postsecondary education. National Education Goal 3 specifically calls for American students to demonstrate competency in challenging subject matter and to learn to use their minds well.

In the Department of Education Appropriations Act, 1992, Congress appropriated $9.642 million for the Byrd Scholarship Program. Pursuant to the Department of Education Appropriations Act, 1992, as was also the case in fiscal years 1987, 1988, 1989, 1990, and 1991, sections 419G(b) and 419I(a) of the program statute do not apply to the administration of the program. Therefore, §§ 654.20(a) and 654.50(a)(4) of the program regulations published as final regulations on June 20, 1989 (54 FR 26006) also do not apply to the administration of the program in fiscal year 1992. The Secretary adopts the following procedures for fiscal year 1992 in lieu of the statutory and regulatory provisions that have been superseded by the 1992 appropriation language. These procedures are necessary for the administration of those aspects of the program which, due to superseding statutory provisions in the 1992 appropriations act, are not governed by provisions of the program statute and regulations.

1. The Secretary allots to the States the funds appropriated for the Byrd Scholarship Program in fiscal year 1992 in accordance with the provisions of section 419D of the program statute, except that the amount allotted for scholarship payments to each State is $1,500 multiplied by the number of scholarships that the Secretary has assigned to the State. The Secretary assigns to each State participating in the program the number of Byrd Scholarships that bears the same ratio to the total number of scholarships made available to all States as the State's school-aged population (ages five through seventeen) bears to the total school-aged population in all participating States, except that no State shall receive fewer than 10 scholarships. The population figures used to calculate the allotment of funds are determined by the most recently available data from the United States Census Bureau.

2. States shall administer their fiscal year 1992 allotments under the Byrd Scholarship Program, for scholarships for academic year 1992–93, in accordance with applicable provisions of the program statute and the final program regulations. However, since sections 419G(b) and 419I(a) of the program statute do not apply to the fiscal year 1992 appropriation, States shall also administer their fiscal year 1992 allotments in accordance with the following procedures—

(a) Byrd Scholars shall be selected solely on the basis of demonstrated outstanding academic achievement, promise of continued academic achievement, and the geographic considerations described in item 2(b) below.

(b) Byrd Scholars shall be selected in such a way that all parts of a State are fairly represented, and no part of a State has a disproportionate share of awards.

Waiver of Notice of Proposed Rulemaking

In accordance with section 431(b)(2)(A) of the General Education Provisions Act (20 U.S.C. 1232(b)(2)(A)), and the Administrative Procedure Act, 5 U.S.C. 553, it is the practice of the Secretary to offer interested parties the opportunity to comment on proposed regulations. The Secretary solicited public comments on these same procedures, resulting from identical appropriation language in the 1987 Appropriations Act, in fiscal year 1987, through a Notice of Proposed Procedures published in the **Federal Register**. No comments were received. The same special procedures were subsequently published in final form and implemented in fiscal years 1988, 1989, 1990 and 1991. Since it is imperative for State educational agencies to receive their program allotments in time to make scholarship awards and payments by the end of the high school academic year during which the scholars have graduated, as required by section 419I(b) of the program statute (20 U.S.C. 1070d–39(b)), the Secretary finds that publication of a Notice of Proposed Procedures for fiscal year 1992 is impracticable and contrary to the public interest under 5 U.S.C. 553(b)(B).

Authority: 20 U.S.C. 1070d–31, *et seq.*

(Catalog of Federal Domestic Assistance No. 84.185, Robert C. Byrd Honors Scholarship Program)

Dated: January 29, 1992.

Lamar Alexander,

Secretary of Education.

Part VIII

Department of Transportation

Federal Aviation Administration

14 CFR Part 135

Ground Proximity Warning Systems; Final Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 135

[Docket No. 26202; Amendment No. 135-42]

RIN 2120-AD29

Ground Proximity Warning Systems

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This final rule revises the operating rules for air taxi and commercial operators by requiring that all turbine-powered (rather than just turbojet) airplanes with ten or more seats be equipped with an approved ground proximity warning system. These changes are needed because studies have shown that several controlled flight into terrain accidents involving turbo-propeller powered airplanes might have been avoided had the airplanes been equipped with a ground proximity warning system. This final rule is intended to reduce the risk of airplanes being flown into terrain with no awareness by the crews that they are approaching the ground.

EFFECTIVE DATE: April 20, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Philip Akers, Aircraft Certification Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-9571.

SUPPLEMENTARY INFORMATION:

Background

A number of studies have looked at the occurrence of "Controlled Flight Into Terrain" (CFIT)-type accidents, where an airplane under the control of a fully qualified and certificated crew is flown into terrain (or water or obstacles) with no apparent awareness on the part of the crew. Some of these studies found that many such accidents could have been avoided if a warning device called a ground proximity warning system (GPWS) was used. (For detailed information on the studies, see "Investigation of Controlled Flight Into Terrain (CFIT)", Department of Transportation, Transportation Systems Center (DOT/TSC), March 1989). A copy of this study has been placed in the docket for this rulemaking.)

In 1974, the FAA required all part 121 and some part 135 certificate holders to install Technical Standard Order (TSO) approved GPWS equipment on large turbine-powered airplanes (§ 121.360). In 1978, the FAA required part 135 certificate holders operating turbojet airplanes with 10 or more seats to install TSO-approved GPWS equipment or alternative ground proximity advisory systems approved by the Director, Flight Standards Service (§ 135.153). (A TSO-approved GPWS is one that operates only when there is an imminent potential hazard; a ground proximity advisory system is usually one that provides routine altitude callouts, whether or not there is any imminent danger.)

Installation of GPWS's or alternative FAA-approved advisory systems was not originally required on turbo-propeller powered (turboprop) airplanes because, at the time, it was believed that the performance characteristics of turboprop airplanes made them less susceptible to CFIT accidents. However, later studies, including investigations by the National Transportation Safety Board (NTSB), analyzed accidents involving turboprop airplanes and found that many of the accidents could have been avoided if GPWS equipment had been used. In 1986, the NTSB recommended that § 135.153 be amended to require the installation of GPWS equipment in all turbine-powered airplanes carrying 10 or more passengers.

In response to the NTSB recommendation, the FAA requested that DOT/TSC analyze past CFIT accidents involving turbine-powered airplanes operating under part 135. The study looked at data from 41 CFIT accidents that occurred between 1970-1988. It found that of the 25 accidents that involved the type of airplane covered by this rule, and for which sufficient accident investigation data were available (covering the period 1978-1987) 16, or 64 percent, might have been avoided if the airplanes had GPWS's.

The DOT/TSC study also compared the TSO-approved GPWS to two FAA-approved alternative ground proximity advisory systems in five different operational modes. These five modes are: (1) Excessive rate of descent; (2) Excessive closure rate to terrain; (3) Altitude loss after takeoff; (4) Not in landing configuration; and (5) Deviation below glideslope. The study found equivalence in two modes (not in landing configuration and deviation below glideslope). However, there were significant performance differences in the most critical operational situation (excessive closure rate to terrain); advisory systems were found to always give automatic callouts below certain altitudes, whereas the GPWS would warn only when necessary. The GPWS would also provide maximum warning time while minimizing unwanted alarms and would use command-type warnings.

The DOT/TSC study also found that the unit cost of a TSO-approved GPWS would be comparable to that of an advisory system and therefore neither system is prohibitively expensive.

As a result of the studies discussed above, as well as a significant increase in the operation of this class of turbopropeller airplanes, the FAA issued Notice of Proposed Rulemaking (NPRM) No. 90-14 (55 FR 17358, April 24, 1990) entitled "Ground Proximity Warning Systems." The NPRM proposed the installation of TSO-approved GPWS equipment on all turbine-powered airplanes with 10 or more seats operating under part 135.

Subsequent to issuing the NPRM, the NTSB advised the FAA that six commuter airplane accidents occurred between January 1987 and January 1990. The NTSB advised that:

(1) On January 19, 1988, a Fairchild Metro III SA227-AC crashed on approach to Durango, Colorado. There were 9 fatalities and 8 survivors. The NTSB stated that "a ground proximity warning device probably would have alerted the crew to the airplane's increasing proximity to terrain and may have prevented the accident" and that "over 20 seconds of advance warning could have been provided by a GPWS."

(2) On February 19, 1988, a Fairchild Metro III SA227-AC crashed shortly after departing from Raleigh Durham International Airport due to "an excessive angle of bank initiated at an altitude that was too low." There were 12 fatalities and no survivors. The NTSB stated that "about 7½ seconds of advance warning could have been provided by a GPWS."

(3) On August 7, 1989, a DeHaviland DHC-6 flew into a mountain in Ethiopia during a flight with bad weather conditions and too low an altitude. There were 16 fatalities and no survivors. The NTSB stated that "a ground proximity warning system • • • may have prevented this accident since it can warn of a projected impact with terrain in time for corrective action by the pilot."

(4) On October 28, 1989, a DeHaviland DHC-6-300 crashed in Molokai, Hawaii. There were 20 fatalities and no survivors. In the final NTSB accident report dated September 25, 1990, the NTSB stated that "a ground proximity warning system would have provided sufficient warning for the crew to have pulled up and overflown the terrain." The NTSB determined that the probable cause of the accident was the airplane's controlled flight into terrain as a result of the decision of the captain to continue flight under visual flight rules at night into instrument meteorological conditions, which obscured rising mountainous terrain.

(5) On December 26, 1989, a British Aerospace Jetstream 3101 crashed during its final approach to Pasco Washington; the airplane had been too high on the final approach, therefore requiring a steep descent. There were 6 fatalities and no survivors. The NTSB advised that "a high descent rate at low altitude will cause a GPWS warning."

(6) On January 15, 1990, a Fairchild Metro III SA227-AC crashed during its approach to Elko, Nevada. There were 13 injuries and no fatalities. The NTSB stated that "about 25 seconds of advance warning time could have been provided by a GPWS."

Discussion of Comments

The FAA received 17 comments in response to the proposed rule. Most of the comments received generally support the rule; however, the comments address one or more broad areas, including: ground proximity warning systems (produced by one manufacturer) vs. advisory systems (produced by at least two manufacturers); cost; timetable for compliance; false warnings; installation problems; training; and applicability of the rule. Five commenters oppose the NPRM.

Those who fully support the proposed rule are the NTSB and Sundstrand Data Control, Inc. The Airline Pilots Association (ALPA) also supports the proposal but recommends changing compliance deadlines. The General Aviation Manufacturer's Association (GAMA) comments that it cannot respond to the NPRM because it believes that the DOT/TSC report upon which it is based is "technically inaccurate." GAMA recommends that the NPRM be delayed until the report's analysis and conclusion are made "technically correct." In addition, some commenters provide a direct response to the DOT/TSC study. All comments and FAA responses are addressed in the following section.

Ground Proximity Warning Systems vs. *Advisory Systems*

Eight commenters, including the Regional Airline Association (RAA), National Air Transportation Association (NATA), manufacturers of advisory systems such as Rockwell International and Kollsman, and part 135 operators such as Continental Express, express dissatisfaction with the NPRM's proposed requirement that only TSO-approved GPWS's be installed in part 135 turbine-powered airplanes.

Reasons for this position can be categorized into two broad areas: (1) Some believe that advisory systems are as effective as GPWS's; and (2) GPWS equipment is produced and sold by one manufacturer, creating monopolistic conditions. These two areas are described below, each with its own FAA response.

Effectiveness of Ground Proximity Warning Systems vs. Advisory Systems. Some commenters say that ground proximity advisory systems are as effective as GPWS's in terms of giving clear and specific warnings when the airplane is too close to terrain. For example, Continental Express asserts that the aural and visual alerts of advisory systems are no more routine than those of GPWS's and that, similar to GPWS's, they provide additional warnings which are based on the violation of "defined flight profiles". Several commenters, including RAA, recommend that the rule be expanded to allow the use of alternative systems, in addition to GPWS's.

Some commenters, e.g., Kollsman, feel that the FAA's position in the NPRM is contradictory, i.e., it is recognized (based on the DOT/TSC study) that advisory systems are functionally equivalent and provide the same safety benefit as GPWS's, yet it is considered unacceptable to allow anything that is not TSO-approved.

FAA Response: The FAA has found, in the DOT/TSC and other studies, that GPWS equipment and advisory systems are functionally equivalent in 2 out of 5 modes or warning envelopes: Mode 4 (not in landing configuration) and Mode 5 (deviation below glideslope). In the other 3 modes, there are either minor or significant differences: In Mode 3 (altitude loss after takeoff), the two systems have proximate equivalence, although the GPWS shows some superiority over advisory systems because it provides a direct warning to "pull-up"; advisory systems, in contrast, require much more integration of data on the part of the flightcrew (i.e., first receiving altitude callouts reflecting an increasing trend in altitude after takeoff, then receiving callouts reflecting decreased altitude and reversing this trend). Most importantly, in Mode 1 (excessive sink rate) and Mode 2 (excessive closure to terrain), the two systems have shown a critical difference in their performance. The FAA has analyzed accident data from many sources, including the NTSB, and has found that GPWS performance is far superior to advisory system performance in these two modes. Ground proximity warning system equipment is able to calculate the airplane descent and closure rate, compare these to the defined warning envelopes and provide a warning only if the limits are exceeded. In comparison, advisory systems either provide only one callout when the airplane enters a certain radio altimeter range and no warnings for an excessive descent rate at higher altitudes; or they provide continuous callouts below a certain altitude limit.

In addition, during the DOT/TSC study, advisory system manufacturers and others were requested to submit "hard" data to substantiate the safety performance of these systems. The FAA was interested in receiving data such as accident/incident investigation reports, reconstructed accident profiles, cockpit voice recorder and flight data recorder readouts, and pilot surveys. No such quantifiable or "hard" data was made available during the DOT/TSC study, nor was any submitted for the public record during the comment period to establish the equivalence of GPWS's and advisory systems.

Therefore, the FAA continues to support a TSO-approved GPWS because it has been shown to meet minimum performance specifications in all 5 modes and provides a higher level of safety. (This TSO (TSO-C92b), in fact, incorporates by reference RTCA Document DO-161A, which was developed by a consortium of government and industry experts and addresses all 5 warning envelopes.)

In addition, the FAA has confidence in the GPWS because it has proven to be a reliable and effective system under part 121 operations.

One Manufacturer of GPWS Equipment. Some commenters, including RAA, Continental Express, Northwest Airlink, and Kollsman say that there is currently only one manufacturer of the TSO-approved GPWS (Sundstrand). As a result, this manufacturer will continue to monopolize the market on the production and sale of GPWS's destroying competition and raising prices. RAA recommends that there be at least three systems available, which would motivate manufacturers to provide an effective product at competitive prices.

FAA Response: It is the FAA's policy to encourage and support competitive sourcing of equipment. TSO-C92b incorporates both government and industry input for a GPWS which meets minimum performance specifications. The FAA will approve a GPWS from any manufacturer whose product complies with TSO-C92b.

In response to comments that it has monopolized the market for GPWS equipment, Sundstrand has informed the FAA that it has dedicated its GPWS patent (#3,940,358; glide slope boundary conditions and detection) for public use (see public docket #26202). The FAA welcomes this action and believes that it will encourage other manufacturers, who may have construed this to be a design impediment, to produce and market a TSO-approved GPWS.

Cost

There were eight comments in this area.

Six commenters, including NATA, Kollsman, and several airlines, say that the NPRM's cost estimates for a GPWS and its installation are too low, primarily because associated equipment costs, weight penalties, and installation costs are underestimated or not considered. Examples of such additional costs are: extra equipment needed to support a GPWS such as a radio altimeter and barometric rate computer; increased weight penalties due to the need for additional equipment; and installation costs resulting from the down time needed for installation.

In addition, Continental Express states that the estimated cost of a GPWS, as presented in the NPRM, is too low because the proposed system is only in the planning stage; the purchase and installation costs will most likely rise.

Two commenters say that the NPRM is incorrect in assuming that the cost of a GPWS is comparable to that of alternative systems. Kollsman presents cost data for its VTA system ($15,000) and expresses doubt that a GPWS would be available for less than that amount. RAA cites findings from the DOT/TSC study and says that the highest-cost system is 48% more than the lowest-cost system.

Virtually all commenters on this issue state that the monopolistic situation that would be created by the proposed rule (given Sundstrand's patent situation at the time of the NPRM) would undoubtedly lead to higher prices.

FAA Response: The FAA partly concurs that its cost estimates do not include certain equipment and weight penalties. In calculating GPWS costs, the FAA did include the equipment and weight costs of the radio altimeter. Additionally, the FAA did not calculate the equipment and weight costs of the barometric rate computer as an additional cost. (The barometric-rate computer is a necessary component for GPWS operation.) Since the NPRM was published, the FAA has determined that on average only one in three regional air carrier airplanes already has a barometric-rate computer. Therefore, the FAA has reestimated GPWS costs to be approximately $1000 higher to reflect this additional equipment and weight. (See the economic evaluation in this final rule document for further detail.) Additionally, Sundstrand indicates that the barometric rate function may be provided, at a much lower cost, as an option to be included with their GPWS. In terms of installation costs, the FAA did include retrofitting and down-time costs in its original calculations, just as these costs are included for any new system.

Regarding manufacturer costs, the FAA, during the course of the DOT/TSC study, asked manufacturers of advisory systems to provide "representative" cost data for their own systems and their competitors' systems. In all cases, manufacturers provided lower acquisition and retrofitting cost estimates for their own systems, as compared to what they estimated for competitors' systems. The FAA, therefore, used "own-system" estimates from each manufacturer's system presented in the DOT/TSC report and the NPRM.

In addition, Sundstrand provided the FAA the same cost estimates at least three times before their estimates were published in the DOT/TSC study and later, the NPRM. Because Sundstrand publicly reaffirmed these cost estimates several times, the FAA considers them valid unless proven otherwise.

The concern that Sundstrand's costs will rise because of a monopolistic situation created by the rule, is unjustified due to Sundstrand's opening its GPWS patent to the public. On the contrary, the FAA believes that more competition will be stimulated, which will serve to keep costs at a lower level.

Timetable for Compliance

There were two comments in this area.

Mesaba Airlines claims that the 2-year compliance date is inadequate because it would not allow enough time for system engineering and installation; much time would be needed for systems integration. In addition, down time would be needed for actual installation. It recommends that the deadline for existing airplane retrofits be extended to at least 4 years.

ALPA says that the compliance time is too lengthy, and cites the DOT/TSC study as support that CFIT-type accidents will continue until GPWS's are installed on all turbine-powered airplanes. Therefore, ALPA recommends that the time frame in which airplanes would be required to have a GPWS should be shortened as follows: Airplanes with 10 or more seats should be retrofitted within 1 year, not 2 years; airplanes with a ground proximity advisory system should retrofitted with a GPWS within 2 years.

FAA Response: The FAA has considered these alternative timetables and maintains that the proposed timetable is the most reasonable one for installing GPWS equipment. There is concern, however, on having all airplanes meet the compliance dates in an orderly manner. In previous instances involving rules requiring equipment installation, there have been cases where delays could have been avoided by installing the equipment during the periodic maintenance cycle of the airplane. Certificate holders have made an unacceptable number of requests to extend compliance dates. To alleviate this problem, an installation schedule was included in several recent amendments to the FAR's. Because an installation schedule was not proposed in this rulemaking, and because issuing a supplemental notice of proposed rulemaking would add further delays, FAA principal airworthiness inspectors will be monitoring part 135 operators to ensure that an acceptable transition to the GPWS is made.

Increased compliance time would very likely result in more lives lost from CFIT-type accidents. As stated in the background, the NTSB found, in its preliminary investigations of six other accidents (beyond those which were documented in the DOT/TSC report) that GPWS "may have prevented the accident" or provided "advance warning." NTSB also stated that, for all six accidents, the GPWS at least could have been a factor to prevent the accident. Alternatively, a reduction in compliance time is unrealistic, considering the amount of time needed to retrofit each airplane, including scheduling and the ordering and availability of equipment.

The FAA expects airplane operators affected by this rule to make a "good faith" effort in complying with the timetable established for installation of the GPWS. While the final rule does not contain an installation schedule, affected operators are expected to begin the approval process as soon as possible so that they will not be faced with last minute scheduling problems. The FAA assumes that planning will begin at the time of publication of the rule.

At this time, the FAA knows of no circumstances under which it would consider granting an extension of the compliance date unless an operator can present evidence of good faith efforts to secure the equipment and installation services. Examples of such evidence include purchase orders and contracts dated in 1992 to indicate a plan to ensure implementation within the 2-year compliance period.

The FAA considers its proposed timetable a middle ground between the need to reduce CFIT-type accidents as quickly as possible and practical considerations of installing GPWS equipment on all airplanes affected by the rule. Therefore, part 135 operators affected by this rule are required to comply with the proposed timetable for installing GPWS equipment on their airplanes. Additionally, the FAA considers compliance date extensions to be unwarranted, since GPWS equipment is available and can be installed within the time required by the rule.

False Warnings

There were three comments in this area.

Rockwell International, Conquest Airlines, and Continental Express claim that the GPWS has been found to give frequent and unnecessary false warnings, which pre-conditions crewmembers to ignore the warnings and also interferes with crew communications; in some cases, the GPWS is deactivated, thus negating its usefulness.

FAA Response: The GPWS requirements were refined by amendments in 1975 and 1976. (See 40 FR 19638, 42183, 50707, 55313, and 41 FR 35070.) One of the major considerations at that time was the transition from TSO–C92a to the current standard, TSO–C92b, which resolved the problem of false or nuisance alarms. Since the effective dates of the amendments listed above, there have been only rare occasions of GPWS false alarms. These were mostly attributed to non-standard approaches with unusually high glide slope angles or terrain closure rates, and have been resolved on an individual basis. Operating experience has demonstrated that false/nuisance GPWS warnings are minimal and are no longer a problem.

Installation Problems

Mesaba Airlines says that it will be difficult to install GPWS's on many airplanes due to limited rack and panel space.

FAA Response: The FAA has consulted with Sundstrand who has developed a new GPWS model for smaller turbine-powered airplanes. This manufacturer has informed the FAA that the new model is smaller than the existing system now used in part 121 operations and that it is specifically designed for installation in the commuter type airplane. Use of this or a similar model for airplanes that have limited rack and panel space is recommended.

Training

There were three comments in this area.

ALPA stresses the importance of an appropriate and quick response to GPWS warnings and recommends training for pilots in how to use GPWS equipment.

Conquest Airlines is against requiring GPWS's in commuter airplanes, stating that the GPWS can interfere with crew communication emergencies; it recommends instead, improved training for flight crews (e.g., Line-Oriented Flight Training [LOFT] and Cockpit Resource Management [CRM]) to enhance safety.

Similarly, Rockwell International says that the DOT/TSC report does not evaluate the interrelationship between GPWS's and other warning systems (e.g., windshear) and how this affects crew performance.

FAA Response: The rule (§ 135.153(d)) requires GPWS training by stating that operators' Airplane Flight Manuals must contain appropriate procedures for the use of GPWS equipment by flight crews. The FAA, however, is not specifying the contents of this type of training due to the diversity of Part 135 operations. As was the case with previous rulemaking concerning new equipment, the FAA expects each operator to develop GPWS training to fit its own operations and to meet the requirements of § 135.153(d).

In addition, the FAA believes that GPWS equipment will not impede crew communications or interfere with other warning devices because the interference problem created by false alarms has been virtually eliminated. The GPWS equipment helps, rather than hinders crew communications, because it produces fewer warnings (compared to advisory systems) resulting in less confusion in the cockpit.

In terms of improved training for flight crews, the FAA has already required or recommended such training in recent amendments to parts 121 and 135, as well as in advisory circulars on LOFT and CRM. The FAA has also established procedures for a voluntary alternative training program called the "Advanced Qualifications Program" (AQP). A key element of this program is cockpit resource management training, which teaches crewmembers how to operate as a team through effective communication and decision-making. Whether a commuter airline continues to employ current training methods or implements an AQP, there are provisions in place for providing training in the proper use of GPWS's in the flightcrew environment.

Applicability of the Rule

There were six comments in this area, three of which say that certain categories of airplanes should be exempt from the proposed requirement.

Chalk's International Airlines and Ketchikan Air Service, Inc. are against requiring GPWS's for their seaplanes and floatplanes that are engaged only in daytime, VFR operations. They state that GPWS's would add no further safety benefit for VFR operations, as opposed to IFR operations, and therefore, they recommend that certain day VFR operations be exempted from the rule.

NATA is against requiring GPWS's for on-demand air charter operations; it states that such operations should be distinguished from commuter operations. NATA notes that the NPRM does not make this distinction; thus, it concludes that the proposal discriminates against charter operations. Therefore, NATA recommends that turbo-prop airplanes used for charter operations by on-demand part 135 operators be exempted from the rule and that new airplanes (turbine-powered with 10 or more seats) be equipped with a GPWS 2 years after the adoption of the rule.

Two other commenters (Mesaba Airlines and United Express) recommend that airplanes already in service be exempt from a retrofit installation and that a GPWS be installed only on newly manufactured airplanes.

An individual commenter states that, if the FAA is to require GPWS's for air taxi and commercial operators, it should be required for all airplanes; this would "give a much better economic scale for the avionics manufacturers," i.e., GPWS's would cost less since more would be produced.

FAA Response: In considering whether to grant the above-requested exceptions, the FAA studied the extent to which these operations had a history of CFIT-type accidents and fatalities. The FAA found that both VFR and charter operations did, indeed, have a history of CFIT-type accidents and fatalities. The DOT/TSC study reports that between 1978 and 1988, VFR operations had 3 CFIT-type accidents with 18 fatalities; all were Mode 2 (excessive closure rate to terrain) situations. In this same time period, charter operations had 13 CFIT-type accidents with 21 fatalities. Operating

experience demonstrates that GPWS equipment is necessary as a safety component for these operations; therefore, they are not being excluded from the rule.

The FAA does not concur with commenter recommendations to require GPWS equipment only on newly-manufactured airplanes. The NPRM and this final rule document have cited studies showing a significant number of CFIT-type accidents involving commuter airplanes not equipped with a GPWS. Operating experience clearly indicates that GPWS equipment is superior to advisory systems. Since many airplanes already in use will remain in operation for many years, the FAA has concluded that it is crucial that all commuter airplanes be required to have GPWS equipment as soon as feasible in order to prevent more CFIT accidents.

The recommendation to extend the requirement for GPWS to airplanes that are not operated under part 135 is outside the scope of this rulemaking.

Comments on the DOT/TSC Report

The FAA received some comments which respond directly to the DOT/TSC report. In particular, Rockwell International and Continental Express state that DOT/TSC conclusions, based on the study's analysis of NTSB accident data, are faulty in terms of the following: (1) A GPWS warning may not have been activated in some accidents; if there was a warning, it may not have provided enough reaction time or been heeded by the flight crew; and an advisory system may have been able to perform as effectively as a warning system; (2) Other contributing factors could have caused some of the accidents (e.g., windshear, flight crew stress); GPWS equipment may not have helped in these cases.

In addition to faulting DOT/TSC's analysis of NTSB data, these commenters state that some of the study's information is inaccurate. For example, a table that is supposed to list only accidents involving turbine-powered airplanes also lists those involving piston-engine airplanes. Also, some of the cost/benefit information is faulted, for example, installation costs for GPWS equipment should be higher than quoted because of the need to connect it to other airplane systems; and advisory systems provide the same level of benefit as does GPWS equipment.

FAA Response: All comments regarding the DOT/TSC report have been reviewed. In addition, DOT/TSC has thoroughly reviewed all relevant NTSB accident data and exercised the best possible judgment in determining the effectiveness of GPWS equipment in preventing accidents. In some cases, DOT/TSC has made judgments based on the available data, and the conclusions reached in these cases are sound.

DOT/TSC agrees that, in a few instances, there were minor errors in exhibiting the data; however, the errors did not affect the ultimate conclusions reached in the study. For example, even though the table described above lists two accidents involding piston-engine airplanes, the remaining 25 accidents comprise 22 involving turboprop airplanes and 3 involving turbojet airplanes; thus, the study's conclusion that turboprop airplanes should have approved GPWS equipment remains.

Regarding these commenters' arguments that the study's cost data is inaccurate, the FAA reiterates that each manufacturer provided the cost data for its own system, as well as its competitor's systems and that the latter cost data was biased upwards. Therefore, the cost data used in the study was based on estimates from the respective manufacturers. The FAA considers these estimates to be valid. While each type of system achieves benefits which exceed its costs, the FAA has determined that GPWS is most beneficial from a safety standpoint.

Commenters' arguments that installation costs were not included in DOT/TSC estimates are not valid because these costs were included in GPWS cost calculations presented in the study; this data was subsequently reflected in the NPRM and is explained in the cost section and the economic evaluation of this final rule document.

Regulatory Evaluation Summary

This section summarizes the full regulatory evaluation prepared by the FAA that provides more detailed estimates of the consequences of this regulatory action. This summary and the full evaluation quantify, to the extent practicable, estimated costs to the private sector and anticipated benefits.

Executive Order 12291, dated February 17, 1981, directs Federal agencies to promulgate new regulations or modify existing regulations only if potential benefits to society for each regulatory change outweigh potential costs. The order also requires the preparation of a Regulatory Impact Analysis of all "major" rules except those responding to emergency situations or other narrowly defined exigencies. A "major" rule is one that is likely to result in an annual effect on the economy of $100 million or more, a major increase in consumer costs, or a significant adverse effect on competition.

The FAA has determined that this rule is not "major" as defined in the executive order; therefore, a full regulatory analysis has not been prepared. Instead, the agency has prepared a more concise document termed a regulatory evaluation. In addition to a summary of the regulatory evaluation, this section contains a regulatory flexibility determination required by the 1980 Regulatory Flexibility Act (P.L. 96–354), a regulatory flexibility analysis, and an international trade impact assessment. If more detailed economic information than is contained in the summary is desired, the reader is referred to the full regulatory evaluation in the docket.

The rule will amend Part 135 such that 2 years following its effective date, no person may operate a multiengined turbine-powered airplane having a passenger seating configuration, excluding any pilot seat, of 10 seats or more unless it is equipped with an approved GPWS. Airplanes already equipped with a previously approved alternative "advisory" system may continue to be operated with that system until 4 years after the effective date of the rule.

Much discussion and documentation of costs and benefits of this rule were provided in the DOT/TSC study. The costs and benefits presented in this regulatory analysis reflect, to a large degree, both the findings in that study and the comments responding to the NPRM.

Analysis of Costs

The unit cost of each GPWS, including installation, as reported by the manufacturer, amounts to $14,600. The FAA estimates that within the 10-year-period 1993–2002, a total of 887 airplanes operating under Part 135 will require a GPWS at a total cost of $13.0 million. Approximately 725 of 837 airplanes that are currently operating under Part 135 and affected by this rule will need to be equipped with a GPWS within 2 years after the effective date of the rule. About 60 airplanes operating under Part 135 (not included in the above total of 887) are already equipped with GPWS approved for operations under Part 121, and another 52 airplanes have advisory systems that will need to be replaced within 4 years following the effective date of the rule. In addition, newly manufactured multiengine turbine-powered airplanes with 10 or more passenger seats will be affected by this rule and must be equipped with GPWS. The FAA anticipates that in each of the first 10 years after this rule is in effect (1993–2002) 11 new turbine-powered airplanes in the 10 to 19 passenger seat size will be added to the fleet operating under Part 135 that would not contain GPWS's unless otherwise required.

The manufacturer also provided cost data for compatible radio altimeters and barometric-rate computers that will be needed on-board to accompany the GPWS. The estimated cost per airplane is $7,000 for an altimeter and $975 for a computer, including installation. The FAA estimates that 326 existing airplanes are equipped with acceptable radio altimeters, and that 225 existing airplanes are equipped with barometric rate computers (leaving 511 and 612 airplanes to be equipped with a radio altimeter and barometric rate computer, respectively). Among newly-manufactured airplanes, 73 will require altimeters and 88 will require computers during the 10-year period. This assumes that a similar percentage of such airplanes as currently exists would be equipped with these instruments in the absence of this rule. Total outlays for radar altimeters and barometric rate computers for the years 1993–2002, are estimated at $4.1 million and $0.7 million, respectively.

The total estimated equipment and installation costs for all airplanes affected is estimated to be $17.7 million.

The manufacturer estimates annual maintenance costs to be 5 percent of total equipment costs. Therefore, annual maintenance costs for an airplane needing all three pieces of equipment would be .5×($14,600+7,000+975)=$1,129. The average cost per airplane will be somewhat less since not all airplanes will require the same amount of new equipment to comply with this rule. Total fleet maintenance costs will increase from year-to-year as more airplanes become equipped with GPWS and related instruments. Maintenance costs during the 10-year analysis period will total $8.3 milion.

Each additional pound of weight added to a turbine-powered airplane operating under Part 135 is estimated to consume an additional 8.55 gallons of fuel annually. Applying the current jet fuel cost of $1.82 per gallon, the annual cost per pound of additional weight is about $15.56. The total additional weight per airplane associated with the GPWS, altimeter, and barometric rate computer is estimated to be 5.6 pounds. Because some airplanes are already equipped with one or more of these instruments, the average additional weight per airplane is estimated to be about 4 pounds. Therefore, total annual weight penalty costs are estimated to be $62.24 per airplane. Total additional fleet fuel costs are estimated to be $0.5 million over the 10-year period.

Two manufacturers estimate that 40 man-hours will be required to install all equipment associated with the GPWS. Although installation is likely to coincide with other scheduled maintenance activity, the loss of the use of an airplane for 40 man-hours, or 5 workdays, typically equates to a loss of 18 revenue hours for Part 135 airplanes, assuming an average of 3.6 revenue hours or block hours per day. The value of this lost revenue is estimated to be $180 per hour. Therefore, 18 hours of down-time due solely to installation of a GPWS and related equipment will cost an operator $3,240 per airplane. However, $3,000 per airplane is used for the purpose of this analysis since it is likely that installation of such equipment will coincide to some extent with other scheduled maintenance. Such costs will occur in 1993 (or sooner) for most affected airplanes, and in 1995 (or sooner) for airplanes that are currently equipped with approved advisory systems. Total fleet down-time costs are estimated to be $2.3 million over the 10-year period.

The total 10-year cost of this rule for all equipment, installation, maintenance, additional fuel consumption, and down-time costs is estimated to be $28.9 million, or $20.7 million discounted present value.

Analysis of Benefits

Twenty-five accidents involving turbine-powered airplanes occurred during the 10-year period (1978–1987) for which NTSB accident investigations revealed that it was highly improbable that the flight crew had any prior awareness of an impending impact with terrain. None of the airplanes involved in these accidents was equipped with a GPWS, and only one was equipped with an advisory system. The March 1989 DOT–TSC study of CFIT's scrutinized the circumstances of each of these accidents. The study determined that four of the accidents most likely would not have been prevented if a GPWS had been in use. In five other accidents the airplanes involved would have received a GPWS alert if such a system had been in use, but with questionable time provided for recovery. The other 16 accidents involved airplanes that would have had a GPWS alert activated with sufficient time for recovery. The casualties in the 16 accidents that the study considered preventable with the use of a GPWS included 56 fatalities and 7 serious injuries.

Comparable levels of accidents and casualties can be expected in the future if GPWS's are not installed on multiengined, turbine-powered airplanes operating under Part 135. In order to provide the public and government officials with a bench mark comparison of the expected safety benefits of rulemaking actions over an extended period of time with estimated costs in dollars, the FAA currently uses a minimum value of $1.5 million to statistically represent the value of a human fatality avoided (in accordance with guidelines issued by the Secretary of Transportation dated June 22, 1990). A value of $640,000 is used to statistically represent a serious injury prevented. In addition, the DOT–TSC study determined that the value of the average dollar loss for the 10 airplanes destroyed and 6 airplanes substantially damaged, was $550,000 and $180,000, respectively. Applying these values against the estimated potential losses provides an estimate of the total benefits of the rule over a 10-year period. The savings in human casualties total $88.5 million ((56×$1.5 million)+(7×$640,000)). The savings in destroyed and substantially damaged airplanes total $6.6 million ((10×$550,000)+(6×$180,000)). Total benefits amount to $95.1 million, or $53.1 million when discounted at 10 percent over the 10-year period.

There have been at least six more commuter airplane accidents occurring since the 1978–1987 study period. Preliminary findings indicate that they may have been prevented if the airplane had been equipped with a GPWS. These accidents have not been included in the estimate of benefits attributable to this rule because the NTSB has not completed its investigations or made final recommendations on all of them. Therefore, it would be inappropriate to attribute a specified number of accidents prevented if this rule had been in effect. However, one of the six accidents in which the NTSB did complete its investigation is mentioned here as further evidence of the merits of this rule. That particular accident occurred on October 28, 1989, in Molokai, Hawaii, and resulted in the deaths of all 20 people aboard the airplane. The NTSB concluded that a GPWS might have prevented the accident and reiterated its stance on the need for use of GPWS's in turbine-powered airplanes operated under part 135.

Comparison of Benefits and Costs

The anticipated discounted present value of the benefits of this rule ($53.1 million over 10 years) far exceed the estimated discounted present value of the costs ($20.7 million over 10 years). Although there is no way to know how many accidents and deaths actually will be prevented, if the rule is only 40

percent as successful as expected in preventing CFIT accidents, it will be cost-beneficial.

International Trade Impact

This rule will have little or no impact on trade opportunities for U.S. firms doing business overseas or foreign firms doing business in the United States. If foreign nations do not adopt U.S. standards, their airplane operators may be at a disadvantage in the U.S. market. However, the impact is expected to be slight. The maximum annualized cost of this rule per airplane over the 10-year period 1993 to 2002 is estimated at $3,772 ($2,600 discounted present value) but the average will be somewhat less. Such costs should not create an economic disadvantage to either domestic operators or foreign carriers operating in the United States.

Regulatory Flexibility Determination

The Regulatory Flexibility Act of 1980 (RFA) was enacted by Congress to ensure that small entities are not unnecessarily and disproportionately burdened by government regulations. The RFA requires agencies to review rules that may have a "significant economic impact on a substantial number of small entities."

For air carriers, a small entity is defined as one that owns, but does not necessarily operate, 9 or fewer airplanes. The FAA's criteria for a "substantial number" is a number that is not less than eleven and that is more than one third of the small entities subject to the rule. The FAA's criteria for a "significant impact" is at least $4,200 per year (1991 dollars) for an unscheduled carrier and $60,300 per year for a scheduled carrier operating a fleet that includes small airplanes, which have 60 or fewer seats.

An unscheduled small entity carrier with at least 2 airplanes will incur a significant economic impact because the annualized present value cost of $5,600 for 2 airplanes exceeds the $3,700 criteria used by the FAA. Such carriers represent approximately 37 percent of all small entities subject to the rule. Therefore, as required by law, a regulatory flexibility analysis follows.

Regulatory Flexibility Analysis

As required by sections 603(b) and (c) of the Regulatory Flexibility Act, the following analysis deals with the rule as it relates to small entities.

Why Agency Action is Taken

The reasons for agency action are detailed in the preamble to the rule. Briefly, the amendment will improve safety involving Part 135 operations by reducing controlled flight into terrain accidents involving turbine-powered airplanes. The FAA estimates that 16 such accidents could have been prevented during the 10-year period of 1978 through 1987 if the airplanes had been equipped with the ground proximity warning systems required by this rule. The rule addresses an NTSB recommendation and is supported by studies concluding that installation of a GPWS will contribute to prevention of CFIT accidents.

Objective of and Legal Basis for the Rule

The objective of the rule is to improve the operating safety of part 135 airplanes by preventing controlled flights into terrain. The objective is more thoroughly discussed in the preamble to the rule. The legal basis of the rule is sections 313, 314 and 601 through 610 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354, 1355, and 1421 through 1430) and the Department of Transportation Act (49 U.S.C. 106(g)).

Description of the Small Entities Affected by the Rule

The small entities affected by the rule will be unscheduled carriers operating under part 135 of the Federal Aviation Regulations having more than one, and fewer than nine airplanes.

Compliance Requirement of the Rule

Compliance with the amendment will be mandatory for all turbine-powered multiengine airplanes with 10 or more seats operating under part 135. Those turboject airplanes that are currently using alternative warning systems approved by the FAA will be required to replace those systems within 4 years of the effective date of the rule.

Alternatives to the Rule

As part of the rulemaking action, the FAA considered several alternative approaches to the problem addressed by this rule.

Alternative One: Let the market decide. The airline would be free to choose whether it should install GPWS's as recommended. This alternative would allow the public to select an airline based on competitive factors including those of a safety nature. This is an alternative applicable to all safety regulations and, in the view of the FAA, would not assure a safe U.S. air transportation system.

Alternative Two: Delay development of the rule pending additional information that could be obtained during further government and industry reviews. This alternative is also rejected. The current rule is supported by adequate investigations and studies.

Alternative Three: Reduce costs to the industry by allowing operators to install either a GPWS or a ground proximity "advisory" system. Advisory systems provide a full complement of five warning envelopes and are available for less than the cost of a GPWS. The FAA rejects this alternative because the most effective advisory systems available are comparable in price to a GPWS, but not in effectiveness. The FAA has found, in the DOT/TSC and other studies, that GPWS equipment and advisory systems are functionally equivalent in only 2 out of 5 modes or warning envelopes. Only the TSO-approved GPWS meets minimum performance specifications in all 5 modes and provides the highest level of safety possible.

Federalism Implications

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule will not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Conclusion

This rule is significant under Department of Transportation Policies and Procedures (44 FR 11034, February 26, 1979) and, if adopted, the FAA certifies that it may have a significant negative economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act; however, no other feasible alternatives were identified. The annual cost that would be imposed on part 135 operators to install a ground proximity warning system on turbine-powered airplanes would exceed the $3,700 siginificant impact criteria per year for unscheduled air carriers. The FAA has determined that this notice involves a rulemaking action that is not a major rule under Executive Order 12291. A final regulatory evaluation of the proposal, including a final regulatory flexibility analysis and international trade impact analysis has been placed in the docket. A copy may be obtained by contacting the person identified under "**FOR FURTHER INFORMATION CONTACT.**"

List of Subjects in 14 CFR Part 135

Ground proximity warning systems.

The Amendment

Accordingly, the Federal Aviation Administration (FAA) amend 14 CFR Part 135 of the Federal Aviation Regulations (FAR) as follows:

PART 135—AIR TAXI OPERATORS AND COMMERCIAL OPERATORS

1. The authority citation for part 135 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 through 1431, and 1502; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983).

2. Section 135.153 is revised to read as follows:

§ 135.153 Ground proximity warning system.

(a) Except as provided in paragraph (b) of this section, after April 20, 1994, no person may operate a turbine-powered airplane having a passenger seating configuration, excluding any pilot seat, of 10 seats or more, unless it is equipped with an approved ground proximity warning system.

(b) Any airplane equipped before April 20, 1992, with an alternative system that conveys warnings of excessive closure rates with the terrain and any deviations below glide slope by visual and audible means may continue to be operated with that system until April 20, 1996, provided that—

(1) The system must have been approved by the Administrator;

(2) The system must have a means of alerting the pilot when a malfunction occurs in the system; and

(3) Procedures must have been established by the certificate holder to ensure that the performance of the system can be appropriately monitored.

(c) For a system required by this section, the Airplane Flight Manual shall contain—

(1) Appropriate procedures for—

(i) The use of the equipment;

(ii) Proper flight crew action with respect to the equipment; and

(iii) Deactivation for planned abnormal and emergency conditions; and

(2) An outline of all input sources that must be operating.

(d) No person may deactivate a system required by this section except under procedures in the Airplane Flight Manual.

(e) Whenever a system required by this section is deactivated, an entry shall be made in the airplane maintenance record that includes the date and time of deactivation.

Issued in Washington, DC, on March 17, 1992.

Barry Lambert Harris,

Acting Administrator.

Department of Labor

Employment and Training Administration

Federal and State Unemployment Insurance Program; Project to Review and Change the Formulation and Allocation Systems for Unemployment Insurance Administrative Funding to the State Employment Security Agencies (SESAs); Notice of Study Project

DEPARTMENT OF LABOR

Employment and Training Administration

Federal and State Unemployment Insurance Program; Project to Review and Change the Formulation and Allocation Systems for Unemployment Insurance Administrative Funding to the State Employment Security Agencies (SESAs)

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of study project.

SUMMARY: The Employment and Training Administration (ETA) announces an Unemployment Insurance (UI) project to review and change the current budget formulation and resource allocation systems used to provide SESAs administrative funds for the operation of the UI program. This project is part of a Congressional mandate under the Emergency Unemployment Compensation (EUC) Act (Pub. L. 102–164) which requires the Secretary of Labor to submit a report to Congress before November 15, 1992 including a proposal for revising the method of allocating grants among the SESAs. This review is part of an effort by ETA to increase the SESAs' efficiency and flexibility in the financial and operational management of their UI programs, while assuring the Secretary of Labor's statutory obligation to provide funding for "proper and efficient" administration of the UI program is fulfilled.

DATES: Comments must be received in the Department of Labor by the close of business May 19, 1992.

ADDRESSES: Submit written comments to Mary Ann Wyrsch, Director, Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., room S–4231, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Darla Letourneau, Budget Officer, Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., room S–4219, Washington, DC 20210. Telephone (202) 535–0210 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

A. Project Objectives

ETA is attempting to update its method of budgeting funds for the UI program and allocating these funds to the SESAs. The current methods are complex, outdated, and inhibit improvements in efficiency. The system uses State work measurement factors that are almost a decade old. The current methods also rely on outdated processes carried over from the period when the Unemployment Insurance Service (UIS) had more involvement with the operational methods of the SESAs. Since 1987, SESAs have had bottom line authority to use UI administrative resources based on State assessment of needs. ETA ceased requiring States to account for costs by specific cost categories, and emphasized instead the meeting of performance standards within overall discretion in fund utilization.

ETA has three goals for this effort: (1) To secure stable and adequate funding for basic UI administrative costs with an annual allocation made prior to the beginning of the fiscal year;

(2) To establish a mechanism for providing timely and adequate funding to the States for unanticipated workload increases; and

(3) To provide an equitable allocation of resources among the States that promotes innovative and cost effective practices.

The legislation calling for the report on revised methodology directs that the report include consideration of the following principles. ETA will use them as guiding principles for this effort:

- Workload levels should be the primary factor in determining allocations;
- Ways should be sought to ensure each State a minimum grant level, regardless of workload;
- Nationally available objective data should be used for determining State costs, with consideration of legitimate cost differences among the States;
- Methods for allocating grants among States should be simplified;
- Disincentives to productivity and efficiency in the current methodology should be eliminated; and
- Promotion of innovative and cost effective practices should be included in the allocation methodology.

Finally, we will use two working assumptions that provide some framework for the administrative financing debate. These are:

(1) Changes to the UI administrative financing system will not require legislative changes.

(2) The revised system is intended to produce new national cost factors that are to be used both in determining the overall funding needs for the program, as well as the distribution of the resources among the States.

B. Implementation and Consultation Approach

The EUC Act calls for the submission of a report on a new allocation system within the 12-month period beginning on the date of the enactment of this Act. The Department will issue the report in two phases. The first phase report will include the framework of the new methodology, but not the final proposal because of the necessity of developing cost measurements based on on-site State observations. This first report will be submitted by the November deadline. The second phase report will be the final proposal and will include new funding cost measures which will result from detailed surveys and analyses undertaken in FY 1993–94. Our anticipated target date for this second report to Congress is December 31, 1994. The Act requires a 12-month Congressional review period before the implementation of the proposed allocation methodology. The new funding and allocation methodologies will be effective for FY 1997.

Throughout this process, ETA will seek input from a broad range of parties to ensure that all groups affected by the change have an opportunity to share their ideas and comment on the Department's proposal. ETA welcomes comments, to be submitted to the above address, on the current system and any suggestions for areas to be examined during the initial phase of the project study.

C. Schedule of Federal Register Notice Publications

The first report to Congress outlining the proposed methodology is scheduled to be published, for comment, after the report is submitted in November 1992. The comments received on this report will be incorporated in the second report to Congress which will contain the final proposal for the new UI funding and allocation methodologies.

Signed at Washington, DC, on March 11, 1992.

Roberts T. Jones,

Assistant Secretary of Labor.

Department of Housing and Urban Development

Office of the Assistant Secretary for Housing and Development

Announcement of Funding—Invitation for FY 1992 Section 8 Rental Voucher Set-Aside for Homeless Veterans With Severe Psychiatric or Substance Abuse Disorders; Notice

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

[Docket No. N-92-3402; FR-3222-N-01]

Announcement of Funding—Invitation for FY 1992 Section 8 Rental Voucher Set-Aside for Homeless Veterans With Severe Psychiatric or Substance Abuse Disorders

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD

ACTION: Announcement of funding availability for fiscal year 1992.

SUMMARY: The Department of Housing and Urban Development (HUD) announces $17.9 million in Fiscal Year 1992 funding which will support approximately 750 section 8 rental vouchers to be used in a program established by HUD and the Department of Veterans Affairs (VA) that will benefit homeless veterans with severe psychiatric or substance abuse disorders. This Announcement invites applications from the PHAs administering the rental voucher program in the areas, selected by VA, where homeless veterans will receive supportive services. In the body of this document is information regarding eligibility, the allocation of the funds, application processing, and how to apply, and a list of steps and exhibits involved in the application process.

DATES: Applications are due before 3 p.m. local time on April 20, 1992 at the HUD Field Office receiving the application.

FOR FURTHER INFORMATION CONTACT: Gerald J. Benoit, room 6126, Office of Public and Indian Housing, Office of Assisted Housing, Rental Assistance Division, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410, (202) 708–0477. The TTD number for the hearing impaired is (202) 708–4594. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act Statement

The information collection requirements contained in this announcement have been approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980 and have been assigned OMB Control Number 2502–0123.

I. Purpose and Substantive Description

The HUD-Veterans Affairs Supportive Housing (HUD–VASH) program for homeless veterans with severe psychiatric or substance abuse disorders is a national initiative of the U.S. Department of Housing and Urban Development (HUD) and the Department of Veterans Affairs (VA). Under this initiative, VA ongoing case management, health and other supportive services will be made available for up to nineteen supportive services sites across the nation and HUD has set-aside funding for section 8 rental vouchers for homeless veterans with severe psychiatric or substance abuse disorders who will benefit from the supportive services. (A listing of the service sites selected by VA and of the Public Housing Agencies (PHAs) administering the rental voucher program at the service sites is included in Table 1. at the end of this announcement). The VA services and HUD rental vouchers will support community-based projects aimed at providing model programs of comprehensive health, housing assistance, and other supportive services to homeless veterans suffering from complex, often chronic, health, mental health and substance abuse problems and the lack of needed services. These services will be organized and delivered in conjunction with permanent, affordable housing.

The goal of the HUD–VASH initiative is to show that appropriately designed health and other supportive services, combined with decent, safe and sanitary affordable housing, can help homeless veterans with severe paychiatric or substance abuse disorders lead healthy, productive lives in the community, and avoid becoming permanent members of the nation's homeless. The initiative also seeks to promote the expansion of permanent housing options for these individuals.

The HUD-VASH initiative is an outgrowth of several previous demonstration programs on behalf of homeless veterans or mentally ill persons, including the VA's Homeless Chronically Mentally Ill (HCMI) and Domiciliary Care for the Homeless Veterans (DCHV) programs, and the HUD/Robert Wood Johnson Program on Chronic Mental Illness as well as the Supportive Housing Demonstration program (SHD) under the Stewart B. McKinney Act. Experience under the SHD program and other McKinney Act housing programs has reinforced the understanding of the need for comprehensive, individually tailored service packages to assist the homeless in achieving self-sufficiency.

The HUD-VASH initiative combines Section 8 rental voucher assistance provided by HUD to selected PHAs with case management and clinical services provided by VA at its medical centers and in the community. Under this initiative, VA will first identify homeless veterans with severe psychiatric or substance abuse disorders through outreach efforts. The persons identified will then receive treatment and be stabilized medically prior to issuance of the rental voucher. The VA will work with PHA staff to help veterans locate suitable private market rental units where they can be assisted under the rental voucher program. VA will continue to provide community based case management services, outpatient health services, hospitalization and other assistance on a regular basis, as needed. It is expected that veterans involved in this program will continue in the prescribed treatment programs after they have leased units under the rental voucher program.

This annoucnement invites the PHAs that administer the rental voucher program in the area where service sites selected by VA are located to apply for a share of the approximately 750 Section 8 rental vouchers that have been set aside for this initiative.

II. VA Application Selection Process

In 1990, VA considered 63 specialized HCMI and DCHV programs for participation in the HUD-VASH program. Sites were reviewed by VA's Northeast Program Evaluation Center. The following measures, derived from clinical evaluation findings and management experience during the first two years of HCMI and DCHV program implementation, were used to select supportive services sites:

1. The number of veterans seen per year;
2. The percentage of veterans contacted through outreach;
3. The percentage of veterans sleeping in a shelter or on the streets at the time of first contact;
4. The percentage of veterans with substance abuse problems;
5. The percentage of veterans receiving VA contract residential treatment;
6. Compliance with evaluation procedures;
7. Commitment of the clinicians to developing effective and innovative programs;
8. Quality of medical center administrative support for the program; and
9. Quality of psychiatry service support for the program.

Table 1. at the end of this announcement lists the 19 VA service sites that were selected for participation

in this initiative by VA in September 1991, the PHA administering the section 8 rental voucher program at each VA service site, the amount of budget authority available for each service site, the approximate number of units it will support and the responsible HUD Field or Regional office.

III. Section 8 Program Guidelines

The PHAs listed in Table 1. at the end of this annoncement are invited by HUD to apply for rental vouchers for the HUD-VASH initiative in accordance with the instructions in section V. of this announcement. These vouchers will provide rental subsidies that will enable very low-income homeless veterans with severe psychiatric or substance abuse disorders to live in standard housing. The rent subsidy is usually the difference between the applicable payment standard of the PHA and 30 percent of the family's adjusted income. These subsidies allow an individual to be assisted in a standard rental unit of his or her choice. If the individual moves later to a different unit, he or she can continue to receive the rent subsidy. Five year rental voucher funding will be provided by HUD to the PHA in support of the HUD-VASH program.

PHAs and local VA offices will need to work together throughout the course of this initiative to achieve program objectives.

VA local office responsibilities include (1) screening of homeless veterans currently on the PHA's Section 8 waiting list to determine whether they meet the HUD-VASH program participation criteria established by the VA national office, and if there are an insufficient number of suitable applicants on the PHA waiting list, referring additional very low income homeless veterans meeting the HUD-VASH program participation criteria to the PHA for inclusion on the waiting list; (2) providing appropriate treatment and supportive services to potential HUD-VASH program participants prior to PHA issuance of rental vouchers; (3) providing housing search assistance to HUD-VASH participants with rental vouchers;(4) identifying the social service and medical needs of HUD-VASH participants and providing, or ensuring the provision of, regular, ongoing case management, outpatient health services, hospitalization and other supportive services as needed throughout the five year term of this initiative; and (5) maintaining records and providing information for evaluation purposes, as required by HUD or the VA.

To be eligible for the HUD-VASH initiative a veteran must: (1) Have been contacted by the VA homeless program while living in a shelter or on the street; (2) have a severe psychiatric or substance abuse disorder; and (3) have received treatment and have been stabilized medically. Preference will be given to veterans who have been homeless for 30 days or more.

PHA responsibilities include (1) screening the Section 8 waiting list for homeless veterans with severe psychiatric or substance abuse disorders to be referred to the VA local office for a determination of whether they meet the HUD-VASH program participation criteria established by the VA national office; (2) determining the eligibility for Section 8 assistance of homeless veterans referred by VA local offices; (3) prior to ACC execution, amending the administrative plan and equal opportunity housing plan to provide a preference for the homeless veterans selected by the local VA office for participation in the HUD-VASH initiative in a number equal to the number of units provided by HUD for this purpose, and providing for the opening of closed waiting lists if applicable; (4) maintaining records and providing information for evaluation purposes, as required by HUD or VA; and (5) administering the rental voucher program in accordance with HUD regulations and requirements.

IV. Rental Voucher Application Process Forms

Form HUD–52515 may be obtained from the local HUD Field Office. To assist PHAs, the following are attached to this announcement: Form HUD 52515 (Attachment 1); the Certification for a Drug-Free Workplace (Attachment 2); the text for Certification Regarding Lobbying (Attachment 3); and Standard Form LLL, Disclosure of Lobbying Activities (Attachment 4).

Application Submission Deadline

PHA applications must be received by 3 p.m. local time on April 20, 1992 at the HUD Field Office receiving the application. Applications that are not delivered before 3 p.m. local time on that date will not be considered. In addition, PHAs should contact their local HUD Field Office for the exact address and room number where applications must be received.

The above-stated application deadline is firm as to date and hour. In the interest of fairness to all competing applicants, the Department will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid risk of loss eligibility brought about by unanticipated delays or other delivery-related problems.

V. Application Submission Requirements General

PHA applicants must be submitted to the local HUD Field Office on Form HUD–52515 in accordance with the rental voucher program regulations.

Table 1. at the end of this announcement lists by field office the approximate number of units and budget authority for each PHA in support of the HUD–VASH initiative. The funding for each HUD–VASH supportive service site has been determined in consultation with VA. If applications are not received by the application due date or are not approvable for any site, those rental vouchers will be distributed among the sites with approvable applications.

Certification Regarding Drug-Free Workplace

The Drug-Free Workplace Act of 1988 requires grantees of Federal agencies to certify that they will provide a drug-free workplace. Thus, each PHA must certify (even though it has done so previously) that it will comply with the drug-free workplace requirements in accordance with 24 CFR part 24, subpart F. (See Attachment 2, Certification for Drug-Free Workplace.)

Certification Regarding Lobbying

Section 319 of the Department of the Interior Appropriations Act, Public Law 101–121, approved October 23, 1989 (31 U.S.C. 1352), generally prohibits recipients of Federal contracts, grants, and loans from using appropriated funds for lobbying the Executive or Legislative Branches of the Federal Government in connection with a specific contract, grant, or loan. The Department's regulations on these restrictions on lobbying are codified at 24 CFR part 87. To comply with 24 CFR 87.110, any PHA submitting an application under this announcement for more than $100,000 of budget authority assistance must submit a certification and, if warranted, a Disclosure of Lobbying Activities. To assist PHAs, the text for the Certification Regarding Lobbying (Attachment 3) and Standard Form LLL, "Disclosure Form to Report Lobbying" (Attachment 4) are attached to this announcement.

Checklist for Technical Requirements

The following checklist specifies the required information which must be submitted in the PHA's application.

INITIAL SCREENING CHECKLIST

[Application for HUD–VASH Rental Vouchers]

PHA		Field Office		
Yes	No	Yes	No	
—	—	—	—	The application contains a completed Form HUD 52515.
—	—	—	—	The application states by number of bedrooms the total number of efficiency or one bedroom units requested by PHA.
—	—	—	—	The application demonstrates that the project requested is responsive to the condition of the housing stock in the community and the housing assistance needs of very low income families (including the elderly, handicapped, disabled, large families and those displaced) residing in or expected to reside in the community.
—	—	—	—	The application demonstrates that the applicant qualifies as a public housing agency and is legally qualified and authorized to participate in the Rental Voucher program for the area in which the program is to be carried out. Such demonstration includes (i) the relevant enabling legislation, (ii) any rules and regulations adopted or to be adopted by the agency to govern its operations, and (iii) a supporting opinion from the agency counsel. If such documents are currently on file in the Field Office they do not have to be resubmitted.
—	—	—	—	The application includes a statement that the housing quality standards to be used in the operation of the program will be as set forth in 24 CFR 887.251 or that variations in the Acceptability Criteria as are proposed. In the latter case, each proposed variation shall be specified and justified.
—	—	—	—	The application contains the PHA schedule of leasing which must provide for the expeditious leasing of units. In developing the schedule, a PHA must specify the number of units that are expected to be leased at the end of the three month interval. The schedule must project lease-up by eligible families within twelve months or sooner after execution of the ACC by HUD.
—	—	—	—	The application contains estimates of the average adjusted income for prospective participants for each bedroom size.
Requirement for Drug-Free Workplace Certification and Anti-Lobbying Certification and Disclosure Statement:				
—	—	—	—	The application meets HUD's drug-free workplace requirements set out at 24 CFR part 24, subpart F. (The application contains an executed Certification for Drug-Free Workplace (attachment 2)).
—	—	—	—	The application meets HUD's regulations regarding anti-lobbying set out at 24 CFR part 87. (The anti-lobbying requirements apply only to applications requesting budget authority exceeding $100,000. If this PHA application for rental voucher funding exceeds $100,000 in budget authority, the PHA must comply with the anti-lobbying requirements by submitting an Anti-Lobbying Certification (attachment 3) and, if warranted, a Disclosure of Lobbying Activities (attachment 4)).

VI. Corrections to Deficient Applications

An application must be received by the Field Office no later than the application submission deadline date and time specified in this Announcement, otherwise the application will not be considered by the Field Office. The Field Office will initially screen all applications and notify PHAs of technical deficiencies by letter. The PHA must correct deficiencies within 14 days or the application will not be approved.

All PHAs are encouraged to review the initial screening checklist provided in section V. of this announcement. The checklist identifies technical requirements needed for application processing.

VII. Other Matters

Environmental Review

An environmental finding under the National Environmental Policy Act (42 U.S.C. 4321–4347) is unnecessary since the Rental Voucher Program is part of the Section 8 Existing Housing Program, which is categorically excluded under HUD regulations at 24 CFR 50.20(d).

Federalism Impact

The General Counsel, as the Designated Official under section 6(a) of Executive Order 1262, Federalism, has determined that the policies contained in this announcement will not have substantial, direct effects on the states, on their political subdivisions, or on the relationship between the federal government and the states, or on the distribution of power or responsibilities among the various levels of government. As a result, the announcement is not subject to reivew under the Order. This announcement would not substantially alter the established roles of HUD, the States and local governments, including PHAs.

Impact on the Family

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this Announcement does not have potential for significant impact on family formation, maintenance, and general well-being and, thus, is not subject to review under the Order. No significant change in existing HUD policies or programs will result from promulgation of this announcement, as those policies and programs relate to family concerns. This is an announcement that does not alter program requirements concerning family eligibility.

Public Announcement Requirement: HUD Reform Act

HUD will include recipients of assistance pursuant to this Announcement in its quarterly **Federal Register** announcement of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.10(b), and the announcement published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on this requirement.)

Section 103 of the HUD Reform Act

HUD's regulation implementing section 103 of the Department of Housing and Urban Development Reform Act of 1989 (42 U.S.C. 3537a) was published on May 13, 1991 (56 FR 22088) and became effective on June 12, 1991. That regulation, codified as 24 CFR part 4, applies to this funding announcement. The requirements of the rule continue to apply until the announcement of the selection of successful applicants.

HUD employees involved in the review of applications and in the making of funding decisions are restrained by part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR part 4.

Applicants who have questions should contact the HUD Office of Ethics (202) 708–3815 (Voice/TDD). (This is not a toll-free number.) The Office of Ethics can provide information of a general nature to HUD employees, as well. However, a HUD employee who has specific program questions, such as whether particular subject matter can be discussed with persons outside the Department, should contact his or her Regional or Field Office Counsel, or Headquarters counsel for the program to which the question pertains.

Section 112 of the Reform Act

Section 13 of the Department of Housing and Urban Development Act (42 U.S.C. 3537b) contains two provisions dealing with efforts to influence HUD's decisions with respect to financial assistance. The first imposes disclosure requirements on those who are typically involved in these efforts—those who pay others to influence the award of assistance or the taking of management action by the Department and those who are paid to provide the influence. The second restricts the payment of fees to those who are paid to influence the award of HUD assistance, if the fees are tied to the number of housing units received or are based on the amount of assistance received, or if they are contingent upon the receipt of assistance.

Section 13 was implemented by final rule published in the **Federal Register** on May 17, 1991 (56 FR 22912). If readers are involved in any efforts to influence the Department in these ways, they are urged to read the final rule, particularly the examples contained in appendix A of the rule.

Any questions about the rule should be directed to Arnold J. Haiman, Director, Office of Ethics, room 2158, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410–3000. Telephone: (202) 708–3815; (Voice/TDD). (This is not a toll-free number.) Forms necessary for compliance with the rule may be obtained from the local HUD office.

Authority: Sec. 8, U.S. Housing Act of 1937 (42 U.S.C. 1437f), Sec. 7(d) Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: March 10, 1992.

Joseph G. Schiff,

Assistant Secretary for Public and Indian Housing.

Attachment 2

Certification Regarding Drug-Free Workplace Requirements

(Form 24 CFR 24, Appendix C)

Instructions for Certification

1. By signing and/or submitting this application or grant agreement, the grantee is providing the certification set out below.

2. The certification set out below is a material representation of fact upon which reliance was placed when the agency determined to award the grant. If it is later determined that the grantee knowingly rendered a false certification, or otherwise violates the requirements of the Drug-Free Workplace Act, the agency, in addition to any other remedies available to the Federal Government, may take action authorized under the Drug-Free Workplace Act.

3. For grantees other than individuals, Alternate I applies.

4. For grantees who are individuals, Alternate II applies.

Certification Regarding Drug-Free Workplace Requirements

Alternate I

A. The grantee certifies that it will provide a drug-free workplace by:

(a) Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition;

(b) Establishing a drug-free awareness program to inform employees about –

(1) The dangers of drug abuse in the workplace;

(2) The grantee's policy of maintaining a drug-free workplace;

(3) Any available drug counseling, rehabilitation, and employee assistance programs; and

(4) The penalties that may be imposed upon employees for drug abuse violations occurring in the workplace;

(c) Making it a requirement that each employee to be engaged in the performance of the grant be given a copy of the statement required by paragraph (a);

(d) Notifying the employee in the statement required by paragraph (a) that, as a condition of employment under the grant, the employee will –

(1) Abide by the terms of the statement; and

(2) Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after such conviction;

(e) Notifying the agency within ten days after receiving notice under subparagraph (d)(2) from an employee or otherwise receiving actual notice of such conviction;

(f) Taking one of the following actions, within 30 days of receiving notice under subparagraph (d)(2), with respect to any employee who is so convicted –

(1) Taking appropriate personnel action against such an employee, up to and including termination; or

(2) Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a Federal, State, or local health, law enforcement, or other appropriate agency;

(g) Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs (a), (b), (c), (d), (e) and (f).

B. The grantee shall insert in the space provided below the site(s) for the performance of work done in connection with the specific grant:

Place of Performance (Street address, city, county, state, zip code)

Alternate II

The grantee certifies that, as a condition of the grant, he or she will not engage in the unlawful manufacture, distribution, dispensing, possession or use of a controlled substance in conducting any activity with the grant.

Attachment 3

Certification Regarding Lobbying

Certification for Contracts, Grants, Loans, and Cooperative Agreements

The undersigned certifies, to the best of his or her knowledge and belief, that:

(1) No Federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of a Member of Congress in connection with the awarding of any Federal contract, the making of any Federal grant, the making of any Federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any Federal contract, grant, loan, or cooperative agreement.

(2) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form -LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.

(3) The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by section 1352, title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than $10,000 and not more than $100,000 for each such failure.

INSTRUCTIONS FOR COMPLETION OF SF-LLL, DISCLOSURE OF LOBBYING ACTIVITIES

This disclosure form shall be completed by the reporting entity, whether subawardee or prime Federal recipient, at the initiation or receipt of a covered Federal action, or a material change to a previous filing, pursuant to title 31 U.S.C. section 1352. The filing of a form is required for each payment or agreement to make payment to any lobbying entity for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with a covered Federal action. Use the SF-LLL-A Continuation Sheet for additional information if the space on the form is inadequate. Complete all items that apply for both the initial filing and material change report. Refer to the implementing guidance published by the Office of Management and Budget for additional information.

1. Identify the type of covered Federal action for which lobbying activity is and/or has been secured to influence the outcome of a covered Federal action.

2. Identify the status of the covered Federal action.

3. Identify the appropriate classification of this report. If this is a followup report caused by a material change to the information previously reported, enter the year and quarter in which the change occurred. Enter the date of the last previously submitted report by this reporting entity for this covered Federal action.

4. Enter the full name, address, city, state and zip code of the reporting entity. Include Congressional District, if known. Check the appropriate classification of the reporting entity that designates if it is, or expects to be, a prime or subaward recipient. Identify the tier of the subawardee, e.g., the first subawardee of the prime is the 1st tier. Subawards include but are not limited to subcontracts, subgrants and contract awards under grants.

5. If the organization filing the report in item 4 checks "Subawardee", then enter the full name, address, city, state and zip code of the prime Federal recipient. Include Congressional District, if known.

6. Enter the name of the Federal agency making the award or loan commitment. Include at least one organizational level below agency name, if known. For example, Department of Transportation, United States Coast Guard.

7. Enter the Federal program name or description for the covered Federal action (item 1). If known, enter the full Catalog of Federal Domestic Assistance (CFDA) number for grants, cooperative agreements, loans, and loan commitments.

8. Enter the most appropriate Federal identifying number available for the Federal action identified in item 1 (e.g., Request for Proposal (RFP) number; Invitation for Bid (IFB) number; grant announcement number; the contract, grant, or loan award number; the application/proposal control number assigned by the Federal agency). Include prefixes, e.g., "RFP-DE-90-001."

9. For a covered Federal action where there has been an award or loan commitment by the Federal agency, enter the Federal amount of the award/loan commitment for the prime entity identified in item 4 or 5.

10. (a) Enter the full name, address, city, state and zip code of the lobbying entity engaged by the reporting entity identified in item 4 to influence the covered Federal action.

    (b) Enter the full names of the individual(s) performing services, and include full address if different from 10 (a). Enter Last Name, First Name, and Middle Initial (MI).

11. Enter the amount of compensation paid or reasonably expected to be paid by the reporting entity (item 4) to the lobbying entity (item 10). Indicate whether the payment has been made (actual) or will be made (planned). Check all boxes that apply. If this is a material change report, enter the cumulative amount of payment made or planned to be made.

12. Check the appropriate box(es). Check all boxes that apply. If payment is made through an in-kind contribution, specify the nature and value of the in-kind payment.

13. Check the appropriate box(es). Check all boxes that apply. If other, specify nature.

14. Provide a specific and detailed description of the services that the lobbyist has performed, or will be expected to perform, and the date(s) of any services rendered. Include all preparatory and related activity, not just time spent in actual contact with Federal officials. Identify the Federal official(s) or employee(s) contacted or the officer(s), employee(s), or Member(s) of Congress that were contacted.

15. Check whether or not a SF-LLL-A Continuation Sheet(s) is attached.

16. The certifying official shall sign and date the form, print his/her name, title, and telephone number.

Public reporting burden for this collection of information is estimated to average 30 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Management and Budget, Paperwork Reduction Project (0348-0046), Washington, D.C. 20503.

Part XI

The President

Proclamation 6414—National Public Safety Telecommunicators Week, 1992

Federal Register
Vol. 57, No. 55
Friday, March 20, 1992

Presidential Documents

Title 3—

The President

Proclamation 6414 of March 18, 1992

National Public Safety Telecommunicators Week, 1992

By the President of the United States of America

A Proclamation

Each day, thousands of Americans dial 9–1–1 for help in emergencies ranging from house fires and automobile accidents to heart attacks and child poisonings. The men and women who answer these calls for help, gathering essential information and dispatching the appropriate assistance, can often make the difference between life and death for persons in need. Our Nation's 9–1–1 dispatchers, however, are among the more than 500,000 telecommunications specialists who work daily to protect and to promote the public safety. This week, we salute all of them—both professional and volunteer—for their dedicated efforts in our behalf.

Public safety telecommunicators are more than a calm and reassuring voice at the other end of the phone. They are knowledgeable and highly trained individuals who work closely with other police, fire, and medical personnel. They are Federal and State officials who manage vital government communications in areas such as highway safety, road maintenance, forestry, and conservation; and they are municipal employees who help to ensure the smooth operation of public utilities and other services that affect the health and safety of our citizens. Because emergencies can strike at any time, we rely on the vigilance and the preparedness of these individuals 24 hours a day, 365 days a year.

Our Nation enjoys the highest standards of public health and safety in the world, and we owe a great debt to the men and women who, by applying their expertise in telecommunications, help to make that achievement possible. During this special observance, we acknowledge that debt and extend a heartfelt thanks to each of them.

The Congress, by House Joint Resolution 284, has designated the week of April 12 through April 18, 1992, as "National Public Safety Telecommunicators Week" and has authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week of April 12 through April 18, 1992, as National Public Safety Telecommunicators Week. I invite all Americans to observe this week with appropriate programs and activities in honor of all the emergency dispatchers and other communications specialists, both professional and volunteer, who help to protect our health and safety.

IN WITNESS WHEREOF, I have hereunto set my hand this eighteenth day of March, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

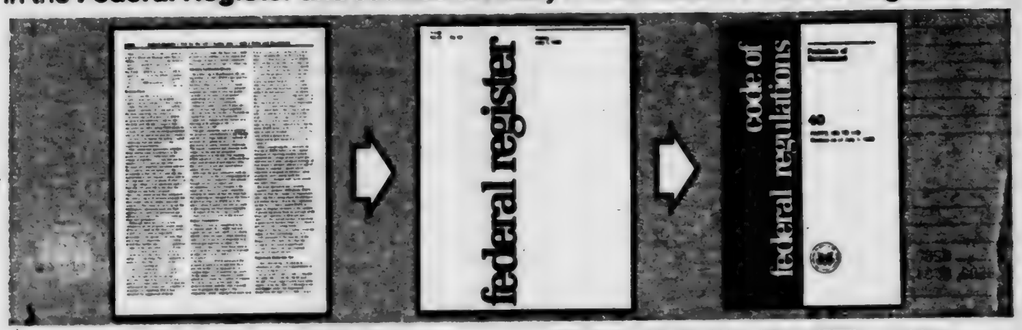
LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List March 18, 1992

The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**



The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index.**

The **Code of Federal Regulations** (CFR) comprising approximately 196 volumes contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current CFR volumes appears both in the **Federal Register** each Monday and the monthly LSA (List of CFR Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and St. Louis, MO, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

ST. LOUIS, MO

WHEN: April 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO
RESERVATIONS: Call the Federal Information Center
St. Louis: 1-800-366-2998
Missouri (outside St. Louis): 1-800-735-8004

Rules and Regulations

Federal Register
Vol. 57, No. 56
Monday, March 23, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FEDERAL RESERVE SYSTEM

12 CFR Part 225

[Docket No. R-0751]

Rescission of Policy Statement Requiring Application for Relocation of a Subsidiary Bank to Another State

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Interpretation; Rescission of Policy Statement.

SUMMARY: The Board has rescinded its policy statement requiring applications for relocations of a subsidiary bank to another state. 12 CFR 225.144. Accordingly, the Board has determined not to require the filing of an application for Board approval under the Bank Holding Company Act ("BHC Act") for bank relocations except in situations in which the Board has found an evasion of the BHC Act.

EFFECTIVE DATE: March 23, 1992.

FOR FURTHER INFORMATION CONTACT: Scott G. Alvarez, Associate General Counsel, Legal Division (202) 452-3583, or Anne R. Wolfson, Attorney, Legal Division (202) 452-2246. For the hearing impaired only, Telecommunications Device for the Deaf (TDD), Dorothea Thompson (202) 452-3544, Board of Governors of the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: In 1985, the Board issued a policy statement regarding the relocation of banks owned by bank holding companies. 50 FR 83913 (1985). That policy statement was issued in response to a petition requesting that the Board review a proposal by a subsidiary national bank of Mark Twain Bancshares, Independence, Missouri, to relocate from Missouri to Kansas, pursuant to section 30 of the National Bank Act. The policy statement explains that the Board believed that the constraint imposed by the Douglas Amendment to the BHC Act on the Board's authority to approve the bank acquisition proposals similarly constrained a bank holding company's authority to retain control of a bank. The Douglas Amendment provides that the Board may not approve an application to acquire control of a bank outside of the applicant holding company's home state, unless the acquisition is specifically authorized by the state where the bank to be acquired is located. 12 U.S.C. 1842(d). In the policy statement the Board stated that its approval of an acquisition of a bank is necessarily subject to the condition that the bank remain located in the state specified to the Board in the application by the bank holding company to acquire the bank. Consequently, a change in location of the bank outside of the bank holding company's home state constituted a material change in an essential predicate of the Board's approval of the acquisition of the bank. This material change required prior Board approval under the BHC Act and the Douglas Amendment.

On this basis, the Board in 1989 reviewed and approved an application by SouthTrust Corporation, Birmingham, Alabama, to retain a subsidiary national bank of SouthTrust Corporation after its relocation from Alabama to Georgia. The SouthTrust relocation was recently reviewed by the U.S. Court of Appeals for the District of Columbia Circuit. *Synovus Financial Corporation* v. *Board of Governors of the Federal Reserve System*, No. 89-1394 (D.C. Cir. Dec. 20, 1991), *petition for reh'g pending*. In that case, the Court held that the Board did not have jurisdiction under the BHC Act to review the relocation proposed by SouthTrust. The Court reasoned that the relocation of a national bank did not represent "an acquisition" that was subject to the requirements of the BHC Act and that a condition restricting the location of the bank was not imposed by the Douglas Amendment where the relocation was permitted under the terms of section 30 of the National Bank Act. The U.S. District Court for the Eastern District of Pennsylvania had reached a similar conclusion in an earlier lawsuit against the Comptroller of the Currency that has since become moot. *See McEnteer* v. *Clarke*, 644 F. Supp. 290 (E.D. Pa. 1986).

The Board has reconsidered its policy statement in light of these court decisions, and has determined not to require the filing of an application for Board approval under the BHC Act for the relocation of a national bank owned by a bank holding company except in situations in which the Board has found an evasion of the BHC Act. Accordingly, the Board has determined to rescind its policy statement regarding national bank relocations.

Regulatory Flexibility Act Analysis

The action would apply equally to entities of all sizes, and does not have particular effect on small entities. Accordingly, pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. 96-354, 5 U.S.C. 601 *et seq.*), the Board believes that the interpretation will not have a significant economic impact on a substantial number of small entities.

Public Comment

The provisions of section 553 of title 5, United States Code, relating to notice, public participation, and deferred effective date have not been followed in connection with this action, because it represents the announcement of a Board policy that was not subject to these requirements. In addition, the change in policy relieves a previous restriction, and is not subject to the requirements of section 553. The Board's expanded rule making procedures have not been followed for the same reason.

BILLING CODE 6210-01-F

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-CE-55-AD; Amendment 39-8210; AD 92-07-14]

Airworthiness Directives; Air Tractor Inc. AT-300 and AT-400 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Air Tractor Inc. AT-300 and AT-400 series airplanes. This action requires initial and repetitive inspections of the wing spar caps for corrosion and repair or replacement if found corroded. The Federal Aviation Administration (FAA) has received three reports of badly corroded wing spar caps on the affected airplanes. The actions specified by this AD are intended to prevent failure of the wing structure that could result in loss of control of the airplane.

DATES: Effective May 8, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 8, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from Air Tractor Inc., P.O. Box 485, Olney, Texas 76374; Telephone (817) 564-5616. This information may also be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Bob D. May, Aerospace Engineer, Airplane Certification Office, FAA, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas 76193-0150; Telephone (817) 624-5156.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD that is applicable to certain Air Tractor Inc. AT-300 and AT-400 airplanes was published in the **Federal Register** on November 15, 1991 (56 FR 57994). The action proposed initial and repetitive visual inspections of the wing spar caps for corrosion, and, if corrosion is found, repair of the corroded spar cap in accordance with the instructions in Air Tractor Inc. Service Letter No. 90, dated May 6, 1991, or replacement of the corroded spar cap in accordance with the applicable maintenance manual as defined in the referenced service letter.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public. After careful review, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. The FAA has determined that these minor corrections will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

The compliance time of this AD is presented in calendar time instead of hours time-in-service based on the FAA's determination that corrosion can occur on the wing spar caps of the affected airplane regardless of the amount of hours an airplane is in service. Moisture can become entrapped in the wing spar cap and corrosion can form over time.

The FAA estimates that 600 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 2 hours per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $66,000.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism imlications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

92-07-14 Air Tractor Inc: Amendment 39-8210; Docket No. 91-CE-55-AD.

Applicability: Models AT-300, AT-301, and AT-302 airplanes (serial numbers (S/N) 300-0001 through 301-0688); Model AT-400 airplanes (S/N) 400-0244 through 400-0415; and Model AT-400A airplanes (all S/N), certificated in any category.

Compliance: Required within the next 90 calendar days after the effective date of this AD, unless already accomplished, and thereafter at intervals not to exceed 12 calendar months.

To prevent failure of the wing structure that could result in loss of control of the airplane, accomplish the following:

(a) Remove the inspection plates on the lower side of the wing leading edge skin, and visually inspect the upper and lower aluminum spar caps from the centerline to outboard end for corrosion using a flashlight and mirror.

(1) If corrosion is found that is equal to or less than the criteria in Air Tractor Inc. Service Letter No. 90, dated May 6, 1991, prior to further flight, repair in accordance with the instructions in Air Tractor Inc. Service Letter No. 90, dated May 6, 1991.

(2) If corrosion is found that is more than the criteria in Air Tractor Inc. Service Letter No. 90, dated May 6, 1991, prior to further flight, replace the wing spar cap in accordance with the applicable maintenance manual.

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Airplane Certification Office, FAA, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas 76193. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Fort Worth Airplane Certification Office.

(d) The inspections and possible repair required by this AD shall be done in accordance with Air Tractor Inc. Service Letter No. 90, dated May 6, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Air Tractor Inc., P.O. Box 485, Olney, Texas 76374-0150. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 1100 L Street, NW; room 8401, Washington, DC.

(e) This amendment (39-8210) becomes effective on May 8, 1992.

Issued in Kansas City, Missouri, on March 13, 1992.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 12

[T.D. 92-28]

Extension of Import Restrictions on Pre-Hispanic Archaeological Artifacts From El Salvador

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations to reflect the extension of the import restrictions on pre-Hispanic archaeological objects from the Cara Sucia Archaeological Region of El Salvador which were imposed by T.D. 87-104. The Deputy Director of the United States Information Agency (USIA) has determined that the emergency conditions which originally warranted the imposition of import restrictions still exist. Accordingly, the restrictions will continue to be in effect for an additional three years, and the Customs Regulations are being amended to indicate this extension. This document also corrects a typographical error which appeared in the listing of Treasury Decision Numbers in the section.

EFFECTIVE DATE: March 23, 1992.

FOR FURTHER INFORMATION CONTACT: Legal Aspects: John Atwood, Chief, Intellectual Property Rights Branch, (202) 566-8956. Operational Aspects: Pamela Wenner, Trade Operations (202) 535-4931.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to the provisions of the Convention on Cultural Property Implementation Act, the Deputy Director of the United States Information Agency (USIA), after consultation with the Secretaries of State and Treasury, determined that significant pre-Hispanic cultural artifacts from the Cara Sucia Archaeological Region of El Salvador were in danger of pillage and looting, and that an emergency condition existed which warranted the imposition of a prohibition on the importation of such articles into the United States. In T.D. 87-104, the Customs Service announced the imposition of import restrictions and identified the types of articles covered by the restrictions.

The Deputy Director of the USIA has considered the recommendations of the Cultural Property Advisory Committee and determined that the emergency conditions which warranted imposition of the initial restrictions still exist and has decided to extend the import restrictions for another three years. (See 57 FR 8792, March 12, 1992)

Accordingly, Customs is amending § 12.104g (19 CFR 12.104g) to reflect the extension of the import restriction. This amendment is also being used to correct a typographical error which misidentifies the T.D. which set forth the original restrictions on the pre-Hispanic El Salvadorian artifacts. The T.D. had been identified as being 87-10. The correct number is 87-104.

Regulatory Flexibility Act

Because no notice of proposed rulemaking is required, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) do not apply.

Executive Order 12291

Because this document does not result in a "major rule" as defined by Executive Order 12291, the regulatory analysis and review prescribed by the Executive Order is not required.

Inapplicability of Notice and Delayed Effective Date

Because this amendment reflects the extension of emergency import restrictions on cultural property which is currently subject to pillage and looting, pursuant to section 553(b)(B) and 553(a)(1) of the Administrative Procedure Act, no notice of proposed rulemaking or public procedure is required or necessary. For the same reason, a delayed effective date is both impracticable and contrary to the public interest.

Drafting Information

The principal author of this amendment was Peter T. Lynch, Regulations and Disclosure Law Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects in 19 CFR Part 12

Customs duties and inspections, Imports, Cultural property.

Amendment to the Regulations

Accordingly, part 12 of the Customs Regulations (19 CFR part 12) is amended as set forth below:

PART 12—SPECIAL CLASSES OF MERCHANDISE

1. The general and specific authority citation for part 12 continues to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (General note 8, Harmonized Tariff Schedule of the United States (HTSUS)), 1624.

* * * * *

Sections 12.104-12.104i also issued under 19 U.S.C. 2612.

§ 12.104 [Amended]

2. Section 12.104g is amended by removing "T.D. 87-10" from the column headed "T.D. No." adjacent to the entry for El Salvador, and adding "87-104, extended by 92-28" in its place.

Approved: March 18, 1992.

Carol Hallett,

Commissioner of Customs.

Peter K. Nunez,

Assistant Secretary of Treasury.

Internal Revenue Service

26 CFR Part 301

[T.D. 8403]

RIN 1545-AH14

Taxpayer Assistance Orders

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the issuance of taxpayer assistance orders. The Technical and Miscellaneous Revenue Act of 1988 added new section 7811 to the Internal Revenue Code of 1986 (Code). The regulations provide

guidance concerning the procedures for filing an application for a taxpayer assistance order, the terms of such order, and the effect of such an order on applicable statutes of limitations.

EFFECTIVE DATE: These regulations are effective on March 20, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph W. Clark, (202) 566–4574 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

This document contains final regulations amending the Procedure and Administrative Regulations (26 CFR part 301) under section 7811 of the Internal Revenue Code. The regulations reflect the addition of section 7811 to the Internal Revenue Code by section 6230 of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. 100–647).

Section 7811 provides that upon application filed by a taxpayer or the taxpayer's duly authorized representative, the Ombudsman's office may issue a taxpayer assistance order if it determines that the taxpayer is suffering or is about to suffer a "significant hardship" as a result of the manner in which the Service is administering the internal revenue laws. The Internal Revenue Service published temporary regulations and a notice of proposed rulemaking in the **Federal Register** March 22, 1989 (54 FR 11699), providing rules under section 7811 of the Code. Several parties submitted written comments concerning the regulations. Some of the comments are discussed below. The final regulations adopt the rules contained in the notice of proposed rulemaking with some minor modifications. Most of the issues raised in the public comments either had been considered prior to publication of the temporary regulations or fall outside the scope of the regulations. A few of the comments were adopted in the final regulations.

Explanation of Provisions

The terms of a taxpayer assistance order may require the Service to release levied property, or to stop any action or refrain from taking any action with respect to the taxpayer regarding collection, the immediate assessment of deficiencies in bankruptcies and receiverships, the issuance of administrative summonses and the discovery of liability, or any other provision in the Internal Revenue Code that is specifically described by the Ombudsman in the order. To the extent authorized by Internal Revenue Service delegation orders, the authority exercisable by the Ombudsman under section 7811 may be exercised by Problem Resolution Officers in regional and district offices and at service and compliance centers. The taxpayer assistance order may be modified or rescinded only by the Ombudsman, a district director, a service center director, a compliance center director, a regional director of appeals, or the superior of those officials.

An application for a taxpayer assistance order may be filed by the taxpayer or the taxpayer's duly authorized representative. At the request of one commenter, enrolled agents have been added to the list of authorized taxpayer representatives. In general, any attorney, certified public accountant, enrolled actuary or enrolled agent may now act as a taxpayer's representative.

The temporary regulations contained a relatively lengthy definition of "significant hardship." The final regulations define significant hardship simply as a serious privation of the taxpayer and emphasize that mere economic or personal inconvenience to the taxpayer does not constitute a significant hardship. In response to several commenters, the definition of significant hardship no longer implies that financial hardship must be present. In response to the Ombudsman's office, the definition of significant hardship no longer provides that financial hardship alone is not sufficient to meet the definition. The experience acquired by the Ombudsman's office over the term of the temporary regulation demonstrates a need to provide relief from hardships that are not strictly financial. An example would be a "cooling off" period where contacts between the taxpayer and the Service have become strained. After defining a significant hardship, the final regulations separately provides that in deciding whether the significant hardship (which must result from the manner in which the internal revenue laws are being administered) merits relief pursuant to section 7811, it is necessary to consider the behavior of the taxpayer and the action or inaction of the Service that causes or is about to cause the significant hardship to the taxpayer.

The final regulations specify that taxpayer assistance orders can require the Service to release levied property in limited situations in which the Service is legally authorized to release such property. For example, in the absence of an overpayment the Service is not authorized to release sums that have been credited against the taxpayer's liability and deposited into the United States Treasury. On the other hand, since bank levies are subject to a 21-day freeze before they are honored under section 6332(c), and since in most cases more than 21 days will pass before the government sells seized property other than money, there are a number of instances in which the taxpayer assistance orders may be used to effect the return of levied money and property of the taxpayer.

The final regulations provide for the suspension of applicable statutes of limitations from the date the Ombudsman receives the application until the later of the date on which the Ombudsman makes a decision with respect to the application or the date on which an authorized official completes his or her review of the Ombudsman's decision to issue a taxpayer assistance order. The statute of limitations also is suspended for any additional period specified by the Ombudsman in the taxpayer assistance order. However, if the Ombudsman issues a taxpayer assistance order in the absence of a written application by the taxpayer, the statute of limitations is not automatically suspended.

The final regulations should not be construed as restricting or otherwise limiting taxpayer assistance practices of Problem Resolution Offices pursuant to existing delegation orders and Internal Revenue Manual provisions.

Special Analyses

It has been determined that these regulations are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administration Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking was submitted to the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these regulations is Joseph W. Clark of the General Litigation Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

List of Subjects in 26 CFR Part 301

Administrative practice and procedure, Alimony, Bankruptcy, Child support, Continental Shelf, Courts, Crime, Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Investigations, Law enforcement, Oil pollution, Penalties, Pensions, Reporting and recordkeeping requirements, Statistics, Taxes.

Adoption of Addition to the Regulations

Accordingly, title 26, part 301 of the Code of Federal Regulations is amended as follows:

PART 301—[AMENDED]

Paragraph 1. The authority citation for part 301 continues to read in part:

Authority: Sec. 7805, I.R.C. 1954; 68A Stat. 917; 26 U.S.C. 7805 * * *

§ 301.7811–1T [Redesignated as § 301.7811–1]

Par. 2. Section 301.7811–1T is redesignated as § 301.7811–1, and the word "(temporary)" is removed from the section heading.

§ 301.7811–1 [Amended]

Par. 3. Newly designated § 301.7811–1 is amended as follows:

1. Paragraph (a)(1) is amended by removing the period from the end of the paragraph and adding the language ", including action or inaction on the part of the Internal Revenue Service."

2. Paragraph (a)(3) is amended by adding the words "enrolled agent," after the language "certified public accountant."

3. Paragraph (a)(4)(ii) is revised as set forth below.

4. Paragraph (a)(5) is added as set forth below.

5. Paragraph (c)(1) is amended by removing the word "determination" in the first sentence and adding the word "deciding" in its place.

6. Paragraph (c)(3) is amended by removing the word "may" in the last sentence and substituting the word "will" in its place.

7. Paragraph (e)(2) is amended by removing the word "determination" in the paragraph heading and in the text of the paragraph in each place it occurs, and adding the word "decision" in each place where "determination" was removed in the text of the paragraph and the heading.

8. Paragraph (h) is revised to read as set forth below.

§ 301.7811–1 Taxpayer Assistance Orders

(a) * * *

(4) * * *

(ii) *Term Defined.* The term *significant hardship* means a serious privation caused or about to be caused to the taxpayer as the result of the particular manner in which the revenue laws are being administered by the Internal Revenue Service. Mere economic or personal inconvenience to the taxpayer does not constitute significant hardship.

(5) *Finding different from relief.* A finding that a taxpayer is suffering or about to suffer a significant hardship as a result of the manner in which the internal revenue laws are being administered by the Internal Revnue Service will not automatically result in relief being granted to a taxpayer under this section. A finding of "significant hardship" is separate and distinct from a determination that the taxpayer will be granted relief. The granting of relief requires an examination of the behavior of the taxpayer and of the action or inaction of the Internal Revenue Service that causes or is about to cause the significant hardship to the taxpayer.

* * * * *

(h) *Effective Date.* These regulations are effective as of March 20, 1992.

Approved: March 10, 1992.

Shirley D. Peterson,

Commissioner of Internal Revenue.

Fred T. Goldberg, Jr.,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

NATIONAL LABOR RELATIONS BOARD

29 CFR Part 102

Procedural Rules; Correction

AGENCY: National Labor Relations Board.

ACTION: Final rules; Correction.

SUMMARY: On February 4, 1992, the National Labor Relations Board published at 57 FR 4157 revisions to its rules which, *inter alia*, modified § 102.111 (a) and (b) to incorporate references to a new appendix A to part 102. By stating in amendatory instruction 2 that "Section 102.111 is revised to read as follows:" we inadvertently deleted paragraph (c) from § 102.111. We now wish to modify amendatory instruction 2 to reflect our intention not to delete paragraph (c) from this section.

EFFECTIVE DATE: February 4, 1992.

FOR FURTHER INFORMATION CONTACT: John C. Truesdale, Executive Secretary, 1717 Pennsylvania Avenue, NW., room 701, Washington, DC 20570, Telephone: (202) 254–9430.

§ 102.111 [Corrected]

Accordingly, in the rule published at 57 FR 4157, February 4, 1992, amendatory instruction 2 is corrected to read as follows:

"2. Section 102.111 is amended by revising paragraphs (a) and (b) to read as follows:"

Dated: Washington, DC, March 18, 1992.

By direction of the Board.

John C. Truesdale,

Executive Secretary, National Labor Relations Board.

[FR Doc. 92–6681 Filed 3–20–92; 8:45 am]

BILLING CODE 7545–01–M

POSTAL SERVICE

39 CFR Part 20

Implementation of Changes in Express Mail International Olympic Service

AGENCY: Postal Service.

ACTION: Temporary rule.

SUMMARY: The Postal Service is changing the qualifying requirements for Express Mail International Olympic Service to make the service available to organizations affiliated with the United States Olympic Committee, such as the national sports governing bodies, and their agents.

EFFECTIVE DATE: 12:01 a.m., March 18, 1992.

FOR FURTHER INFORMATION CONTACT: Rainer Hengst, (202) 268–6095.

SUPPLEMENTARY INFORMATION: Express Mail International Olympic Service (Olympic Service) is a new type of Express Mail International Service (EMS) limited in terms of its availability, scope, and duration. The Postal Service is offering Olympic Service, on a temporary basis, from January 29, 1992, through August 31, 1992. Olympic Service is available only for EMS shipments weighing more than two pounds sent to addresses within France, Switzerland, and Spain. At present, only the United States Olympic Committee, the Postal Service's fellow official Olympic corporate sponsors, and their agents can qualify to use the service.

The Postal Service has decided to change the qualifying requirements for Olympic Service to make the service also available to organizations affiliated with the United States Olympic Committee (affiliated Organizations), such as the national sports governing bodies, and their agents. Extending availability in this manner is consistent with the Postal Service's rationale for implementing the service. Each of the 42

Affiliated Organizations is responsible for organizing this country's Olympic efforts either in an individual sport or on a national basis. As is the case with the United States Olympic Committee and official Olympic corporate sponsors, the Affiliated Organizations can be expected to send Olympic-related mail to France, Switzerland, and Spain while Olympic Service is being offered.

The Postal Service is not making any other changes in Olympic Service at this time. Consequently, subject to the amendments set forth below, the existing temporary regulations will continue to apply to the service.

In setting international postage rates, the Postal Service must ensure that such rates (1) do not apportion the costs of the service so as to impair to overall value of the service to the users; (2) apportion the costs of all postal operations to all users on a fair and equitable basis; (3) are fair and reasonable; and (4) are not unduly or unreasonably discriminatory or preferential. The changes in Olympic Service announced herein satisfy these criteria.

The Postal Service adopts the following amendments to the International Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 20.1.

List of Subjects in 39 CFR Part 20

International postal service, Foreign relations.

PART 20—[AMENDED]

1. The authority citation for 39 CFR part 20 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 401, 404, 407, 408.

2. Chapter 2 of the International Mail Manual is amended by amending section 215.1 to read as follows:

CHAPTER 2—CONDITIONS FOR MAILING

210 Express Mail International Service

* * * * *

215 OLYMPIC SERVICE

215.1 Description

215.11 General. Express Mail International Olympic Service is available only for items sent by or on behalf of (1) the United States Olympic Committee (USOC), (2) organizations affiliated with the USOC (Affiliated Organizations), such as the national sports governing bodies, and (3) companies that have been designated as official corporate sponsors of the 1992 Olympic Games by the USOC, for expedited services to all addresses located in France and Switzerland and to addresses in Spain as shown in the IMM Individual Country Listing for that country. Olympic Service items may be sent from any point in the United States agreed upon by the Postal Service and the mailer. There is no service guarantee for Olympic Service.

* * * * *

3. Chapter 2 of the International Mail Manual is amended by amending section 215.4 to read as follows:

215.4 Application for Olympic Service

215.42 Responsibilities of IAR. The IAR determines eligibility for Olympic Service by verifying (1) that the applicant is the USOC, an Affiliated Organization, an official Olympic sponsor, or an agent mailing on behalf of one of the foregoing; and (2) that the applicant's anticipated mailings meet the requirements for Olympic Service. The IAR is also responsible for transmitting the information provided by the applicant about anticipated mailings to the International & Military Mail Operations Division and for establishing the applicant's Express Mail corporate account.

* * * * *

These changes will be published in the next issue of the International Mail Manual.

Stanley F. Mires,

Assistant General Counsel, Legislative Division.

[FR Doc. 92-6582 Filed 3-20-92; 8:45 am]

BILLING CODE 7710-12-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[FRL-4116-9]

New York: Final Authorization of State Hazardous Waste Program Revisions

AGENCY: Environmental Protection Agency.

ACTION: Immediate final rule.

SUMMARY: New York has applied for final authorization of revisions to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA). The Environmental Protection Agency (EPA) has reviewed New York's application and has made a decision, subject to public review and comment, that New York's hazardous waste program revisions satisfy all of the requirements necessary to qualify for final authorization. Thus, EPA intends to approve New York's hazardous waste program revisions. New York's application for program revision is available for public review and comment.

DATES: Final authorization for New York shall be effective May 22, 1992 unless EPA publishes a prior Federal Register action withdrawing this immediate final rule. All comments on New York's program revision application must be received by the close of business April 22, 1992.

ADDRESSES: Copies of New York's program revision application are available during the business hours of 8 a.m. to 4:30 p.m. at the following addresses for inspection and copying: New York State Department of Environmental Conservation, 50 Wolf Road, room 204, Albany, New York 12233-7258, (518) 457-3273; U.S. EPA Library (PM 211A), 401 M Street, SW., Washington, DC 20460, 202/382-5926. U.S. EPA Region II Library, room 402, 26 Federal Plaza, New York, New York 10278, Phone (212) 264-2881. Written comments should be sent to: Mr. Conrad Simon, Director, Air and Waste Management Division, U.S. EPA, Region II, 26 Federal Plaza, New York, New York 10278, (212) 264-2301.

FOR FURTHER INFORMATION CONTACT: Mrs. Elizabeth E. Van Rabenswaay, Environmental Scientist; Hazardous Waste Programs Branch, Air & Waste Management Division, U.S. EPA, Region II, 26 Federal Plaza, New York, New York 10278, (212) 264-0548.

SUPPLEMENTARY INFORMATION:

A. Background

States with final authorization under section 3006(b) of the Resource Conservation and Recovery Act (RCRA or the Act), 42 U.S.C. 6926(b), have a continuing obligation to maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal hazardous waste program. In addition, as an interim measure, the Hazardous and Solid Waste Amendments of 1984 (Pub. L. 98-616, November 8, 1984, hereinafter HSWA) allows States to revise their programs to become equivalent to RCRA requirements promulgated under HSWA authority. Revisions to State hazardous waste programs are necessary when Federal and State statutory or regulatory authority is modified or when certain other changes occur. Most commonly, State program revisions are necessitated by changes to EPA's regulations in 40 CFR parts 260-266, 268, 124 and 270.

B. New York

New York initially received final authorization on May 29, 1986. New York received authorization for revisions to its program on July 3, 1989, and May 7, 1990, and October 29, 1991. On September 25, 1991, New York submitted a program revision application for additional program approvals. Today, New York is seeking approval of its program revision in accordance with 40 CFR 271.21(b)(3).

In order to obtain Final Authorization, the State of New York has demonstrated and certified that its authority to regulate the following is equivalent to the federal RCRA authority, including the requirements promulgated under HSWA authority:

Provision	Federal authority	State authority
Standards for Hazardous Waste Storage and Treatment Tank Systems (51FR25422; 7/14/86).	RCRA Section 1006, 2002, 3001-3007, 3010, 3014, 3017-19, 7004; 40 CFR parts 260, 264, 265 and 270.	ECL Section 27-0907, 0911; 6NYCRR 370.2, 371.1, 372.2, 373-1, 373-2, 373-3.
Revised Manual SW-846 Amended Incorporation by Reference (52FR8072; 3/16/87).	RCRA Sections 2002, 3001; 40 CFR 260.11(a), 270.6(a).	ECL Section 27-0900; 6NYCRR § 370.1(e)(6).
Closure/Post-Closure Care for Interim Status Surface Impoundments (52FR8704; 3/19/87).	RCRA Section 3004, 3005; 40 CFR parts 260, 264, 265 and 270.	ECL Sections 27-0911, 0917, 0918; 6NYCRR part 370, 373-1, 373-3.11(f).
Amendments to Part B Info. Requirements for Land Disposal Facilities (52FR23447; 6/22/87).	RCRA Sections 3004, 3005; 40 CFR 270.14.	ECL Section 27-0907, 0911; 6NYCRR 373-1.5(a)(3)(vii), (viii)(e).
Hazardous Waste Misc. Units (52FR46946; 12/10/87)	RCRA Sections 3004(u), 3005; 40 CFR 141.31(a), parts 260, 264 § 264.90(d), 264.600, 264.603, 260.10, & 270.	ECL Section 27-0911; 6NYCRR Sections 373-2.6, 370.2, 373-2.2, 373-2.5, 373-2.7, 373-2.8, 373-1.5, 373-2.24.
Standards Applicable to Owners and Operators of Hazardous Waste TSDF's; Closure/Post-Closure and Financial Responsibility Requirements (53FR7740; 3/10/88).	RCRA Sections 3004, 3005; 40 CFR parts 260, 264, 265, 270.	ECL Sections 27-0911, 0918; 6NYCRR Part 370, 373-1, 373-2, 373-2.7, 373-2.8, 373-3.8, 373-3.7.
Identification & Listing of Haz. Waste; Treatability Studies Sample Exemption (53FR27290; 7/19/88).	RCRA Section 3001; 40 CFR 260.10, 261.4 (e) and (f).	ECL Section 27-0903; 6NYCRR Sections 370.2(b), 371.1(e)(4) (iv) and (v).
Hazardous Waste Management System; Standards for Haz. Waste Storage and Treatment Tank Systems (53FR34079; 9/2/88).	RCRA Sections 1006, 2002, 3001-3007, 3010, 3014, 3017-19, 7004; 40 CFR parts 260, 261, 262, 264, 265 and 270.	ECL Sections 27-0907, 0911; 6NYCRR 370.2, 373-1, 373-2.7, 373-2.10, 373-3.7, 373-3.10.
Identification & Listing of Haz. Waste; and Designation, Reportable Quantities; and Notification (53FR35412; 9/13/88).	RCRA Section 3001; 40 CFR 261.32	ECL Section 27-0903; 6NYCRR Section 371.4(c).
Permit Modifications for Hazardous Waste Management Facilities. (53FR37912; 9/28/88).	RCRA Sections 2002(a), 3004, 3005 & 3006; 40 CFR parts 124, 264, 265 & 270, 270.42.	ECL Section 27-0707, 0913; 6NYCRR 370, 373-1, 373-2, 373-3, 621.13 & 621.14.
Statistical Methods for Evaluating Groundwater Monitoring Data from Hazardous Waste Facilities (53FR39720; 10/11/88).	RCRA Sections 1006, 2002(a), 3004 & 3005; 40 CFR 264.91, 264.92, 264.97, 264.98 and 264.99.	ECL Sections 27-0703, 0911 6NYCRR Section 373-2.6 (b), (c), (h), (i), and (j).
Permit Modifications for Hazardous Waste Management Facilities (53FR41649; 10/24/88).	RCRA Sections 2002(a), 3004, 3005 & 3006 40 CFR 264.96(g)(4).	ECL Sections 27-0707, 0913; 6NYCRR 373-2.6(i)(8)(iv)
Identification & Listing of Hazardous Waste; Removal of Iron Dextran from the List of Hazardous Wastes (53FR43878; 10/31/88).	RCRA Section 3001(b); 40 CFR 261.33	ECL Section 27-0903; 6NYCRR Section 371.4(d).
Identification & Listing of Hazardous Waste; Removal of Strontium Sulfide from the List of Hazardous Wastes (53FR43881; 10/31/88).	RCRA Section 3001(b); 40 CFR 261.33	ECL Section 27-0903; 6NYCRR Section 371.4(d).
Standards for Generators of Hazardous Waste; Manifest Renewal (53FR45089; 11/8/88).	RCRA Sections 2002, 3002, 3003; 40 CFR 262.20 and 6700-22.	ECL Sections 27-0905, 0907(5); 6NYCRR Section 372.2(b)(1), Appendix 30.
Hazardous Waste Miscellaneous Units; Standards Applicable to Owners and Operators (54FR615; 1/9/89).	RCRA Sections 3004, 3005; 40 CFR 270.14(b) (5) and (13).	ECL Sections 27-0905, 0907, 0911, 0913; 6NYCRR Sections 373-1.5(a)(2) (v) and (vii).
Amendment to Requirements for Hazardous Waste Incinerator Permits (54FR4286; 1/30/89).	RCRA Section 3005(b); 40 CFR part 270.62(d).	ECL Section 27-0707, 27-0913; 6NYCRR 373-1.9(a)(4).
Changes to Interim Status Facilities for Hazardous Waste Management Permits; Modifications of Hazardous Waste Management Permits Procedures for Post-Closure Permitting (54FR9596; 3/7/89).	RCRA Sections 2002(a), 3004, 3005 & 3006; 40 CFR 270.72, 270.42, 270.1, 270.10 and 270.29.	ECL Section 27-0707, 0912, 0913; 6NYCRR 373-1.3(g), 373-1.7(c), 373-1.2(e), 373-1.4(b), and 373-1.5(p).
HSWA Date of Enactment Provisions (11/8/84):		
Direct Action Against Insurers (HSWA 3004(t); 11/8/84)	RCRA Section 3004(t)	ECL Section 27-0917(5), (6) Insurance Law Section 3420.
Dioxin Waste Listing and Management Standards (50FR1978; 1/14/85)	RCRA Sections 3001, 3004; 40 CFR parts 261, 264, 265 & 270.	ECL Sections 27-0903, 0911; 6NYCRR Sections 371.1(c)(5), 371.(f)(2), 371.4, 372.1(e)(1), 373-2.9(f), 373-2.11, 373-2.12, 373-2.13, 373-2.14, 373-2.15, 373-3.1, 373-1.5, 373-3.15, 373-3.16, appendices 21, 22, 23, and 32.
Fuel Labeling (HSWA 3004(r)(1); 2/7/85)	RCRA Sections 3004(r)(1), 3014; 40 CFR 266.34(d).	ECL Section 270907.
Paint Filter Test (50FR18370; 4/30/85)	RCRA Sections 3004, 3005; 40 CFR parts 264, 265, 270.	ECL Sections 27-0707, 0911; 6NYCRR part 373-2, 373-3.
Prohibitions of Liquids in Landfills (HSWA 3004(c); 5/8/85)	RCRA Section 3004(c); 40 CFR 264.314, 265.314, 270.21(h).	ECL Sections 27-0703(a), 27-0911, 27-0912; 6NYCRR 373-2.14 and 373-3.14.
Expansions During Interim Status—Waste Piles (HSWA 3015(a); 5/8/85)	RCRA Section 3015(a)	ECL Section 27-0913.
Expansions During Interim Status—Landfills and Surface Impoundments (HSWA 3015(b); 5/8/85).	RCRA Section 3015(b)	ECL Section 27-0913.
HSWA Codification Rule (50FR28702; 7/15/85):		
Small Quantity Generators	RCRA Section 3002; 40 CFR 261.5 (b), (f), (g) and (h).	ECL Section 27-0907; 6NYCRR Section 372.1(e)(1).
Household Waste	RCRA Section 3001; 40 CFR 261.4(b)(1)	ECL Sections 27-0900, 27-0903; 6NYCRR 371.1(e)(2)(i).
Waste Minimization	RCRA Section 3002; 40 CFR 262.41, 264.70, 264.73 and 270.	ECL Section 0907, 0906; 6NYCRR 372.2(c)2, 373-2.5 and 373-1.
Location Standards for Salt Domes, Salt Beds, Underground Mines & Caves.	RCRA Section 3004(b); 40 CFR 264.18(c) and 265.18.	ECL Section 27-0912; 6NYCRR 373-2.2(i)(2), 373-3.2(i).

Provision	Federal authority	State authority
Liquids in Landfills	RCRA Sections 3003(c); 40 CFR 264.314, 265.314, 270.21(h).	ECL Sections 27-0703(a), 0911, 0912; 6NYCRR Sections 373-2.14(j) (1), (2), 373-3.14(g) (1) and (2).
Dust Suppression	RCRA Section 3092, 3004; 40 CFR 266.23	ECL Section 374.3(d).
Double Liners	RCRA Section 3015(b); 40 CFR 264.221, 264.301, 265.221, 265.254, 265.301.	ECL Sections 27-0707, 0911; 6NYCRR 373-2.11(b), 373-2.14(c), 373-3.11(i), 373-3.12(h), 373-3.14(j).
Groundwater Monitoring	RCRA Section 3004(p); 264.90, 40 CFR 264.222, 264.252, 264.253, 264.302, 264.226, 264.228, 264.254, 264.303, 264.310.	ECL Section 27-0703(1), 0911; 6NYCRR Sections 373-2.5(a)(2), 373-2.11 (c) (d) (f), 373-2.12 (c), (d) & (e)(2), 373-2.14 (d), (e) & (g).
Cement Kilns	RCRA Section 3004(a); 40 CFR 261.6, 261.30, and 266.31.	ECL Sections 19-0301(1), 19-0303, 0304, 27-0703, 0907, 0908, 0911; 6NYCRR Sections 372.1(e)(2)(ii), 371.4(d), 374.4(b)(2)(i).
Corrective Action	RCRA Section 3004 (a), (c) and (d). 3005; 40 CFR 264.90, 264.101, and 270.60.	ECL Sections 3-0301(1)(f), 27-0703, 0705, 0707, 0911, 71-2701; 6NYCRR Sections 373-1.1(d)(2), (4) and (5), 373-2.6(e) (1) & (2), 373-2.5(e)(1).
Pre-construction Ban	RCRA Section 3005(a); 40 CFR 270.10(f) (1) & (3).	373-1.2(c).
Permit Life	RCRA Section 3005(c)(3); 40 CFR 270.41(a)(6), 270.50(d).	ECL Sections 27-0707, 0913(1), 70-0115; 6NYCRR 373-1.8(a)(1).
Omnibus Provision	RCRA Section 3005(c)(3); 40 CFR 270.32(b).	ECL Sections 27-0707, 0913(1); 6NYCRR 373-1.8(c)(2).
Interim Status	40 CFR 270.10, 270.30, 270.70, 270.73	373-1.3, 373-1.4, and 373-1.8.
Hazardous Waste Exports	RCRA Section 3017; 40 CFR parts 261, 262, and 263.	ECL Section 27-0907(6); 6NYCRR 370, 372.1, 372.2, and 372.5.
Exposure Information	RCRA 3019(a); 40 CFR 270.10 (c) and (j)	ECL Section 27-0707, 0913(j); 6NYCRR 371-1.4(b), 373-1.5(d) (6) and (h)(10).
Listing of TDI, TDA, DNT (50FR42936; 10/23/85)	RCRA Section 3003(1); 40 CFR 261.33 and 261.32.	ECL Section 27-0905; 6NYCRR § 371.1 (c) and (d).
Burning of Waste Fuel and Used Oil Fuel in Boilers and Industrial Furnaces (50FR49164; 11/29/85).	RCRA Sections 3001, 3004(a); 40 CFR parts 261, 264, 265 and 266.	ECL Section 27-0907, 0909, 0910, 0922; 6NYCRR 371.1(d), 372.1(e), 373-2.15, 373-3.15, 374.4 and 374.5.
Listing of Spent Solvents (50FR53315; 12/31/85)	RCRA Section 3001(b); 40 CFR 261.31	ECL Section 27-0903; 6NYCRR Section 371.4(b).
Listing of Spent Solvents; Correction (51FR2702; 1/21/86)	RCRA Section 3001(b); 40 CFR 261.31	ECL Section 27-0903; 6NYCRR Section 371.4(b).
Listing of EBB Waste (51FR5327; 2/13/86)	RCRA Section 3001(b); 40 CFR 261.32	ECL Section 27-0903; 6NYCRR Section 371.4(c).
Listing of Four Spent Solvents (51FR6537; 2/25/86)	RCRA Section 3001(b); 40 CFR 261.33, and 261.31.	ECL Section 27-0903; 6NYCRR Section 371.4 (b) and (d).
Generators of 100 to 1000 kg Hazardous Waste (51FR10146; 3/24/86)	RCRA Section 3001(d); 40 CFR parts 260-263.	ECL Section 27-0909, 0907, 0909, 0911; 6NYCRR Section 370.2(b), 371.1(a), 371.4(d), 372.1(e), 372.2 (e) & (b), 372.3(b), 373-1.1(d) & 373-1.3(b).
Codification Rule, Technical Correction (Paint Filter Test) (51FR19176; 5/28/86).	RCRA Sections 3004, 3005; 40 CFR 265.314(d).	ECL Sections 27-0707, 0911; 6NYCRR 373-3.14(g)(3).
Standards for Hazardous Waste Storage and Tank Systems (also in Non-HSWA Cluster III) (51FR25422; 7/14/86).	RCRA Sections 1006, 2002, 3001-3007, 3010, 3014, 3017-19, 7004; 40 CFR parts 260, 261, 262, 264, 265 and 270.	ECL Section 27-0907, 0911; 6NYCRR 370.2, 371.1, 372.2, 373-1, 373-2 and 373-3.
Biennial Report; Correction (51FR28556; 8/8/86)	RCRA Sections 3002, 3004; 40 CFR 264.75, 265.75.	ECL Section 27-0707, 0907(6), 0911; 6NYCRR Section 373-2.5(e)(6-10) and 373-3.5(e)(5-10).
Exports of Hazardous Waste (51FR28604; 8/8/86)	RCRA Section 3017; 40 CFR parts 261, 262 and 263.	ECL Section 27-0707(6); 6NYCRR parts 370, 372.1, 372.2 and 372.5.
Standards for Generators Waste Minimization Certifications (51FR35190; 10/1/86).	RCRA Sections 3002(a)(6), b.; 40 CFR 262.41, 8700-22.	ECL Sections 27-0907(5) (a) and (b), 0908; 6NYCRR Section 372.2.
Listing of EBDC (54FR37726; 10/24/89)	RCRA Section 3001(b); 40 CFR Sections 261.32.	ECL Section 27-0903; 6NYCRR Section 371.4(c).
Land Disposal Restrictions (51FR40572; 11/7/86)	RCRA Sections 3004(d)–(k) & (m); 40 CFR part 268, 261, 262, 263 264, 265, 268, 270.	ECL Section 27-0912; 6NYCRR 370, 371, 372, 373-1, 373-2, 373-3 and 376.
Burning of Waste Fuel and Used Oil Fuel in Boilers and Industrial Furnaces; Technical Corrections (52FR11819; 4/13/87).	RCRA Sections 3004(g)(2)(A), 3004(n) (2) & (3); 40 CFR 261, 266.	ECL Section 27-0903; 6NYCRR Section 371, 374.4(b), 374.5 (e) and (f).
Land Disposal Restrictions Corrections (52FR21010; 6/4/87)	40 CFR 264, 265, and 268	6NYCRR 372.2, 373-3, and 376.
California List Waste Restrictions (52FR25760; 7/8/87)	RCRA Section 3004(d)–(k) and (m); 40 CFR parts 264, 265, 268 and 270.	ECL Section 27-0912; 6NYCRR 373-1, 373-2, 373-3 and 376.
Exception Reporting for Small Quantity Generators of Hazardous Waste (52FR35894; 9/23/87).	RCRA Sections 3001(a) and 3002(a)(5); 40 CFR 262.42, 262.44.	ECL Sections 27-0905, 0907(5), 0911, 0913; 6NYCRR Section 372.1(e) (i) and (ii), and 372.2(c)(3).
California List Waste Restrictions; Technical Corrections (53FR41295; 10/27/87).	RCRA Section 3004(d)–(k) and (m); 40 CFR parts 264, 265, 268 and 270.	ECL Section 27-0912, 6NYCRR parts 373-1, 373-2, 373-3, and 376.
HSWA Codification Rule 2 (52FR45788; 12/1/87):		
Permit Application Requirements Regarding Corrective Action	RCRA Section 3004, 3005; 40 CFR 270.14	ECL Section 27-0911, 0913; 6NYCRR 373-1.5(a).
Corrective Action Beyond Facility Boundary	RCRA Section 3004(v); 40 CFR 264.101(c), 264.100(e) 264.1, 264.3.	ECL Sections 27-0707, 0911, 0913; 6NYCRR Sections 373-2.6(e)(5) and 373-2.6(1).
Corrective Action for Injection Wells	40 CFR 265.1 and 270.60	ECL Section 373-3.1(a)(4), 373-1.1(d)(2).

Provision	Federal authority	State authority
Permit Modification	RCRA Section 3005(c); 40 CFR 270.41(a)(3).	ECL Sections 27-0707, 0913; 6NYCRR Section 621.14 and 373-1.7(b).
Permit as a Shield Provision	RCRA Section 3005(g); 40 CFR 270.4(a)	ECL Section 27-0912; 6NYCRR Section 373-1.2(l).
Permit Conditions to Protect Human Health and the Environment	RCRA Section 3005(c); 40 CFR 270.10(k)	ECL Section 27-0707, 0913; 6NYCRR Section 373 1.4(h).
Post-Closure Permits	RCRA Section 3005(c); 40 CFR 270.1(c)	ECL Section 27-0707, 0913, 0918; 6NYCRR Section 373-1.2(e).
Identification and Listing of Hazardous Waste; Technical Correction (53FR27162; 7/19/88).	RCRA Section 3001; 40 CFR 261.5 (e) and (f)(2).	ECL Section 27-0903 6NYCRR Section 372.1(e) (i), (v) and (vi).
Farmer Exemptions; Technical Corrections (53FR27164; 7/19/88)	RCRA Section 3002, 3004, 3005; 40 CFR 262.10, 264.1(g), 265.1(c), 268.1(c), 270.1.	ECL Section 27-0907, 0911, 0913; 6NYCRR Sections 372.1 (a) and (b), 373-1.1(d)(1), 376.1(a)(4).
Land Disposal Restrictions for First Third Scheduled Wastes (53FR31138; 8/17/88).	RCRA Section 3004 (d)–(k) and (m); 40 CFR parts 264, 265, 268 and 268.	ECL Section 27-0912; 6NYCRR 373-2, 373-3, 374 and 376.
Hazardous Waste Management System; Standards for Hazardous Waste Storage and Treatment Tank System (also in Non-HSWA Cluster V) (53FR34079; 9/2/88).	RCRA Sections 1006, 2002, 3001-3007, 3010, 3014, 3017-19, 7004; 40 CFR parts 260, 264, 265 and 270.	ECL Sections 27-0907, 0911; 6NYCRR 370.2, 373-1.2, 373-2, 373-3.
Identification and Listing of Hazardous Waste; Land Disposal Restrictions—Administrative Stay (54FR4021; 1/27/89).	40 CFR part 261	6NYCRR part 371.
Land Disposal Restrictions (54FR8264; 2/27/89)	40 CFR part 268	6NYCRR part 376.
Land Disposal Restriction Amendments to First Third Scheduled Wastes (54FR18836; 5/2/89).	40 CFR part 268.12 and 268.43	6NYCRR part 376.
Land Disposal Restrictions for Second Third Scheduled Wastes (54FR26594; 6/23/89).	RCRA Section 3004 (d)–(k) and (m); 40 CFR part 268.	ECL Section 27-0912; 6NYCRR 376.
Hazardous Waste Management System; Requirements of Rulemaking Petitions (54FR27114; 6/27/89).	RCRA Sections 3003, 3012, 3021, 3026; 40 CFR 260.22.	6NYCRR part 370.3(c).
Land Disposal Restrictions; Correction (54FR36967; 9/6/89)	RCRA Section 3004(d)–(k) and (m); 40 CFR part 268.	ECL Section 27-0912; 6NYCRR part 376.
Land Disposal Restrictions; Correction (55FR23935; 6/13/90)	RCRA Section 3004(d)–(k) and (m); 40 CFR part 268.	ECL Section 27-0912; 6NYCRR part 376.
Reportable Quality Adjustment Methyl Bromide Production Wastes (54FR41402; 10/6/89).	40 CFR 261.32	6NYCRR 371.4(c).
Reportable Quantity Adjustment (54FR50968; 12/11/89)	40 CFR 261.31	6NYCRR 371.4(b).
Land Disposal Restrictions for Third Third Scheduled Wastes (55FR22520; 6/1/90).	RCRA Section 3004 (d)–(k) and (m); 40 CFR parts 261, 262, 264, 265 and 268.	ECL Section 27-0912; 6NYCRR parts 371, 372, 373-2, 373-3 and 376.

EPA has reviewed New York's application, and has made an immediate final decision that New York's hazardous waste program revision satisfies all of the requirements necessary to qualify for final authorization. Consequently, EPA intends to grant final authorization for the additional program modifications to New York. The public may submit written comments on EPA's immediate final decision up until April 22, 1992. Copies of New York's application for program revision are available for inspection and copying at the locations indicated in the "Addresses" section of this Notice.

Approval of New York's program revision shall become effective 60 days after the date of publication of this Notice unless an adverse comment pertaining to the State's revision discussed in this Notice is received by the end of the comment period. If an adverse comment is received, EPA will publish either (1) a withdrawal of the immediate final decision or (2) a notice containing a response to comments which either affirms that the immediate final decision takes effect or reverses the decision. New York is applying for final authorization of the following Federal hazardous waste requirements:

RCRA Checklist	HSWA or FR reference	Promulgation or HSWA date
Non-HSWA Cluster III (7/1/86–6/30/87):		
Standards for Hazardous Waste Storage and Treatment Tank Systems	51FR25422	7/14/86
Revised Manual SW-846; Amended Incorporation by Reference	52FR8072	3/16/87
Closure/Post-Closure Care for Interim Status Surface Impoundments	52FR8704	3/19/87
Amendments to Part B Info. Requirements for Land Disposal Facilities	52FR22447	6/22/87
Non-HSWA Cluster IV (7/1/87–6/30/88):		
Hazardous Waste Miscellaneous Units	52FR46946	12/10/87
Standards Applicable to Owners and Operators of Hazardous Waste TSDF's; Closure/Post-Closure and Financial Responsibility Requirements.	53FR7740	3/10/88
Non-HSWA Cluster V (7/1/88–6/30/89):		
Identification & Listing of Haz. Waste; Treatability Studies Sample Exemption	53FR27290	7/19/88
Hazardous Waste Management System; Standards for Hazardous Waste Storage and Treatment Tank systems	53FR34079	9/2/88
Identification & Listing of Haz. Waste; and Designation, Reportable Quantities; and Notification	53FR35412	9/13/88
Permit Modifications for Hazardous Waste Management Facilities	53FR37912	9/25/88
Statistical Methods for Evaluating Groundwater Monitoring Data from Hazardous Waste Facilities	53FR39720	10/11/88
Permit Modifications for Hazardous Waste Management Facilities	53FR41649	10/24/88
Identification & Listing of Hazardous Waste; Removal of Iron Dextran from the List of Hazardous Wastes	53FR43878	10/31/88
Identification & Listing of Hazardous Waste; Removal of Strontium Sulfide from the List of Hazardous Wastes	53FR43881	10/31/88
Standards for Generators of Hazardous Waste; Manifest Renewal	53FR45089	11/8/88
Hazardous Waste Miscellaneous Units; Standards Applicable to Owners and Operators	54FR615	1/9/89
Amendment to Requirements for Hazardous Waste Incinerator Permits	54FR4286	1/30/89
Changes to Interim Status Facilities for Hazardous Waste Management Permits; Modifications of Hazardous Waste Management Permits; Procedures for Post-Closure Permitting.	54FR9596	3/7/89

New York has only applied for authorization for the above listed requirements. This list does not include some federal requirements, including, but not limited to, rules such as the Toxicity Characteristic Rule and the rules establishing organic air emission standards. New York is not authorized, nor is it seeking to be authorized, to operate the Federal Program on Indian lands. This authorization shall remain with the EPA.

C. Decision

The EPA concludes that New York's application for program revision meets all of the statutory and regulatory requirements established by RCRA. Accordingly, New York is granted final authorization to operate its hazardous waste program as revised. New York now has expanded responsibility for permitting treatment, storage and disposal facilities within its borders and carrying out other aspects of the RCRA program, subject to the limitation of its revised program application and previously approved authorities. New York also has primary enforcement responsibilities for the program revision, although EPA retains the right to conduct inspections under section 3007 of RCRA and to take enforcement actions under sections 3008, 3013 and 7003 of RCRA.

The version of the regulations being authorized by EPA at this time are the regulations which are in effect as of February 1st, 1992. The regulations so authorized are available at the repositories noted above and will appear in the revised version of Title 6 of the Official Compilation of Codes, Rules and Regulations that the New York Secretary of State will be publishing later in 1992.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this authorization will not have a significant economic impact on a substantial number of small entities. This authorization effectively suspends the applicability of certain Federal regulations in favor of New York's program, thereby eliminating duplicative requirements for handlers of hazardous waste in the State. It does not impose any new burdens on small entities. This rule, therefore, does not require a regulatory flexibility analysis.

Authority: This Notice is issued under the authority of sections 2002(a), 3006 and 7004(b) of the Solid Waste Disposal Act, as amended. 42 U.S.C. 6912(a), 6926, 6974(b).

Dated: March 12, 1992.

Constantine Sidamon-Eristoff,

Regional Administrator.

BILLING CODE 6560-50-M

40 CFR Part 721

[OPPTS-50580B; FRL-4002-2]

Carboxy Alkyl Silyl Salt and Formaldehyde, Polymer with Bisphenol A and Substituted Phenol; Proposed Revocation of Significant New Use Rules

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is revoking the significant new use rules (SNURs) at 40 CFR 721.1060 and 721.1890 that were promulgated under section 5(a)(2) of the Toxic Substances Control Act (TSCA) for the above two chemical substances based on receipt of new data. The data indicate that for purposes of TSCA section 5, further regulation under section 5 of TSCA is not warranted at this time.

EFFECTIVE DATE: The effective date of this rule is April 22,1992.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, TSCA Assistance Office (TS-799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. EB-44, 401 M St., SW., Washington, DC 20460. Telephone: (202) 554-1404, TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of June 28, 1990 (55 FR 26092), EPA issued SNURs establishing significant new uses for carboxy alkyl silyl salt (P-89-292) and formaldehyde, polymer with bisphenol A and substituted phenol (P-89-279). Because of additional data EPA has received for these substances, EPA proposed to revoke these SNURs in the **Federal Register** of August 29, 1991 (56 FR 42714).

I. Rulemaking record

The record for the rules which EPA is revoking was established in docket number OPPTS-50580 (P-89-279 and P-89-292). This record includes information considered by the Agency in developing this rule and includes the test data to which the Agency has responded with this revocation.

II. Background

The Agency proposed the revocation of the SNUR for these substances in the **Federal Register** of August 29, 1991 (56 FR 42714). The background and reasons for the revocation of the SNUR are set forth in the preamble to the proposed revocation. The Agency received no public comment concerning the proposed revocation. As a result EPA is revoking these SNURs.

III. Objectives and Rationale of Revocation of the Rules

During review of the PMNs submitted for the chemical substances that are the subject of this revocation, EPA concluded that regulation was warranted under section 5(e) of TSCA pending the development of information sufficient to make a reasoned evaluation of the environmental effects of the substances, and EPA identified the tests considered necessary to evaluate the risks of the substances. The basis for such findings is referenced in Unit II. of this preamble. Based on these findings, section 5(e) consent orders were negotiated with the PMN submitters and SNURs were promulgated. EPA reviewed the testing conducted by the PMN submitters for the substances and determined that the information available was sufficient to make a reasoned evaluation of the environmental effects or releases of the substances. With respect to P-89-292, EPA concluded that, for the purposes of TSCA section 5, the substance will not present an unreasonable risk. With respect to P-89-279, EPA concluded that, for the purposes of TSCA section 5, the substance will not be released in substantial quantities. Accordingly, EPA subsequently revoked the section 5(e) consent orders. The revocation of SNUR provisions for these substances designated herein is consistent with the revocation of the section 5(e) orders. In light of the above EPA is revoking SNUR provisions for these chemical substances. EPA will no longer require notice of any company's intent to manufacture, import, or process these substances.

List of Subjects in 40 CFR Part 721

Chemicals, Environmental protection, Hazardous materials, Recordkeeping and reporting requirements, Significant new uses.

Dated: February 6, 1992.

Victor J. Kimm,

Acting Assistant Administrator for Prevention, Pesticides and Toxic Substances.

Therefore, 40 CFR part 721 is amended as follows:

PART 721—[AMENDED]

1. The authority citation for part 721 will continue to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

§ 721.1060 [Removed]

2. By removing § 721.1060.

§ 721.1890 [Removed]

3. By removing § 721.1890.

BILLING CODE 6560-50-F

FEDERAL MARITIME COMMISSION

46 CFR Part 502

[Docket 92-03]

Rules of Practice and Procedure; Special Docket Applications

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: The Federal Maritime Commission adopts as a final rule an Interim Rule regarding the processing of special docket applications. This amendment to part 502 authorizes the Secretary of the Commission to assign such applications to Special Docket Officers for review and initial decision. The Secretary will retain discretion to assign particular applications to the Office of Administrative Law Judges as appropriate.

EFFECTIVE DATE: This action is effective March 23, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523-5725.

SUPPLEMENTARY INFORMATION: Rule 92 of the Commission's Rules of Practice and Procedure, 46 CFR 502.92, contains regulations outlining the procedures for the filing and processing of special docket applications. Such applications may be filed by a common carrier or shipper for permission to refund or waive collection of a portion of freight charges, where it appears that there is an error in the carrier's tariff of a clerical or administrative nature or an error due to inadvertence in failing to file a new tariff. Under past Commission practice, all such applications were referred by the Secretary of the Commission to the Commission's Office of Administrative Law Judges ("OALJ") for review and for issuance of an initial decision.

The number of special docket applications filed with the Commission has increased dramatically over the last year. This increase occurred at a time when the number of formal docket proceedings assigned to OALJ also increased significantly. These increases created a significant workload burden for OALJ. To reduce this workload burden and to better utilize staff resources, the Commission, by notice of January 27, 1992, 57 FR 3026, published an Interim Rule amending its special docket procedures and solicited comments. Under the Rule, principal responsibility for review of special dockets is transferred to the Office of the Secretary of the Commission. The Secretary has the authority to assign special docket applications to special Dockets Officers, who will review each application and issue an initial decision. The process for filing of exceptions and/or review of initial decisions by the Commission will continue. The Secretary also has discretion to continue to refer particular applications to OALJ for disposition when deemed appropriate. Such discretion might be exercised, for example, when the application involves unique or complex legal issues.

Special Docket Officers to whom applications are assigned will be experienced Commission personnel, including at the outset the Commission's Assistant Secretary and the Director of the Office of Informal Inquiries, Complaints and Informal Dockets. Other personnel also will be utilized for this function. Transfer of the special docket function in this fashion places this activity in a posture similar to the processing of service contract correction applications under 46 CFR 581.7, the responsibility for which has been delegated to the Director, Bureau of Tariffs, Certification and Licensing. This reassignment will not result in any change in the quality and carefulness of review of special docket applications.

A related change regarding the number of copies of special docket applications required to be filed was included in the Interim Rule. The number is reduced from an original and three to an original and one.

Brief comments on the Interim Rule were filed by Sea-Land Service, Inc., Contship Containerlines, Inc., Wilhelmsen Lines AS, V.A.G. Transport GmbH & Co. OHGT, the Transpacific Westbound Rate Agreement and, filing collectively, the Asia North America Eastbound Rate Agreement, the Israel Trade Conference, the South Europe/U.S.A. Freight Conference, the United States Atlantic Gulf Ports/Eastern Mediterranean and North African Freight Conference and the U.S. Atlantic & Gulf/Australia-New Zealand Conference. The comments all supported the Interim Rule and suggested no changes. The Commission therefore will adopt the changed special docket procedure as a final rule.

Although the Commission, as an independent regulatory agency, is not subject to Executive Order 12291, dated February 17, 1981, it has nonetheless reviewed the rule in terms of that Order and has determined that this rule is not a "major rule" as defined in Executive Order 12291 because it will not result in:

(1) Annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Federal Maritime Commission certifies, pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), that this rule will not have a significant economic impact on a substantial number of small entities, including small businesses, small organizational units and small government jurisdictions.

List of Subjects in 46 CFR Part 502

Administrative practice and procedure.

Therefore, pursuant to 5 U.S.C. 553 and sections 8 and 17 of the Shipping Act of 1984, 46 U.S.C. app. 1707 and 1716, part 502 of title 46, Code of Federal Regulations, is amended as follows:

1. The interim rule amending 46 CFR part 502 which was published at 57 FR 3026 on January 27, 1992, is adopted as a final rule without change.

By the Commission.

Joseph C. Polking,

Secretary.

[FR Doc. 92-6601 Filed 3-20-92; 8:45 am]

BILLING CODE 6730-01-M

Proposed Rules

Federal Register

Vol. 57, No. 56

Monday, March 23, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR CH. I

Public Meeting for Special Review of NRC Regulations

AGENCY: Nuclear Regulatory Commission.

ACTION: Notification of agenda and procedure for conduct of Public Meeting.

SUMMARY: On March 5, 1992, the NRC published in the **Federal Register** an announcement (57 FR 7893) providing initial information about a public meeting to be held on March 27, 1992 relating to the Special Review of NRC regulations currently being conducted by the Committee to Review Generic Requirements (CRGR). The announcement indicated that details regarding the agenda for the meeting would be published in a subsequent notice prior to the meeting. The agenda for the meeting is provided below immediately following this notice. A summary of the comments received and preliminary evaluation is also provided.

As indicated in the agenda, the morning session of the meeting will be devoted principally to discussion of suggested or possible changes to the NRC regulatory requirements that affect operating power reactors. The afternoon session will cover suggested or possible changes in the remaining areas of NRC regulations, e.g., regulatory requirements for waste and materials licensees.

Interested individuals may address remarks or comments to the CRGR at the meeting, relevant to the identification and evaluation of candidates for reduction or elimination in the Special Review context. To facilitate the scheduling of available time for speakers and orderly conduct of the meeting, members of the public who wish to speak at the meeting should notify a cognizant NRC staff member in advance of the meeting, as indicated in the information below. Several candidates for recommended action have been identified by CRGR, based on preliminary evaluation of comments received in response to the notice announcing the Special Review (57 FR 6299). Those items, which are likely or possible candidates, discussed as Category I or II items in the agenda below, will be given highest priority in allocating discussion time at the meeting.

The review by the NRC staff and CRGR of comments received from the public and other sources is continuing. Other candidates for recommended action in the Special Review (i.e., in addition to those now listed in the agenda below) may be identified prior to the public meeting. Such additional candidates (if any) will be included in a revised agenda that will be made available at the time of the meeting.

A copy of public and agency comments received is available for review in the NRC's Public Document Room.

DATE: Public meeting is scheduled for March 27, 1992.

ADDRESS: Public meeting will be held at the Hyatt Regency Bethesda, 1 Bethesda Metro Center, Bethesda, Maryland 20814. Phone (301) 657-1234.

FOR FURTHER INFORMATION CONTACT: To request the opportunity to speak at the public meeting, contact one of the cognizant NRC staff members listed below. Indicate as specifically as possible the topic(s) of your comment. Provide your name and a telephone number at which you can be reached, if necessary, before the meeting. Registration will be available at the meeting for a limited number of additional speakers on a first come basis.

Contact: James Conran, Phone (301) 492-9855, FAX (301) 492-7142 or Dennis Allison, Phone (301) 492-4148, FAX (301) 492-7142.

Dated at Bethesda, Maryland this 18th day of March, 1992.

For the Nuclear Regulatory Commission.

Edward L. Jordan,

Director, Office for Analysis and Evaluation of Operational Data.

Agenda for Public Meeting on Special Review of NRC Regulations—Morning Session: (Regulatory Requirements Affecting Principally Power Reactors)

8:30 a.m.—Introductory Remarks by CRGR Chairman.

8:45 a.m.—Discussion of Potential Candidates for Recommended Action in Special Review Report.

Note: In allocating discussion time at the meeting, highest priority will be given to items which have been identified as likely or possible candidates for recommended action, based on a preliminary evaluation of public comments. These are the items identified as Category I and Category II in the Preliminary Status of Issues discussed below. Other items which are byproducts that warrant consideration for longer term programs may be discussed, time permitting. These are the items identified as Category III in the Preliminary Status of Issues discussed below.

1 p.m.—Break for Lunch.

Afternoon Session: (Other Areas of NRC Regulation, e.g., Regulatory Requirements for Waste and Materials Licensees).

2:30 p.m.—Introductory Remarks by CRGR Chairman.

2:45 p.m.—Discussion of Potential Candidates for Recommended Action in Special Review Report.

Note: In allocating discussion time at the meeting, highest priority will be given to items which have been identified as likely or possible candidates for recommended action, based on a preliminary evaluation of public comments. These are the items identified as Category I and Category II in the Preliminary Status of Issues discussed below. Other items which are byproducts that warrant consideration for longer term programs may be discussed, time permitting. These are the items identified as Category III in the Preliminary Status of Issues discussed below.

5 p.m.—Adjourn meeting.

Preliminary Status of Issues

The criteria listed below have been used in assigning categories during the preliminary evaluation of public comments.

Category I: Likely Candidate for Special Review Recommendation. Appears likely to meet Commission's basic criteria for Special Review candidate (i.e., reduce regulatory burden, and not reduce protection of public health and safety), based on dispositive information provided in the comment or otherwise readily available for consideration in the Special Review. [Likely CRGR recommendation to initiate rulemaking, or other appropriate action, for reduction of specific requirement or requirements.]

Category II: Possible Candidate for Special Review Recommendation. Might meet Commission's basic criteria for

Special Review candidate (i.e., reduce regulatory burden and not reduce protection of public health and safety); but dispositive information is not provided in comment and is not readily available. [Possible CRGR recommendation for dispositioning as a separate priority action following the Special Review.]

Category III: Not a Candidate for Special Review Recommendation. Does not appear to meet the Commission's basic criteria for Special Review Candidates. [Nevertheless, as a byproduct of this process, the CRGR may obtain or develop information that it wishes to convey to a program office in the context of ongoing NRC programs; for example, candidates for consideration in programs such as the program to identify and eliminate power reactor requirements marginal to safety.]

Other (No Category): Includes matters outside the scope of the special review. [The CRGR would recommend no further consideration.]

The issues and comments discussed below have, on a preliminary basis, been evaluated and assigned to Categories.

X11. Criminal Penalties for Medical Licensees
X12. Agreement States, 10 CFR 150.20
X13. NRC Form 5
X14. Cost to Airline Industry of Proposed Rule

Issue 1: Containment testing and allowable containment leakage rates.

Proposed Action

NUMARC: Continue expeditiously toward resolution of the issues related to allowable containment leakage rates during testing, that were identified in the February 24, **Federal Register** notice.

Detroit Edison: Expedite the review of 10 CFR part 50, appendix J recommended in NUREG–4330 and revise treatment of isolation valve testing.

Note: The allowable containment leakage rates are contained in plant technical specifications. Periodic containment testing is required by 10 CFR part 50, appendix J.

Summary of Comments

NUMARC NRC and industry efforts are already underway to resolve this issue and these efforts should proceed towards resolution in an expeditious fashion.

Detroit Edison: Resolution of these issues should proceed expeditiously.

Detroit Edison: The appendix J requirement to determine as-found leakage for isolation valves when maintenance is already planned for the valve should be revised to permit only determination of as-left leakage after the maintenance has been performed. The as-found data provides minimal information of safety significance. An as-left leakage determination following maintenance is sufficient to assure public health and safety.

Preliminary Category

Category III. These matters appear to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this review and will be considered in that program.

Issue 2: Change FSAR Update Frequency.

Proposed Action

NUMARC: Revise 10 CFR 50.71, "Annual Safety Analysis Report Updates" to provide for FSAR updates once per refueling cycle, rather than annually.

Summary of Comments

NUMARC: NRC deferred action on a previous Yankee Atomic petition for the proposed action due to lack of priority. The majority of design changes reflected in the updated FSAR are effected during the refueling outage. Use of the refueling cycle interval would provide for a more coordinated and cohesive update and generally a better document, while saving significant industry resources. The present annual update requirement results in much additional complication and waste of licensee resources. The change would in no conceivable way reduce the health and safety of the public.

Yankee Atomic: The proposed action would eliminate a number of unnecessary formal submittals by the industry and should receive a higher priority within the NRC.

Preliminary Category

Category I. Appears to meet the criteria for this special review. Recommend initiating rulemaking to require that FSAR updates be submitted within 6 months after the end of a refueling outage and reflect all changes made as of the end of the outage, provided that the time between outages is less than or equal to 24 months.

Issue 3: Eliminate Annual Design Change Report.

Proposed Action

NUMARC: Replace the requirement in 10 CFR 50.59(b) for an annual report of design changes with resident inspector review of design change packages, as appropriate.

Summary of Comment

NUMARC: The report of the design changes made under 10 CFR 50.59 requires hundreds of manhours per year, and does not appear to be reviewed by NRC. The reports do not make any contribution to safety. This reporting requirement should receive one of the highest priorities in any NRC review of reporting requirements.

NRC Staff: Two comments supported revision of § 50.59 to clarify the requirements.

Preliminary Category

Category II. The staff reviews and uses the design change reports. No changes in the recordkeeping and reporting information required by 10 CFR 50.59 appear to be warranted. However, it appears appropriate to submit the required design change report along with the periodic FSAR update on a proposed refueling cycle frequency (see Issue 2) rather than submitting it annually.

Issue 4: Eliminate Duplicative Reports.

Proposed Action

NUMARC: Review the NRC system of reporting requirements in the aggregate and consider elimination of duplicative reports, that do not contribute to safety, and reports that are not reviewed by NRC.

Summary of Comment

NUMARC: Numerous requirements for reporting exist, resulting from a myriad of regulations and license document requirements. Many of the reports are duplicative and do not make any contribution to safety. Some date before the time that resident inspectors were placed at the plant sites. There are so many different reports, frequencies, addressees, etc., that it is a significant burden just to keep track of the reporting requirements. In addition, the immense volume of reporting requirements creates a large administrative burden, e.g., the report of design changes made under 10 CFR 50.59 requires hundreds of manhours per year, and does not appear to be reviewed by NRC.

Westinghouse: The reporting requirements for errors in Emergency Core Cooling System calculations are redundant, with similar requirements in part 21 and in § 50.46. Processing the error detection, assessment and reporting must be done under the quality assurance requirements of appendix B, which makes the 30 day requirement impractical.

Preliminary Category

Category III for most comments. Not specific and/or do not appear to meet the criteria for this special review. Some comments on reporting requirements have previously been considered and additional comments will be considered in the NRC's program to eliminate power reactor requirements that are marginal to safety (as discussed in the February 4, 1992 **Federal Register** notice). In addition, the Office of NRR has recently undertaken a systematic review of power reactor reporting requirements. Further, the Office of NMSS is preparing a plan for a regulatory impact survey for Commission consideration.

Other (No Category) for the specific comment on 10 CFR 50.46. This requirement was recently considered by the Commission. No information was provided that would warrant reconsideration. It does not appear that the requirements of 10 CFR 50.46 and 10 CFR part 21 are duplicative. It does appear that the reporting requirements of 10 CFR 50.46 are needed.

Issue 5: Revise Security Event Reports.

Proposed Action

NUMARC: Revise the requirement in 10 CFR 73.71(c) to eliminate reporting requirements for events that have no security significance and require reports only for actual threats to plant security.

Summary of Comment

NUMARC: 10 CFR 73.71(c) requires reports of many events that have no security significance. This reporting requirement should receive one of the highest priorities in any NRC review of reporting requirements.

Preliminary Category

Category III: The rule does not require reports of little or no security significance. There may be plant specific interpretation/implementation problems. The comment will be considered as a matter of course under existing routine programs.

Issue 6: Main Steam Isolation Valve Leakage Control System.

Proposed Action

NUMARC: Continue expeditiously toward resolution of the Boiling Water Reactor Main Steam Isolation Valve Leakage Control System issue identified in the February 24, **Federal Register** notice.

Summary of Comment

NUMARC: NRC and industry efforts are already underway to resolve this issue and these efforts should proceed towards resolution in an expeditious fashion.

Preliminary Category

Category III: Appears to meet the criteria for requirements that are marginal to safety rather than the criteria for this special review and it will be addressed in that program.

Issue 7: Performance Based Quality Assurance (10 CFR 50, appendix B)

Proposed Action

NUMARC: Modify the requirements in 10 CFR 50, appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants," to be consistent with performance based regulations.

Summary of Comment

NUMARC: Appendix B to part 50 needs to be updated for consistency with performance based regulations and with new quality concepts such as total quality management. The regulation needs to be adopted to support total quality management by the industry and a wholesale shift to performance based inspection concepts by NRC inspectors. Appendix B is a logical candidate for consideration as a requirement of marginal safety significance.

NRC Staff: One staff comment supported revision of Appendix B to eliminate burdensome requirements without reducing protection of public health and safety.

Preliminary Category

Category III. Does not appear to meet the criteria for this special review. An overall reexamination of 10 CFR appendix B and/or its implementation may be warranted to evaluate the potential for improvements along the lines suggested.

Issue 8: Modify Sholly Amendment Requirements

Proposed Action

NUMARC: Reduce or eliminate the administrative burden associated with the public notice of § 50.91 and § 50.92 reviews of license amendments for no significant hazards.

Summary of Comment

NUMARC: The time for publishing and processing a Federal Register notice, except for the exigent or emergency situations, take at least six weeks with no affect on safety. Applicants are required to perform unnecessary assessments. A primary suggestion is that only irreversible decisions, such as venting the containment at Three Mile Island, need the kind of advance notice and opportunity for hearing that is currently required. For other decisions, a notice and opportunity for hearing could be provided after the license amendment is issued.

Preliminary Category

Category II. It is not yet clear to the CRGR whether or not the relaxations requested are legally permissible. The issue has been referred to the NRC's Office of the General Counsel for legal analysis.

Issue 9: Prioritize Revision of 10 CFR Part 50 Requirements

Proposed Action

NUMARC: Utilize the input and discussions at the planned March 27, 1992, public meeting to determine the priority (sequence and schedule) for considering decreased prescriptiveness in the following regulations, as discussed in the February 24, 1992 **Federal Register** notice:

a. 10 CFR 50.44, "Standards for Combustible Gas Control Systems in Light Water Cooled Power Reactors"

b. Appendix J to 10 CFR part 50, "Primary Reactor Containment Leakage Testing for Water Cooled Power Reactors" (See Issue 1)

c. Appendix R to 10 CFR part 50, "Fire Protection Program for Nuclear Power Facilities Operating Prior to January 1, 1979"

Summary of Comment

The comment consisted of the proposed action described above.

Preliminary Category

Category III. Appears to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this special review.

Issue 11: Modify Fitness for Duty Rule

Proposed Action

NUMARC: Reduce and clarify requirements of 10 CFR Part 26, "Fitness for Duty Programs."

Summary of Comment

NUMARC: Fifty-one recommendations have been provided to the NRC to make utility programs more cost effective and efficient without diminishing the fitness for duty program.

Preliminary Category

Category III. NUMARC's 51 recommendations are in for consideration. The Office of NRR is developing an amendment to the rule in response to the Commission's direction. This effort will take into account the NUMARC comments.

Issue 12: § 50.34(f), Additional TMI-Related Requirements

Proposed Action

NUMARC: Include modification of the requirements in 10 CFR 50.34(f) "Additional TMI-related requirements" as a candidate for consideration as a requirement of marginal safety significance.

Summary of Comment

NUMARC: Most of the actions required by § 50.34(f) have been implemented by all current licensees and the Commission's Severe Accident Policy Statement published in August 1985 (50 FR 32138) renders a number of the actions unnecessary. Additionally, the February 4 **Federal Register** notice recognizes that modifications of the regulatory requirements in the areas of post accident sampling systems and combustion gas control systems would have little impact on safety.

Preliminary Category

Category III: Appears to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this special review.

Issue 13: § 50.49, Environmental Qualification of Electric Equipment

Proposed Action

NUMARC: Include modification of the requirements in 10 CFR 50.49, "Environmental Qualification of Electric Equipment Important to Safety," as a candidate for consideration as a requirement of marginal safety significance.

Summary of Comment

NUMARC: The requirements of this regulation are based on deterministic design basis accidents while probabilistic risk analyses have shown that most of the components to which these requirements are applied have little or no importance to plant safety.

NRC Staff: One comment proposed revision to clarify and reduce § 50.49 requirements.

Preliminary Category

Category III. Appears to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this special review.

Issue 14: 10 CFR 20, Dose Limits for Hot Particles

Proposed Action

NUMARC: Include modification of 10 CFR part 20 dose limits with regard to hot particles as a candidate for consideration as a requirement of marginal safety significance.

Summary of Comment

NUMARC: The absence of a dose limit for hot particle exposures requires recording and reporting these "technical" overexposures, even though the associated health risk is less than that for a total effective dose equivalent dose limit. In additional, lack of a technically sound dose limit for hot particle exposure will frustrate implementation of practices that ensure that total effective dose equivalents are ALARA. The requirement is a logical candidate for consideration as a requirement of marginal safety significance.

Preliminary Category

Category III. Appears to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this special review.

Issue 16: 10 CFR 21, Defects and Noncompliance Reports: (Commercial Grade Items)

Proposed Action

NUMARC: Include modification of the requirements in 10 CFR part 21, "Reporting of Defects and Noncompliance," particularly with respect to providing a more flexible definition of commercial grade item, as a candidate for consideration as a requirement of marginal safety significance.

Summary of Comment

NUMARC: The current definition of "commercial grade item" restricts the ability of a utility to assume the part 21 liability responsibility for safety related applications of, primarily, replacement piece parts. The requirement is a logical candidate for consideration as a requirement of marginal safety significance.

Preliminary Category

Category III. Appears to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this special review.

Issue 17: Event Reporting Systems

Proposed Action

NUMARC: Delay implementation and revise the requirements in NUREG–1022, Revision 1, "Event Reporting Systems" (New guidance for implementation of 10 CFR 50.72 and 50.73.)

Summary of Comment:

NUMARC: Recent publication of draft NUREG–1022, Revision 1 for comment is intended by the staff to clarify reporting requirements; however, the staff has reinterpreted and changed regulatory requirements in many areas, effectively lowering the reporting threshold, which will result in reporting of items of little or no safety significance. The evaluation of safety importance and regulatory burden done for the draft NUREG–1022 was incorrect in its conclusion of no change in regulatory impact and inadequate to address the safety impact. The result of implementing the revised NUREG–1022 in its present form will be a significant increase in regulatory burden; an increase in LERs of 2500 to 7500 per year for the industry. The change in requirements incorporated in the revised NUREG would in no way affect the health and safety of the public.

Detroit Edison: Reduce the prescriptiveness of NUREG–1022, on Licensee Event Reports, and other similarly prescriptive regulatory guidance. The recently distributed draft of the latest version of NUREG–1022 would place an added significant burden on licensees, through expansion of reporting requirements, without any accompanying safety benefit.

NRC Staff: One comment supported combination of § 50.72 and § 50.73, and revision to limit reportable items.

Preliminary category

Other (No Category) for NUREG–1022. This is outside the scope of the special review because it involves future issuance of a NUREG document. Public comments are already being considered in connection with the proposed document.

Category I with regard to limiting reportable items in 10 CFR 50.72 and 50.73. The staff is preparing a proposed rule change to delete certain unneeded reports from the reporting requirements of 10 CFR 50.72 and 50.73.

Issue 18: Averted On-Site Costs in Cost-Benefit Analyses

Proposed Action

Yankee Atomic: Establish cost benefit analysis practices that are consistent with actual cost experience at nuclear power plants and utilize sound principles of economic analysis.

Summary of Comment

Yankee Atomic: The NRC revision of cost benefit methodology currently underway should encompass the use of a commonly accepted data base for cost estimates, which should include all cost factors (e.g., O&M costs like maintenance, testing and training).

NUMARC: Although the treatment of AOSCs is a matter of policy, not regulation, it has a considerable impact on licensees' backfit benefit-cost analyses. Treating the AOSCs as negative costs, as the NRC currently does, leads to very skewed and misleading benefit/cost ratios that the NRC can use to support the imposition of unjustified backfits. This position was evaluated by EPRI in NSAC–143, "Questionable Techniques Used in Cost-Benefit Analyses of Nuclear Safety Enhancements." This should be a candidate for consideration in the program on requirements that are marginal to safety.

Richard S. Barkley: Continue and expand the program of reviewing and evaluating current and future NRC regulations for possible improvement by CRGR of their current cost-benefit analyses for generic requirements by using more realistic cost estimates and eliminating the practice of using avoided costs in cost-benefit calculations. Consider the recurring operations and maintenance (O&M) expenses and the reduction in complexity of the plant design (e.g., PASS) and operation associated with those marginal technical safety requirements already identified. The deletion of these requirements would reduce complexity and result in substantial savings, as well as benefit reactor safety.

Preliminary Category

Category III: Does not appear to meet the criteria for this special review. The staff is currently working on revised guidelines for cost benefit analyses. The Commission has directed continued/further consideration of the averted onsite costs question. An opportunity for comment on the regulatory analysis guidelines will be provided at an appropriate stage.

Issue 19: Individual Plant Examination of External Events

Proposed Action

NUMARC: Include the requirement to perform Individual Plant Examination of External Events (IPEEEs), as defined in NRC Generic Letter 88–20, Supplement 4, "IPEEE of Severe Accident Vulnerabilities" as a candidate requirement of marginal safety significance.

Summary of Comment

NUMARC: Except for plant walkdowns, the seismic assessment is not likely to identify genuine opportunities for cost-beneficial enhancements to the seismic robustness of existing plants. The staff has subsumed into the IPEEE requirements related to generic safety issues that have not been previously justified by NRC staff on their own merits. There is little to be gained from the IPEEE because potentially important external events were either treated conservatively in design bases or were being examined extensively as generic issues.

Yankee Atomic: The entire IPE/IPEEE effort (Generic Letter 88–20) is an excellent example of a poorly justified, poorly planned, and poorly coordinated regulatory initiative that has and continues to have made excessive demands on licensees' resources.

Preliminary Category

Other (No Category). These issues were recently decided by the Commission following public comment. No new information was provided (nor is any apparent) to warrant reconsideration. The NRC position is that the IPEEE (present scope) is likely to find significant safety enhancements (cost beneficial).

Issue 20: Operator Requalification Examinations

Proposed Action

NUMARC: Revise NUREG–1021 to allow licensees greater flexibility and responsibility for implementation of operator requalification examinations.

Summary of Comment

NUMARC: The NRC's role in the administration of the operator requalification examinations should be changed to the oversight of an examination conducted by the licensee. This is supported by the experience with the current revision of NUREG–1021, which clearly points to safety improvements arising from reduction of licensed operator stress and reduced burden arising from increased efficiency of exam administration. Modification of the administration of the operator requalification examinations should be included as a candidate for consideration as a requirement of marginal safety significance.

Detroit Edison: NUREG–1021, on Operator Requalification Exam Standards is used in an excessively prescriptive manner to define the content of training programs thus imposing a significant burden not inherent in the regulations.

Preliminary Category

Category III. Appears to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this review.

Issue 21: 10 CFR 73.55, Physical Protection in Power Reactors

Proposed Action

NUMARC: Include modification of the requirements in 10 CFR 73.55.

"Requirements for physical protection of licensed activities in nuclear power reactors against radiological sabotage" as a candidate for consideration as a requirement of marginal safety significance.

Summary of Comment

NUMARC: The NRC is evaluating this regulation in response to a Staff Requirement Memorandum, dated last fall. The requirement is a logical candidate for consideration as a requirement of marginal safety significance. The industry experience of the last decade and the recent imposition of more stringent personnel screening programs (fitness for duty; access authorization) suggest that the insider threat has been minimized. Three specific areas should be considered as marginal to safety: separate vital area security; watch-person control of containment access; and compensatory security measures for certain events.

Detroit Edison: The regulatory burden of many security related requirements, including fitness for duty requirements, can be reduced without a significant reduction of safety.

Preliminary Category

Category III. Appears to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this review. The Office of NRR is already evaluating the regulation in response to Commission direction.

Issue 22: 10 CFR 72, subpart H. Physical Protection of ISFSI

Proposed Action

NUMARC: Include modification of the requirements in 10 CFR part 72, subpart H, "Physical Protection-Licensing Requirements for the Independent Storage of Spent Nuclear Fuel and High-Level Radioactive Waste," as a candidate for consideration as a requirement of marginal safety significance.

Summary of Comment

NUMARC: Utilities installing ISFSIs are required to employ virtually all of the security measures found at operating nuclear power plants. More realistic requirements consistent with providing basic industrial security should be used. The requirement is a logical candidate for consideration as a requirement of marginal safety significance.

Preliminary Category

Category III: Appears to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this review.

Issue 25: Improved Technical Specification Program

Proposed Action

Detroit Edison: Review the application of the Commission's Interim Policy Statement on Technical Specifications to the Improved Technical Specifications program to assure that the safety benefit of retained requirements merits the burden of their retention as Technical Specifications, and to accelerate the approval of additional Technical Specifications for relocation.

Summary of Comment

Detroit Edison: The Improved Technical Specifications program reduces regulatory burden for requirements relocated from Technical Specifications to plant programs. Some requirements have been retained as Technical Specifications through marginal application of the Commission's Interim Policy Statement on Technical Specifications. In other cases, the relocation of Technical Specifications has been delayed. The comment does not address a specific regulatory requirement, but rather the implementation of a program to review and revise certain requirements. The comment does not specify the burden of the effect on safety of the proposed action.

Preliminary Category

Other (No Category). The staff considers line item changes as quickly as feasible when they meet the Commission's criteria for allowable changes—e.g., provide a safety benefit. Expansion of line item changes beyond these criteria would be inconsistent with the Commission's policy statement on the Technical Specification improvement program. The CRGR plans to review the more general product of the Technical Specification improvement program (improved standard technical specifications) when the staff completes its development work.

Issue 26: Qualification and Training of Nuclear Power Plant Personnel

Proposed Action

NUMARC: Include revision of Regulatory Guide 1.8, "Qualification and Training of Personnel for Nuclear Power Plants," as a candidate for consideration as a requirement of marginal safety significance.

Summary of Comment

NUMARC: The NRC proposed training rule negates the necessity for a revised Regulatory Guide 1.8. The requirement is a logical candidate for consideration as a requirement of marginal safety significance.

Preliminary Category

Other (No Category). This is outside the scope of the special review because it involves a future revision to a regulatory guide. An opportunity for public comment will be provided, as a matter of course, for any regulatory guide revisions.

Issue 27: NPP Simulation Facilities for Use in Operator License Examinations

Proposed Action

NUMARC: Include revision of Regulatory Guide 1.149, "Nuclear Power Plant Simulation Facilities for Use in Operator License Examination," as a candidate for consideration as a requirement of marginal safety significance.

Summary of Comment

NUMARC: The industry compliance with the NRC simulator certification requirements and adherence to ANSI/ANS 3.5 obviates the need to issue Regulatory Guide 1.149. The NRC is currently evaluating this requirement. The requirement is a logical candidate for consideration as a requirement of marginal safety significance.

Preliminary Category

Other (no category). This is outside the scope of the special review because it involves a future revision to a regulatory guide. An opportunity for comment on any regulatory guide revisions will be provided as a matter of course.

Issue 28: Operability Determinations (GL 91-18)

Proposed Action

NUMARC: Include the new requirement incorporated in Generic Letter 91-18, "Operability Determinations," as candidate for requirements of marginal safety significance.

Summary of Comment

NUMARC: Generic Letter 91-18 provides Inspection Guidance on Operability that includes new or different regulatory guidance concerning the determination of operability. The guidance will result in the imposition of new regulatory requirements, and, in many ways, runs counter to previous guidance and good utility practice. NRC Inspection Manual, part 9900, section 6.12, "Support System Operability," states: "When a support system is determined to be inoperable, all systems for which that support system is required for systems operability should be declared inoperable and the LCOs for those systems entered. Any appropriate remedial actions specified by a supported system LCO action statement * * * should be taken." This requirement has the potential to require the shutdown of facilities unnecessarily, due to having a cascade down to the shortest allowed action time, even if the function to support safe plant operation is available.

Yankee Atomic: The extensive new requirements in NUREG-1022 are flawed; however, Generic Letter 91-18 transmitted two new Inspection Modules that drew upon NUREG-1022 for inspection standards prior to any opportunity for industry review and comment.

Preliminary Category

Category III. Appears to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this review. Note that the inspection guidance does not authorize backfitting. This is stated in the inspection guidance itself.

Issue A: ZIRLO Cladding Exemptions

Proposed Action

Revise 10 CFR 50.44, 50.46, and 10 CFR 50 appendix K so that is not necessary to obtain exemptions when using ZIRLO fuel cladding (rather than Zircalloy fuel cladding).

Summary of Comment

Westinghouse: The wording of these rules explicitly calls out Zircalloy cladding. The NRC staff has determined, based on tests and analyses provided by Westinghouse, that (in other respects) these regulations are completely applicable to ZIRLO cladding. The requirement to obtain exemptions does not in any way contribute to safety.

Preliminary Category

Category I. The CRGR recently reviewed a generic letter indicating that, aside from the name of the alloy, the regulations are applicable to ZIRLO cladding. Rulemaking will be necessary to eliminate the need for exemptions for ZIRLO cladding.

Issue B: Pressure-Temperature Limit

Proposed Action

Drop the Pressure-Temperature Limit based on Regulatory Guide 1.99, Revision 2, and define a limit that would better represent the Reactor Coolant System Pressure-Temperature Limit.

Summary of Comment

Westinghouse: Current practice is generally felt to be overly conservative, reducing the plant operating window during heatup and cooldown and increasing the chance of inadvertently actuating a pressure relief device.

Preliminary Category

Other (No Category). Does not appear to meet the criteria for this special review or the criteria for the program on requirements that are marginal to safety Insufficient basis provided to warrant consideration.

Issue C: Boron Dilution Event

Proposed Action

The limit which prohibits return to criticality following a boron dilution event should be revised to allow criticality under specified conditions.

Summary of Comment

Westinghouse: The criteria in the Standard Review Plan (NUREG-0800, Section 15.4.6) in essence prohibit a return to criticality for a boron dilution event. The limit should be revised to allow return to criticality provided the transient is self limiting (see discussion in NRC Generic Letter 85-05). This matter should be considered in the program for requirements that are marginal to safety.

Preliminary Category

Other (No Category). Does not appear to meet the criteria for this special review or the criteria for the program on requirements that are marginal to safety. Insufficient basis provided to warrant consideration.

Issue D: Leak-Before-Break

Proposed Action

Extend the Leak-Before-Break justification to design of emergency core cooling systems and environmental qualification of equipment.

Summary of Comment

In accordance with the revision to 10 CFR 50 appendix A, GDC 4, the Leak-Before-Break justification was accepted for eliminating the postulation of a design basis break for the purpose of high energy piping design (e.g., whip restraints). This justification could be broadened to include design of emergency core cooling systems and environmental qualification of equipment.

Preliminary Category

Other (No Category). This proposal was considered during initial consideration of the Leak-Before-Break justification for the purpose of high energy piping design and it was not adopted at that time. No new information was provided to warrant reconsideration.

Issue E: Post Accident Sampling System

Proposed Action

Reduce post-accident sampling system requirements.

Summary of Comment

Yankee: In the program on requirements that are marginal to safety, (some) requirements for post accident sampling systems were found to be marginal to safety. However, no action was intended because the major costs (of design and installation) had already been born. The requirements should yet be reduced to save the operating and maintenance costs.

Preliminary Category

Category III. Appears to meet the criteria for the program on requirements that are marginal to safety rather than the criteria for this special review.

Issue F: Seismic and LOCA loads, GDC 2

Proposed Action

Allow the analysis for effects of seismic and LOCA stresses to be performed separately on aged components because of the considerable unlikeliness of such a simultaneous event.

Summary of Comment

Westinghouse: The comment recommends the proposed action as discussed above.

Preliminary Category

Other (No Category). Does not appear to meet the criteria for this special review or the criteria for the program on marginal to safety. This proposal was considered when the general design criteria were adopted and on other occasions since that time, for example in the review of the Diablo Canyon operating license application. No new information is provided to warrant reconsideration.

Issue G: Cycle Counting Requirement

Proposed Action

Replace the technical specification cycle counting requirement, typically located in table 5.7.1, with a transient fatigue management program.

Summary of Comment

Westinghouse: The comment recommends the proposed action as described above.

Preliminary Category

Other (No Category). Does not appear to meet the criteria for this special review or the criteria for the program on requirements that are marginal to safety. Insufficient basis provided to warrant consideration.

Issue I: Final Amendment to 10 CFR 50, appendix J

Proposed Action

Incorporate industry's latest comments into the final amendment to 10 CFR, appendix J that is being processed.

Summary of Comment

NUMARC: The comment recommends the proposed action as stated above.

Preliminary Category

Other (No Category). Rulemaking is in progress and there is not an opportunity for additional public comment at this time.

Issue J: Response Time Testing

Proposed Action

Reduce or eliminate response time testing requirements, at least for sensors.

Summary of Comment

The comment recommends the proposed action as stated above.

Preliminary Category

Other (no category). This appears to be outside the scope of this special review. The requirements are contained in plant technical specifications rather than in a regulation. The staff is planning to review a topical report, which is expected from the BWR Owner's Group this spring, on this subject.

Issue K: Comments Not Categorized

Proposed Action

Should the NRC conduct this Special Review (and other reviews to eliminate requirements marginal to safety) and, if so, how should the reviews be conducted? Should the NRC move towards non-prescriptive regulations? Should the NRC use PRA studies to discriminate new requirements.

Summary of Comment

Ohio Citizens for Responsible Energy, Inc.: NRC should stop any attempts to deregulate the nuclear industry. The (CRGR) Special Review should be stopped.

The NRC should restrict itself to its statutory responsibilities to protect the public and is not empowered to participate in a program for promoting economic growth. Citations in support of this are: the D.C. Circuit Court of Appeals decision on "Union of Concerned Scientists vs. NRC;" Section 2(c) of the Energy Reorganization Act of 1974; and the legislative history language by the Senate Committee on Government Operations in Report No. 92–980, 93rd Congress, 2nd Session.

Public Citizen/Critical Mass Energy Project: There is a need for caution in the special review and for adequate periods of public review and comment on any regulatory action arising out of the special review.

State of New Jersey: The Bureau of Nuclear Engineering is concerned that the CRGR review will unnecessarily accelerate the schedule for completion of the NRC staff's analysis of the candidates identified by the marginal safety requirements program. If the CRGR review takes precedence over the work of the NRC staff, the comment period is effectively shortened and public input is eliminated.

Detroit Edison: Review all burdensome regulatory requirements using the NRC's safety goal, probabilistic risk assessments, and estimated vs. actual costs to reassess original decisions. Requirements imposed since 1981 represent a substantial portion of the total regulatory burden and were approved believing that all economic and other burdens were correctly estimated.

Many of the candidates listed in NUREG–4330 apparently were not studied further due to low frequency of mention during interviews conducted during the study's scoping phase. The NRC should more fully examine the candidates for elimination or reduction listed in NUREG–4330.

Reviewing activities to implement regulatory requirements that take place during plant outages would lead to shorter outages, higher plant capacity factors, and fewer potential challenges to safety related equipment. A specific example of such an activity is Instrumentation Response Time Testing, which is addressed in a BWR Owners' Group Technical Report planned for submittal within the next month. Instrumentation Response Time Testing yields little safety benefit in comparison of its requirements.

The regulatory burden of the Maintenance Rule (10 CFR 50.65) will be much greater than originally intended by the Commission and out of proportion with any safety benefit. Experience gained since the enactment of the Maintenance Rule provides a clearer idea of the resources necessary to implement the rule. Once the implementation guidance is formulated, the actual safety benefits will also become clearer.

Yankee Atomic: NRC's rationale for deciding on regulatory changes based on marginal safety significance is deficient in that it does not take into account all costs born by the licensees. For example, no action is intended on post-accident sampling system requirements "* * * the costs of installing [the systems] have already been expended * * *: The obvious assumption is that maintenance, testing, training, procedure development and maintenance are all without cost for the many years the system will remain installed.

NUMARC: The NRC should move toward non-prescriptive and performance based requirements.

New York Power Authority: Greater use should be made of PRA, i.e., place the basis of regulation more on risk considerations.

Yankee Atomic: The NRC should improve in its use of PRA to discriminate new requirements.

NUMARC: The special review should consider regulations promulgated since 1981 as well as earlier regulations.

NUMARC: There is a need to look at the entire process. The NRC's recent regulatory impact survey is encouraging in this regard.

Preliminary Category

Other (no category). These comments appear to be outside the scope of this special review. Nevertheless, they are being considered, as appropriate, in specific contexts. For example, the Commission has already expressed a policy of moving towards non-prescriptive regulations in the CRGR charter and has provided appropriate guidance to the NRC staff on the use of PRA results. The Commission's instructions clearly indicate that normal rulemaking procedures will continue to be followed. If any rule changes are proposed, there will be ample opportunity for public notice and comment.

Issue X1: Authorization of reactor licensees to receive back their own waste sent off-site for processing

Summary of Comment:

NUMARC: NUMARC urges NRC to expedite rulemaking to allow receipt back of wastes in light of pending denial of access to low level waste (LLW) facilities.

Preliminary Category

Category II: While the action proposed would reduce a regulatory burden without reducing protection of the public health and safety, the comment does not provide information warranting an acceleration of the current rulemaking process. The staff proposes to continue the expedited process detailed in SECY–92–062, Attachment 2, which proposes the rulemaking required in the comment.

Issue X2: Coordination of rules promulgated by NRC and States

Summary of Comment

U.S. Council on Energy Awareness: Radiopharmaceutical licensees are being unduly affected by standards promulgated by individual states (Agreement and non-Agreement) which are diverging from the NRC's, e.g., in standards for atmospheric emissions, low-level waste disposal, decommissioning, and residual contamination limitations. The NRC should take a lead role in resolving these issues and clarifying responsibility for regulation NARM and NORM through the Committee on Interagency Radiation Research and Policy Coordination (CIRRPC) and the Conference of Radiation Control Protection Directors (CRCPD).

American College of Nuclear Physicians and Society of Nuclear Medicine (ACNM/SNM): "In its petition for review of the Quality Management Rule, the ACNP/SNM): requested NRC to consider why the rule was made a matter of compatibility for Agreement States which believe that their current regulatory programs are adequate."

Preliminary Category:

Category III for the USCEA comment. Any standards promulgated by the States in the areas mentioned are required under the principle of compatibility to reflect Federal standards (those of EPA and NRC). NRC actively works with the States, CIRRPC, CRCPD, and other Federal agencies to eliminate areas of conflict or overlap in regulations. NRC has no authority or responsibility for the regulation of NARM or NORM radionuclides because they are specifically excluded from the Atomic Energy Act. Congress has on several occasions declined to give NRC authority for them. No action is needed.

Category III for the ACNM/SNM comment. The comment offers no new information. The Commission is currently reviewing its policy on compatibility regarding Agreement State programs which are similar to NRC programs. Im promulgating the Quality Management Rule, NRC considered issues of compatibility and determined that the definitions regarding misadministrations should be assigned strict (or level 1 division) of compatibility. This was done so that NRC could compare on a one-for-one basis that performance of Agreement State vs. NRC medical licensees. The other parts of the Quality Management Rule was assigned a level 2 division of compatibility to allow some degree of flexibility to the states in adopting the rule.

Issue X3: Quality Management Rule

Adequacy of the Final Quality Management Rule to protect public health and safety and consideration of existing oversight.

Summary of Comment

American College of Nuclear Physicians and Society of Nuclear Medicine (ACNP/SNM): The Final Rule "does not enhance public health and safety" and "does not recognize the existing professional oversight of medical practitioners."

U.S. Council for Energy Awareness (USCEA): "In the recently issued NRC regulations which address the radiopharmaceutical practices, the regulations conflict directly with . . . the therapeutic treatment of cancer patients and the support requirements of nuclear medicine patients."

Preliminary Category:

Category III for the ACNP/SNM comment: The ACNP/SNM did not provide new information showing that removing the current regulation will not reduce the protection of public health and safety. The ACNP/SNM filed a petition for review of the final rule and the oral arguments are scheduled for May 12, 1992 in the U.S. Court of Appeals for the District of Columbia.

Category III for the USCEA comment. The USCEA did not provide adequate information to determine the regulatory burden and the public health and safety issues involved. The rule is under court review.

Issue X4: Potential conflict of NRC regulations with the practices of pharmacy

Summary of Comment

U.S. Council for Energy Awareness (USCEA): "In the recently issued NRC regulations which address the radiopharmaceutical practices, the regulations conflict directly with the practice of pharmacy . . . Significantly less prescriptive requirements could be much more effectively utilized in this area of regulation." This appears to refer to the Quality management Rule and the Interim Final Rule.

American College of Nuclear Physicians and Society of Nuclear Medicine (ACNP/SNM): The rule has an adverse effect on the practice of nuclear medicine and pharmacy and should be withdrawn.

Preliminary Category

Category III. The Interim Final Rule has an expiration date (August, 1993) and is currently in an open comment period. The staff also expects to address the issues underlying the Interim Final Rule in a proposed rulemaking this summer or fall in response to the 1989 ACNP/SNM petition for rulemaking.

Issue X5: Contamination monitoring of packages containing radioactive gases or special form sources

Summary of Comment

William J. Morris, CHP: This regulatory burden is unnecessary because gases will not cause contamination on the outside of the package and special form sources, by design, present very little, if any contamination hazard during transportation.

Preliminary Category

Category II. NMSS recommends that 20.1906(b) be amended to exempt packages containing radioactive gases and special form sources from the contamination monitoring requirement of 20.1906. This exemption would have little safety impact because leak testing of the sealed sources would still be required.

Issue X6: Performance documentation of additional surveys of portable gauges and radiography sources under 10 CFR 20.1906(b)

Summary of Comment

William J. Morris, CHP: The regulatory analysis and statements of consideration did not recognize or discuss the regulatory impact or operational history; NRC inspection findings and reports of abnormal occurrences have not shown any transportation problems of special form sources.

Preliminary Category

Category III. NMSS is preparing a policy and guidance directive that will instruct license reviewers to allow fixed and portable gauge users to monitor

their wipe samples with their portable survey meters to meet the requirements of 20.1906(b).

Issue X7: Emergency plans for certain fuel-cycle and materials licensees pursuant to 10 CFR 30.22(i), 40.31(j), and 70.22(i)

Summary of Comment

U.S. Council of Energy Awareness (USCEA): The requirement for a full-scale emergency plan is excessive and unnecessarily burdensome because fires are the only events that could possibly require offsite protective measures and NRC requirements go well beyond what would be required to respond to fires.

Preliminary Category

Category III. The requirement for emergency plans could not be removed without some reduction in the level of protection of public health and safety. Identical comments were considered when the final rules was published on April 7, 1989 (54 FR 14051). In its response to comments that the rule was not needed, the Commission stated, "Any system of engineered safeguards is considered to have some possibility of failure. No system could ever be perfect. Therefore, the NRC has decided to require another level of protection beyond engineered safeguards, designed to prevent or mitigate an accident, if releases could cause doses exceeding protective action guides." NRC will respond to licensees' questions to ensure clarity of requirements.

Issue X8: Incident reporting of offsite medical treatment of contaminated individuals pursuant to 10 CFR 30.50, 40.60 or 70.50.

Summary of Comment

U.S. Council for Energy Awareness (USCEA): The requirement to report contamination events pursuant to 10 CFR 30.50(b)(1), 40.60(b)(1), or 70.50(b)(1) can result in additional personnel exposure related to reporting activities, as opposed to cleanup activities. This type of situation conflicts with ALARA practices. It would be more appropriate to eliminate reporting requirements for minimal levels of contamination.

U.S. Council for Energy Awareness (USCEA): The requirement to report offsite medical treatment of a contaminated individual pursuant to 10 CFR 30.50(b)(1), 40.60(b)(3), or 70.50(b)(3) is overly restrictive.

Preliminary Category

Category III for contamination events. Removing the requirement to report unplanned contamination events would reduce NRC's ability to promptly evaluate and respond to contamination incidents; therefore, it would reduce the level of protection of public health and safety. The Commission addressed these comments when the final rule was issued on August 16, 1991 (56 FR 40757). In responding to claims that personnel exposure would increase, the Commission stated, "The reporting requirements do not relieve licensees from their responsibility to maintain radiation exposures as low as reasonably achievable." In response to requests for reporting thresholds, the final rule included thresholds to eliminate reports of trace quantities, and to eliminate reports of licensed material with a half-life less than 24 hours.

Category III for medical treatment events. Removing the requirement to report unplanned medical treatment of contaminated individuals would reduce NRC's ability to promptly evaluate and respond to the unplanned introduction of radioactive material into an emergency medical facility; therefore, it would reduce the level of protection of public health and safety. The Commission addressed this comment when the final rule was issued on August 16, 1991 (56 FR 40757). In response to this comment, the Commission stated, "The NRC is concerned about the spread of contamination at the medical facility and the possible exposure of the general public to radiation and radioactive contamination. In addition, there is always the possibility that radiation may complicate the treatment of an injury."

Issue X9: Medical license fee burden and equity

Summary of Comment

American College of Nuclear Physicians and Society of Nuclear Medicine (ACNP/SNM): The nuclear medicine community is concerned with the impact of the fees on small materials users and their ability to recover fees through their services. Approximately 400 medical licensees have terminated their licenses due to adverse impact of fees. The fee distribution is also inequitable in that non-for-profit educational institutions are exempt, whereas not-for-profit medical facilities are liable for the full fee amount.

U.S. Committee on Energy Awareness (USCEA): For radiopharmaceuticals and medical licensees, the annual fees are overly burdensome for licensees who posses sealed sources requiring little radiological resources and negligible regulatory scrutiny.

Preliminary Category

Category III. Neither comment adds new information. These issues were considered by the Commission when it promulgated the final rule and in the proposed rule for small entities.

Public Law 101–508, the Omnibus Budget Reconciliation Act of 1990 requires that the Commission recover 100 percent of its budget authority, less appropriations from the Nuclear Waste Fund for Fiscal Years 1991 through 1995 by assessing license and annual fees. In order to comply with the law, the Commission published proposed revisions to its fee regulations in the **Federal Register** (56 FR 14870) on April 12, 1991. Based on careful evaluation of over 400 comments, the Commission issued a final rule on July 10, 1991 (56 FR 31472). As stated in the supplementary information accompanying the rule, the annual fees are to recover NRC's generic and other costs that are not recovered as identifiable services to specific licensees and applicants under 10 CFR 170. The annual fees allocate the generic costs that are attributable to a given class of licensee to that class.

With regard to the impact on NRC licensees, the Commission considered generically the adverse impact of implementing the legislation in developing the final rule. The Commission concluded that:

"to eliminate the adverse effects, the annual fees would have to be eliminated or reduced. Because Public Law 101–508 requires the NRC to assess and collect approximately 100 percent of its budget authority, a reduction in the fees assessed for one class of licensee would require a corresponding increase in the fees assessed for another class. Therefore, the impact noted cannot be eliminated without creating adverse effects for other licensees. For this reason, consideration has been given only to the effects that NRC is required to consider by law (i.e., the Atomic Energy Act, the Energy Reorganization Act, and the Regulatory Flexibility act." (56 FR 31470; July 10, 1991).

In accordance with the Regulatory Flexibility Act, the Commission considered the effect of the regulation on small entities. The final rule reduces the impact on small entities by establishing a maximum annual fee of $1,800 per licensed category for those licensees that meet the size standards established by the NRC for small entities.

Based on observations during the first five months of implementing the new annual fees, the Commission has taken action to further reduce the impact of the annual fee on small entities. On January 9, 1992, a proposed rule was published to adjust the annual fee assessed on licensees who qualify as a small entity under the NRC's size standards (57 FR 847). The maximum annual fee of $1,800 for small entities would be continued. However, a lower tier small entity fee of $400 was proposed for small businesses and non-profit governmental jurisdictions with populations of less than 20,000. After considering public comments on the proposed rule, the Commission anticipates publishing a final rule this spring.

The staff will address the recently submitted ACNP/SNM petition for rulemaking during the upcoming year.

Issue X10: Overlapping regulatory requirements on mixed waste

Summary of Comment

While NUMARC is accurate in stating that dual regulation of mixed waste by NRC and EPA is expensive and complicated, the comment discusses the burden imposed by the cost of disposing of mixed waste without estimating what portion of the cost is due to the overlapping regulation (costs for disposing of mixed waste are dependent on many factors, including the manner in which a disposal facility contractor, or host state, chooses to amortize the fees charged to its customers for the disposal of mixed waste) and does not address, or cite, the actual overlapping or burdensome regulations.

In that the complexity involved in the management of mixed waste lies primarily in the complexity of the implementing regulations of the Resource Conservation and Recovery Act (RCRA) further action on this comment, by NRC, appears inappropriate. EPA is currently considering whether mixed waste should be regulated separately from hazardous waste and would be the agency to enforce revised RCRA regulations if it appears that this action is warranted.

Preliminary Category

Category III. The comment does not provide adequate dispositive information to rate this a Category I or II issue. The commenter recognizes that NRC has taken some initiatives to deal with mixed waste and asks for continued attention to coordination with EPA. The NRC will continue to work with EPA and the regulated community to address issues of concern to mixed waste managers.

Issue X11: Delay of a proposed rule clarifying criminal penalties regarding Medical Licensees

Summary of Comment

American College of Nuclear Physicians and Society of Nuclear Medicine (ACNP/SNM): Nuclear medicine and nuclear pharmacy "must take into consideration many variabilities such as the patient's age, sex, the stage of the disease process. NRC's stringent regulations under 10 CFR Part 35 are not compatible with appropriate practice considerations. The ASNP/SNM believe that the rule must be delayed until Part 35 regulations are revised. If the criminal rule is promulgated and enforced before that time, medical licensees may be penalized."

Preliminary Category

Category III. The criminal penalty rule does not entail a regulatory burden on licensees; with one minor exception, it is simply a restatement of existing statutory authority which clarifies those regulations which may subject a violator to penalties for willful violation, attempted violation, or conspiracy to violate regulations. The comment will be considered as part of the proposed rulemaking.

Issue X12: Agreement State use of sealed sources

Summary of Comment

Robert D. Martin, Regional Administrator, NRC Region IV: Part 150.20 places a burden Agreement State licensees and NRC staff without contributing to safety. It should be modified to permit Agreement State licensees to use sealed sources in NRC jurisdiction without filing for reciprocity and to prohibit the use of unsealed material in NRC jurisdiction under reciprocity.

Preliminary Category

Category II. The 150.20 reciprocity question as it relates to radiation safety is currently under review by NRC legal staff. The comment will be considered in the context of that review.

Issue X13: Use of forms equivalent to NRC Form 5

Summary of Comment

Department of the Navy: The Navy wants to be able to report data on their equivalent forms to comply with the new 10 CFR 20.2206.

Preliminary Category

Category III. There is no burden since licensees are permitted to report data either on equivalent forms or by electronic media as long as they contain all the information required by NRC Form 5. NRC is developing software to calculate total effective dose equivalent (TEDE) which can be used to compile and transmit Form 5 data. This should make reporting still easier for licensees.

Issue X14: Proposed regulation on general licensees; costs to the airline industry

Summary of Comment

American Airlines: The proposed regulation imposes needless costs and administrative burdens with no countervailing benefits to the public. It is an effort to register all byproduct materials and devices manufactured and sold under general license, including luminous safety devices and numerous other devices used by the airline industry. It would require the licensee to supply each of the recipients of a generally licensed device with a copy of the general license contained in 10 CFR 31.5. The regulation could cost the airline industry $6 million in annual registration fees and another $6 million in annual recordkeeping expenses.

Preliminary Category

Category III. There is a need to respond to questions by clearly communicating the intent and application of the regulation.

[FR Doc. 92–6707 Filed 3–20–92; 8:45 am]
BILLING CODE 7590–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 721

[OPPTS–50588A; FRL–4002–5]

Polyaromatic Urethane; Proposed Revocation of a Significant New Use Rule

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to revoke a significant new use rule (SNUR) promulgated under section 5(a)(2) of the Toxic Substances Control Act (TSCA) for a chemical substance based on receipt of new data. The data indicate that the substance will not present an unreasonable risk of injury to human health and further regulation under section 5 of TSCA is not warranted at this time.

DATES: Written comments must be submitted to EPA by April 22, 1992.

ADDRESSES: Since some comments may contain confidential business information (CBI), all comments must be sent in triplicate to: TSCA Document Receipt Office (TS–790), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. E–105, 401 M St., SW., Washington, DC 20460. Comments should include the docket control number. The docket control number for each of the new chemical substances covered in this SNUR is OPPTS–50588A, followed by the last four digits of the number of the proposed CFR section covering that chemical substance. Nonconfidential versions of comments on this proposed rule will be placed in the rulemaking record and will be available for public inspection. Unit IV. of this preamble contains additional information on submitting comments containing CBI.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, TSCA Assistance Office (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. EB–44, 401 M St., SW., Washington, DC 20460. Telephone: (202) 554–1404, TDD: (202) 554–0551.

SUPPLEMENTARY INFORMATION: In the Federal Register of November 6, 1990 (55 FR 46786), EPA issued a SNUR establishing significant new uses for polyaromatic urethane. Because of additional data EPA has received for this substance, EPA is proposing to revoke this SNUR.

I. Rulemaking record

The record for the rule which EPA is proposing to revoke was established at OPPTS–50588A (P–89–998). This record includes information considered by the Agency in developing this rule and includes the test data to which the Agency has responded with this proposal.

II. Background

EPA is proposing to revoke the significant new use and recordkeeping requirements for the following chemical substance under 40 CFR part 721 subpart E. In this unit, EPA provides a brief description for the substance, including its PMN number, chemical name (generic name if the specific name is claimed as CBI), CAS number (if assigned), basis for the revocation of the section 5(e) consent order for the substance, and the CFR citation deleted in the regulatory text section of this rule. Further background information for the substance is contained in the rulemaking record referenced above in Unit II.

PMN Number P–89–998

Chemical name: (generic) Polyaromatic urethane.
CAS Number: Not available.
Effective date of revocation of section 5(e) consent order: August 15, 1991.
Basis for revocation of section 5(e) consent order: The order was revoked based on the results of certain testing undertaken by the Company after signing the consent order. The test data demonstrate that the PMN substance, P–89–998, is chemically bonded with other polymers. Previously P–89–998 was thought to exist as a mixture with other polymers. After bonding to a polymer, P–89–998 is not released by itself to the environment. EPA has determined that the test results are valid and negate the underlying basis of the consent order. EPA no longer expects P–89–998 to be released into the environment in substantial quantities. Further, EPA has no basis to believe that the manufacture, processing, distribution in commerce, use, or disposal of the PMN substance or the polymer incorporating P–89–998 will or may present an unreasonable risk of injury to human health or the environment. Therefore, EPA has concluded that further regulation under section 5 of TSCA is not warranted at this time.
CFR citation: 40 CFR 721.2568.

III. Objectives and Rationale of Proposing Revocation of the Rule

During review of the PMN submitted for the chemical substance that is the subject of this proposed revocation, EPA concluded that regulation was warranted under section 5(e) of TSCA pending the development of information sufficient to make a reasoned evaluation of the environmental effects of the substance, and EPA identified the tests considered necessary to evaluate the risks of the substance. The basis for such findings is referenced in Unit II. of this preamble. Based on these findings, a section 5(e) consent order was negotiated with the PMN submitter and a SNUR was promulgated. EPA reviewed testing conducted by the PMN submitter for the substance and determined that the information available was sufficient to make a reasoned evaluation of the environmental effects of the substance. EPA concluded that, for the purposes of TSCA section 5, the substance will not present an unreasonable risk and subsequently revoked the section 5(e) consent order. The proposed revocation of SNUR provisions for this substance designated herein is consistent with the revocation of the section 5(e) order. In light of the above EPA is proposing a revocation of SNUR provisions for this chemical substance. When this revocation becomes final EPA will no longer require notice of any company's intent to manufacture, import, or process this substance.

IV. Comments Containing Confidential Business Information

Any person who submits comments claimed as confidential business information must mark the comments as "confidential," "trade secret," or other appropriate designation. Comments not claimed as confidential at the time of submission will be placed in the public file. Any comments marked as confidential will be treated in accordance with the procedures in 40 CFR part 2. Any party submitting comments claimed to be confidential must prepare and submit a public version of the comments that EPA can place in the public file.

List of Subjects in 40 CFR Part 721

Chemicals, Environmental protection, Hazardous materials, Recordkeeping and reporting requirements, Significant new uses.

Dated: February 6, 1992.

Victor J. Kimm,
Acting Assistant Administrator for Prevention, Pesticides and Toxic Substances.

Therefore, 40 CFR part 721 is amended as follows:

PART 721—[AMENDED]

1. The authority citation for part 721 will continue to read as follows:

Authority: 15 U.S.C. 2604, 2607, and 2625(c).

§ 721.2568 [Removed]

2. By removing § 721.2568.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[Docket No. 92–48, RM–7922]

Radio Broadcasting Services; Bagdad, AZ

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for rule making filed by Chris Sarros seeking the allotment of FM Channel 280A to Bagdad, Arizona, as that locality's first local aural transmission service. Petitioner is requested to provide additional information to establish Bagdad's status as a community for allotment purposes. Since Bagdad is located within 320 kilometers of the Mexican border, international coordination of this proposal with Mexico is required, pursuant to the terms of the United States-Mexican FM Broadcasting Agreement of 1972, 24 UST 1815, TIAS No. 7697. Coordinates for this proposal are 34–34–52 and 113–12–14.

DATES: Comments must be filed on or before May 8, 1992, and reply comments on or before May 26, 1992.

ADDRESSES: Secretary, Federal Communications Commission, Washington, DC, 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, as follows: Chris Sarros, 3815 Northfield Avenue, Kingman, AZ 86401.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92–48, adopted March 6, 1992, and released March 17, 1992. The full text of this Commisison decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452–1422, 1714 21st St., NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

47 CFR Part 73

[Docket No. 92–49, RM–7924]

Radio Broadcasting Services; Greenfield, Huntsville and Seligman, MO

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition filed by KJEM FM, A Limited Partnership, requesting the substitution of Channel 227C1 for Channel 227C2, Seligman, Missouri, and modification of the license for Station KESE to specify operation on the higher class channel. The coordinates for Channel 227C1 are 36–28–03 and 94–10–25. To accommodate the allotment at Seligman, we shall propose the substitution of Channel 299A for Channel 228A, Station KXBR, Greenfield, Missouri, at coordinates 37–23–10 and 93–53–16 and the substitution of Channel 258A for Channel 225A, Station KFAY–FM, Huntsville, Missouri, at coordinates 36–05–35 and 93–36–16. We shall propose to modify the license for Station KESE to specify operation on Channel 227C1 in accordance with Section 1.420(g) of the Commission's Rules and will not accept competing expressions of interest for the use of the channel or require petitioner to demonstrate the availability of an additional equivalent class channel for use by such parties.

DATES: Comments must be filed on or before May 8, 1992, and reply comments on or before May 26, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, as follows: Elvis Moody, KJEM, A Limited Partnership, Station KESE, 216 North Main Street, Bentonville, Arkansas 72712.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 92–49, adopted March 6, 1992, and released March 17, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1039 and 1313

[Ex Parte No. 387; Sub-No. 964]

Railroad Transportation Contracts

AGENCY: Interstate Commerce Commission.

ACTION: Proposed Rule.

SUMMARY: The Commission is considering whether it should exempt rail carriers from the requirement to file with the Commission contracts entered into with purchasers of rail service pursuant to section 10713 of the Interstate Commerce Act (49 U.S.C. 10713). Carriers are currently required to file such contracts and amendments thereto, as well as contract summaries containing designated non-confidential elements thereof. The contracts are afforded confidential treatment and are normally available only to the parties thereto and authorized members of the Commission's staff; the contract summaries are available to the general public.

DATES: Comments are due on May 7, 1992.

ADDRESSES: Send comments (an orignal and 10 copies) referring to Ex Parte No. 387 (Sub-No. 964) to: Interstate Commerce Commission, Office of the Secretary, Case Control Branch, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: James W. Green (202) 927–5597, Charles

E. Langyher, III (202) 927–5160. [TDD for hearing impaired: (202) 927–5721.]

SUPPLEMENTARY INFORMATION: Rail contract service has proven to be commercially successful. The volume of contract filings has shown a steady increase over the years and the Commission currently receives in excess of 70,000 contracts and summaries a year. Contract filings have become routine and there is virtually no substantive controversy with respect to them. The Commission's regulations (49 CFR 1313.15) contain provisions under which anyone allowed to file complaints against contracts can request discovery of applicable contract provisions. Since 1985, only one such discovery request has been received, although more than 190,000 contracts and amendements have been filed, and no contracts have been disapproved by the Commission.

In a recent rulemaking proceeding,[1] the Commission modified its rail contract filing regulations (49 CFR part 1313) to enable it to identify expired contracts and remove them from its files. In comments in that proceeding, the Association of American Railroads (AAR) suggested that the Commission exempt carriers from the requirement to file rail contracts. AAR asserted that an exemption would fully preserve the rights of potential complaints, while relieving carriers of filing burdens (and the Commission from storing contracts at all); that an exemption would be fully consistent with each of the exemption criteria of 49 U.S.C. 10505; and that the Commission could require carriers to submit copies of contracts when complaints were filed. While an exemption was beyond the scope of the earlier proceeding, we will take up the question here.

The filing of rail contracts with the Commission serves several purposes: it makes comprehensive rail contract information readily available to the Commission; it allows with the Act and the Commission's regulations; it allows the Commission to verify that the accompanying summaries are consistent with the terms of the actual contracts; and it ensures that contracts can be made available to petitioners upon approval of petitions to discover contract provisions. As indicated by AAR, even if an exemption is granted, the Commission can require carriers to submit contracts and/or contract amendments whenever a complaint is filed or whenever there is any other reason to do so. Thus, we do not believe our ability to deal with complaints and petitions to discover contract provisions will be materially affected by the grant of exemption. The Commission's ongoing review of contracts and summaries, and the level of information readily available to the Commission, will, however, be affected if an exemption is granted.

In our review of contracts and summaries, we typically find several thousand deficiencies each year and require carriers to make appropriate corrections. The majority of these deficiencies are technical in nature and relate to dicrepancies between contracts and their corresponding summaries. Without the contracts, we would no longer be able to detect discrepancies between contracts and summaries; however, neither the initial filings nor the corrected ones have generated complaints from shippers or ports, or substantive concerns on the part of the Commission. In these circumstances, the finding and correction of such discrepancies is of questionable value.

We have no reason to believe that carriers have intentionally misrepresented the terms of their contracts in the summaries they file, or that they would do so if an exemption is granted. Nevertheless, if carriers are not required to file contracts with the Commission, we believe it is appropriate that they utilize extra care to ensure that their contract summaries accurately reflect the corresponding contracts and amendments.

We have become aware of a general problem in connection with summaries for the so-called evergreen contracts (contracts that provide for automatic extensions, absent unilateral termination action by one or more of the parties). The summaries for such contracts typcially show the initial expiration date contained in the contract as the contract termination date, without any indication that the term is automatically extended absent unilateral termination action by one or more of the parties. We believe this misrepresents the true "life" of the contract. Thus, we are also proposing to amend the relevant filing regulations (49 CFR part 1313) to clarify that the contract duration provisions shown in summaries for evergreen contracts must reflect the automatic extension provisions contained therein.

Environmental and Energy Considerations

We preliminarily conclude that the proposed rule revisions will not affect significantly either the quality of the human environment or the conservation of energy resources.

Regulatory Flexibility Anlaysis

We preliminarily conclude that this action will not have a significant impact on a substantial number of small entities.

List of Subjects in 49 CFR Part 1039

Agricultural commodities, Intermodal transportation, Manufactured commodities, Railroads.

List of Subjects in 49 CFR Part 1313

Administrative practice and procedures, Agricultural commodities, Forests and forest products, Railroads.

Decided: March 6, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett. Commissioner Simmons dissented with a separate expression. Vice Chairman McDonald dissented in the disposition of this proceeding.

Sidney L. Strickland, Jr.

Secretary.

For the reasons set forth in the preamble, title 49, chapter X, parts 1039 and 1313 of the Code of Federal Regulations are proposed to be amended as follows:

PART 1039—EXEMPTIONS

1. The authority citation for part 1039 would continue to read as follows:

Authority: 49 U.S.C. 10321, 10505, 10708, 10762 and 11105; 5 U.S.C. 553.

2. A new section 1039.23 is proposed to be added as follows:

§ 1039.23 Railroad contracts entered into pursuant to 49 U.S.C. 10713.

Rail carriers are exempt from the provisions of 49 U.S.C. 10713 and 49 CFR part 1313 to the extent, and only to the extent, that such provisions require the filing of contracts and contract amendments with the Commission. This exemption does not extend to contract summaries or amended contract summaries. Rail carriers must immediately provide to the Commission all contracts and/or contract amendments it requests.

PART 1313—RAILROAD CONTRACTS ENTERED INTO PURSUANT TO 40 U.S.C. 10713

3. The authority citation for part 1313 would continue to read as follows:

Authority: 49 U.S.C. 10321 and 10713; 5 U.S.C. 553.

4. In § 1313.10, paragraph (b)(5)(iii) is proposed to be revised to read as follows:

[1] Ex Parte No. 387 (Sub-No. 963), Railroad Transportation Contracts, published on November 19, 1991 at 56 FR 58320.

§ 1313.10 Contract summary content—agricultural commodities.

Notices

Federal Register
Vol. 57, No. 56
Monday, March 23, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Information Collection Request Under Review

AGENCY: ACTION

SUMMARY: Under the Paperwork Reduction Act (44 U.S.C., chapter 35), the Office of Management and Budget (OMB) reviews and acts upon proposals to collect information from the public or to impose recordkeeping requirements. ACTION has submitted three copies of the attached information collection proposal to OMB. ACTION is only submitting the Foster Grandparent Program survey for publication, because the Senior Companion survey asks exactly the same questions. OMB and ACTION will consider comments on the proposed collecton of information and recordkeeing requirements. ACTION is requesting an expedited review by OMB with final action by April 1, 1992 so that the approved forms will be ready for data collection beginning June 30, 1992.

DATE: OMB and ACTION will consider comments received by April 6, 1992. Comments are to be directed to both of the following addresses:

Janet Smith, ACTION Clearance Officer, ACTION, 1100 Vermont Ave., NW., Washington, DC 20525, Tel. (202) 634–9245.

Daniel Chenok, Desk Office for ACTION, Office of Management and Budget, 3200 New Executive Office Bldg., Washington, DC 20503, Tel. (202) 395–7316.

SUPPLEMENTARY INFORMATION:

Office of ACTION Issuing Proposal: Office of Management and Budget.

Title of form: ACTION Foster Grandparent Project Director Survey.

Need and use: The information collected in this survey will be used by the OAVP Income Eligibility Task Force to recommend, to the Director, statutory, regulatory, and programmatic changes in the income eligibility criteria for the Foster Grandparent and Senior Companion programs as appropriate.

Type of Request: New collection.

Frequency of Collection: Non recurring.

General Description of Respondents: Project Directors.

Estimated Number of Responses: 90.

Estimated Annual Reporting or Disclosure Burden: 45 hours.

Dated: March 12, 1992

Jane A. Kenny,
Director, ACTION

Foster Grandparent Program—Project Directory Survey

Eligibility

We would like to start by asking for your views about some of ACTION'S income eligibility criteria for the Foster Grandparent program. Based on your experience as a project director, answer questions 1–5 with the goal of maximizing your project's ability to accomplish its objectives.

Q–1 Should medical expenses be deducted from income before determining a senior's eligibility for the Foster Grandparent program? (Circle number)

1. No
2. Yes

Q–2 Whose income should be counted when determining a senior's eligibility for the Foster Grandparent program? (Circle number)

1. Income of related and unrelated persons living together and sharing expenses (No Change)
2. Only the Senior and the Spouse's Income
3. Only the Senior's Income
4. Other (Write in) _____

Q–3 In your area, based on a family size of four, which of these annual income limits would best include those seniors most people believe are low income? (Circle number)

1. Limit less than $13,400
2. $13,400 (100% of poverty)
3. $16,750 (125% of poverty)
4. $20,100 (150% of poverty)
5. $23,450 (175% of poverty)
6. $26,800 (200% of poverty)
7. Limit greater than $26,800
8. Other (Write in) _____

Q–4 Please use the space below to tell us anything else about ACTION'S income eligibility criteria that affects your project's ability to accomplish its objectives.

Assignment Development

Before volunteers can be placed, assignments must be developed. We would like to know about the stipended volunteer assignments developed for your project.

Q–4 During your last completed budget year, how many assignments involved tasks that required specific skills? Count each assignment once. Total assignments should add to the project's total number of assignments during your last completed budget year. (Write number on line—If none write 0)

Skill needed	Number of assignments at skill level (write in)
No specific skills needed	
Reading only	
Writing only	
Basic math only	
Any combination of reading, writing, math	
Other (List)	
Total assignments in project (Should add to total assignments for last completed budget year)	

Q–5 During your last completed budget year how many assignments was your project unable to fill because income eligible applicants did not have the needed skills? (Write number)

_____ Number requests not filled

Recruitment Effort

The next set of questions asks about the involvement of project staff and advisory council members in the project's recruitment effort.

Q–6 During your last completed budget year, how many of the project's advisory council members participated in recruitment activities? (Write number. If none, write 0.)

_____ Advisory council members who recruit

Q–7 For your last completed budget year, estimate the total number of hours spent by all members of your advisory council on recruitment activities. (Write number. If none, write 0)

_____ Recruiting hours by advisory council

Q–8 During your last completed budget year, how many of your staff had Foster Grandparent program responsibilities?

_____ Number of staff with foster grandparent program responsibility

Q–9 During your last completed budget year, how many of your staff had Foster Grandparent program recruitment responsibilities? (Write number)

_____ Staff who recruit

Q–10 For your last completed budget year, estimate the number of hours staff spent on requirement activities. (Write number)

_____ Recruiting hours spent by staff

Q–11 Please use the space below to tell us anything else you think is important about your recruiting effort.

Recruitment Methods

The next set of questions asks about recruitment methods used in your project.

Q–12 Projects use a variety of recruiting methods. Some recruiting methods are listed below. Read through the list and circle the number in front of every method that your project has used.

Staff Public Speaking: Where has staff used public speaking as a recruitment method?

Volunteer public speaking: Where have volunteers used public speaking as a recruitment method?

1. Senior centers, retirement centers, retirement organizations, or senior nutrition projects.
2. Church groups.
3. Senior community socials.
4. Public meetings on topics of interest to seniors.
5. Other (Write in) _____

Personal contact: Which personal contact methods were used?

6. Volunteers invite friends to apply.
7. Staff meets with residents of low income housing projects.
8. Former volunteers are invited to return when appropriate.
9. All contacts followed up with personal invitation to volunteer.
10. Personal referral by staff in another agency.
11. Networking with other volunteer agencies.
12. Other (Write in) _____
13. Senior centers, retirement centers, retirement organizations, or senior nutrition projects.
14. Church groups.
15. Senior community socials.
16. Public meetings on topics of interest to seniors.
17. Other (Write in) _____

Publicity & Advertisement: Which publicity and advertising methods were used?

18. Articles in newsletters read by retirees.
19. Notices in church bulletins.
20. News stories on radio, television or in newspapers.
21. Advertisements in newspapers.
22. Advertisements on radio.
23. Advertisements on television.
24. Other (Write in) _____

Q–13 We want to know which recruiting methods your project has found to be the most effective. Look back through the recruiting list above. What was the most, second, and third effective recruiting method the project has used? Put the numbers from the list above in each box below.

☐ Most effective recruiting method
☐ Second most effective recruiting method
☐ Third most effective recruiting method

Q–14 Please use this page to tell us what makes those recruiting methods effective.

Recruitment Difficulties

Q–15 At times, recruiting stipended volunteers may be difficult. Think back over your last completed budget year. Did your project have difficulty recruiting stipended volunteers?

1. No Skip to Q–26
2. Yes (Continue)

Listed below are some problems a project director like yourself might face when recruiting stipended volunteers. Please rate each problem from 1–5 depending on how much of a problem it is for your project.

1=No Problem
5=Major Problem

Q–16 The pool of income eligible seniors in the service area is too small. (Circle number)
no problem 1 2 3 4 5 major problem

Q–17 There are too few eligible clients in the service area. (Circle number)
no problem 1 2 3 4 5 major problem

Q–18 Action granted the project more Volunteer Service Years than the project requested. (Circle number)
no problem 1 2 3 4 5 major problem

Q–19 The competition from other programs and businesses for income eligible seniors has reduced the pool of potential volunteers in my service area. (Circle number)
no problem 1 2 3 4 5 major problem

Q–20 Volunteer stations are seeking volunteers with higher skill levels than income eligible seniors usually have. (Circle number)
no problem 1 2 3 4 5 major problem

Q–21 Applicants fail to meet ACTION's income limits. (Circle number)
no problem 1 2 3 4 5 major problem

Q–22 ACTION's income limits do not take into account the high cost of living in my service area. (Circle number)
no problem 1 2 3 4 5 major problem

Q–23 Seniors who would be eligible based on their personal income are not eligible when household income is counted. (Circle number)
no problem 1 2 3 4 5 major problem

Q–24 Low income seniors are not eligible because ACTION counts income before subtracting medical expenses. (Circle number)
no problem 1 2 3 4 5 major problem

Q–25 Please use the space below to tell us about your positive recruitment experiences and any other recruitment difficulties you may have experienced.

Transportation

Q–26 Sometimes transportation is a concern for stipended volunteers. During your last completed budget year, how may stipended volunteers used each of these types of transportation as their main way of getting to assignments? (Count each volunteer *once*. If no stipended volunteers used one type of transportation, write 0 in the boxes beside that type.)

Main type of transportation	Number of volunteers using type transport (write in)
Public transportation	
Taxi	
Privately owned vehicle	
Project transports volunteers	
Contract service transports volunteers	
Volunteers carpool	
Volunteers from other agencies transport project volunteers	
Other (List)	
Total Volunteers in Project	

Q–27 During your last completed budget year, how many assignments did the project have that could only be filled by volunteers driving privately owned vehicles? (If none, write 0)

_____Assignments that could only be filled by volunteers driving privately owned vehicles

Q–28 Is your service area covered by public transportation? (Circle number)

1. None of service area covered by public transportation

2. Part of service area covered by public transportation

3. All of service area covered by public transportation

Background

We would like to end by asking you to provide some general information about your project. (Please answer for the project's last completed budget year)

Q–29 During your last completed budget year, how many volunteer stations participated in your project? (Write number)

_____Number Stations

Q–30 During your last completed budget year, how many volunteers were paid a stipend? (Write number)

_____Number volunteers paid a stipend

Q–31 During your last completed budget year, of those volunteers who were paid a stipend, how many stopped volunteering?

_____ Number stopped volunteering

Q–32 During your last completed budget year, how many budgeted Volunteer Service Years did your project have? (Write number)

_____Number volunteer service years

Q–33 At the beginning of your last completed budget year, how many of your stipended volunteers were in the following age groups? (Circle number)

1. 60–64

2. 65–69

3. 70–74

4. 75 and older

Q–34 At the *beginning* of your last completed budget year, how many income eligible seniors were on your waiting list? (If 0, write none)

_____Number income eligible seniors on waiting list

Q–35 How many years have you been a project director? (Write number. If less than one year write 0.)

_____ Years as project director

Please give us your project grant number so we may verify that your survey has been returned. We will tear this section off and throw it away after we receive your survey.

Q–36 Please write your project grant number in the boxes below.

☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐

Project grant number

BILLING CODE 6050–28–M

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Rulemaking; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. No. 92–463), notice is hereby given of the meeting of the Committee on Rulemaking of the Administrative Conference of the United States.

Committee on Rulemaking

Date: Thursday, March 26, 1992

Time: 3: p.m.

Location: Administrative Conference of the United States, 2120 L Street, NW., suite 500, Washington, DC 20037 (Library, 5th Floor)

Agenda: The Committee will meet to discuss: (1) Procedural rule exemption project, and (2) Professor Robert Anthony's study of non-rule rulemaking.

Contact: Kevin L. Jessar, 202–254–7020

Attendance at the committee meeting is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman at least one day in advance. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the committee before, during, or after the meeting. Minutes of the meeting will be available on request. The contact person's mailing address is: Administrative Conference of the United States, 2120 L Street, NW., suite 500, Washington, DC 20037. Telephone 202–254–7020.

Dated March 19, 1992.

Jeffrey S. Lubbers,

Research Director.

[FR Doc. 92–6770 Filed 3–20–92; 8:45 am]

BILLING CODE 6110–01–M

DEPARTMENT OF AGRICULTURE

Meeting of the President's Council on Rural America

AGENCY: Department of Agriculture.

ACTION: Notice of meeting.

SUMMARY: The Under Secretary for Small Community and Rural Development, Department of Agriculture, is announcing a meeting of the President's Council on Rural America. The meeting is open to the public.

DATES: Meeting on Wednesday, May 27, 8 a.m. to 5 p.m., Thursday, May 28, 8 a.m. to 5 p.m., and Friday, May 29, 8 a.m. to 12 p.m.

ADDRESSES: The meeting will be held at: The Brown Palace Hotel, 321 17th Street, Denver, Colorado 80202. Phone: 303/297–3111, FAX: 303/293–9204.

FOR FURTHER INFORMATION CONTACT: Jennifer Pratt, Special Assistant to the Council, Office of Small Community and Rural Development, Room 5050, South Building, USDA, Washington, DC 20250, 202/690–4748.

SUPPLEMENTARY INFORMATION: The President's Council on Rural America was established by Executive Order on July 16, 1990. Members are appointed by the President and include representatives from the private sector and from State and local governments. The Council is reviewing and assessing the Federal Government's rural economic development policy and will advise the President and the Economic Policy Council on how the Federal Government can improve its rural development policy. The purpose of the meeting is to make decisions on a work plan for the Council task groups. The public may participate by providing written and verbal comments. Written comments may be submitted to Jennifer Pratt.

Dated: March 9, 1992.

Roland R. Vautour,

Under Secretary for Small Community and Rural Development.

BILLING CODE 3410–07–M

Animal and Plant Health Inspection Service

[Docket No. 92–038]

Environmental Assessment and Preliminary Finding of No Significant Impact for Field Testing a Live Genetically Engineered Vaccinia Vectored Rabies Vaccine in New Jersey

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that an environemental assessment and preliminary finding of no significant impact has been prepared by the Animal and Plant Health Inspection Service (APHIS) and is available for comment. The environmental assessment and preliminary finding of no significant impact was prepared as part of APHIS' review of an application to conduct a field test in New Jersey of a live genetically engineered vaccinia vectored rabies vaccine that expresses the rabies virus surface glycoprotein. The environmental assessment and preliminary finding of no significant impact indicates that the field testing of the rabies vaccine would not have a significant impact on the human environment and that an environmental impact statement need not be prepared.

DATES: Consideration will be given only to comments regarding the environmental assessment and preliminary finding of no significant impact received on or before April 7, 1992.

ADDRESSES: A copy of the environmental assessment and preliminary finding of no significant impact is available for public inspection in room 1141, United States Department of Agriculture, 14th Street and Independence Avenue, SW., Washington, DC 20250 between 8 a.m. and 4:30 p.m., Monday through Friday except holidays. A copy of the environmental assessment and preliminary finding of no significant impact may also be obtained from the person listed under **"FOR FURTHER INFORMATION CONTACT"**. Send an original and three copies of written comments to Chief, Regulatory Analysis and Development Staff, PPD, APHIS, USDA, room 866, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Please state that your comments refere to Docket No. 92–038.

FOR FURTHER INFORMATION CONTACT: Dr. Robert B. Miller, Chief Staff Veterinarian, veterinary Biologics, Biotechnology, Biologics, and Environmental Protection, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, room 832, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–5863.

SUPPLEMENTARY INFORMATION: The Animal and Plant Health Inspection Service (APHIS) has prepared an environmental assessment and preliminary finding of no significant impact relative to a request for authorization to conduct a field trial on or about April 15, 1992, in Atlantic, Cape May, and Cumberland Counties, New Jersey, with an experimental live vaccinia vectored rabies vaccine that expresses the rabies virus surface glycoprotein. The sponsor of the field trial is the Wistar Institute of Anatomy and Biology, Philadelphia, Pennsyslvania. A limited field trial of the same vaccine was previously approved by APHIS and initiated on Parramore Island, Virginia, on August 20, 1990 (See 54 FR 9241–9242, March 6, 1989) and Sullivan County, Pennsylvania, in June, 1991 (See 59 FR 19635–19636, April 29, 1991).

As part of its preparation of an environmental assessment and preliminary finding of no significant impact (hereinafter "the document"), APHIS has consulted with the Vaccinia Subcommittee of the National Vaccine Program of the Public Health Service of the Department of Health and Human Services. The Vaccinia Subcommittee of the National Vaccine Program, consisting of scientists and physicians from the Centers for Disease Control, the National Institutes of Health, and the Food and Drug Administration, is reviewing the document with primary emphasis on the public health aspects of the field trial in New Jersey.

Environmental Assessment and Preliminary Finding of No Significant Impact

Before a veterinary biologist product can be licensed, under the Virus-Serum-Toxin Act (21 U.S.C. 151–159), it must be shown to be pure, safe, potent, and efficacious. Field testing under 9 CFR part 103.3 is necessary in order to satisfy vaccine safety requirements as a prerequisite to licensing vaccines. In the course of reviewing the field testing protocol for the vaccinia vectored rabies vaccine, APHIS assessed the impact on the human environment of authorizing the sponsor to conduct a limited field trial of the product in New Jersey.

The environmental assessment and preliminary finding of no significant impact provide the public with documentation of APHIS' review and analysis of environmental effects which would be associated with the gathering of information in the field trial.

The facts that support a preliminary finding of no significant impact are summarized below and are contained in the environmental assessment.

1. Genetic engineering procedures were employed to incorporate only the rabies glycoprotein gene within the thymidine kinase (TK) locus of vaccinia virus. The recombinant vaccine cannot induce rabies.

2. The vaccinia rabies glycoprotein (V–RG) recombinant vaccine has been shown to cause no adverse clinical signs or gross or histopathological lesions, yet is fully capable of eliciting an immune response that protects a variety of species from virulent rabies virus challenge. The V–RG recombinant vaccine in target and non-target species is unable to evoke antibodies to other rabies viral structural proteins.

3. The TK gene insertion is a stable characteristic of the V–RG recombinant vaccine with a very low probability of loss or reversion.

4. The V–RG recombinant vaccine does not contain an oncogene or cancer-causing substance, and does not contain any new genetic information to enhance the likelihood of it becoming oncogenic.

5. Biological transmission of the V–RG recombinant vaccine could not be demonstrated in laboratory studies involving more than 40 species of domesticated and wild mammals and birds.

6. In rare instances, contact (mechanical) transmission between animals was observed immediately after oral administration of the V–RG vaccine. No adverse effects from these transmissions were observed, and no adverse outcomes are expected from similar exposures during the field trial.

7. Laboratory containment experiments demonstrate that the V–RG vaccine is non-pathogenic, safe, and efficacious in a variety of laboratory animal model systems and a number of target and non-target species, including the major terrestrial wildlife and domestic animal reservoirs of rabies.

8. Previous field trials of V–RG vaccine in Europe, Virginia, and Pennsylvania have not demonstrated adverse effects of V–RG vaccine for workers, local human populations, or wildlife.

9. In the proposed field trial, vaccine-bait units will remain on site until consumed or biodegraded. This potential short term persistence of V–RG vaccine on site is not anticipated to have an adverse impact on the environment.

10. Monitoring of wildlife and human populations in the area of the field trial will continue for one year after the initiation of the trial. Based on the foregoing, APHIS has made a determination that the field trial of the live vaccinia vectored rabies vaccine that expresses the rabies surface glycoprotein would have no significant impact on the human environment.

The environmental assessment and preliminary finding of no significant impact have been prepared in accordance with: (1) the National Environmental Policy Act of 1969 (NEPA, 42 U.S.C 4321 *et seq.*), (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1508), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS Guidelines Implementing NEPA (44 FR 50381–50384, August 28, 1979, and 44 FR 51272–51274, August 31, 1979).

Done at Washington, DC this 18th day of March 1992.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-6661 Filed 3-20-92; 8:45 am]

BILLING CODE 3410-34-M

[Docket No. 92-039]

Receipt of Permit Applications for Release Into the Environment of Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that four applications for permits to release genetically engineered organisms into the environment are being reviewed by the Animal and Plant Health Inspection Service. The applications have been submitted in accordance with 7 CFR part 340, which regulates the introduction of certain genetically engineered organisms and products.

ADDRESSES: Copies of the applications referenced in this notice, with any confidential business information deleted, are available for public inspection in room 1141, South Building, U.S. Department of Agriculture, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. You may obtain a copy of these documents by writing to the person listed under "**FOR FURTHER INFORMATION CONTACT.**"

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology Permits, Biotechnology, Biologics, and Environmental Protection, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which Are Plant Pests or Which There Is Reason to Believe Are Plant Pests," require a person to obtain a permit before introducing (importing, moving interstate, or releasing into the environment) into the United States certain genetically engineered organisms and products that are considered "regulated articles." The regulations set forth procedures for obtaining a permit for the release into the environment of a regulated article, and for obtaining a limited permit for the importation or interstate movement of a regulated article.

Pursuant to these regulations, the Animal and Plant Health Inspection Service has received and is reviewing the following applications for permits to release genetically engineered organisms into the environment:

Application No.	Applicant	Date recovered	Organism	Field test location
92-055-01	Monsanto Agricultural Co.	02-24-92	Soybean plants genetically engineered to express the enzyme 5-enolpyruvyl shiki-mate-3-phosphate synthase (EPSPS) and a metabolizing enzyme for tolerance to the herbicide glyphosate.	Montgomery County, VA.
92-056-01	ICI Seeds, Inc.	02-25-92	Corn plants genetically engineered to express genes from a non-pathogenic source organism for tolerance to the herbicide glufosinate.	Boone County, IA.
92-057.01, renewal of permit 90-350-01, issued on 04-24-91.	University of Idaho	02-26-92	Potato plants genetically engineered to express an enzyme that confers tolerance to the herbicide bromoxynil.	Bingham County, ID.
92-062-01	Campbell Research and Development	03-02-92	Tomato plants genetically engineered to express a delta-endotoxin protein from *Bacillus thuringiensis* subsp. *kurstaki* strain HD-73 for resistance to lepidopteran insects.	Yolo County, CA.

Done in Washington, DC, this 18th day of March 1992.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 92-662 Filed 3-20-92; 8:45 am]

BILLING CODE 3410-34-M

[Docket No. 92-024]

Receipt of Permit Applications for Release Into the Environment of Genetically Engineered Organisms

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice

SUMMARY: We are advising the public that 23 applications for permits to release genetically engineered organisms into the environment are being reviewed by the Animal and Plant Health Inspection Service. The applications have been submitted in accordance with 7 CFR part 340, which regulates the introduction of certain genetically engineered organisms and products.

ADDRESSES: Copies of the applictions referenced in this notice, with any confidential business information deleted, are available for public inspection in room 1141, South Building, U.S. Department of Agriculture, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. You may obtain a copy of these documents by writing to the person listed under "**FOR FURTHER INFORMATION CONTACT**".

FOR FURTHER INFORMATION CONTACT: Dr. Arnold Foudin, Deputy Director, Biotechnology, Biologics, and Environmental Protection, Biotechnology Permits, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, room 850, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436-7612.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 340, "Introduction of Organisms and Products Altered or Produced Through Genetic Engineering Which are Plant Pests or Which There is Reason to Believe Are Plant Pests," require a person to obtain a permit before introducing (importing, moving interstate, or releasing into the environment) into the United States certain genetically engineered organisms and products that are considered "regulated articles." The regulations set forth procedures for obtaining a permit for the release into the environment of a regulated article, and for obtaining a limited permit for the importation or interstate movement of a regulated article.

Pursuant to these regulations, the Animal and Plant Health Inspection Service has received and is reviewing the following applictions for permits to release genetically engineered organisms into the environment:

Application No.	Applicant	Date received	Organism	Field test location
92-034-01, renewal of permit 90-332-04, issued on 03-06-91.	DeKalb Plant Genetics	02-03-92	Corn plants genetically engineered to express the *bar* gene for tolerance to the herbicide bialaphos.	DeKalb County, IL.
92-034-02, renewal of permit 90-310-01, issued on 03-20-91.	U.S. Department of Agriculture, Agricultural Research Service.	02-03-92	Potato plants genetically engineered to express a modified *Galleria mellonella* larval serum protein for resistance to blackspot bruise.	Bingham County, ID; Aroostock County, ME; Clay County, MN; Grand Forks County, ND.
92-034-03	Heinz U.S.A.	02-03-92	Tomato plants genetically engineered to express an antisense pectin methylesterase (PME) chimeric gene to increase the soluble solid content.	San Joaquin County, CA.
92-035-01	Rogers NK Seed Co.	02-04-92	Tomato plants genetically engineered to express a delta-endotoxin protein from *Bacillus thuringiensis* subsp. *kurstaki* for resistance to lepidopteran insects.	Yolo County, CA.
92-035-03	Campbell Research and Development	02-04-92	Tomato plants genetically engineered to express an anti-sense poly-galacturonase (PG) gene.	Yolo County, CA.
92-035-05	DNA Plant Technology Corp.	02-04-92	Tomato plants genetically engineered to express an anti-sense ACC gene to delay ripening.	Contra Costa County, CA.
92-036-01, renewal of permit 90-345-02, issued on 05-02-91.	Washington State University	02-05-92	Potato plants genetically engineered to express disease resistance response genes from the pea.	Benton County, WA.
92-037-01	Monsanto Agricultural Co.	02-06-92	Tomato plants genetically engineered to express tolerance to the herbicide glyphosate.	Jersey County IL.
92-037-02	Monsanto Agricultural Co.	02-06-92	Soybean plants genetically engineered to express the enzyme 5-enol-pyruvyl shikimate-3-phosphate synthase (EPSPS) and a metabolizing enzyme for tolerance to the herbicide glyphosate.	Bertie and Wayne Counties, NC.

BILLING CODE 3410-34-M

Forest Service

Draft Supplement to the White Stallion Final Environmental Impact Statement; Bitterroot National Forest, Ravalli County, MT

AGENCY: Forest Service, USDA.

ACTION: Notice; intent to supplement a final environmental impact statement.

SUMMARY: The Forest Service will supplement the February 1991 White Stallion Final Environmental Impact Statement (FEIS). The legal notice for this FEIS was published April 3, 1991. The Draft Supplement is being prepared because the March 15, 1991 Record of Decision was appealed and, upon review by the Deputy Regional Forester, the decision to implement timber harvesting and road construction was reversed back to the Bitterroot National Forest Supervisor until further analysis could be done. The appeal issue centered around the failure of the FEIS to adequately address the cumulative effects of private land timber harvesting activities upon old-growth dependent species. These harvesting activities occur in both the Sleeping Child drainage and in the North Fork of Rye Creek. The original assessment area will be increased to include all of this harvesting activity and part of the Skalkaho Creek drainage. The Draft Supplement will document this additional analysis.

DATES: Public comments concerning the Draft Supplement and the scope of the analysis should be submitted by April 15, 1992.

ADDRESSES: Send written comments to District Ranger, Darby Ranger District, PO. Box 266 Darby, MT 59829.

FOR FURTHER INFORMATION CONTACT: Questions about the Draft Supplement should be directed to Rick Floch, Darby Ranger District, Phone: (406) 821-3913.

SUPPLEMENTARY INFORMATION: The Draft Supplement will address the cumulative effects of timber harvesting and associated access road construction on adjacent private lands to old-growth dependent species.

Management activities under consideration would occur only in an area encompassing approximately 8,300 acres of multi-ownership lands in the Sleeping Child drainage. To assess effects on old-growth dependent species, the assessment area has been expanded from its original size. It is now bounded by Skalkaho Creek and Daly Creek on the north, the Sapphire Divide on the east, Rye Creek on the south and the National Forest boundary to the west and encompasses approximately 124,000 acres. A portion of the assessment area being considered for harvest and roading is within the Sleeping Child Roadless Area (X1074).

The Draft Supplement will also further address the roadless issue by analyzing a new alternative that proposes harvest activities outside of the roadless area, only, with no new road construction.

Scoping and identification of the environmental issues for the White Stallion proposed actions were discussed in the FEIS.

The Draft Supplement is expected to be available to the public early in May 1992. The comment period on the Draft will be 45 days from the date the EPA's notice of availability appears in the **Federal Register.** It is very important that those interested in the Supplement participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the Final Supplement to the White Stallion Final Environmental Impact Statement.

The responsible official, who is the Forest Supervisor, will consider the comments and responses to the White Stallion FEIS and Draft Supplement, environmental consequences discussed in the Final Supplement; and applicable laws, regulations, and policies in making a decision regarding the White Stallion proposal.

The responsible official will document the decision and reasons for the decision in the Record of Decision. The decision will be subject to review under applicable Forest Service Regulations.

Dated: March 13, 1992.

James D. Glevanik,

Acting Forest Supervisor, Bitterroot National Forest.

DEPARTMENT OF COMMERCE

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: National Oceanic and Atmospheric Administration.

Title: Alaska Region Logbook Family of Forms.

Form Number: No form numbers assigned.

OMB Approval Number: 0648-0213.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 40,705 hours [4,621 for reporting hours, 36,084 recordkeeping hours].

Number of Respondents: 198 for reporting hours; 2,177 recordkeepers.

Avg. Hours Per Respondent: 23.3 for reporting hours; 16.6 for recordkeepers.

Needs and Uses: Logbooks are needed to obtain fishery management dependent data on fishing catch, fishing effort and associated biological and economic information from fishermen. Data are used for stock assessments, quota compliance, regulatory analyses and fishery monitoring.

Affected Public: Individuals or households, businesses or other for-profit institutions, small businesses or organizations.

Frequency: Recordkeeping, weekly, quarterly, on occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Ronald Minsk, (202) 395-3084.

Copies of the above information collection proposal can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 377-3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Ronald Minsk, OMB Desk Officer, room 3019, New Executive Office Building, Washington, DC 20503.

Dated: March 17, 1992.

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

International Trade Administration

[A-509-504]

Industrial Phosphoric Acid From Israel; Final Results of Antidumping Duty Administrative Review and Revocation in Part of the Antidumping Duty Order

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review and revocation in part of the antidumping duty order.

SUMMARY: On December 27, 1991, the Department of Commerce published the preliminary results of its administrative review and its intent to revoke in part the antidumping duty order on industrial phosphoric acid from Israel (56 FR 67059). The review covers two manufacturers and/or exporters of this merchandise to the United States and the period August 1, 1989 through July 31, 1990. We have now completed this review and determine the dumping margins to be zero for Negev Phosphates and 6.82 percent *ad valorem* for Haifa Chemicals. The Department is revoking the antidumping duty order with respect to Negev Phosphates.

EFFECTIVE DATE: March 23, 1992.

FOR FURTHER INFORMATION CONTACT: Gayle Longest or Michael Rollin, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On December 27, 1991, the Department of Commerce (the Department) published in the **Federal Register** the preliminary results of its administrative review and intent to revoke in part the antidumping duty order on industrial phosphoric acid from Israel (56 FR 67059). We have now completed this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of Review

Imports covered by this review are shipments of industrial phosphoric acid (IPA). This product is currently classifiable under item number 2809.20.00 of the Harmonized Tariff Schedule (HTS). The written description remains dispositive.

The review covers two manufacturers/exporters to the United States of the subject merchandise, Negev Phosphates and Haifa Chemicals, and the period August 1, 1989 through July 31, 1990.

Revocation in Part

In the first and second administrative reviews of this order, Negev made no sales at less than fair value and was assessed a zero percent margin. During the third administrative review and pursuant to 19 CFR 353.25, Negev requested revocation of the order as it pertained to Negev.

The Department has determined that Negev has not had sales at less than fair value for at least three consecutive years. In addition, as provided in 19 CFR 353.25(a)(2)(iii), Negev has agreed in writing to an immediate suspension of liquidation and reinstatement of the order if circumstances develop which indicate that IPA exported to the United States by Negev is being sold at less than fair value. Therefore, we are revoking the antidumping order on IPA with respect to Negev. This partial revocation applies to all unliquidated entries of this merchandise produced by Negev and exported to the United States entered, or withdrawn from warehouse, for consumption, on or after August 1, 1990, the date stated in our tentative determination to revoke the order.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. We received comments from the petitioners, FMC Corporation and Monsanto, and Negev, the only Israeli producer/exporter responding to our questionnaire.

Comment 1: The petitioners argue that there is sufficient evidence before the Department to create "reasonable grounds to believe or suspect" that Negev Phosphates has made below-cost sales in its home market. According to petitioners, under the statutory provision, Commerce must conduct a cost of production (COP) investigation whenever it has "reasonable grounds to believe or suspect" that below-cost sales have taken place (19 U.S.C. section 1677b(b)), and the standard for initiation of a COP investigation is that the information must support "a specific and objective basis for suspecting that a particular foreign firm is engaged in sales below its cost of production." *Al Tech Specialty Steel Corp.* v. *United States*, 575 F.Supp. 1277, 1282 (CIT 1983), *aff'd on other grounds*, 745 F.2d 632 (Fed. Cir. 1984) ("*Al Tech*"). Petitioners argue that their "legal burden" is not to show conclusively and precisely that below cost sales have been made, and claims that the Department is encouraged to undertake COP investigations on minimal information, citing *Connors Steel Company* v. *United States*, 527 F.Supp. 350, 357 (CIT 1981), *modified*, 566 F.Supp. 154 (CIT 1982).

The petitioners maintain that the evidence indicating below-cost sales consists of three elements: (1) A significant differential in home market prices reported by Negev; (2) a consultancy study prepared by an outside expert estimating Negev's cost of producing IPA submitted previously by petitioners; and (3) Negev's annual report for 1990 which shows an operating loss.

The petitioners argue that substantial price differentials in Negev's home market sales reveal that there are two distinct groups of sales, higher-priced sales and lower-priced sales. Moreover, petitioners claim that the inclusion of the lower-priced sales in the Department's calculation is the determining factor in whether a dumping margin is found in this review. Petitioners also argue that the extremely low prices of certain sales should raise some suspicion that those sales were below the cost of production. In addition, petitioners argue that a consultancy study provided by an industry expert indicates that the lower-priced sales in Negev's questionnaire response were below two cost estimates contained in the study. This study was submitted to the Department on April 29, 1991 in support of petitioners' request for the initiation of a cost-of-production investigation. Finally, the petitioners maintain that Negev's operating loss, reported in the statement of income (loss) and retained earnings included in the 1990 annual report, indicates that a COP investigation is justified.

Negev argues that the Department should again deny the petitioners' request for a COP investigation. Negev claims that the Department correctly denied the request earlier in this administrative review, and petitioners have merely resubmitted the same request after both the verification and the preliminary determination. Negev maintains that petitioners' evidence of sales below cost is not sufficient to justify a COP investigation.

Negev argues that the fact that the prices of some home market sales are lower than others provides no real evidence of below-cost sales. Negev cautions that margins may result in any antidumping calculation if lower-priced home market sales are eliminated. Moreover, Negev argues that the consultancy study was already determined by the Department to be insufficient to justify a COP investigation, and the flaws in the study which the Department previously identified still remain.

Negev further argues the minimal loss reported in its 1990 annual report does not indicate sales below cost, particularly since Negev showed significant profits in 1989. Negev maintains that if there were a correlation between the petitioners' cost/price analysis and Negev's profits, there would have to be losses in both years. Moreover, according to Negev's questionnaire response, during the review period, home market sales of IPA were a very small percentage of Negev's total sales. Therefore, the minimal loss in 1990 cannot be considered evidence that some IPA sales in the home market are below cost, because these sales represent too minimal a percentage of Negev's total revenue to impact its profit as suggested by petitioners.

Department's Position: We disagree with the petitioners' contention that their allegation of home market sales below cost is supported by sufficient evidence to prompt the Department to initiate a COP investigation. Petitioners are correct that, to initiate a COP investigation, the Department must have before it a "specific and objective basis" for suspecting that a firm is selling in the home market at prices below its cost of production. However, they are incorrect when they claim their burden is not to sow that below-cost sales have actually occurred. The Court of International Trade stated in *Nakajima All Co. LTD.* v. *United States*, 744 F. Supp. 1168, (CIT 1990) ("*Nakajima*") that though section 1677b(b) requires "'only a showing that sales have been made at below cost, not substantial sales', *such a showing, nonetheless, must be made.*" (emphasis added). Petitioners have not made such a showing.

For their allegation of sales below cost, petitioners rely upon a consultant's report addressing production costs for certain worldwide producers of industrial phosphates. The report was based upon data gathered sometime during or before 1986, fully three years earlier than the sales under review here, and petitioners made no attempts to adjust the 1986 cost data for the known production circumstances of the company during the current review period, as indicated by the questionnaire response. (See, May 24, 1991 memorandum to the file: Petitioners' April 29, 1991 Allegation of Sales Below Cost by Negev Phosphates—Industrial Phosphoric Acid from Israel—Third Administration Review). The Department stated in its April 24 memorandum that, since the petitioners had failed to make any attempt to adjust their outdated data, it was difficult to evaluate adequately the validity of their price-to-cost comparisons. Moreover, allegations of sales below cost must be made on data contemporaneous with the sales under review. See, Al Tech Steel, Nakajima, and Initiation of Antidumping Duty Investigation; Pressure Sensitive PVC Battery Covers from the Federal Republic or Germany, (55 FR 5868; February 20, 1990)).

On other points raised by the petitioners, we consider that the presence of lower-priced home market sales is a characteristic of virtually every case and cannot be taken as evidence of sales below cost. Furthermore, the loss reported in Negev's 1990 annual report offers no discernible indication of the company's home market sales experience with respect to IPA. IPA is not the primary source of revenue for Negev and comprises only a part of the company's overall sale. In addition, the majority of Negev's IPA sales are export sales. Consequently, home market sales of IPA during the period of review represent a minimal portion of Negev's total revenue. Lower-priced IPA home market sales are an even smaller percentage of Negev's total sales, and could not be expected to have a significant effect on Negev's total profit or loss.

Comment 2: Negev contends that the Department should make an upward adjustment to U.S. price for countervailing duty deposits on sales in 1990, even though these duties have not yet been assessed.

Department's Position: The Department has not completed the countervailing duty administrative review that encompasses the 1990 period covered in this review and, therefore, does not have the necessary information to make such an adjustment. Moreover, in this review period, as in prior review periods, a further adjustment for countervailing duties would not change the final results for Negev because we found that Negev had no dumping margins during the review period (see, Industrial Phosphoric Acid From Israel; Final Results of Antidumping Duty Administrative Reviews, (56 FR 33248; July 19, 1991).

Comment 3: Negev argues that the Department should not compare its home market sales to related parties with its U.S. sales.

Department's Position: We disagree with the respondent. In the original investigation and the previous administrative reviews of this antidumping duty order, the Department rejected identical arguments raised by the respondent because the evidence on the record indicated related party sales were comparable in price to sales to unrelated parties (see Final Determination of Sales at Less Than Fair Value; Industrial Phosphoric Acid from Israel, (52 FR 25440; July 7, 1987, Comment 5) and Industrial Phosphoric Acid from Israel; Final Results of Antidumping Duty Administrative Review, (56 FR 33248; July 19, 1991), Comment 6). In this review, the respondents have provided neither new evidence nor any arguments as to why we should reconsider our position here.

Comment 4: Negev claims the Department should offset the commission paid to the U.S. customer with indirect selling expenses incurred on home market sales.

Department's Position: We disagree with the respondent. The Department addressed this argument in the original investigation and in previous administrative reviews of this antidumping duty order, and rejected Negev's claim because the evidence on the record did not indicate that this expense was a commission. In this review as well as in the original investigation, we verified that this expense is a fixed percentage deducted from the price of each U.S. sale. A reduction of the sale price to a purchaser, in this case by a specific fixed rate, constitutes a discount, not a commission. (see, Final Determination of Sales at Less Than Fair Value; Industrial Phosphoric Acid from Israel (52 FR 25440; July 7, 1987), Comment 2) and Industrial Phosphoric Acid From Israel Final Results of Administrative Reviews, (56 FR 33248; July 19, 1991), Comment 8). Furthermore, as in Comment 3 above, Negev failed to present new evidence or arguments that give us a basis for changing our findings.

Comment 5: Negev maintains that the Department should consider it's claim for a level of trade adjustment.

Department's Position: We disagree with the respondent. The Department denied this argument in this review as in prior reviews, because the respondent has failed to establish that the difference in selling expenses between the U.S. and home market is attributable to differences in levels of trade (see, Industrial Phosphoric Acid From Israel Final Results of Administrative Reviews, (56 FR 33248; July 19, 1991), Comment 7).

Final Results of Review

As a result of our comparison of United States price with foreign market value, we determine the margins to be:

Manufacturer/Exporter	Margin (percent)
NEGEV	0
HAIFA	6.82

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Furthermore, the following deposit requirements will be effective upon publication of this notice of final results of administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for the reviewed companies will be as outlined above; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) cash deposits for all other manufacturers or exporters will be waived as the rate would be zero. This rate represents the highest rate for any firm with shipments in the administrative review, other than those firms receiving a rate based entirely on best information available.

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

The notice also serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: March 17, 1992.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

[FR Doc. 92- 6686 Filed 3-20-92; 8:45 am]

BILLING CODE 3510-DS-M

Quarterly Update of Foreign Government Subsidies on Articles of Quota Cheese

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Publication of quarterly update of foreign government subsidies on articles of quota cheese.

SUMMARY: The Department of Commerce, in consultation with the Secretary of Agriculture, has prepared a quarterly update to its annual list of foreign government subsidies on articles of quota cheese. We are publishing the current listing of those subsidies that we have determined exist.

EFFECTIVE DATE: April 1, 1992.

FOR FURTHER INFORMATION CONTACT: Patricia W. Stroup or Michael Rollin, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION: Section 702(a) of the Trade Agreements Act of 1979 ("the TAA") requires the Department of Commerce ("the Department") to determine, in consultation with the Secretary of Agriculture, whether any foreign government is providing a subsidy with respect to any article of quota cheese, as defined in section 701(c)(1) of the TAA, and to publish an annual list and quarterly updates of the type and amount of those subsidies.

The Department has developed, in consultation with the Secretary of Agriculture, information on subsidies (as defined in section 702(h)(2) of the TAA) being provided either directly or indirectly by foreign governments on articles of quota cheese.

In the current quarter the Department has determined that the subsidy amounts have changed for several of the countries for which subsidies were identified in our annual subsidy list. The appendix to this notice lists the country, the subsidy program or programs, and the gross and net amount of each subsidy on which information is currently available.

The Department will incorporate additional programs which are found to constitute subsidies, and additional information on the subsidy programs listed, as the information is developed.

The Department encourages any person having information on foreign government subsidy programs which benefit articles of quota cheese to submit such information in writing to the Assistant Secretary for Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

This determination and notice are in accordance with section 702(a) of the TAA (19 U.S.C. 1202 note).

Dated: March 17, 1992.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

APPENDIX.—QUOTA CHEESE SUBSIDY PROGRAMS

Country	Program(s)	Gross [1] subsidy	Net [2] subsidy
Belgium	European Community (EC) Restitution Payments	80.4¢/lb.	80.4¢/lb.
Canada	Export Assistance on Certain Types of Cheese	30.3¢/lb.	30.3¢/lb.
Denmark	EC Restitution Payments	57.8¢/lb.	57.8¢/lb.
Finland	Export Subsidy	157.6¢/lb.	157.6¢/lb.
France	EC Restitution Payments	64.9¢/lb.	64.9¢/lb.

BILLING CODE 3510-DS-M

[C-570-816]

Preliminary Negative Countervailing Duty Determinations: Oscillating and Ceiling Fans From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Commerce.

EFFECTIVE DATE: March 23, 1992.

FOR FURTHER INFORMATION CONTACT: Ross Cotjanle or Beth Graham, Office of Countervailing Investigations, Import Administration, U.S. Department of Commerce, room B-099, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-3534 or 377-4105, respectively.

Preliminary Determination

Case History

Since the publication of the notice of initiation in the **Federal Register** (56 FR 57616, November 13, 1991), the following events have occurred.

On November 22, 1991, we issued a questionnaire to the Government of the People's Republic of China (GPRC) in Washington, DC, concerning petitioner's allegations.

On February 6, 1992, we received responses from the GPRC and twelve companies: Esteem Industries Ltd./Holmes Products Corp./HASM Manufacturing Co.; Durable Electrical Metal Factory Ltd./Parawind Ltd./Paragon Industries; Wuxi Electric Fan Factory; and Polarary Industrial Corporation/Paragon Industries (China); Gangkou Electric Fan Factory; Xinhui Electric Motor Factory; Nanhai Flying Fan Factory; Mei De Electric Holding Co.; Guangdong Machinery and Equipment Import/Export Corporation; and CEC Electrical Manufacturing (International) Company, Ltrd.; Shell Electric Manufacturing Co.; and Wing Tat Electric Manufacturing Co., Ltd.

On March 9, 1992, we were notified of an additional producer/exporter, Chung On Household Electric Appliance Co., Ltd. We received a response from this company on March 9, 1992.

Scope of Investigation

Imports covered by these investigations constitute two separate classes or kinds of merchandise: (1) Oscillating fans; and (2) Ceiling fans.

The merchandise subject to these investigations are oscillating fans and ceiling fans. Oscillating fans are electric fans that direct a flow of air using a fan blade/motor unit that pivots back and forth on a stationary base ("oscillates"). Oscillating fans incorporate a self contained electric motor of an output not exceeding 125 watts. Ceiling fans are electric fans that direct a downward and/or upward flow of air using a fanblade/motor unit. Ceiling fans incorporate a self-contained electric motor of an output not exceeding 125 watts. Ceiling fans are designed for permanent or semi-permanent installation.

Window fans, industrial oscillating fans, industrial ceiling fans, and commercial ventilator fans are not included within the scope of these investigations. Furthermore, industrial ceiling fans are defined as ceiling fans that meet six or more of the following criteria in any combination: A maximum speed of greater than 280 revolutions per minute (RPMs); a minimum air deliver capacity of 8000 cubic feet per minute (CFM); no reversible motor switch; controlled by wall-mounted electronic switch; no built-in motor controls; no docorative features; not light adaptable; fan blades greater than 52 inches in diameter; metal fan blades; downrod mounting only—no hugger mounting capability; three fan blades; fan blades mounted on top of motor housing; single-speed motor.

The Harmonized Tariff Schedule (HTS) subheading under which oscillating fans are classifiable is 8414.51.0090. The HTS subheading under which ceiling fans are classifiable is 8414.51.0030. Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Application of the CVD Law

In the petition filed in this investigation petitioner alleged that regardless of the nature of the PRC economy, the PRC fans sector operates substantially pursuant to market principles and that the CVD law should apply. In our notice of initiation, we stated that the Department must decide (1) whether the PRC fans sector does, in fact, operate as a market oriented industry; and (2) if so, whether the CVD law can be applied to this sector. The facts in the petition indicated a prevalence of private and private-like ownership in the PRC fans sector. Additionally, the petitioner provided evidence that the PRC fans producers procure inputs and market their output without government intervention. For these reasons, the Department concluded that it was appropriate to investigate whether the fans producers operated as a market oriented industry and, if so, whether fans producers in the PRC receive bounties or grants within the meaning of section 303 of the Act.

Since our decision to initiate, we have developed a test for antidumping proceedings involving nonmarket economy (NME) countries to determine when available information permits the foreign market value (FMV) to be calculated using the normal market economy methodologies for calculating FMV, pursuant to section 773(c)(1)(B). If available information permits the use of our normal market economy methodologies under that section, the Department considers the industry producing the subject merchandise to be a "Market Oriented Industry" (MOI). If an industry is an MOI, the Department has effectively determined that the prices and costs in the industry are sufficiently free of NME distortion so

that they may be used in the calculation of the FMV instead of surrogate values.

In this countervailing duty investigation, the petitioner has alleged that the PRC fans industry is operating as a market oriented industry. If the Department finds that the fans industry in the PRC is an MOI, then the prices and costs to the PRC producers will be considered accurate measures of value, as discussed above. If NME prices and costs are considered by the Department to be market-determined and not significantly influenced or distorted, directly or indirectly, by central government economic planning, then the concerns of the Court of Appeals in *Georgetown Steel* v. *United States*, 801 F.2d 1308 (Fed. Cir. 1986), do not arise. Therefore, the Department is free to apply the countervailing duty law to an MOI located within a NME.

If an MOI exists, thereby permitting dumping margins to be calculated using the NME producers' actual costs and prices, the United States industries would be left at a disadvantage if they were not able to seek protection from subsidies to that industry. Moreover, the NME government could affect the calculations through subsidization with impunity if the countervailing duty law did not apply. On the other hand, if an industry is determined to be nonmarket, so that the Department would have to value the factors of production in a surrogate country, subsidies to the NME producers become irrelevant—any AD Margin would not be calculated using NME prices potentially influenced by subsidies.

Therefore, the countervailing duty law may be applied to industries in nonmarket economy countries if the Department finds that the relevant industry is an MOI.

The test used to determine whether an MOI exists appear in the Department's Preliminary Determination of Sales at Less Than Fair Value: Sulfanilic Acid from the People's Republic of China ("Sulfanilic Acid"), which will soon be published in the **Federal Register**. As explained in that notice, the factors the Department will consider include:

- For merchandise under investigation, there must be virtually no government involvement in setting prices or amounts to be produced. For example, state-required production or allocation of production of the merchandise, whether for export or domestic consumption in the nonmarket economy country, would be an almost insuperable barrier to finding a market-oriented industry.
- The industry producing the merchandise under investigation should be characterized by private or collective ownership. There may be state-owned enterprises in the industry, but substantial state ownership would weigh heavily against finding a market-oriented industry.
- Market-determined prices must be paid for all significant inputs, whether material or non-material (*e.g.*, labor and overhead), and for all all-but-insignificant proportion of all the inputs accounting for the total value of the merchandise under investigation. For example, an input price will not be considered market-determined if the producers of the merchandise under investigation pay a state-set price for the input or if the input is supplied to the producers at government direction. Moreover, if there is any state-required production in the industry producing the input, the share of state-required production must be insignificant.

If these conditions are not met, the producers of the merchandise under investigation will be treated as nonmarket economy producers.

In applying these factors to this investigation, we preliminarily determine, based on the responses submitted in this proceeding, that there is no government involvement in setting the prices of ceiling or oscillating fans or the amounts to be produced. Additionally, we preliminarily determine, again based on the responses, that the fans industry is primarily characterized by private and collective ownership of the producers under investigation. Only two are state-owned enterprises.

With respect to the third factor, regarding the prices paid for inputs, respondents were asked to identify their significant inputs. Certain inputs (including those sources outside the PRC) they identified were: Aluminum, bearings, blades, capacitors, connectors, interest expenses, iron rods, lamps and lampholders, machinery and equipment, management, metal, motors and motor parts, moulds, packing materials, painting materials, plastics, plating materials, shipping expenses, steel, switches, tussles, copper/enamelled/steel wire, wood, and zinc alloy.

Respondents further indicated which of these significant inputs were sourced in the PRC. The responses indicate that most of the companies under investigation source significant inputs in the PRC. Furthermore, a review of these inputs indicates that PRC-sourced inputs may account for a significant proportion of the total value of the merchandise under investigation.

In order to determine whether the prices paid for PRC-sourced inputs were market-determined, we asked the government and the fans producers to describe the level of state involvement in the setting of those prices. We also asked whether there was state-required or "in-plan" production of the inputs.

Based on their responses, we have concluded that none of the producers under investigation pay state-set prices for their PRC-sourced inputs. Nor do they receive their inputs at government direction. According to the responses, the fans producers pay market-determined prices to their suppliers.

With respect to whether there is state-required production in the industries producing the inputs, the record is not clear. For example, the government response states that it "is not aware of any fan producers who use 'class-one' products as inputs. There is no in-plan production of fans or fan inputs. It is theoretically possible for fan input suppliers to have both in-plan and out-of-plan production, but the Government does not have information on particular suppliers." As it is the PRC government which directs which products are produced in-plan, the statement that in-plan production is theoretically possible would seem to indicate that there is in-plan production in the industry producing the inputs. Company responses generally indicated that none of the inputs sourced in the PRC were from in-plan production. They also state that they were unaware whether there was in-plan production of the inputs or if their suppliers had in-plan production. Certain companies stated that it was likely that some of their suppliers had in-plan production. For some of these companies, a significant input sourced in the PRC was steel, which they believed was produced in-plan and out-of-plan.

Based on information gathered by the Department, we have concluded that the amount of steel produced in-plan is not insignificant. Therefore, we determine that the price of this input is not market-determined. With respect to other significant inputs, we do not have sufficient information to determine whether there is in-plan production or the extent of in-plan production. However, beyond the question of whether there is in-plan production, we do not have sufficient evidence to determine that the prices paid for those inputs are market-determined. Consistent with the position of the Department in antidumping investigations of imports from nonmarket economy countries, "an assertion (that inputs are purchased at market-oriented prices), without sufficient documentary evidence, is not enough to establish market behavior." Such claims must be examined at verification. (See, Sulfanilic Acid and Preliminary Determination of Sales At Less than Fair Value: Certain Carbon Steel Butt-Weld Pipe Fittings from the People's Republic of China, 56 FR 66831, 66833.)

Therefore, we conclude that (1) the price of at least one significant input is not market-determined, (2) the record does not support a finding that the prices of other significant inputs are market-determined, and (3) the record does not support a finding that market-determined prices are paid for all but an insignificant proportion of all the inputs accounting for the total value of the merchandise under investigation. As a result, we preliminarily determine that the countervailing duty law cannot be applied to producers in the PRC of oscillating and ceiling fans.

Despite our preliminary determination, we are not rescinding the initiation of this investigation. Rather, because our determination is based on the particular facts in this case, the Department believes that the information used as the basis for its preliminary determination should be verified. It is especially important to clarify some of the information on the record and verify the accuracy of the data submitted in considering the application of the countervailing duty law to the PRC. Among the issues the Department intends to explore thoroughly at verification will be the market or non-market character of the inputs identified by respondents, the scope of the products that have in-plan production in the PRC, the proportion of total PRC production accounted for by the in-plan production, and documentary evidence which supports the assertion that inputs are purchased at market-oriented prices. An additional consideration of the Department in not terminating this case is to allow all interested parties to submit comments on the data in this proceeding.

Verification

In accordance with section 776(b) of the Act, we will verify the information used in making our final determination, which is due on or before June 1, 1992.

Public Comment

In accordance with 19 CFR 355.38, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on these preliminary determinations. Individuals who wish to request a hearing must submit such a request within ten days of the publication of this notice in the **Federal Register** to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B099, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. A hearing, if requested, will be held on May 18, 1992, at 2 p.m. at the U.S. Department of Commerce, room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Case and rebuttal briefs are due on May 8 and 14, 1992, respectively. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)) and 19 CFR 355.15.

Dated: March 16, 1992.

Alan M. Dunn,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[C-507-601]

Roasted In-Shell Pistachios From Iran; Rescission of Initiation of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of rescission of initiation of countervailing duty administrative review.

SUMMARY: The Department of Commerce ("the Department") is rescinding the initiation of countervailing duty administrative review on roasted in-shell pistachios from Iran, covering the period January 1, 1990 through December 31, 1990.

EFFECTIVE DATE: March 23, 1992.

FOR FURTHER INFORMATION CONTACT: Patricia W. Stroup or Michael Rollin, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On October 2, 1991, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administrative Review" (56 FR 49878) of the countervailing duty order on roasted in-shell pistachios from Iran (51 FR 35679; October 7, 1986). On October 31, 1991, the Rafsanjan Pistachio Cooperative, a respondent in this proceeding and a major exporter of the subject merchandise, requested that the Department conduct an administrative review of this order. We initiated the review, covering the period January 1, 1990 through December 31, 1990, on November 22, 1991 (56 FR 58878).

Conduct of Administrative Review

The Department conducts administrative reviews of countervailing duty orders for two purposes, either of which may be sufficient to justify the review. The primary purpose is to establish the correct duty to be finally assessed on imports during the period reviewed. In this case there were no imports due to the ban on most imports from Iran under Executive Order 12613, issued by President Reagan on October 29, 1987, reprinted in 50 U.S.C.A. 1701 (1991) and the regulations promulgated thereunder, 31 CFR 560 (1991). Therefore, the first purpose of an administrative review cannot be satisfied.

A secondary purpose of an administrative review is to establish a new cash deposit rate on future imports. Normally this action is a by-product of reviews of imports during the period reviewed. When there are no imports, the Department normally assumes that future imports will benefit from countervailable subsidies to roughly the same degree as past imports, and an administrative review is not necessary or justified. However, the Department also recognizes that when there are basic changes in the subsidy programs themselves, this assumption may not hold. If the implementation of such program-wide changes can be established and if the impact of these program-wide changes on the production or exportation of the subject merchandise can be quantified, even in the absence of exports to the United States, the Department may conduct a review to establish a new cash deposit rate for future entries. However, in this case there are several reasons why this secondary purpose of conducting a review cannot be satisfied.

First, the requestor has not specified which programs that existed during the investigation have been changed. The review must necessarily be focused on certain programs and the requestor must provide descriptions of these programs and the changes to them.

Second, there is no possibility of future imports due to the embargo. While program-wide changes are reviewed to establish cash deposit rates on future imports, the Department has previously done so on the belief that future imports are likely, or at least

reasonably possible. An embargo, such as this one, creates a unique situation in which future imports are not foreseeable. Therefore, a review would serve no purpose.

Third, verification is not likely to be possible, due to the nature of the present relationship between the United States and Iran. Yet, such verification would be essential in establishing and accepting any program-wide changes, particularly since no verification was possible during the investigation and we have no established body of information against which to measure alleged changes.

Rescission of Initiation of Administrative Review

For these reasons, we are rescinding our initiation of the administrative review of the countervailing duty order on roasted in-shell pistachios from Iran, for the period January 1, 1990 through December 31, 1990, and have determined that the Department will not conduct an administrative review for that period. Further, the Department will not consider conducting reviews of later periods as long as the trade embargo remains in effect.

Dated: March 16, 1992.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

[Modification No. 1 to Permit No. 727]

Marine Mammals; Modification of Permit; Singapore Zoological Gardens (P354A)

Notice is hereby given that pursuant to the provisions of § 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), Public Display Permit No. 727 issued to Singapore Zoological Gardens, 80 Mandai Lake Road, Singapore, 2572 on April 4, 1991 (56 FR 14499) is modified as follows:

Section B.6, first sentence is changed to read:

6. The authority to acquire the marine mammals authorized shall extend from date of issuance through April 30, 1993.

All conditions currently contained in the Permit remain in effect.

This modification becomes effective on March 23, 1992.

Documents submitted in connection with the above modification are available for review by appointment in the following offices:

Office of Protected Resources, National Marine Fisheries Service, NOAA, 1335 East West Highway, room 7324, Silver Spring, MD 20910 (301/713-2289); and

Director, Southwest Region, National Marine Fisheries Service, NOAA, 501 West Ocean Blvd., Long Beach, CA 90802 (310/980-4016).

Dated: March 16, 1992.

Charles Karnella,

Deputy Director, Office of Protected Resources.

BILLING CODE 3510-22-M

COMMODITY FUTURES TRADING COMMISSION

Advisory Committee on CFTC-State Corporation; Eighth Renewal

The Commodity Futures Trading Commission has determined to renew again for a period of two years its advisory committee designated as the Commission's "Advisory Committee on CFTC-State Corporation." As required by section 14(a)(2)(A) of the Federal Advisory Committee Act, 5 U.S.C. app. 2, section 14(a)(2)(A), and 41 CFR 101-6.1007 and 101.6.1029, the Commission has consulted with the Committee Management Secretariat of the General Service Administration, and the Commission certifies that the renewal of the advisory committee is in the public interest in connection with duties imposed on the Commission by the Commodity Exchange Act, 7 U.S.C. 1 *et seq.*, as amended.

The objectives and scope of activities of the Advisory Committee on CFTC-State Cooperation are to conduct public meetings and submit reports and recommendations on matters of joint concern to the states and the Commission arising under the Commodity Exchange Act regarding regulation of commodity transactions and related activities.

Commissioner Fowler C. West serves as Chairman and Designated Federal Official of the Advisory Committee on CFTC-State Cooperation. The Advisory Committee's other members include state officials who have had experience in the commodities, securities, law enforcement and consumer protection fields, and representatives of the industry's only registered futures association, an industry association and a private brokerage firm.

Interested persons may obtain information or make comments by writing to the Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581

Issued in Washington, DC this 17th day of March, 1992 by the Commission.

Jean A. Webb,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Department of the Navy

Planning and Steering Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. 2), notice is hereby given that the Planning and Steering Advisory Committee will meet April 6, 1992, from 9:00 am to 3:30 pm, at the Center for Naval Analyses, 4401 Ford Avenue, Alexandria, Virginia. This session will be closed to the public.

The purpose of this meeting is to discuss topics relevant to SSBN security. The entire agenda will consist of classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that all sessions of the meeting shall be closed to the public because they concern matters listed in 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting, contact: LT J. E. Williams (OP-213E), Pentagon, room 4D534, Washington, DC 20350, Telephone Number: (703) 697-8887.

Dated: March 13, 1992.

Wayne T. Baucino

Lieutenant, JAGC U.S. Naval Reserve, Alternate Federal Register Liaison Officer.

BILLING CODE 3810-AE-F

DEPARTMENT OF ENERGY

Financial Assistance Award; Intent To Award Grant to Light Sculpting, Inc.

AGENCY: U.S. Department of Energy.

ACTION: Notice of unsolicited financial assistance award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.6(a)(2), it is making a discretionary financial assistance award based on acceptance of an unsolicited application meeting the criteria of 10 CFR 600.14(e)(1) to Light Sculpting, Inc. under Grant No. DE-FG01-92CE15543. The proposed grant will provide Government funding in the estimated amount of $99,583 for Light Sculpting, Inc. to develop a more reliable and more marketable version of a patented system for rapid fabrication of prototypes by irradiation of photopolymers. The indirect energy savings are expected to be substantial as it offers the potential for producing parts directly, rather than going through multiple machine operations, thereby reducing energy consumption in the cost of production.

The grant is being awarded to Light Sculpting, Inc. on an unsolicited basis, because it is a unique energy saving technology. It has been recommended by the National Institute of Standards and Technology (NIST). Dr. Efrem Fudim will be the principal investigator. He has spent twenty-five years in the field of rapid prototyping and design-controlled fabrication, analog circuits, and pneumatic controls. In accordance with 10 CFR 600.14(e)(1), it has been determined that this project represents a unique idea that is not eligible for financial assistance under a recent, current, or planned solicitation. The Energy-Related Inventions Program (ERIP) has been structured, since its beginning in 1975, to operate without competitive solicitations, because the legislation directs ERIP to provide support for worthy ideas submitted by the public. The proposed technology has a strong possibility of allowing for future reductions in the energy consumption of the United States. The program has never issued and has no plans to issue a competitive solicitation.

The anticipated term of the proposed grant shall be 24 months from the effective date of award.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Placement and Administration, ATTN: John Windish, PR-322.2, 1000 Independence Avenue, SW., Washington, DC 20585.

Thomas S. Keefe,

Director, Operations Division "B", Office of Placement and Administration.

[FR Doc. 92-6666 Filed 3-20-92; 8:45 am]

BILLING CODE 6450-01-M

Richland Field Office; Issuance of Grant Award

AGENCY: U.S. Department of Energy, Richland Field Office.

ACTION: Notice of noncompetitive financial assistance award.

SUMMARY: The Department of Energy, Richland Field Office, announces that pursuant to paragraph A of 10 CFR 600.7(b)(2)(i), it intends to issue a noncompetitive grant award to the Washington State Department of Health. The award is planned for a two (2) year project cycle, consisting to two (2) separately funded one (1) year budget periods. The initial budget period is estimated at $500,000.

FOR FURTHER INFORMATION CONTACT: Melanie P. Fletcher, U.S. Department of Energy, Richland Field Office, P.O. Box 550, Richland, Washington 99352, Telephone: (509) 376-4828.

SUPPLEMENTARY INFORMATION:

Grant Award Number: DE-FG06-92RL12455.

Scope of Project: The proposed financial assistance award is a grant to the Washington State Department of Health to fund the Hanford Environmental Radiation Oversight Program. The Hanford Environmental Radiation Oversight Program consists of collection, analysis, compilation, evaluation and reporting of environmental radiation baseline samples, oversight of the Richland environmental surveillance program, environmental investigations, and long term planning. The Washington State Department of Community Development is currently the recipient of a grant for Emergency Preparedness and Environmental Monitoring for the Hanford Site. In a letter dated December 11, 1991, the Washington State Department of Health requested that the Department of Energy separate the tasks into two autonomous grants—one for the emergency preparedness activities with the Department of Community Development, and another for the environmental oversight activities with the Department of Health. This would minimize excessive administrative burdens, and increase the cost effectiveness of the separate activities being performed. As the Washington State Department of Health is already performing the environmental oversight activities as stipulated by state regulation, competition is not appropriate and would have an adverse effect on the continuity of this activity.

Dated: March 12, 1992.

Marji W. Parker,

Acting Director, Procurement Division, Richland Field Office.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[P-2458-010, 2572-006, 2520-010 and 2634-005]

Application Filed With the Commission

March 17, 1992.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. *Type of Application:* Transfers of License.

b. *Projects Nos.:* 2458-010, 2572-006, 2520-010 and 2634-005.

c. *Date Filed:* March 12, 1992.

d. *Applicant:* Great Northern Nekoosa Corporation, Great Northern Paper Inc.

e. *Name of Projects:* Penobscot Mills Project, Ripogenus Project, Mattaceunk Project, Great Northern Storage Projects.

f. *Location:* On the Penobscot River and the West Branch of the Penobscot River in Aroostook, Penobscot, and Piscataquis Counties, Maine.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Thomas E. Mark, Esq., LeBoeuf, Lamb, Leiby & MacRae, 520 Madison Ave., New York, New York 10022, (212) 715-8000.

i. *FERC Contact:* Robert Bell (202) 219-2806.

j. *Comment Date:* April 16, 1992.

k. *Description of Project:* Licenses were issued to Great Northern Nekoosa Paper Corporation (Licensee), to operate and maintain the Penobscot Mills, Ripogenus, Mattaceunk, and Great Northern Storage Projects Nos. 2458, 2572, 2520, and 2634, respectively. The Licensee intends to transfer the licenses to the Great Northern Paper Corporation (Transferee), to facilitate the continued operation, maintenance, and relicensing of the projects. The Transferee intends to take over the project and agrees to accept the terms and conditions of the existing licenses as if it were the original licensee.

The transfer applications were filed within five years of the expiration of the licenses for the Penobscot Mills Project No. 2458 and the Ripogenus Project No. 2572, which are the subject of pending relicensing applications. In Hydroelectric Relicensing Regulations Under the Federal Power Act (54 FR 23,756; FERC Statutes and Regulations, Regulations Preambles 1986-1990 ¶ 30,854 at p. 31,437), the Commission declined to forbid license transfers during the last five years of an existing license, and instead indicated that it

would scrutinize all such transfer requests to determine if the transfer's primary purpose was to give the transferee an advantage in relicensing (*id.* at p 31,438 n. 318). The transfers would lead to the substitution of the transferee for the transferor as the applicant in the subject relicensing proceedings.

I. This notice also consists of the following standard paragraphs: B and C.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS," "RECOMMENDATIONS FOR TERMS AND CONDITIONS," "NOTICE OF INTENT TO FILE COMPETING APPLICATION," "COMPETING APPLICATIONS," "PROTEST" or "MOTION TO INTERVENE," as applicable, and the project number of the particular application to which the filing is in response. Any of these document must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. An additional copy must be sent to: the Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, room 1027–UPC, at the above address. A copy of any notice of intent, competing application, or motion to intervene must also be served upon each representative of the applicant specified in the particular application.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. JD92–04474T Colorado–3 Amendment]

State of Colorado; NGPA Notice of Determination by Jurisdictional Agency Designating Tight Formation

March 16, 1992.

Take notice that on March 11, 1992, the Oil and Gas Conservation Commission of the State of Colorado (Colorado), submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that a portion of the Niobrara Formation in Yuma County, Colorado, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The geographical area coverd by Colorado's determination, which was previously excluded from tight formation designation by the Commission in Order No. 137, is described as follows:

Township 3 North, Range 46 West, 6th P.M.
Section 6: All
Township 4 North, Range 46 West, 6th P.M.
Sections 8, 16, 17, 20, 21, 29 through 32: All

The notice of determination also contains Colorado's findings that the reference portion of the Niobrara Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

[Docket No. CI87–736–004, et al]

Chevron Natural Gas Services, Inc., et al; Applications for Extension of Blanket Limited-Term Certificates With Pregranted Abandonment [1]

March 10, 1992.

Take notice that each Applicant listed on the Appendix hereto filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for extension of its blanket limited-term certificate with pregranted abandonment authorizing sales for resale in interstate commerce previously issued by the Commission for a term expiring March 31, 1992, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before March 23, 1992, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be baken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell

Secretary.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

APPENDIX

Docket No.	Date filed	Applicant
CI87–736–004	3–6–92	Chevron Natural Gas Services, Inc., P.O. Box 3725, Houston, Texas 77253–3725.
CI87–883–004 [1]	3–6–92	Meridan Oil Trading Inc., 2919 Allen Parkway, P.O. Box 4239, Houston, Texas 77210.
CI90–76–002	3–6–92	Kern River Gas Supply Corporation, c/o Tenneco Gas, P.O. Box 2511, Houston, Texas 77252.

[1] Applicant also requests that its certificate be amended to include authority to make sales for resale in interstate commerce of imported natural gas and natural gas purchased from non-first sellers such as intrastate pipelines and local distribution companies.

[Docket No. CI89–382–003]

K N Gas Marketing, Inc.; Application for Extension of a Blanket Limited-Term Certificate With Pregranted Abandonment

March 17, 1992

Take notice that on March 16, 1992, K N Gas Marketing, Inc. of P. O. Box 281304, Lakewood, Colorado 80228–9304, filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for extension of its blanket limited-term certificate with pregranted abandonment authorizing sales for resale in interstate commerce previously issued by the Commission for a term expiring March 31, 1992, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Any person desiring to be heard or to make any protest with reference to said application should on or before March 24, 1992, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for K N Gas Marketing, Inc. to appear or to be represented at the hearing.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

Office of Fossil Energy

National Petroleum Council; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: National Petroleum Council (NPC).
Date and Time: Thursday, April 9, 1992, at 9 a.m.
Place: The Mayflower Hotel, Colonial Room, 1127 Connecticut Avenue, NW., Washington, DC.
Contact: Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE–1), Washington, DC 20585, Telephone: 202/586–3867.
Purpose: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industry.

Tentative Agenda:

—Call to order by Ray L. Hunt, Chairman, National Petroleum Council.
—Remarks by the Honorable James D. Watkins, Secretary of Energy.
—Progress report of the NPC Committee on Refining Kenneth T. Derr, Chairman.
—Progress Report of the NPC Committee on Natural Gas, Frank H. Richardson, Chairman.
—Administrative matters.
—Discussion of any other business properly brought before the National Petroleum Council.
—Public comment (10-minute rule).
—Adjournment.

Public Participation: The meeting is open to the public. The chairperson of the Council is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Any member of the public who wishes to file a written satement with the Council will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral satements pertaining to agenda items should contact Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least five days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Transcripts: Available for public review and copying at the Public Reading Room, room IE–190, Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on March 13, 1992.

Marcia Morris,

Deputy Advisory Committee, Management Officer.

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS–51790; FRL 4054–6]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). This notice announces receipt of 103 such PMNs and provides a summary of each.

DATES: Close of review periods:

P 92-605

Manufacturer. Novo Nordisk BioIndustrials, Inc.

Chemical. (G) A sporulation-deficient *Bacillus* species was genetically modified using recombinant DNA techniques to contain genes for the enhanced production of a subtilisin enzyme and for resistance to antibiotics. The subtilisin gene was obtained from a strain of a *Bacillus* species and introduced into the host using recombinant, intergeneric plasmids. Plasmid vector DNA is retained in the PMN microorganism.

Use/Production. (G) The PMN microorganism will be used for the biosynthesis of subtilisin an enzyme for use in detergents. Prod. range: Confidential.

Toxicity Data. Pathogenicity tests were conducted in mice with the PMN

and unmodified recipient microorganisms. These vegetative microbial cells were nonpathogenic when they were administered to mice at three dose levels via the intraperitoneal route. The LD50 for bothe the unmodified recipient and PMN microorganisms was $> 10^9$ cells per kilogram of body weight.

Exposure. Workers in the production areas who maintain and process cultures of the recombinant microorganism.

Environmental Release/Disposal. Production and processing: live cells are contained in a sealed fermentation vessel system during the manufacturing process. The recombinant microorganism is separated from the enzyme product and is inactivated prior to disposal. Detectible, viable microbial cells are not expected to be present in the enzyme concentrate or formulations. Disposal of cell waste: land application.

EXPORT-IMPORT BANK OF THE U.S.

[Public Notice 16]

Agency Forms Submitted for OMB Review

AGENCY: Export-Import Bank of the United States.

ACTION: In accordance with the provisions of the Paperwork Reduction Act of 1980, Eximbank has submitted an application to be used under the Bank's medium and long term loan and guarantee programs.

PURPOSE: The proposed application is to be used by applicants when applying for Eximbank's services under its medium and long term loan and guarantee programs. The application will serve as a mechanism by which Eximbank can evaluate creditworthiness of applicants, to find reasonable assurance of repayment, and to assure that relevant statutory programs and requirements are met.

SUMMARY: The following summarizes the information collection proposal submitted to OMB.

(1) *Type of request:* extension.
(2) *Number of forms submitted:* one.
(3) *Form Number:* EIB 87–14 (Rev.).
(4) *Title of information collection:* Medium- and Long-Term Export Loan and Guarantee Application.
(5) *Frequency of use:* Submission of applications.
(6) *Respondents:* Any U.S. or foreign bank, other financial institution, other responsible party including the exporter or creditworthy borrowers in a country eligible for Eximbank assistance.
(7) *Estimated total number of annual responses:* 500.
(8) *Estimated total number of hours needed to fill out the form:* 250. Section 3504(h) of Public Law 96–511 does not apply.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed application may be obtained from Helene H. Walt, Agency Clearance Officer, (202) 566–8111. Comments and questions should be directed to Lin Liu, Office of Management and Budget, Information and Regulatory Affairs, room, 3235, New Executive Office Building, Washington, DC 20503, (202) 395–7340. All comments should be submitted within two weeks of this notice; if you intend to submit comments but are unable to meet this deadline, please advise by telephone that comments will be submitted late.

Dated: March 9, 1992.

Helene H. Walt,

Agency Clearance Officer.

BILLING CODE 6690-01-M

FEDERAL MARITIME COMMISSION

Inter-American Discussion; et al., Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203–011369.
Title: Inter-American Discussion Agreement.
Parties: Inter-American Freight Conference, Inter-American Freight Conference Puerto Rico and U.S. Virgin Islands Area, Inter-American Freight Conference Pacific Coast Area, Inter-American Freight Conference Area River Plate/Puerto Rico and U.S. Virgin Islands/River Plate, A. Bottacchi S.A. de Navegacion C.F.I. el., A/S/ Ivarans Rederi, d/b/a/ Ivaran Lines, Companhia Maritima Nacional, Companhia de Navegacao Maritima Netumar, American Transport Lines, Inc., CMB Transport N.V., Companhia de Navegacao Lloyd Brasileiro, Empresa Lineas Maritimas Argentinas Sociedad Anonima (ELMA S/A), Empresa de Navegacao Alianca S.A. Hamburg-Sudamerikanische Dampfschifffahrts-Gesellschaft Eggert & Amsinck (Columbus Line) Nedlloyd Lijnen B.V., Transroll/Sea-Land, Frota Amazonica S.A., Maruba S.C.A., Norsul Internacional S.A.

The proposed Agreement would authorize the parties to meet, discuss and agree on rates and charges in the trade between the United States (including Puerto Rico and the U.S. Virgin Islands) and ports in Argentina, Brazil, Paraguay and Uruguay. The parties have no obligation under this Agreement, other than voluntary, to adhere to any consensus or agreement reached.

Agreement No.: 224–200634.
Title: Tampa Port Authority/OdessAmerica Cruise Company Terminal Agreement.
Parties: Tampa Port Authority, OdessAmerica Cruise Company.
Synopsis: The Agreement permits the Tampa Port Authority to make its passenger terminal facilities available to

OdessAmerica Cruise Company on a non-exclusive basis and to provide preferential berthing during certain periods.

Dated: March 17, 1992.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

[Docket No. 92-11]

USA International Procurement Agency, Inc. v. Seaport Shipping Agency, Inc.; Filing of Complaint and Assignment

Notice is given that a complaint filed by USA International Procurement Agency, Inc. ("Complainant") against Seaport Shipping Agency, Inc., d/b/a Seaport Shipping Lines ("Respondent") was served March 16, 1992. Complainant alleges that Respondent engaged in violations of section 10(d)(1) of the Shipping Act of 1984, 46 U.S.C. app. Section 1709(d)(1), by failing to properly handle Complainant's cargo in a responsible manner or at a price which it had represented itself to be capable of doing, on a shipment of office furniture and supplies from Baltimore, Maryland to Bamako, Mali, via Antwerp on April 29, 1991.

This proceeding has been assigned to Administrative Law Judge Charles E. Morgan ("Presiding Officer"). Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the Presiding Officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the Presiding Officer in this proceeding shall be issued by March 16, 1993, and the final decision of the Commission shall be issued by July 14, 1993.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Concord EFS, Inc.; Formations of, Acquisitions by, and Mergers of Bank Holding Companies; and Acquisitions of Nonbanking Companies

The companies listed in this notice have applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed companies have also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The applications are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 13, 1992.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Concord EFS, Inc., Memphis, Tennessee; to become a bank holding company by acquiring 100 percent of the voting shares of EFS National Bank, Memphis, Tennessee, a *de novo* bank.

In connection with this application, Applicant also proposes to acquire Concord Computing Corporation, Elk Grove Village, Illinois, and thereby engage *de novo* in providing check authorization and collection services, pursuant to §§ 225.25(b)(7) of the Board's Regulation Y. Applicant currently engages in these activities through a retail division.

2. Concord EFS, Inc., Memphis, Tennessee; to retain Network EFT, Inc., Elk Grove Village, Illinois, and thereby engage in data processing, specifically electronic funds transfer services, pursuant to § 225.25(b)(7) of the Board's Regulation Y.

3. Concord EFS, Inc., Memphis, Tennessee; to acquire VMT, Inc., Memphis, Tennessee, and thereby continue to engage in the provision of data transmission hardware in connection with its customers' transaction processing networks, pursuant to § 225.25(b)(7) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, March 16, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Integra Financial Corp.; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 17, 1992.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. Integra Financial Corporation, Pittsburgh, Pennsylvania; to acquire Landmark Savings Association, Pittsburgh, Pennsylvania, and thereby indirectly acquire Landmark Savings Association, Pittsburgh, Pennsylvania, and thereby engage in deposit taking activities and lending and other activities pursuant to § 225.25(b)(9) of the Board's Regulation Y; Landmark Mortgage Services, Inc., Pittsburgh, Pennsylvania, and thereby engage in conducting a mortgage origination business pursuant to § 225.25(b)(1) of the Board's Regulation Y; and Landmark Tri-Rivers Insurance Agency, Inc., Pittsburgh, Pennsylvania, and thereby engage in selling annuity and mutual fund products on a commission basis.

Board of Governors of the Federal Reserve System, March 17, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Joel W. Kovner; Change in Bank Control; Acquisition of Shares of Banks or Bank Holding Companies

The notificant listed below has applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notice is available for immediate inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for the notice or to the offices of the Board of Governors. Comments must be received not later than April 9, 1992.

A. Federal Reserve Bank of San Francisco (Kenneth R. Binning, Director, Bank Holding Company) 101 Market Street, San Francisco, California 94105:

1. Joel W. Kovner, Pacific Palisades, California; to acquire up to 24.9 percent of the voting shares of Professional Bancorp, Inc., Santa Monica, California, and thereby indirectly acquire First Professional Bank, N.A., Santa Monica, California.

Board of Governors of the Federal Reserve System, March 16, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

GENERAL ACCOUNTING OFFICE

Federal Accounting Standards Advisory Board; Meeting

AGENCY: General Accounting Office.

ACTION: Notice.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. No. 92-463), as amended, notice is hereby given that a two-day meeting of the Federal Accounting Standards Advisory Board will be held on Thursday, April 9, 1992 and Friday, April 10, 1992, from 9 a.m. to 4 p.m. in room 7313 of the General Accounting Office, 441 G St., NW., Washington, DC.

The agenda for the meeting will consist of a review of the minutes of the March 18-19 meeting, a review of an exposure draft on Accounting for Tangible Property Other Than Long Term Fixed Assets of the Federal Government, review of an exposure draft on Uses and Objectives of Federal Accounting, a discussion on issues and options for unfunded liabilities, and a review of an analysis of comments on the exposure draft on Financial Resources, Funded Liabilities, and Net Financial Resources of Federal Entities. We advise that other items may be added to the agenda; interested parties should contact the Staff Director for more specific information and to confirm the date of the meeting.

Any interested person may attend the meeting as an observer. Board discussions and reviews are open to the public.

FOR FURTHER INFORMATION CONTACT: Ronald S. Young, Staff Director, 401 F St., NW., room 302, Washington, DC 20001, or call (202) 504-3336.

Authority: Federal Advisory Committee Act. Pub. L. No. 92-463, Section 10(a)(2), 86 Stat. 770, 774 (1972) (current version at 5 U.S.C. app. section 10(a)(2) (1988); 41 CFR 101-6.1015 (1990).

Dated: March 17, 1992.

Ronald S. Young,

Staff Director.

BILLING CODE 1610-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Health Care Policy and Research

Meetings

In accordance with section 10(a) of the Federal Advisory Committee Act (5 U.S.C. appendix 2), announcement is made of the following advisory subcommittees scheduled to meet during the month of March 1992:

Name: Consumers Guide to The Americans with Disabilities Act Advisory Subcommittee.

Dates and Times: March 23, 1992, 8:30 a.m.,

Place: Marriott Residence Inn, Charles Room, 7335 Wisconsin Avenue, Bethesda, Maryland 20814.

This meeting will be closed to the public.

Purpose: The Subcommittee's charge is to provide, on behalf of the Health Care Policy and Research Contracts Review Committee, advice and recommendations to the Secretary and to the Administrator, Agency for Health Care Policy and Research (AHCPR), regarding the scientifc and technical merit of contract proposals submitted in response to a specific Request for Proposal. The purpose of this contract is to develop a coordinated, computer based system to determine the rights and responsibilites of the disabled and the health care provider in meeting the requirements of The Americans with Disabilities Act (effective January 1992). Health care delivery questions most important to the disabled community are to be answered during Phase I of the research followed by the development of a prototype for retrieval of the inforamtion. The primary care practitioner will be the focus of defining the provider's responsibilities in determining whether the Act is applicable to a patient.

Name: NMES Data Support Advisory Subcommittee.

Dates and Times: March 25, 1992, 8:30 a.m.

Place: Marriott Residence Inn, Charles Room, 7335 Wisconsin Avenue, Bethesda, Maryland 20814.

This meeting will be closed to the public.

Purpose: The Subcommittee's charge is to provide, on behalf of the Health Care Policy and Research Contracts Review Committee, advice and recommendations to the Secretary and to the Administrator, AHCPR, regarding the scientifc and technical merit of contract proposals submitted in response to a specific Request for Proposal. The purpose of this contract is to provide timely and efficient data base management and computer programming which shall include: Econometric analyses; microsimulation moodeling and complex survey statistics; computer-related consulting and technical assistance; editorial and graphics services. This contract is designed to provide support of the data preparation, dissemination, and analysis activities in the Division of Medical Expenditure Studies, Center for Genreal Health Services Intramural Research, AHCPR.

Agenda: The session of each Subcommittee will be devoted entirely to the technical review and evaluation of contract proposals submitted in response to specific Requests for Proposals. The Administrator, AHCPR, has made a formal determination that these meetings will not be open to the public. This is necessary to protect the free exchange of views and avoid undue interference with Committee and Department operations, and safeguard confidential proprietary information and personal information concerning individuals associated with the proposals that may be revealed during the sessions. This is in accordance with section 10(d) of the Federal Advisory Committee Act, 5 U.S.C. appendix 2, Department regulations, 45 CFR 11.5(a)(6), and procurement regulations, 48 CFR 315.604(d).

Anyone wishing to obtain information regarding these meetings should contact Karen Harris, Office of Management, Management Systems and Services Branch.

Agency for Health Care Policy and Research, Executive Office Center, 2101 E. Jefferson Street, suite 601, Rockville, Maryland 20852

Agenda items are subject to change as priorities dictate.

Note: Due to unforseen circumstances, arrangements for both the March 23rd and March 25th meetings are delayed. Consequently, more timely notification was not possible.

Dated: March 10, 1992.

J. Jarrett Clinton,

Administrator, AHCPR.

BILLING CODE 4160-90-M

Food and Drug Administration

[Docket No. 92F-0053]

Hoechst Celanese Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Hoechst Celanese Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of acesulfame potassium as a nonnutritive sweetener in yogurt and yogurt-type products, in frozen and refrigerated desserts, and in syrups and toppings.

FOR FURTHER INFORMATION CONTACT: Patricia A. Hansen, Center for Food Safety and Applied Nutrition (HFF-333), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-254-9523.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5) (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 2A4311) has been filed by Hoechst Celanese Corp., Route 202-206 North, Somerville, NJ 08876. The petition proposes that the food additive regulations in § 172.800 *Acesulfame potassium* (21 CFR 172.800) be amended to provide for the safe use of acesulfame potassium as a nonnutritive sweetener in yogurt and yogurt-type products, in frozen and refrigerated desserts, and in syrups and toppings.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: March 16, 1992.

[Docket No. 92F-0100]

PCI Membrane Systems, Ltd.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that PCI Membrane Systems, Ltd., has filed a petition proposing that the food additive regulations be amended to provide for the safe use of the reaction product of 1,3,5-benzenetricarbonyl trichloride with piperazine and 1,2-diaminoethane as a food-contact layer of reverse osmosis membranes.

FOR FURTHER INFORMATION CONTACT: Julius Smith, Center for Food Safety and Applied Nutrition (HHF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 020-254-9500.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5) (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 9B4157) has been filed by PCI Membrane Systems, Ltd., Laverstoke Mill, Whitechurch, Hampshire RG28 7NR, England. The petition proposes to amend the food additive regulations to provide for the safe use of the reaction product of 1,3,5-benzenetricarbonyl trichloride with piperazine and 1, 2-diaminoethane as a food-contact layer of reverse osmosis membranes.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: March 16, 1992.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Program Announcement for the Disadvantaged Health Professions Faculty Loan Repayment Program

The Health Resources and Services Administration (HRSA) announces that applications for fiscal year (FY) 1992 for the Disadvantaged Health Professions Faculty Loan Repayment Program are now being accepted under section 761 of the Public Health Service Act (The Act), as added by The Disadvantaged Minority Health Improvement Act of 1990, Public Law 101-527.

Approximately $975,000 is available in FY 1992 for competing applications for the Disadvantaged Health Professions Faculty Loan Repayment Program. It is expected that 30 awards averaging $32,000 ($16,000 per year for two years) will be supported with these funds.

Purpose

The purpose of the Disadvantaged Health Professions Faculty Loan Repayment Program (FLRP) is to attract and retain disadvantaged health professions faculty members for accredited health professions schools. The FLRP is directed at those individuals available to serve immediately or within a short time as full-time faculty members.

Eligible Individuals

Individuals from disadvantaged backgrounds are eligible to compete for participation in the FLRP if they:

1. Have a degree in medicine, osteopathic medicine, dentistry, nursing, pharmacy, podiatric medicine, optmetry, veterinary medicine, or public health or from a school that offers a graduate program in clinical psychology; or

2. Are enrolled in an approved graduate training program in one of the health professions listed above; or

3. Are enrolled as a full-time student in the final year or health professionals training, leading to a degree from an eligible school.

Prior to submitting an application, eligible individuals must sign a contract as prescribed by the Secretary, setting forth the terms and conditions of the FLRP. This contract requires the individual to also have entered into a contract with an eligible school to serve as a full-time member of the faculty, as determined by the school, for not less than two years, whereby the school agrees to pay a sum (in addition to faculty salary) equal to that paid by the Secretary towards the repayment of the applicant's health professions educational loans.

Eligible Schools

Eligible health professions schools are accredited public or nonprofit private schools of medicine, osteopathic medicine, denistry, pharmacy, podiatric medicine, optometry, veterinary medicine, public health, or schools that offer a graduate program in clinical psychology as defined in section 701(4) of the Act, and which are located in States as defined in section 701(11) of the Act, and which are accredited as provided in section 701(5) of the Act, and schools of nursing as defined in section 853 of the Act.

Provisions of the Loan Repayment Program

Section 761 authorizes the Secretary to repay up to $20,000 of the principal and interest of a participant's educational loans, but not to exceed 50 percent of the amounts due on such loans for such year for each year of eligible faculty service.

The school is required, for each such year, to make payments of principal and interest due, in an amount equal to the amount of payment made by the Secretary for that year. These payments must be in addition to the faculty salary the participant otherwise would receive.

HRSA will pay on behalf of the participant the principal due for that year and interest on educational loans for the following expenses:

1. Tuition expenses;

2. All other reasonable educational expenses such as fee, books, supplies, educational equipment and materials required by the school, and incurred by the applicant;

Reasonable living expenses, as determined by the Secretary; and

4. Partial payments of the increased Federal income tax liability caused by the FLRP's payments and considered to be "other income," if the recipient requests such assistance.

Prior to entering into an agreement for repayment of loans, the statue requires the Secretary to obtain satisfactory evidence of the existence and reasonableness of the individual's educational loans, including a copy of the written loan agreement establishing the loan, and a notarized statement that the copy is a true copy of the loan agreement.

Waiver Provision

In the event of undue financial hardship to a school, the school, may obtain from the Secretary a waiver of its share of payments while the participant is serving under the terms of the contract. For purposes of this program, "undue financial hardship" means a situation where the school experiences a net loss as evidenced by documentation of "undue financial hardship", as seen by the individual school, on the basis of the school's particular financial status such as budget cutbacks. Decisions will be made on a case-by-case basis, as supported by the school's documentation such as: (1) The most current certified public accounting audit; and (2) the Balance Sheet and Statement of Income and Expenses for the last three years.

If the Secretary waives the school's payment requirement, the amount of the Federal loan repayment will not be subject to the 50 percent limit per year described above, but cannot exceed the $20,000 repayment limit applicable to the Secretary. The participant must pay that portion of loan payment due which is not covered.

The following Definitions, Program Requirements, Review Criteria and Funding Preference were established in FY 1991 after public comment dated October 2, 1991, at 56 FR 49896, and Administration is extending them in FY 1992.

Definitions

For purposes of the FLRP in FY 1992, an "Individual from a Disadvantaged Background" is defined as a 42 CFR 57.1804, as one who:

1. Comes from an environment that has inhibited the individual from obtaining the knowledge, skill, and abilities required to enroll in and graduate from a health professions school, or from a program providing education or training in an allied health profession; or

2. Comes from a family with an annual income below a level based on low income thresholds according to a family size published by the U.S. Bureau of the Census, adjusted annually for changes in the Consumer Price Index, and adjusted by the Secretary for use in all health professions programs. The Secretary will periodically publish these income levels in the Federal Register. The following income figures determine what constitutes a low income family for purposes of the Faculty Loan Repayment Program for FY 1992.

Size of parents' family [1]	Income level [2]
1	$9,100
2	11,800
3	14,100
4	18,000
5	21,300
6 or more	23,900

[1] Includes only dependents listed on Federal income tax forms.

[2] Adjusted gross income for calendar year 1991, rounded to $100.

The term "Living expenses" means the costs of room and board, transportation and commuting costs, and other costs incurred during an individual's attendance at a health professions school, as estimated each year by the school as part of the school's standard student budget. (National Health Service Corps Loan Repayment Program, 42 CFR 62.22).

The term "Reasonable educational expenses and living expenses" means the costs of those educational and living expenses which are equal to or less than the sum of the school's estimated standard student budgets for educational and living expenses for the degree program and for the year(s) during which the Program participant is/was enrolled in the school. (National Health Service Corps Loan Repayment Program, 42 CFR 62.22).

The term "Unserved Obligation Penalty" means the amount equal to the number of months of obligated service that were not completed by an individual, multiplied by $1,000, except that in any case in which the individual fails to serve 1 year, the unserved obligation penalty shall be equal to the full period of obligated service multiplied by $1,000. (section 338E of the Act). See "Breach of Contract" section below.

Program Requirements

The following requirements will be applied to the applicant and to the school.

The Applicant

The applicant will be required to do the following:

1. Submit a completed application, including the applicant's contract with an eligible school to serve as a full-time faculty member for not less than two years;

2. Provide evidence that the applicant has completely satisfied any other obligation for health professional service which is owed under an agreement with the Federal Government, State Government, or other entity prior to beginning the period of service under this program;

3. Certify that the applicant is not delinquent on any amounts which are owed to the Federal Government; and

4. Provide documentation to evidence the educational loans and to verify their status.

The School

The participating school will be required to do the following:

1. Enter into a contractual agreement with the applicant whereby the school is required, for each year for which the participant serves as a faculty member, to make payments of principal and interest due for that year, in an amount equal to the amount of such payments made by the Secretary. These payments must be in addition to the faculty salary the participant otherwise would receive.

2. Verify the participant's continuous employment at intervals as prescribed by the Secretary.

If the school is unable to meet the requirement of the FLRP for payment of principal and interest due because the requirement would impose undue financial hardship on the school, the school may request a waiver of this obligation from the Secretary. If the school's proportionate share of loan repayment amounts is waived, the Federal government agrees to make payments of not more than $20,000 of principal and interest for a year, which includes the amount granted as a waiver to the school.

The Secretary will pay participants in equal quarterly payments during the period of service.

Effective Date of Contract

After an applicant has been approved for participation in the FLRP, the Director, Division of Disadvantaged Assistance (DDA), will send the applicant a contract with the Secretary. The effective date is either the date work begins at the school as a faculty member or the date the Director, DDA, signs the FLRP contract, whichever is later. Service should begin no later than September 30, 1992.

Breach of Contract

The following areas under Breach of Contract are addressed in the appended contract:

1. If the participant fails to serve his or her period of obligated faculty service (minimum of two years) as contracted with the school, he/share is then in breach of contract, and neither the Secretary nor the school is obligated to continue loan repayments as stated in the contract. The participant must then reimburse the Secretary and the participating school for all sums of principal and interest paid on his/her behalf as stated in the contract.

2. Regardless of the length of the agreed period of obligation service (2, 3, or more years), a participant who serves less than the time period specified in his/her contract is liable for monetary damages to the United States amounting to the sum of the total of the amounts the Program paid his/her lenders, plus an "unserved obligation penalty" of $1,000 for each month unserved.

3. Any amount which the United States is entitled to recover because of a breach of the FLRP contract must be paid within 1 year from the day the Secretary determines that the participant is in breach of contract. If payment is not received by the payment date, additional interest, penalties and administrative charges will be assessed in accordance with Federal Law (45 CFR 30.13).

Other Consideration

In making awards, HRSA hopes to achieve equitable distribution among health disciplines and among geographic areas. Health needs of national significance will also be a consideration.

Review Criteria

The HRSA will review fiscal year 1992 applications taking into consideration the following criteria:

1. The extent to which the applicant meets the requirements of section 761 of the Act;

2. The completeness, accuracy, and validity of the applicant's responses to application requirements;

3. The submission of the signed contract with the school;

4. An applicant's earliest available date to begin service as a faculty member provided funding is available for that year; and

5. An applicant's availability to enter into a service contract for a longer period than the mandatory 2-year minimum.

In addition, a funding preference, allowing funding of a specific category or group of approved applications ahead of other categories or groups of applications, will be applied in determining the funding of approved applications.

Funding Preference

A funding preference will be given to individuals from disadvantaged (including racial and ethnic minorities) backgrounds who are new to the field of teaching. The Department intends to target FLRP assistance to disadvantaged health professions graduates serving as new faculty. This funding preference is designed to attract such individuals to pursue teaching careers in the health professions.

Established faculty members are eligible to apply for funds under the FLRP, but new faculty repayments will be funded first.

National Health Objectives for the Year 2000

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity for setting priority areas. The Disadvantaged Health Professions Faculty Loan Repayment Program is related to the priority area of Educational and Community-Based Programs. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock No. 017–001–00474–0) of Healthy People 2000 (Summary Report; Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (Telephone (202) 783–3238).

Application Requests

Requests for application materials and questions regarding program information should be directed to: Norman Roskos, Chief, Analysis and Evaluation Branch, Division of Disadvantaged Assistance, Bureau of Health Professions, Health Resources and Services Administration, 5600 Fishers Lane, room 8A–09, Rockville, Maryland 20857, Telephone: (301) 443–3680.

Completed applications should be returned to the address listed above. The application deadline date is July 30, 1992. Applications shall be considered as meeting the deadline if they are either:

(1) Received on or before the deadline date, or

(2) Postmarked on or before the deadline and received in time for consideration. A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

Late applications not accepted for processing will be returned to the applicant.

The application form and instructions for this program have been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act. The OMB clearance number is 0915–0150.

The Disadvantaged Health Professions Faculty Loan Repayment program is listed at 93.923 in the Catalog of Federal Domestic Assistance. It is not subject to the provisions of Executive Order 12372, Intergovernmental Review of Federal Programs (as implemented through 45 CFR part 100).

Dated: January 28, 1992.

Robert G. Harmon,

Administrator.

BILLING CODE 4160-15-M

CONTRACT FOR THE DISADVANTAGED HEALTH PROFESSIONS FACULTY LOAN REPAYMENT PROGRAM

WITH

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES
PUBLIC HEALTH SERVICE
HEALTH RESOURCES AND SERVICES ADMINISTRATION
BUREAU OF HEALTH PROFESSIONS

Section 761 of the Public Health Service Act ("Act") [42 United States Code 294 et seq.], as added by Pub. L. 101-527, authorizes the Secretary of Health and Human Services ("Secretary") to repay the educational loans of applicants from disadvantaged backgrounds selected to be participants in the Loan Repayment Program Regarding Service on Faculties of Certain Health Professions Schools ("Faculty Loan Repayment Program"). In return for these loan repayments, applicants must agree to provide teaching faculty services at an approved accredited health professions school determined by the Secretary for a designated period of obligated service pursuant to section 761 of the Act.

Sections 761(e) & (g) of the Act require applicants to submit with their applications a signed contract with an accredited health professions school and a signed contract which states the terms and conditions of participation in the Faculty Loan Repayment Program. The Secretary shall sign only those contracts submitted by applicants who are selected for participation.

The terms and conditions of participating in the Faculty Loan Repayment Program are set forth below:

Section A-Obligations of the Secretary

Subject to the availability of funds appropriated by the Congress of the United States for the Faculty Loan Repayment Program, the Secretary agrees to:

1. Pay, in the amount provided in paragraph 2 of this section, the undersigned applicant's qualifying educational loans. Qualifying educational loans consist of the principal and interest on educational loans received by the applicant for the following expenses of enrollment:

   a. tuition expenses;

   b. all other reasonable educational expenses such as fees, books, supplies, educational equipment and materials required by the school, and incurred by the applicant; or

   c. reasonable living expenses as determined by the Secretary.

2. If the applicant agrees to serve 2 or more years:

   a. Except as provided in subparagraph b. of this paragraph, pay annually, for each year of service not more than $20,000 of the principal and interest of the qualified educational loans of such individual due but not to exceed an amount equal to 50 percent of 20 percent of such loan payments due; or

   b. The Secretary's liability will not exceed a cap of $20,000 of principal and interest annually. This would include the amount waived under Sec. 761(f) of the Act for the school's proportionate share of the loan repayment amounts. The applicant must pay that portion not covered.

3. Make loan repayments for a year of obligated service no later than the end of the fiscal year in which the applicant completes such year of service.

4. The effective date of the Contract will be the date it is signed by the Director, Division of Disadvantaged Assistance or the date employment begins as a faculty member at the contracting school whichever is later.

Section B-Obligations of the Participant

1. The applicant agrees to:

   a. Continue loan repayments to lenders for the first quarter after which the Secretary will make delayed quarterly payments to applicant for the years stated in paragraph c of this section. Applicant must pay lender(s) these payments.

   b. Serve the period of obligated faculty service as contracted with the school and as determined by the Secretary to be acceptable.

   c. Serve in accordance with paragraph b. of this section for _____ years at _____ _____. The applicant must serve a minimum of two years.

2. If the applicant's eligibility to participate in the Faculty Loan Repayment Program is based on section 761(b)(3) of the Act (i.e. based on enrollment in an accredited health professions school), the applicant also agrees to:

   a. Maintain full-time enrollment, (as determined by the School), in good academic standing as determined by the School, in the final year of the course of study leading to a degree in medicine, osteopathic medicine, dentistry, pharmacy, podiatric medicine, optometry, veterinary medicine, nursing, or public health, or schools offering graduate programs in clinical psychology in which the applicant is currently enrolled, until completion of such course of study;

   b. Enter into a contract with an accredited school described in subsection (c) of Section 761 to serve as a "new" member of the faculty of the school for not less than 2 years according to the requirements described in subsection (e)(2) of section 761.

   c. Begin service obligation as contracted.

Section C-Breach of Written Loan Repayment Contract

1. If the participant fails to comply with section B.1.c. of this contract or is dismissed for disciplinary reasons or voluntarily terminates the contracts, neither the Secretary nor the School is obligated to continue loan repayments as stated in Sec. A of this Contract. The participant shall be liable to the United States and the School for the amounts specified in paragraph 2 of this section.

2. If the applicant agrees to serve as a full-time faculty member for two years or more and fails to serve the 2 year minimum requirement, and is liable to pay monetary damages to the United States amounting to the sum of (a) the total amounts specified in Section A.2 of this contract plus (b) an "unserved obligation penalty" of $1,000 for each month unserved as set forth in paragraph 3 of this section plus (c) any tax assistance paid plus (d) interest, penalties and administrative charges for past due payments.

3. The "Unserved Obligation Penalty" means the amount equal to the number of months of obligated service that were not completed by an individual, multiplied by $1,000 except that in any case in which the individual fails to serve 1 year, the unserved obligation penalty shall be equal to the full period of obligated service multiplied by $1,000.

4. If the applicant agrees to serve more than the 2-year minimum service obligation and has completed the 2-year minimum, the participant will be liable for such sums paid for any months that are not a full year beyond the 2-year minimum requirement as agreed to in Section B.1.c of this contract, plus an "unserved obligation penalty" of $1,000 for each month unserved.

5. Any amount the United States is entitled to recover shall be paid within one year of the date the Secretary determines that the applicant is in breach of this written contract. Failure to pay by the due date will incur delinquent charges provided by Federal Law (45 CFR 30.13).

Section D-Cancellation, Suspension, & Waiver of Obligation

Any service or payment obligation may be canceled, suspended, or waived under certain circumstances described below: (1) In the event of death or permanent and total disability, the Secretary will cancel obligations under this contract. To receive cancellation in the event of death, the executor of the estate must submit an official death certificate to the Secretary. To receive the cancellation for permanent and total disability, participant or the representative must apply to the Secretary, submitting evidence of the medical condition, and the Secretary may cancel this obligation in accordance with applicable Federal statutes and regulations; (2) Upon receipt of supporting documentation the Secretary may waive or suspend service or payment obligation under this contract if the Secretary determines that: (a) meeting the terms and conditions of the contract is impossible or would involve extreme hardship; and (b) enforcement of the obligations would be unconscionable. (3) Deferment will be granted in the event of long term illness. Supporting documentation should be sent to: Division of Disadvantaged Assistance, Room 8A-09 Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

The Secretary or authorized representative must sign this contract before it becomes effective.

Applicant Name (Please Print) Applicant Signature * Date

Secretary of Health and Human Services or Designee Date

* Before signing, be sure you have completed section B.1.c. on page 1 of this contract indicating the number of years of service you agree to perform.

BILLING CODE 4160-15-C

Availability of Funds for Grants To Provide Health Care for the Homeless and Health Care Services for Homeless Children

AGENCY: Health Resources and Services Administration, HHS

ACTION: Notice of available funds.

SUMMARY: The Health Resources and Services Administration (HRSA) announces that the appropriation for fiscal year (FY) 1992 includes $56,021,000 for discretionary grants to provide primary health and substance abuse services to homeless individuals. Grants will be awarded under section 340 of the Public Health Service (PHS) Act, as amended, 42 U.S.C. 256.

Approximately 110 noncompeting continuation grants will be awarded to organizations which received grants in FY 1991 and which are currently providing health services to homeless individuals. The range of project support is approximately $100,000 to $2,000,000 per 12-month budget period, depending upon the number of individuals who will receive care through this effort. In addition, approximately 10–15 new organizations will be awarded a total of approximately $3 million to begin new health care for the homeless activities and 8–12 grants totalling approximately $2.5 million will be awarded to organizations to provide health care services to homeless children. Support for all new grantees will range from approximately $100,000 to $2,000,000 per project for a 12-month budget period. Funds may also be used to support improvement awards to existing grantees to meet additional health service delivery or health system management needs. Approximately 40–50 improvement proposals may be supported, ranging from $10,000 to $50,000 per proposal.

The PHS is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity for setting health priorities. This grant program is related to the objectives cited for special populations, particularly people with low income, minorities, and the disabled, which constitute a significant portion of the homeless population. Potential applicants may obtain a copy of Healthy People 2000 (Full Report; Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report; Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office, Washington, DC 20402–9325 (telephone 202 783–3238).

DUE DATES: Applicants for noncompeting continuation grants submitted, on September 15, 1991, an abbreviated grant application for the FY 1992 funding cycle. Applicants for new starts, grants for services to homeless children, and for improvement funding for continuation grantees are due April 30, 1992. Applications are considered as meeting the deadline if they are either (1) received on or before the deadline date; or (2) postmarked on or before the deadline date and received in time for orderly processing. Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks will not be acceptable as proof of timely mailing. Late applications will not be considered for funding and will be returned to the applicant.

ADDRESES: Application kits (Form PHS 5161–1 with revised face sheet HHS Form 424, as approved by the Office of Management and Budget under contol number 0937–0189) may be obtained from, and completed applications should be mailed to, the appropriate PHS Regional Grants Management Officer (RGMO) (see Appendix). The RGMO can also provide assistance on business management issues.

FOR FURTHER INFORMATION CONTACT: For general program information and technical assistance, contact Ms. John Holloway, Director, or Mr. James L. Gray, Health Care for the Homeless Program Director, Division of Special Populations Program Development, Bureau of Health Care Delivery and Assistance (BHCDA), at 5600 Fishers Lane, Rockville, Maryland 20857 (telephone (301) 443–2512).

SUPPLEMENTARY INFORMATION:

Grants Awarded Under Section 340(a)

Section 340(a) of the PHS Act authorizes the Secretary to award grants to enable grantees, directly or through contracts, to provide for the delivery of health services to homeless individuals. Eligible applicants are nonprofit private organizations and public entities, including State and local governmental agencies. Grantees and organizations with whom they may contract for services under this program must have an agreement with a State under its Medicaid program, title XIX of the Social Security Act (if they provide services that are covered under the title XIX plan for the State), and be qualified to receive payments under the agreement. This requirement may be waived if the organization does not, in providing health care services, impose a charge or accept reimbursement available from any third-party payor, including reimbursement under any insurance policy or under any Federal or State health benefits program.

Preference for new starts will be given to qualified applicants that (1)(A) are experienced in the direct delivery of primary health services to homeless individuals or medically underserved populations or (B) are experienced in the treatment of substance abuse in homeless individuals or medically underserved populations; and (2) agree to provide for primary health and substance abuse services to homeless individuals through both public entities and private organizations. The evaluation criteria will be weighted to reflect these preferences.

For grantees not previously funded under Section 340(a), the amount of Federal grant funds awarded may not exceed 75 percent of the costs of providing primary health and substance abuse services under the grant. Such newly funded grantees must make available non-Federal contributions to meet the remainder of the costs. For continuation grantees (including those applying for improvement funding), the amount of Federal grant funds awarded may not exceed 66⅔ percent of the costs of providing services under the grant. The continuation grantee, if funded, must make available non-Federal contributions to meet the remainder of the costs. Non-Federal contributions may be in cash or in-kind, fairly evaluated, including plant, equipment or services. Funds provided by the Federal Government, or services assisted or subsidized to any significant extent by the Federal Government, may not be included in determining the amount of the non-Federal contributions. Such determination may not include any cash or in-kind contributions that, prior to February 26, 1987, were made available by any public or private entity for the purpose of assisting homeless individuals (including assistance other than the provision of health services). The Secretary may waive the matching requirement if the grantee is a nonprofit private entity and the Secretary determines that it is not feasible for the grantee to comply with the requirement.

The grant may be used to continue to provide services listed below for up to 12 months to individuals who have obtained permanent housing if services were provided to these individuals when they were homeless. For the purpose of this program, the term "homeless individual" means an individual who lacks housing (without regard to whether the individual is a member of a family), including an individual whose primary residence during the night is a supervised public or private facility that provides temporary living accommodations, or an individual who is a resident in transitional housing.

Project Requirements

a. The following services must be provided, directly or through contract:

1. Primary health care and substance abuse services at locations accessible to homeless individuals;

2. 24-hour emergency primary health and substance abuse services to homeless individuals;

3. Referral of homeless individuals as appropriate to medical facilities for necessary hospital services;

4. Referral of homeless individuals who are mentally ill to entities that provide mental health services, unless the applicant will provide such services directly;

5. Outreach services to inform homeless individuals of the availability of primary health and substance abuse services;

6. Aid to homeless individuals in establishing eligibility for assistance, and in obtaining services, under entitlement programs;

7. Podiatry, dental (including dentures), and vision services are supplemental services and may be provided where medically necessary, to the extent that the level of delivery of the required services is not diminished.

Grants Awarded Under Section 340(s)

Section 340(s) of the PHS Act authorizes the Secretary to carry out demonstration programs to enable entities, either directly or through contracts, to provide for the delivery of comprehensive primary health services to homeless children and to children at imminent risk of homelessness. Eligible applicants are grantees funded under section 340(a) of the PHS Act, other public and nonprofit private entities that provide primary health services and substance abuse services to a substantial number of homeless individuals, and public and nonprofit private children's hospitals that provide primary health services to a substantial number of homeless individuals. Grantees and organizations with which they may contract for services under this program must have an agreement with a State under its Medicaid program, title XIX of the Social Security Act (if they provide services that are covered under the title XIX plan for the State), and be qualified to receive payments under the agreement. This requirement may be waived if the organization does not, in providing health care services, impose a charge or accept reimbursement available from any third-party payor, including reimbursement under any insurance policy or under any Federal or State health benefits program.

For grantees under this program which are children's hospitals, the amount of Federal grant funds awarded may not exceed 50 percent of the costs of providing primary health and substance abuse services under the grant. Grantees which are children's hospitals must make available non-Federal contributions to meet the remainder of the costs. Non-Federal contributions may be in cash or in-kind, fairly evaluated, including plant, equipment or services. Funds provided by the Federal Government, or services assisted or subsidized to any significant extent by the Federal Government, may not be included in determining the amount of the non-Federal contributions.

Project Requirements

a. The following services must be provided, directly or through contract:

1. Comprehensive primary health services, including such services provided through mobile medical units;

2. Referrals for provision of health services, social services, and education services, including referral to hospitals, community and migrant health centers, Head Start and other educational programs, and programs for prevention and treatment of child abuse; and

3. Outreach services to identify children who are homeless or at imminent risk or homelessness and to inform parents/guardians of the availability of services directly from the grantees and through the referral mechanism.

Other Grant Requirements Applicable to Both Section 340(a) and 340(s) Grantees

a. Restrictions on the use of grant funds are as follows:

1. Grant funds may not be used to pay for inpatient services, except for residential treatment for substance abuse provided in settings other than hospitals.

2. Grant funds may not be used to make cash payments to intended recipients of primary health and substance abuse services or mental health services.

3. Grant funds may not be used to purchase or improve real property (other than minor remodeling of existing improvements to real property) or to purchase major medical equipment, including mobile medical units. However, upon request by an applicant demonstrating that the purposes of the project cannot otherwise be carried out, the Secretary may waive this restriction.

b. The grantee must, directly or through contract, provide services without regard to ability to pay for the services. If a charge is imposed for the delivery of services, such charge (1) will be made according to a schedule of charges that is made available to the public; (2) will not be imposed on any homeless individual with an income less than the official poverty level (the nonfarm income official poverty line defined by the Office of Management and Budget); and (3) will be adjusted to reflect the income and resources of the homeless individual involved.

Additional Grant Requirements for Section 340(a) Only

a. The grantee may not expend more than 10 percent of grant funds for the purpose of administering the grant.

b. The grantee may, with respect to title I of the Protection and Advocacy for Mentally Ill Individuals Act of 1986, expend amounts received for the purpose of referring homeless individuals who are chronically mentally ill, and who are eligible under the Act, to systems that provide advocacy services under the Act.

c. The grantee may provide services through contracts with nonprofit self-help organizations that are established and managed by current and former recipients of mental health or substance abuse services, who have been homeless individuals; and that have an agreement with a State under its Medicaid program, title XIX of the Social Security Act (if they provide services that are covered under the title XIX plan for the State), and qualify to receive payments under the agreement.

Criteria for Evaluating Applications

Noncompeting Continuations

FY 1992 awards for noncompeting continuations will be made following a review of the abbreviated application submitted by grantees. Funding decisions will be based on the grantee's progress in achieving stated goals and objectives for FY 1991 and its ability to resolve any outstanding issues raised during the review of the FY 1991 grant application.

New Applicants Under Section 340(a)

Applications that are received on time and meet basic application requirements will be reviewed by an objective panel of experts in the field of providing health services to homeless individuals.

All applications for grant support will be reviewed based upon the following evaluation criteria:

a. Compliance with the requirements of section 340 of the PHS Act and other programmatic requirements;

b. Experience in providing primary health or substance abuse services to homeless individuals or medically underserved populations;

c. Extent to which the applicant has identified the homeless population in the service area, including the social and demographic characteristics of the population and the extent to which their health needs are not being met;

d. Adequacy of the applicant's outreach plan to serve the homeless population;

e. Extent to which primary health and substance abuse services are to be provided to homeless individuals in a linked and integrated manner;

f. Adequacy of the applicant's referral arrangement to appropriate medical facilities for hospitalization and, for individuals who are mentally ill, to entities that provide mental health services, unless the applicant will provide such services directly;

g. Extent to which the applicant has the ability to involve appropriate community respresentatives to ensure that the program is culturally appropriate and accommodates the needs of the homeless individuals in the service area;

h. Extent to which the applicant has engaged or plans to engage with other entities in an integrated service system in the community;

i. Qualifications and experience of the proposed project staff; i.e., the staff size and skills necessary to carry out an effective program;

j. Adequacy of the proposed budget; i.e., detailed projections of revenue and costs in accordance with grant application instructions;

k. Evidence of administrative procedures for fiscal control and fund accounting procedures which provide for reasonable financial administration of Federal and non-Federal funds;

l. Evidence of an ongoing program of quality assurance with respect to health services provided under the grant;

m. Evidence of a reasonable plan for communicating with non-English speaking homeless individuals provided health services under the grant; and

n. Indication of strategies for collaborative relationships and linkages which maximize effective use of existing health and social service resources, especially those of state and local health department, primary care providers to the underserved, and academic institutions.

In addition, for FY 1992, it is proposed that a funding priority be given to:

—Applicants located in those States and other distinct geographic areas (for example, cities, counties, or designated health professional shortage areas) which have not previously received funds under Section 340(a) of the PHS Act and/or

—Applicants which intend to serve a primarily rural homeless population.

Applicants which do not meet these priorities will be considered only if sufficient program funds are available.

New Applicants Under Section 340(s)

Applications that are received on time and meet basic application requirements will be reviewed by an objective panel of experts in the field of providing health services to homeless individuals.

All applications for grant support will be reviewed based upon the following evaluation criteria:

a. Compliance with the requirements of section 340(s) of the PHS Act and other programmatic requirements;

b. Experience in providing primary health or substance abuse services to homeless individuals or medically underserved populations;

c. Extent to which the applicant has identified homeless children and children at imminent risk of homelessness within the service area, including the social and demographic characteristics of these children and the extent to which their health needs are not being met;

d. Proposal of an innovative approach to meeting the health care needs of homeless children and children at imminent risk of homelessness, which can be utilized as a demonstration site for other programs nationally;

e. Adequacy of the applicant's outreach plan to identify homeless children and children at imminent risk of homelessness and inform their parents/guardians of the availability of services;

f. Extent to which primary health services are to be provided to homeless children in a linked and integrated manner;

g. Adequacy of the applicant's referral arrangements for the provision of health services, social services, and education services, including referral to hospitals, community and migrant health centers, Head Start and other educational programs, and programs for prevention and treatment of child abuse;

h. Extent to which the applicant has the ability to involve appropriate community representatives to ensure that the program accommodates the needs of homeless children and children at imminent risk of homelessness in the service area;

i. Extent to which the applicant has engaged or plans to engage with other entities in an integrated service system in the community;

j. Qualifications and experience of the proposed project staff; i.e., the staff size and skills necessary to carry out an effective program;

k. Adequacy of the proposed budget; i.e., detailed projections of revenue and costs in accordance with grant application instructions;

l. Evidence of administrative procedures for fiscal control and fund accounting procedures which provide for reasonable financial administration of Federal and non-Federal funds;

m. Evidence of an ongoing program of quality assurance with respect to health services provided under the grant;

n. Evidence of a reasonable plan for communicating with non-English speaking children provided health services under the grant and their parents/guardians; and

o. Indication of strategies for collaborative relationships and linkages which maximize effective use of existing health and social service resources, especially those of state and local health departments, primary care providers to the underserved, and academic institutions.

In addition, it is proposed that a funding priority be given to:

—Applicants which currently receive funding under section 340(a) of the PHS Act;

—Applicants which intend to serve a primarily rural population; and/or

—Public and nonprofit private children's hospitals that provide primary health services to a substantial number of homeless individuals.

Applicants which do not meet those priorities will be considered only if sufficient program funds are available.

Improvements

Requests from existing grantees for improvements will also be reviewed objectively. Only those grantees which have demonstrated satisfactory progress to date in achieving stated goals and objectives for FY 1991 activities will be considered to receive improvement funding.

All applications for grant support for improvement will be reviewed based upon the following evaluation criteria:

a. Evidence of need for the improvement, based on demographic or health status indicators for the user population or on health system developmental needs;

b. Evidence of an innovative approach to addressing a clearly articulated health service delivery or health system management issue; and

c. Description of current efforts being undertaken to address the area of concern and a clearly identified relationship between the current program and the proposed improvement.

An applicant may request more than one improvement; however, the proposals must be prioritized.

In addition, for FY 1992, it is proposed that a funding priority be given to: programs which expand the availability of and access to substance abuse services; innovative approaches to enhancing access to entitlement programs, including Supplemental Security Income; programs which develop or enhance relationships with shelters for homeless and runaway youth; programs which develop innovative programs in collaboration with other community-based organizations engaged in health care delivery to homeless clients; programs which develop innovative service arrangements for homeless individuals with HIV/AIDS; and programs which enhance quality assurance systems to improve their appropriateness in assessing services delivered to homeless individuals.

Opportunity for Comment

Interested persons are invited to comment on the proposed funding priorities for new starts under section 340(a), new starts under section 340(s), and improvements. Normally, the comment period would be 60 days. However, due to the need to implement any changes for the fiscal year 1992 award cycle, the comment period has been reduced to 30 days. All comments received on or before April 22, 1992 will be considered before the proposed funding priorities are established. No funds will be allocated or final selections made until a final notice is published indicating whether the proposed funding priorities will be applied.

Written comments should be addressed to: Ms. Joan Holloway, Director, Division of Special Populations Program Development, Bureau of Health Care Delivery and Assistance, Health Resources and Services Administration, Parklawn Building, room 7–A–22, 5600 Fishers Lane, Rockville, Maryland 20857.

All comments received will be available for public inspection and copying at the Division of Special Populations Program Development, at the above address, weekdays (Federal holidays excepted) between the hours of 8:30 a.m. and 5 p.m.

Other Award Information

The Health Care for the Homeless Program has been determined to be a program which is subject to the provisions of Executive Order 12372 concerning intergovernmental review of Federal programs by appropriate health planning agencies, as implemented by 45 CFR part 100. Executive Order 12372 allows States the option of setting up a system for reviewing applications from within their States for assistance under certain Federal programs. The application packages to be made available under this notice will contain a listing of States which have chosen to set up a review system and will provide a State point of contact (SPOC) in the State for the review. Applicants (other than federally-recognized Indian tribal governments) should contact their SPOCs as early as possible to alert them to the prospective applications and receive any necessary instructions on the State process. For proposed projects serving more than one State, the applicant is advised to contact the SPOC of each affected State. The due date for State process recommendations is 60 days after the appropriate deadline dates. The BHCDA does not guarantee that it will accommodate or explain its responses to State process recommendations received after the date. (See "Intergovernmental Review of Federal Programs", Executive Order 12372, and 45 CFR part 100 for a description of the review process and requirements.)

The OMB *Catalog of Federal Domestic Assistance* number for this program is 13.151.

Dated: January 3, 1992.

Robert G. Harmon,

Administrator.

Indian Health Service

Research Program Grants Technical Assistance Announcement

AGENCY: Indian Health Service (IHS), HHS

ACTION: Notice of technical assistance workshops for propsective IHS grantees.

SUMMARY: The IHS announces that technical assistance workshops for the Research Grant Program to include grant proposal writing will be conducted for American Indian/Alaska Native Tribal Organizations, as defined in the Indian Self-Determination Act, and IHS personnel.

DATES: Technical assistance workshops are scheduled for May 26–28, 1992, in Seattle, Washington and June 9–11, 1992, in Albuquerque, New Mexico.

FOR REGISTRATION CONTACT: William L. Freeman, M.D., Director, IHS Research Program, or Ms. Donna Pexa, Research Program Coordinator, Office of Health Program Research and Development, 7900 South J. Stock Road, Tucson, Arizona 85746–9352, (602) 670–6310, or Ms. M. Kay Carpenter, Grants Management Officer, Division of Acquisition ang Grants Operations, Twinbrook Building, suite 605, 12300 Twinbrook Parkway, Rockville, Maryland 20852–1750, (301) 443–5204. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION: The Office of Health Program Research and Development, Division of Medical Systems Research and Development and the Division of Acquisition and Grant Operations, Grants Management Branch, will provide potential applicants an opportunity to receive technical assistance for Research Grants including participation in grant writing workshops to assist applicants in

developing and submitting competitive proposals. The purpose is to: (a) Establish communication between the IHS and the applicants, (b) determine the applicants eligibility, and (c) to provide technical assistance to increase the ability of an applicant to successfully complete. Applicants will prepare sample applications for constructive review and feedback during the workshop.

Dated: March 17, 1992.

Everett R. Rhoades,

Assistant Surgeon General, Director.

Public Health Service

National Institutes of Health; Statement of Organization, Functions and Delegations of Authority

Part H, chapter HN, (National Institutes of Health) of the Statement of Organization, Functions and Delegations of Authority for the Department of Health and Human Services (40 FR 22859, May 27, 1975, as amended most recently at 57 FR 5459, February 14, 1992) is amended to reflect the following organizational change in the Office of Intramural Research, Office of the Director, NIH: (1) Establish the Office of Human Subjects Research (HNA45). This component will serve as an NIH-wide focal point for coordination and oversight of the entire human subjects protections system, including establishment of an educational/training program, to ensure that all research involving human subjects is carried out uniformly at NIH in accordance with HHS regulations.

Section HN-B, Organization and Functions, is amended as follows: (1) After the statement for the Office of the Director (HNA), Office of Intramural Research (HNA4), Office of Education (HNA44), add the following title and statement:

Office of Human Subjects Research (HNA45). Serves as the NIH-wide focal point for coordination and oversight of the entire NIH human subjects protections system, including the establishment of an educational/training program, to ensure that all research involving human subjects is carried out uniformly at NIH in accordance with HHS regulations.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Availability of Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) for an Alternative to the Proposed Comprehensive Outer Continental Shelf (OCS) Natural Gas and Oil Resource Management Program for 1992-97

SUMMARY: The Minerals Management Service (MMS) prepared an EA for an alternative to the proposed Comprehensive OCS Natural Gas and Oil Resource Management Program for 1992-1997. The alternative would enlarge, relative to the proposed Comprehensive Program, the area that would be considered for natural gas and oil leasing in the Cook Inlet Planning Area of the Alaska OCS. Based on the conclusions of the EA, the MMS has prepared a FONSI.

ADDRESSES: A copy of the EA and FONSI is available to the public upon written request. Requests should be addressed to Minerals Management Service, Environmental Projects Coordination Branch, Mail Stop 4320, 381 Elden Street, Herndon, Virginia 22070-4817. Ask for the "Cook Inlet EA."

SUPPLEMENTARY INFORMATION: A draft Environmental Impact Statement (EIS) for the proposed Comprehensive Program was published in July 1991. The draft EIS did not include an alternative to enlarge the area that would be considered for leasing in the Cook Inlet Planning Area. An EA for the alternative was prepared in March 1992 to provide a basis for determining whether if would be necessary to prepare a supplement to the draft EIS in accordance with the regulations for implementing the National Environmental Policy Act, as amended. The EA shows that no significant differences between the potential environmental impacts of the Cook Inlet element of the proposed Comprehensive Program and the potential environmental impacts of the alternative are expected. Based on the conclusions presented in the EA, a FONSI was prepared and a determination was made that a supplement to the draft EIS is not needed. The final EIS will contain an analysis of potential impacts for the alternative. The final EIS is scheduled to be made available to the public in late April 1992.

Dated: March 18, 1992.

Thomas Gernhofer,

Associate Director for Offshore Minerals Management.

INTERNATIONAL DEVELOPMENT CORPORATION AGENCY

Agency for International Development

Board for International Food and Agricultural Development and Economic Cooperation; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, notice is hereby given of the One Hundred and Tenth Meeting of the Board for International Food and Agricultural Development and Economic Cooperation (BIFADEC) on April 16, 1992, from 8:30 a.m. to 5 p.m.

The purposes of the meeting are: (1) To discuss the report of the President's Commission on the Management of the A.I.D. programs; (2) to consider and discuss A.I.D.'s "focus and concentrate" policies; (3) to hear a report on issues in A.I.D.'s participant training programs; and (4) to hear an update of the University Center activities including title XII programs and review the strategy/study for Historically Black Colleges and universities.

This meeting will be held in Main State Department Building in room 1105. Any interested person may attend and may present oral statements in accordance with procedures established by the Board and to the extent time available for the meeting permits.

All persons, visitors and employees are required to wear proper identification at all times while in the Department of State building. Please let the BIFADEC Staff know (tel # (703) 816-0277) that you expect to attend the meeting. Provide your full name, name of employing company or organization, address and telephone number not later than April 10, 1992. A BIFADEC Staff Member will meet you at the Department of State Diplomatic Entrance at C and 22d Streets with your pass.

C. Stuart Callison, Deputy Executive Director, Agency Center for University Cooperation in Development, Bureau for Research and Development, Agency for International Development, will be the A.I.D. Advisory Committee Representative at this Meeting. Those desiring further information may write to Dr. Callison, in care of the Agency for International Developemnt, room 900 SA-38, Washington, DC 20523-3801 or telephone him on (703) 816-0258.

Dated: March 17, 1992.

Ralph H. Smuckler,

Executive Director, Agency Center for University Cooperation in Development.

BILLING CODE 6116-01-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 303-TA-21 (Final)]

Gray Portland Cement and Cement Clinker From Venezuela

AGENCY: United States International Trade Commission.

ACTION: Suspension of investigation.

SUMMARY: On March 17, 1992, the Department of Commerce (Commerce) suspended its countervailing duty investigation involving gray portland cement and cement clinker from Venezuela (57 FR 9242). The basis for the suspension is an agreement between Commerce and the Government of Venezuela to offset or eliminate completely all benefits provided by the Government of Venezuela which Commerce found to constitute bounties or grants on exports of gray portland cement and cement clinker to the United States. Accordingly, the United States International Trade Commission gives notice of the suspension of its countervailing duty investigation involving imports from Venezuela of gray portland cement and cement clinker, provided for in subheadings 2523.29.00 and 2523.10.00 of the Harmonized Tariff Schedule of the United States.

EFFECTIVE DATE: March 17, 1992.

FOR FURTHER INFORMATION CONTACT: Debra Baker (202-205-3180), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000.

Authority: This investigation is being suspended under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to section 207.40 of the Commission's rules (19 CFR 207.40).

By order of the Commission.

Issued: March 18, 1992.

Kenneth R. Mason,

Secretary

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 32025]

Black Hills & Western Railroad Corp.—Acquisition and Operation Exemption—Certain Lines of Chicago and North Western Transportation Company

Black Hills & Western Railroad Corporation (BH&W), a wholly owned noncarrier subsidiary of Dakota, Minnesota & Eastern Railroad Corporation (DM&E), has filed a verified notice for an exemption to acquire from the Chicago and North Western Transportation Company (CNW) approximately 174.7 miles of line and approximately 22 miles of incidental overhead trackage rights in Nebraska, South Dakota, and Wyoming. The line to be acquired runs between Colony, WY (milepost 174.7), and Dakota Junction, NE (milepost 0.0). The trackage rights extend from near Dakota Junction (milepost 410.3) to Crawford, NE (milepost 432.3).

The transaction is related to a petition for exemption filed concurrently in Finance Docket No. 32026, *Dakota, Minnesota & Eastern Railroad Corporation—Control Exemption—Black Hills & Western Railroad Corporation.* In that proceeding, DM&E seeks an exemption to continue in control of BH&W when BH&W becomes a carrier by consummating the transaction that is the subject of this notice of exemption. BH&W will consummate its acquisition from CNW on the effectiveness of the exemption sought in Finance Docket No. 32026. Upon consummation, BH&W will be a Class III carrier.

Any comments must be filed with the Commission and served on: Bryan D. Olsen, 1935 Piper Jaffray Tower, 222 South Ninth Street, Minneapolis, MN 55402, and Louis E. Gitomer, suite 210, 919 18th Street, NW., Washington, DC 20006.

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio.* Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: March 17, 1992.

By the Commission, David M Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[Docket No. AB-55 (Sub-No. 405)]

CSX Transportation, Inc.—Abandonment—Between Richmond and Marion in Wayne, Randolph, Henry, Delaware, and Grant Counties, IN; Notice of Findings

The Commission has issued a certificate authorizing CSX Transportation, Inc. (CSXT) to abandon 71.34 miles of rail line between milepost 63.21 at Richmond and milepost 134.55 at Marion, which is located in Wayne, Randolph, Henry, Delaware, and Grant Counties, IN. The abandonment certificate will become effective April 22, 1992, unless the Commission finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and CSXT no later than 10 days from the date of publication of this notice. The following notation shall be typed in bold face in the lower left-hand corner of the envelope containing the offer: "Rail Section, AB-OFA." Any offer previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are contained in 49 U.S.C. 10905 and 49 CFR 1152.

Decided: March 18, 1992.

By the Commission: Chairman Philbin, Vice Chairman McDonald, Commissioner Simmons, Phillips, and Emmett.

Sidney L. Strickland, Jr.,

Secretary.

Quarterly Rail Cost Adjustment Factor

AGENCY: Interstate Commerce Commission.

ACTION: Approval of rail cost adjustment factor and decision.

SUMMARY: The Commission has approved the second quarter 1992 rail cost adjustment factor (RCAF) and cost index filed by the Association of

American Railroads. The second quarter RCAF (Unadjusted) is 1.162. The second quarter RCAF (Adjusted) is 1.024 a decrease of 1.5 percent from the first quarter 1992 RCAF (Adjusted) of 1.040. Maximum second quarter 1992 RCAF rate levels may not exceed 98.5 percent of maximum first quarter 1992 RCAF rate levels.

EFFECTIVE DATE: April 1, 1992.

FOR FURTHER INFORMATION CONTACT:
William T. Bono—(202) 927–5720.
Robert C. Hasek—(202) 927–6239.
[TDD for hearing impaired: (202) 927–5721.

SUPPLEMENTARY INFORMATION:
Additional information is contained in the Commission's decision. To purchase a copy of the full decision write to, call, or pick up in person from: Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or telephone (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 927-5721.]

This action will not significantly affect either the quality of the human environment or energy conservation.

Decided: March 16, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett.

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;

(2) The agency form number, if any, and the applicable component of the Department Sponsoring the collection;

(3) How often the form must be filled out or the information is collected;

(4) Who will be asked or required to respond, as well as a brief abstract;

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;

(6) An estimate of the total public burden (in hours) associated with the collection; and,

(7) An indication as to whether section 3504(h) of Public Law 96–511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Ms. Lin Liu on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Lewis Arnold, on (202) 514–4305. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Lewis Arnold, DOJ Clearance Officer, SPS/JMD/5031 CAB, Department of Justice, Washington, DC 20530.

Extension of the Expiration Date of a Currently Approved Collection Without any Change in the Substance or in the Method of Collection

(1) Victims of Crime Act, Crime Victims Assistance Grant Program, Performance Report.

(2) 7390/4. Office of Justice Programs, Office for Victims of Crime (OVC).

(3) Annually.

(4) State or local governments. The information requested is necessary to ensure compliance with statutory criteria which allow the Director of OVC to collect performance data from recipients of VOCA grant funds. The affected public includes up to 57 states and territories administering the crime victims assistance provisions of the Victims of Crime Act.

(5) 57 annual responses at 35 hours per response.

(6) 1,995 annual burden hours.

(7) Not applicable under 3504(h).

(1) Application for Procurement Quota for Controlled Substances.

(2) DEA 250, Drug Enforcement Administration.

(3) On occasion.

(4) Businesses or other for-profit. CFR 1303.12 requires manufacturers who wish to purchase controlled substances in Schedule II to apply on DEA–250 for procurement quotas. Such quotas limit purchase quantities. Information is used for establishing and maintaining quotas.

(5) 341 annual responses at 1 hour per response.

(6) 341 annual burden hours.

(7) Not applicable under 3504(h).

Revision of a Currently Approved Collection

(1) Victims of Crime Act, Crime Victims Assistance Program, Subgrant Award Report.

(2) 7390/2A. Office of Justice Programs, Office for Victims of Crime (OVC).

(3) Annually.

(4) State or local governments. The information requested is necessary to ensure compliance with statutory criteria which allow the Director of OVC to collect performance data from recipients of VOCA grant funds. The affected public includes up to 57 states and territories administering the crime victim assistance provisions of the Victims of Crime Act.

(5) 2,508 annual responses at 2 hours per response.

(6) 5,016 annual burden hours.

(7) Not applicable under 3504(h).

(1) Sample Survey of Jails.

(2) CJ–5, CJ–5A. Office of Justice Programs, Bureau of Justice Statistics.

(3) Annually.

(4) State or local governments. The information collected will provide annual estimates of the Nation's local jail population, as well as data on jail capacity, court orders for conditions of confinement, inmate deaths, AIDS testing and number of inmates with AIDS in the 25 largest jurisdictions. The data will form the basis for historical trend analysis.

(5) 1,200 annual responses at .60 hours per response.

(6) 725 annual burden hours.

(7) Not applicable under 3504(h).

Public comment on these items is encouraged.

Dated: March 18, 1992.

Lewis Arnold

Department Clearance Officer, Department of Justice.

[FR Doc. 92–6679 Filed 3–20–92; 8:45 am]

BILLING CODE 4410–18–M

Lodging of Final Judgment by Consent Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act

In accordance with Department policy, 28 CFR 50.7, and section 122(d)(2) of the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9622(d)(2), notice is hereby given that on March 5, 1992, a proposed Consent Decree in *United States* v. *Berwind Railway Service Co., et al.*, Civil Action No. 92–66J was lodged with the United States District Court for the Western District of Pennsylvania.

Simultaneously with the lodging of the proposed consent Decree, the United States filed a complaint in the United States District Court for the Western District of Pennsylvania alleging that defendant Berwind Railway Service Co., Butterick Company, Inc., GTE Products Corporation, Hamilton Beach/Proctor-Silex, Inc., SCM Corporation, and SKF USA, Inc. arranged for disposal of hazardous substances at the Delta Quarries and Disposal Superfund Site (the "Site"), located near the City of Alfoon and the Village of Pinecroft, Logan and Antis Townships, Blair County, Pennsylvania. Defendant Delta Quarries and Disposal, Inc. is alleged to be the current owner and operator of the Site, and the owner and operator at the time that some of the alleged disposal of hazardous substances there occurred. Hazardous substances found at the Site include acetone, chlorobenzene, chloroethane, chloroform, 1, 1-dichloroethane, 1, 1-dechloroethene, 1, 2-dichloroethene, 1, 2-dichloroethane, trichloroethene ("TCE"), 1,1,1, trichloroethane, tetrachloroethene ("PCE"), toluene, vinyl chloride, barium, manganese, nickel, cadmium, chromium, copper, lead, and zinc.

The complaint seeks, *inter alia*, an injunction requiring the defendants to perform a clean-up of the Site in accordance with a remedy that has been selected by EPA pursuant to section 106 of CERCLA, 42 U.S.C. 9606, and a judgment against the defendants for all costs incurred by the United States for response activities related to the Site, pursuant to section 107(a) of CERCLA, 42 U.S.C. 9607(a).

The proposed Consent Decree would settle the allegations made in the complaint. Under the terms of the proposed Consent Decree, the defendants have agreed to reimburse the Hazardous Substance Response Trust Fund in the amount of $80,538.66, representing 100% of response costs incurred by EPA in connection with the Site through January 3, 1991. The proposed Consent Decree further requires the defendants to perform a clean-up of hazardous substances at the Site in accordance with a remedy selected by EPA, and to reimburse the United States all costs incurred in overseeing the defendants' performance of the remedy.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to the *United States* v. *Berwind Railway Service Co., et al.*, D.J. No. 90–11–2–705.

The proposed Consent Decree may be examined at the office of the United States Attorney for the Western District of Pennsylvania, 633 USPO & Courthouse, 7th Avenue & Grant Street, Pittsburgh, Pennsylvania 15219 and the U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. The proposed Consent Decree may also be examined at the Environmental Enforcement Section Document Center, 601 Pennslyvania Ave., NW., Box 1097, Washington, DC 20004, 202–347–2072. A copy of the proposed Consent Decreee may be obtained in person or by mail from the Document Center. In requesting a copy, please enclose a check in the amount of $24.00 (25 cents per page reproduction costs) payable to "Consent Decree Library."

Barry M. Hartman,

Acting Assistant Attorney General, Environment and Natural Resources Division.

[FR Doc. 92–6587 Filed 3–20–92; 8:45 am]

BILLING CODE 4410–01–M

Lodging of Consent Decrees Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on March 9, 1992 two proposed Partial Consent Decrees in *United States and Commonwealth of Pennsylvania* v. *Bethlehem Steel Corporation*, Civil Action No. 87–5438 (E.D. Pa.), were lodged with the United States District Court for the Eastern District of Pennsylvania. One Partial Consent Decree (the "Bethlehem Plant Decree") concerns violations of the Clean Air Act, 42 U.S.C. 7401*et seq.* ("the Act"), with respect to defendant's operation of blast furnace, coke oven batteries, and a high pressure boiler at its Bethlehem, Pennsylvania plant. The proposed Bethlehem Plant Decree requires defendant to implement injunctive relief, including requirements to install and operate additional emissions control equipment and to achieve, demonstrate, and maintain compliance with relevant emissions standards at the plant, to pay a $5 million civil penalty, and either to implement a supplemental environmental project involving installation of luter-type doors on Coke Oven Batteries 2 and 3 (2A) to reduce coke oven emissions from leaking coke oven doors or pay an additional $1.2 million civil penalty. The second Partial Consent Decree (the "Johnstown Plant Decree") concerns violations of the Act with respect to defendant's operation of an electric arc furnace shop at its Johnstown, Pennsylvania plant. The proposed Johnstown Plant Decree requires defendant to implement injunctive relief, including requirements to operate certain additional emissions control equipment and to achieve, demonstrate, and maintain compliance with relevant emissions standards at the plant, and to pay a civil penalty of $1.7 million civil penalty.

The Department of Justice will receive comments relating to the proposed Bethlehem Plant Decree and the proposed Johnstown Plant Decree for a period of thirty (30) days from the date of this publicaion. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States and Commonwealth of Pennsylvania* v. *Bethlehem Steel Corporation*, D.C. No. 90–5–2–1–1023 (for Bethlehem Plant Decree comments) or D.J. No. 90–5–2–1–1068 (for Johnstown Plant Decree comments).

The proposed Partial Consent Decrees may be examined at the Office of the United States Attorney for the Eastern District of Pennsylvania, 615 Chestnut Street, suite 1300, Philadelphia, Pennsylvania 19106 and the U.S. Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. The proposed Partial Consent Decrees may also be examined at the Environmental Enforcement Section Document Center, 601 Pennsylvania Ave., NW., Box 1097 Washington, DC 20004, 202–347–2072. A copy of the proposed Partial Consent Decrees may be obtained in person or by mail from the Document Center. In requesting a copy, please enclose a check payable to "Consent Decree Library" in the amount of $65.25 (25 cents per page reproduction costs) for a copy of the Bethlehem Plant Decree, or in the amount of $21.25 for a copy of the Johnstown Plant Decree.

Barry M. Hartman,

Acting Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Lodging Final Judgment by Consent Pursuant to the Clean Air Act

Notice is hereby given that on March 12, 1992, a proposed consent decree in *United States* v. *Corning Incorporated, et al.*, Civil Action No. 3:CV–90–207, was lodged with the United States District Court for the Middle District of Pennsylvania. The suit was brought pursuant to section 113 of the Clean Air Act ("the Act"), 42 U.S.C. 7413, for multiple violations of the National Emissions Standards for Hazardous Air Pollutants applicable to the emission of inorganic arsenic from glass manufacturing plants ("arsenic NESHAP"), 40 CFR part 61, subparts (A) and (N). It also alleged a violation of reporting requirements of the New Source Performance Standards ("NSPS") for Glass Manufacturing Plants, 40 CFR part 60, subparts (A) and (CC). The action was based on violations that had occurred and were occurring at two glass works manufacturing facilities located at State College and Charleroi, Pennsylvania. The proposed consent decree between the United States and the defendants resolves the subject violations by providing for injunctive relief to ensure consistent compliance with arsenic limits at the State College plant. The proposed consent decree provides for a civil penalty of $1,825,000 to be paid by defendants for past violations.

The Department of Justice will receive comments relating to the proposed consent decree for a period of thirty days from the date of publication of this notice. Comments should be addressed to the Acting Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Corning Incorporated, et al.*, DOJ Ref. No. 90–5–2–1–1267. The proposed consent decree may be examined at the Office of the United States Attorney, Middle District of Pennsylvania, suite 1162, Federal Building, 228 Walnut Street, P.O. Box 11754, Harrisburg, Pennsylvania 17108. A copy of the proposed consent decree may also be examined at the Environmental Enforcement Section Document Center, 601 Pennsylvania Ave., NW., Box 1097, Washington, DC 20004. A copy of the proposed consent decree may be obtained in person or by mail from the Document Center. In requesting a copy please enclose a check in the amount of $6.50 (25 cents per page reproduction costs) payable to "Consent Decree Library."

Barry M. Hartman,

Acting Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Proposal To Provide Additional Data From Surveys of Employee Compensation

AGENCY: Bureau of Labor Statistics, Labor.

ACTION: Request for comments on proposed new data.

SUMMARY: The Department, through the Bureau of Labor Statistics (BLS), currently collects and publishes extensive data on employee compensation. Among the Department's compensation surveys are the Employment Cost Index (ECI) and the Employee Benefits Survey (EBS). The ECI provides data on employer costs for employee compensation while the EBS provides data on the incidence and detailed characteristics of benefit plans. Since 1990, these two surveys have been collected from the same sample of establishments. Now BLS proposes to combine the output from these surveys to produce additional data on employee compensation. The new data will combine the employer's cost with the corresponding benefit plan provisions.

The Department is seeking comments at this time so that the interested public may be involved at the outset in the development of these new compensation data.

DATES: Comments are due by July 1, 1992.

ADDRESSES: Send comments to William J. Wiatrowski, Project Director, Employee Benefits Survey, Bureau of Labor Statistics, 441 G Street, NW., Washington, DC 20212. Telephone 202–523–9444.

FOR FURTHER INFORMATION CONTACT: Willliam J. Wiatrowski, Project Director, Employee Benefits Survey, Bureau of Labor Statistics, Telephone 202–523–9444.

SUPPLEMENTARY INFORMATION: The Employment Cost Index (ECI) is the most comprehensive measure of labor cost change and levels in the U.S. The ECI was developed in stages. The series began in 1976 with 20 published series of wage changes. In 1980, the ECI began publishing changes in total compensation (wages and benefits together) for the most aggregate of the series, was designated as a Principal Federal Economic Indicator, and became the primary series for analyzing labor cost inflation. In 1981, wage and total compensation series were added for State and local governments.

Since 1981, the ECI has expanded further. Over 200 wage and total compensation indexes, providing extensive occupational, industrial, union status, and geographic detail, are published. In addition, indexes of benefit costs are published for some aggregate series. The ECI includes data on a variety of benefits, including paid leave, insurance, retirement, legally-required, and other benefits. In 1987, the ECI began publishing the hourly costs of wages and benefits for broad occupation and industry groups. Publication of seasonally adjusted series began in 1991.

The Employee Benefits Survey (EBS) has provided extensive data on the availability and detailed characteristics of employee benefits since 1979. In 1990, the EBS completed its first study of employee benefits in small private establishments, the only comprehensive data of its kind available. Upon completion of the 1991 EBS, benefits data will be available for all full-time and part-time private sector and State and local government workers in the U.S.

The EBPS provides incidence data for over 50 employee benefits. Extensive provision data are tabulated for over 20 major benefits, including insurance benefits (such as medical care, dental care, life insurance, and disability income plans), retirement benefits (such as defined benefit pension plans, savings and thrift plans, and profit sharing plans), and leave benefits (such as holidays, vacations, and parental leave). Data are presented separately for full-time and part-time workers and for broad occupational categories.

The BLS began working on integrating the EBS and ECI in 1987, and in November 1989 the data required for both surveys were collected from a single sample for the first time. The BLS currently collects, from this single sample of employers, much of the data needed to provide integrated employer cost and plan provision data for a variety of benefits. The two surveys are integrating their theoretical foundations. For example, the basic unit of observation in the ECI is the occupation in the establishment while in EBS it is the benefit plan. This and similar conceptual issues must be resolved before integrated data can be produced.

Before final decisions are made on the nature of the combined ECI/EBS tabulations to be produced, the input of current and potential data users is requested. The public is asked to comment on the types of data desired, the availability of data for specific subgroups of the country (such as by industry, occupation, geographic region, size of establishment, or other variables), the need for electronic data and any special requirements, the frequency of data availability, and any other relevant topic. Commenters are encouraged to provide specific comments that relate to their areas of expertise, the benefit topics with which they regularly work, and any other matters that they believe would be of interest to the Department as it develops its plans in this area.

Signed at Washington, DC, this 16th day of March 1992.

George L. Stelluto,

Associate Commissioner for Compensation and Working Conditions, Bureau of Labor Statistics.

BILLING CODE 4510–24–M

Employment and Training Administration

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under title II, chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than April 2, 1992.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than April 2, 1992.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, DC this 9th day of March 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

[TA-W-26,607]

Mercury Marine Fond Du Lac, Wisconsin; Negative Determination Regarding Application for Reconsideration

By an application dated February 25, 1992, Local #1947 of the International Association of Machinists (IAM) requested administrative reconsideration of the subject petition for trade adjustment assistance. The denial notice was signed on February 6, 1992 and was published in the **Federal Register** on February 25, 1992 (57 FR 6528).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

In order for a worker group to be certified eligible to apply for adjustment assistance benefits, it must meet all three of the Group Eligibility Requirements of the Trade Act: (1) A significant decrease in employment; (2) an absolute decrease in sales or production; and (3) an increase of imports which contributed importantly to worker separations and declines in sales or production. The "contributed importantly" test is generally demonstrated through a survey of the workers' firm's customers. The failure to meet any one of the worker group criteria would result in a negative determination.

The Department's denial was based on the fact the increased import criterion for outboard motors of under 30 horsepower and 30 horsepower and over was not met in 1990 compared to 1989 and the "contributed importantly" test for all sizes of motors was not met in 1990 compared to 1989 and in 1991 compared to 1990.

Company officials indicated that the major portion of Fond du Lac's sales is for the export market. Investigation findings show declines in Fond du Lac's sales to both the export and domestic markets. Clearly, increased U.S. imports would not form a basis for certification because of sales declines in the export market. Sales declines in the domestic market are the result of the current recession. Industry spokesman indicate that purchases of boats and motors are a discretionary purchase which may be postponed or canceled. Official Government data shows that consumption expenditures on boats and motors declined seven percent in 1991 compared to 1990 as a result of a decline in real disposable personal income for the same period.

The Department was not inconsistent in its determinations for Force Outboards in Hartford, Wisconsin and Mercury Marine in Fond du Lac. Investigation findings show that the Hartford plant was permanently closed in late 1991. Workers at Hartford were certified (TA-W-26,244) since they met all the worker group requirements of the Trade Act. Investigation findings show that the product mix was different at Hartford than at Mercury Marine. Also, company officials indicated that production at Force Outboards went to a different market with different customers from that of Mercury Marine. Further, company imports of small outboard motors from Japan increased substantially at Force Outboards in 1990 compared to 1989. Company imports at Mercury Marine were not substantial and declined in 1990 compared to 1989 and in the first nine months of 1991 compared to the same period in 1990.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC this 12th day of March 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Service, Unemployment Insurance Service.

[FR Doc. 92-6649 Filed 3-20-92; 8:45 am]

BILLING CODE 4510-30-M

Mine Safety and Health Administration

Petitions for Modification

The following parties have filed petitions to modify the application of mandatory safety standards under section 101(c) of the Federal Mine Safety and Health Act of 1977.

1. Mingo Logan Coal Company

[Docket No. M-92-13-C]

Mingo Logan Coal Company, 1000 Mingo Logan Avenue, Wharncliffe, West Virginia 25651 has filed a petition to modify the application of 30 CFR 75.1002 (location of trolley wires, trolley feeder wires, high-voltage cables and transformers) to its Mountaineer Mine (I.D. No. 46-06958) located in Mingo County, West Virginia. The petitioner proposes to use high-voltage cables to power longwall face equipment.

2. Double M Coal Company, Inc.

[Docket No. M-92-14-C]

Double M Coal Company, Inc., P.O. Box 349, Appalachia, Virginia 24216 has filed a petition to modify the application of 30 CFR 75.1710 (canopies or cabs; electric face equipment) to its Mine No. 5 (I.D. No. 44-05661) located in Wise County, Virginia. Due to rises and dips in the mine's roof and floor, the petitioner proposes to operate electrical equipment without canopies.

3. G & C Coal Company

[Docket No. M-92-15-C]

G & C Coal Company, Rt. 1, Box 227, Woodbine, Kentucky 40771 has filed a petition to modify the application of 30 CFR 75.313 (methane monitor) to its No. 1 Mine (I.D. No. 15-16510) located in Whitley County, Kentucky. The petitioner proposes to use a hand-held continuous oxygen and methane monitor instead of continuous machine-mounted methane monitors on permissible three-wheel tractors with drag bottom buckets.

4. T/A Bucket Coal Company

[Docket No. M-92-16-C]

T/A Bucket Coal Company, 14 North Third Street, Minersville, Pennsylvania 17954 has filed a petition to modify the application of 30 CFR 75.301 (air quality, quantity, and velocity) to its Heather Mine (I.D. No. 36-07903) located in Schuylkill County, Pennsylvania. The petitioner requests a modification to require that the minimum quantity of air reaching each working face be 1,500 cubic feet a minute (cfm), the minimum quantity of air reaching the last open crosscut in any pair or set of developing entries be 5,000 cfm, and the minimum quantity of air reaching the intake end of a pillar line be 5,000 cmf.

5. Eastern Associated Coal Corporation

[Docket No. M-92-17-C]

Eastern Associated Coal Corporation, P.O. Box 1233, Charleston, West Virginia 25324 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its Harris No. 1 Mine (I.D. No. 46-01271) located in Boone County, West Virginia. The petitioner proposes to monitor ventilation in the longwall tailgate entry instead of traveling the return aircourse in its entirety.

6. Cordero Mining Company

[Docket No. M-92-18-C]

Cordero Mining Company, P.O. Box 1449, Gillette, Wyoming 82717-1449 has filed a petition to modify the application of 30 CFR 77.206(c) (ladders; construction; installation and maintenance) to its Cordero Mine (I.D. No. 48-00992) located in Campbell County, Wyoming. The petitioner proposes to use a permanent fall prevention system, with rigid rail or steel cable rope with a grabbing device that locks in place automatically to prevent falls, on mobile equipment instead of ladder backguards.

7. Cordero Mining Company

[Docket No. M-92-19-C]

Cordero Mining Company, P.O. Box 1449, Gillette, Wyoming 82717-1449 has filed a petition to modify the application of 30 CFR 77.1607(u) (loading and haulage equipment; operation) to its Cordero Mine (I.D. No. 48-00992) located in Campbell County, Wyoming. The petitioner proposes to use a "power pack" to power up the hydraulic or air system required to provide steering and braking systems, which would give the controls to the equipment being towed. The piece of equipment could then be towed with a steel cable choker which would eliminate the possibility of jack-knifing or over-straining from handling the heavy and awkward tow bar.

Request for Comments

Persons interested in these petitions may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 22, 1992. Copies of these petitions are available for inspection at that address.

Dated: March 16, 1992.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 92-6650 Filed 3-20-92; 8:45 am]

BILLING CODE 4510-43-M

Occupational Safety and Health Administration

[Docket No. NRTL-2-90

United States Testing Company, Inc., California Division

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Notice of application for recognition as a nationally recognized testing laboratory, and preliminary finding.

SUMMARY: This notice announces the application of the California Division of the United States Testing Company, Inc. for recognition as a Nationally Recognized Testing Laboratory (NRTL) under 29 CFR 1910.7, and presents the Agency's preliminary finding.

DATES: The last date for interested parties to submit comments is May 22, 1992.

ADDRESSES: Send comments to: NRTL Recognition Program, Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue, NW., room N3653, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: James J. Concannon, Director, Office of Variance Determination, NRTL Recognition Program, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue, NW., room N3653, Washington, DC 20210.

SUPPLEMENTARY INFORMATION:

Notice of Application

Notice is hereby given that the United States Testing Company, Inc., California Division (UST/CA) has made application pursuant to section 6(b) of the Occupational Safety and Health Act of 1970 (84 Stat. 1593, 29 U.S.C. 655), Secretary of Labor's Order No. 1-90 (55 FR 9033), and 29 CFR 1910.7 for recognition as a Nationally Recognized Testing Laboratory.

The address of the laboratory covered by this application is: United States Testing Company, Inc., California Division, 5555 Telegraph Road, Los Angeles, California 90040.

Regarding the merits of the application, the applicant contends that it meets the requirements of 29 CFR 1910.7 for recognition in the areas of testing which it has specified.

The applicant states that for each item of equipment or material to be certified, it has the capability (including proper testing equipment and facilities, trained staff, written testing procedures, and calibration and quality control programs) to perform testing and examination of equipment and materials for workplace safety purposes to determine conformance with appropriate test standards. Exhibit 2. A., Supplement II, Quality Control Manual, has been revised since the submittal of the original application. The revision, Exhibit 2. A. (1), Quality Control Manual, Volume 4—Rev. 9, 1990, contains sections dealing with organization, operational procedures, calibration, professional records (senior staff), and lists of equipment, apparatus, tools and chambers. Supplement IV contains details of the technical/professional staff, a directory of listed products, and sample test report.

The California Division occupies about 75,000 square feet of combined building and office space, testing yards and parking area, housing a full spectrum of test instrumentation and laboratories, states UST/CA. UST/CA asserts that adequate facilities are provided for the proper storage, installation, operation, and maintenance of all test equipment. Each department maintains the proper environment for the appropriate handling, storage, and conditioning of products to be tested. A stringent visitor access and supervision policy is also maintained. In addition, there is a security/fire system to safeguard the facilities during off hours. All doors and gates are protected by this system.

UST/CA states that it is completely independent of employers subject to the tested equipment requiremens, and of any manufacturers or vendors of equipment or materials being tested for these purposes. It further maintains that all the stock of the United States Testing Company, Inc. is now owned by Societe Generale de Surveillance. No client, business, government agency, trade or professional association, or other entity owns or has any vested interest in the stock or management of the United States Testing Company. The company is independently equipped and staffed, and its personnel perform only objective testing, inspection, evaluation, and analysis of products submitted by the clients of the company. No separate design, promotion, or consultation services are provided. Further, according to the applicant, neither the laboratory nor the persons employed in the laboratory have any affiliations with products designers, manufacturers, architects, government agencies, consumer interests, or any other group having a vested interest in the outcome of the laboratory testing or inspection activities. The United States Testing

Company states that it will continue to maintain this independence.

The United States Testing Company claims that it maintains effective procedures for producing creditable findings or reports that are objective and without bias. It states that complete and adequate records of the quality control program for the company are documented in each division's quality control manual. The UST/CA Quality Control Manual (Ex. 2. A., Supplement II) outlines operational procedures in effect for all in-house testing performed at the California Division. The Manual also provides pertinent information on the equipment calibration program and the personnel structure of the California Division, according to the applicant.

UST/CA states that it maintains effective procedures for handling complaints and disputes under a fair and reasonable system. An official report of test findings is generated for all in-house and field testing performed at the California Division. A procedure has also been implemented for appealing its decisions through a system which provides an unbiased review of any controversial matter. Under this corporate system, the UST/CA is capable of handling inquiries or complaints from the general public, inspection authorities, and government agencies; it is not limited to solving disputes between the client and the laboratory.

The applicant states that it provides for the implementation of control procedures for identifying the listed and labeled equipment or materials, inspection of the production run of such items at factories for product evaluation purposes to assure conformance with applicable test standards, and the conducting of field inspections to monitor and to assure the proper use of its identifying mark or labels on products. The United States Testing Company, Inc., established the Nationwide Consumer Testing Institute, Inc. (NCTI) Listing and Labeling Program as a third party certification program for product quality assurance. The Institute is a wholly owned subsidiary of UST. The "Nationwide" identification and listing and labeling mark are used to eliminate any possibility of identifying the program as an agency of the United States government. The NCTI Program is supported by written test methods and procedures that are based on applicable and appropriate test standards. This program is detailed in the Nationwide Consumer Testing Institute, Inc. *Policy and Format Manual*. (See Ex. 2. A., Supplement III). Within this document, the applicant states, four important aspects of the NCTI certification program are described. First, procedures for identifying the listed or labeled products are outlined. Second, procedures for conducting factory inspections of the production process are described. These inspections evaluate individual products and quality control procedures to determine conformance with the referenced test standards. Third, the procedures for conducting field inspections are outlined. These inspections are conducted to monitor and assure proper use of the NCTI label, to determine whether the product complies with test standards and safety requirements, and to evaluate the effectiveness of the applicable test standards. Finally, the NCTI Policy and Format Manual describes the follow-up listing program, which includes the maintenance of a listed products directory.

Background

According to the applicant, the United States Testing Compnay, Inc. is wholly owned and operated by Societe Generale de Surveillance (SGS), the largest inspection, testing, and expediting company in the world. In the United States, the SGS affiliates including the United States Testing Company are fully owned and controlled by SGS North America, Inc., which is incorporated in Delaware. UST is headquartered in Hoboken, New Jersey, and its Laboratory Services Group is made up of four additional branches located in different areas of the Country. The one of concern for this application, the California Division, is located in Los Angeles.

The applicant states that the United States Testing Company, Inc., was founded in 1880 as the New York Silk and Wool Conditioning Works. Over the next 30 years, the company increased its services into other fields of testing and expanded its facilities to other locations along the eastern seaboard. Because of this expansion, in 1910 the company's name was changed to the United States Conditioning and Testing Company. In 1920, the company became incorporated and subsequently changed its name to the United States Testing Company, Inc. Its offices and main laboratories were moved to Hoboken, New Jersey in 1926.

In 1942, according to the applicant, the third-party certification program was first established using the Seal of Quality of the United States Testing Company, Inc., and this program achieved nationwide implementation when the California Division was formed in 1953. In 1961, the Federal Trade Commission required the Company to change the name of this certification program to eliminate any possibility of identifying the program with an agency of the United States government. In response to this requirement, the Nationwide Consumer Testing Institute, Inc. (NCTI) was introduced the following year, and its label was registered with the U.S. Patent Office in 1969. (NCTI is a wholly owned subsidiary of the United States Testing Company, Inc.). The United States Testing Company, Inc., along with its Nationwide Consumer Testing Institute certification program, was purchased by Societe Generale de Surveillance in 1982.

The applicant states that the California Division of the United States Testing Company, Inc. consists of 41 professional or technical employees. The Electrical Department is the only one involved with certification as it applies to OSHA. Six employees are involved with the program, as follows:

1—Division General Manager
1—Electrical Department Manager
1—Electrical/Electronics Laboratory Supervisor
1—Project Engineer
1—Technical Writer
1—Electrical Engineer

The applicant desires recognition for testing and certification of products when tested for compliance with the following test standards, which are appropriate within the meaning of 29 CFR 1910.7(c):

ANSI/UL 1—Flexible Metal Conduit
ANSI/UL 3—Flexible Nonmetallic Tubing for Electric Wiring
ANSI/UL 250—Household Refrigerators and Freezers
ANSI/UL 514A—Metallic Outlet Boxes, Electrical
UL 544—Electric Medical and Dental Equipment
ANSI/UL 632—Electrically Actuated Transmitters
ANSI/UL 751—Vending Machines
ANSI/UL 913—Intrinsically Safe Apparatus and Associated Apparatus for Use in Class I, II, and III, Division I, Hazardous (Classified) Locations
ANSI/UL 1012—Power Supplies
UL 1236—Electric Battery Chargers
UL 1270—Radio Receivers, Audio Systems, and Accessories
ANSI/UL 1418—Implosion-Protected Cathode-Ray Tubes for Television-Type Appliances
UL 1459—Telephone Equipment
ANSI/UL 1484—Residential Gas Detectors
ANSI/UL 1571—Incandescent Lighting Fixtures
UL 1604—Electrical Equipment for Use in Class I and II, Division 2 and Class III Hazardous (Classified) Locations

Preliminary Finding

The United States Testing Company, Inc., California Division, addressed all of the criteria which had to be met for recognition as an NRTL in its initial application and in its further correspondence. For example, the applicant submitted a list of its test equipment and instrumentation; a roster of its personnel including resumes of those in key positions and copies of position descriptions; copies of a typical test report, a factory inspection form and an inspection summary; a summary of its listing, labeling, and follow-up services; a statement of its independence as a testing laboratory; and a copy of its Quality Assurance Manual including a description of its documentation, calibration system, appeals procedure, record keeping and operational procedures.

Nine major areas were examined in depth in carrying out the laboratory survey: Facility; test equipment; calibration program; test and evaluation procedures; test reports; records; quality assurance program; follow-up listing program; and personnel.

The discrepancies noted by the survey team in the on-site evaluation (Ex. 3.A.(1)) were adequately responded to by the applicant prior to the preparation of the survey report and are included as a separate corrective action report section (Ex. 3.A.(2)).

With the preparation of the final report of the United States Testing Company, Inc., California Division, the survey team was satisfied that the testing facility appeared to meet the necessary criteria required by the standard, and so noted in the On-Site Review Report (Survey). (See Ex. 3.A.).

Following a review of the application file and the on-site survey report of the UST/CA facility, the NRTL Recognition Program staff concluded that the applicant appeared to have met the requirements for recognition as a Nationally Recognized Testing Laboratory and, therefore, recommended to the Assistant Secretary that the application be preliminarily approved.

Based upon a review of the completed application file and the recommendation of the staff, the Assistant Secretary has made a preliminary finding that the United States Testing Company, Inc., California Division can meet the requirements for recognition as required by 29 CFR 1910.7.

All interested members of the public are invited to supply detailed reasons and evidence supporting or challenging the sufficiency of the applicant's having met the requirements for a Nationally Recognized Testing Laboratory, as well as appendix A, of 29 CFR 1910.7. Submission of pertinent written document and exhibits shall be made no later than May 22, 1992, and must be addressed to the NRTL Recognition Program, Office of Variance Determination, room N 3653, Occupational Safety and Health Administration, U.S. Department of Labor, Third Street and Constitution Avenue, N.W., Washington, DC 20210. Copies of the UST/CA application, the laboratory survey report, and all submitted comments, as received (Docket No. NRTL–2–90), are available for inspection and duplication at the Docket Office, room N 2634, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address.

The Assistant Secretary's final decision on whether the applicant satisfies the requirements for recognition as an NRTL will be made on the basis of the entire record including the public submissions and any further proceedings that the Assistant Secretary may consider appropriate in accordance with appendix A of § 1910.7.

Signed at Washington, DC this 17th day of March, 1992.

Dorothy L. Strunk,

Acting Assistant Secretary.

NATIONAL CREDIT UNION ADMINISTRATION

Public Information Collection Requirement Submitted to OMB for Review

March 13, 1992.

The National Credit Union Administration has submitted the following public information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submissions may be obtained by calling the NCUA Clearance Officer listed. Comments regarding information collections should be addressed to the OMB reviewer listed and to the NCUA Clearance Officer, NCUA, Administrative Office, room 7344, 1776 G Street, Washington, DC 20456.

National Credit Union Administration

OMB Number: None.
Form Number: NCUA–10602(OT).
Type of Review: New Collection.
Title: Truth in Savings Survey.
Description: This is a one-time survey to learn how credit unions calculate dividends on deposits.
Respondents: Federally insured credit unions.
Estimated Number of Respondents: 450.
Estimated Burden Hours per Response: 0.167 hours.
Frequency of Response: One-Time.
Estimated Total Reporting Burden: 75 hours.
Clearance Officer: William A. Theard, (202) 682–9700, National Credit Union Administration, room 7344, 1776 G Street, NW., Washington, DC 20456.
OMB Reviewer: Gary Waxman (202) 395–7340, Office of Management and Budget, room 3208, New Executive Office Building, Washington, DC 20503.

Becky Baker,

Secretary of the NCUA Board.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

Music Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Composers Fellowships/Services to Composers Section) to the National Council on the Arts will be held on April 7–9, 1992 from 9 a.m.–5:30 p.m. and April 10 from 9 a.m.–5 p.m. in room M–14 at the Nancy Hanks Center, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

A portion of this meeting will be open to the public on April 10 from 3 p.m.–5 p.m. The topics will be policy and guidelines review.

The remaining portions of this meeting on April 7–9 from 9 a.m.–5:30 p.m. and April 10 from 9 a.m.–3 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman of November 20, 1991, these sessions will be closed to the public pursuant to subsection (c)(4), (6), and (9)(B) of section 552b of Title 5, United States Code.

Any person may observe meetings, or portions thereof, of advisory panels which are open to the public, and may be permitted to participate in the panel's discussions at the discretion of the panel chairman and with the approval of the full-time Federal employee in attendance.

If you need special accommodations due to a disability, please contract the Office of Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue NW., Washington, DC 20506, 202/682–5532, TTY 202/682–5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Dated: March 17, 1992.

Yvonne M. Sabine,

Director, Council and Panel Operations, National Endowment for the Arts.

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Economics; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

NAME: Advisory Panel for Economics.

DATE & TIME: April 9, 1992, 9 am to 5 pm, April 10, 1992, 9 am to 5 pm, April 11, 1992, 9 am to noon.

PLACE: Rooms 540, 540B National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

TYPE OF MEETING: Closed.

CONTACT PERSONS: Dr. Daniel Newlon, Program Director, Dr. Lynn Pollnow, Program Director and Dr. Vincy Fon, Associate Program Director, National Science Foundation, 1800 G Street, NW., room 336, Wasington, DC 20550, Telephone: 202/357–0106.

PURPOSE OF MEETING: To provide advice and recommendations concerning research proposals submitted to NSF for financial support.

AGENDA: To review and evaluate unsolicited research proposals, submitted to or being jointly considered by, the Economics Program as part of the selection process for awards.

REASON FOR CLOSING: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552 b.(c) (4) and (6) of the Government in the Sunshine Act.

Dated: March 18, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket No. 40–8027, License No. SUB–1010, EA 92–045]

In the Matter of Sequoyah Fuels Corp., Gore, OK; Order Modifying License (Effective Immediately)

I

Sequoyah Fuels Corporation (SFC or Licensee) is the holder of Source Material License No. SUB–1010 issued by the Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR part 40. The license authorizes possession and use of source material in the production of uranium hexafluoride (UF6) and depleted uranium tetrafluoride (DUF4) in accordance with the terms and conditions of the license. The license was due to expire on September 30, 1990, but currently remains in effect based on a timely renewal application submitted by the Licensee.

II

On November 5, 1990, NRC issued a Demand for Information to SFC (EA 90–158) for the purpose of obtaining information to determine whether there was reasonable assurance that SFC could properly manage licensed activities in accordance with Commission requirements. This Demand was based in part on the failure by key managers at SFC to accurately and completely inform the NRC of material facts in a prompt manner.

On October 3, 1991, the NRC issued an Order Modifying License (Effective Immediately) and Demand for Information to SFC (EA 91–067) to address a number of significant safety violations and regulatory problems.

Significantly, the Order was based, in part, on the failure of a responsible licensee official to fully provide complete and accurate information to the NRC. The purpose of the Demand was to obtain further information from the Licensee in order to determine whether the Commission could have reasonable assurance that certain individual managers holding key positions described in the License would properly carry out their responsibilities and authorities. That Demand was issued, in part, because it appeared that these key SFC management officials were not candid with the NRC concerning regulatory matters.

The Licensee responded to the Demand in two letters, both dated December 2, 1991. In those responses, the Licensee asserted its belief that the individuals named in the Demand neither acted in careless disregard of their respective responsibilities for licensed activities nor failed to be candid with the NRC. However, the Licensee admitted that the individuals made errors in judgment, missed opportunities to identify and correct deficiencies at an earlier stage, and could have done more to assure that the NRC was fully informed of SFC activities.

By letter dated December 18, 1991, the Licensee stated that it did not intend to use any of the named individuals in the performance and supervision of NRC-licensed activities, and should it desire to use any of the named individuals in such capacities in the future, it would provide the NRC at least 30 days notice. The NRC confirmed this commitment in a Confirmatory Order dated January 13, 1992 (EA 91–196).

On January 7, 1992, an employee approached NRC inspectors with allgations involving potential wrongdoing. Specifically, it was alleged that an SFC health physics (HP) supervisor was condoning, if not encouraging, the falsification of records and improper vehicle surveys. Subsequent discussions with an HP technician raised further concerns regarding the adequacy of surveys performed on vehicles prior to their release from the site.

On January 8, 1992, a senior NRC official on site discussed this matter with the Vice President for Regulatory Affairs, a contractor hired by the Licensee as an interim replacement for one of the key positions recently vacated as a consequence of the October 3, 1991 Order. This discussion was for the purpose of advising SFC of the allegations and potential safety issues so that SFC could investigate the matter and take appropriate corrective action. The Vice President did not, however, convey to the NRC official during that discussion ot two subsequent telephone calls, that he had been aware of the substance of the allegations since January 2, 1992 and that he had directed that SFC initiate an investigator into the specific matters identified by the senior NRC official.

Finally, on January 20, 1992, SFC notified the NRC of the discovery of contamination in the plant warehouse, an unrestricted area. An NRC inspection team subsequently determined that the Licensee had first become aware of the contamination as early as November 22, 1991. In addition, the NRC team also found that the Licensee had also discovered contamination in the SFC Carlile Training Center, an unrestricted offsite facility, as early as November 13, 1991. However, until the NRC inspection, the Licensee failed to either control the contaminated material or take action to restrict access to the areas where the contaminated material was stored.

III

Based on the above, it appears that the Licensee has not been able to overcome and correct SFC's history of lack of candor in bringing potential safety and regulatory issues to NRC's attention. It is recognized that each of the failures to bring forth information to the NRC was not necessarily a violation of NRC requirements. Nevertheless, given the regulatory issues at SFC, it is imperative that NRC be kept fully and promptly informed of potential safety and regulatory issues occurring at this facility. Without this information, NRC could be significantly hampered in its ability to properly regulate activities at SFC.

Consequently, to further assure SFC's management will keep the NRC fully informed of potential safety and regulatory concerns and to provide additional assurance that NRC will be able to effectively carry out its regulatory oversight of the activities at SFC, it is necessary to require that License No. SUB–1010 be modified to include additional reporting requirements. Furthermore, pursuant to 10 CFR 2.202, I find that the public health, safety and interest require that this Order be immediately effective.

IV

Accordingly, pursuant to sections 63, 161b, 161i, 161o, 182, and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR part 40, *It is Hereby Ordered*, effective immediately, that license no. SUB–1010 is modified as follows:

The Licensee shall, to the extent not covered by any other reporting requirement, including but not limited to 10 CFR 40.9(b), inform the Regional Administrator, Region IV, in writing, within five working days of awareness of the following:

A. Failure to follow procedures or other requirements where there are indications that the cause was a deliberate failure to meet requirements. A deliberate failure is a failure caused by deliberate misconduct as defined in 10 CFR 40.10(c).

B. Spills or other unusual occurrences involving the spread of contamination in and around the SFC's facility, equipment, or site, subject to 10 CFR 40.36(f)(1), even if the contamination has been or will be cleaned up.

C. Any failure of equipment or facilities, or failure to follow procedures, which leads to (1) offsite release or contamination in unrestricted areas in excess of SFC's administrative limits; (2) any contamination in restricted areas that requires activities in an area to be suspended for more than twenty four hours pending decontamination; or (3) any personnel contamination in excess of SFC's administrative limits which within one hour of detection is not reduced to within limits.

D. Employee concerns or allegations that any of the above failures may have occurred unless it is determined within the above five working days that the concern or allegation is not valid.

E. Any other matter that the President, SFC, believes rises to a regulatory or safety concern that warrants NRC notification.

The Regional Administrator, Region IV, may, in writing, relax or rescind any of the above conditions upon demonstration by the Licensee of good cause.

V

In accordance with 10 CFR 2.202, the Licensee must, and any other person adversely affected by this order may, submit an answer to this Order, within 20 days of the date of this Order. The answer may consent to this Order. Unless the answer consents to this Order, the answer shall, in writing and under oath or affirmation, specifically admit or deny each allegation or charge made in this Order and shall set forth the matters of fact and law on which the Licensee or other person adversely affected relies and the reasons as to why the Order should not have been issued. Any answer filed within 20 days of the date of this Order may include a

request for a hearing. Any answer or request for a hearing shall be submitted to the Secretary, U.S. Nuclear Regulatory Commission, Attn: Chief, Docketing and Services Section, Washington, DC 20555. Copies shall also be sent to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555, to the Assistant General Counsel for Hearings and Enforcement at the same address, to the Regional Administrator, NRC Region IV, 611 Ryan Plaza Drive, suite 400, Arlington, Texas 76011 and to the Licensee if the answer or hearing request is by a person other than the Licensee. If a person other than the Licensee requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected by this Order and shall address the criteria set forth in 10 CFR 2.714(d).

If a hearing is requested by a Licensee or a person whose interest is adversely affected, the Commission will issue an Order designating the time and place of any hearings. If a hearing is held, the issue to be coinsidered at such hearing shall be whether this Order should be sustained.

VI

In the absence of any request for hearing, the provisions specified in Section IV above shall be final in 20 days from the date of the Order without further order or proceedings. An answer or request for a hearing shall not stay the immediate effectiveness of the order.

Dated at Rockville, Maryland this 13th day of March, 1992.

For the Nuclear Regulatory Commission.

Hugh L. Thompson, Jr.

Deputy Executive Director for Nuclear Material Safety, Safeguards, and Operations Support.

[FR Doc. 92-6683 Filed 3-20-92; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-346]

Toledo Edison Co.; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Standards Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-3, issued to Toledo Edison Company (the licensee), for operation of the Davis-Besse Nuclear Power Station, Unit 1 located in Ottawa County, Ohio.

The amendment would allow continual operation in the event that either the reactor coolant system (RCS) loop 1 vent path or the RCS loop 2 vent path (but not both) is inoperable and cannot be restored to operable status within 30 days. In lieu of a plant shutdown, a Special Report would be prepared and submitted to the NRC within the next 30 days outlining the action taken, the cause of inoperability, and the plans and schedule for restoring the vent path to operable status.

Unidentified RCS leakage had increased during this operating cycle, although it remained within Technical Specification limits. During a recent containment entry, the licensee identified RCS loop 2 vent path as a source of RCS leakage and isolated the vent path to minimize RCS leakage. The licensee then promptly submitted the proposed license amendment, requesting to continue operation with a single loop vent path closed, so as to minimize RCS leakage.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazard consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, because the RCS loop vent paths are not required to function to mitigate any Design Basis Accident; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, because an RCS loop vent path does not function during plant operation, so an isolated RCS loop vent path will not affect plant operation; or (3) involve a significant reduction in a margin of safety because the RCS loop vent paths are not required to function to mitigate any Design Basis Accident.

Accordingly, the Commission proposes to determine that this change does not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within fifteen (15) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By April 22, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the Local Public Document Room located at the University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first pre-hearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene, which must include a list of the contentions that are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in providing the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiration of 30-days, the Commission will make a final determination on the issue of no significant hazards considerations. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves a no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 15-day notice period. However, should circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 15-day notice period, provided that its final determination is that the amendment involves no significant hazards considerations. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1 (800) 325-6000 (in Missouri 1 (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John N. Hannon: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Jay E. Silberg, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated March 13, 1992, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC 20555, and at the Local Public Document Room, University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio 43606.

Dated at Rockville, Maryland, this 18th day of March 1992.

For the Nuclear Regulatory Commission.

Jon B. Hopkins, Sr.,

Project Manager, Project Directorate III-3, Division of Reactor Projects III/IV/V, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-30478; File No. SR-NASD-91-68]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Proposed Rule Change Relating to the Forwarding of Proxy Material

March 16, 1992.

On December 19, 1991, the National Association of Securities Dealers, Inc. ("NASD" or "Association") submitted a proposed rule change to the Securities and Exchange Commission ("SEC" or "Commission") pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder.[2] The proposal amends the Interpretation of the Board of Governors—Forwarding of Proxy and Other Materials, under Article III, section 1 of the NASD's Rules of Fair

[1] 15 U.S.C. 78s(b)(1) (1988).

[2] 17 CFR 240.19b-4 (1991).

Practice [3] ("Interpretation") in order to require NASD member firms to forward proxy material to beneficial owners at the request of persons other than the issuer, *i.e.* stockholders.[4]

Notice of the proposed rule change, as amended, together with its terms of substance was provided by the issuance of a Commission release (Securities Exchange Act Release No. 30341, February 6, 1992) and by publication in the **Federal Register** (57 FR 5193, February 12, 1992). No comments were received on the proposal. This order approves the proposed rule change.

In May 1991, the staff of the Commission's Division of Market Regulation ("Division"), in connection with the review of an earlier proposed rule change,[5] requested that the NASD consider amending the Interpretation to require NASD members to forward proxy material to beneficial owners upon the request of persons other than the issuer. Previously, the Interpretation required NASD members to forward proxy material to beneficial owners upon the request of the issuer, but did not extend the duty to forward proxy material upon the request of other persons who are shareholders of the issuer. Upon consideration of the Division's request, the NASD determined that potential exists for disruption in proxy communications in circumstances where stockholders in possession of the stockholder lists request NASD members to forward material to beneficial owners.

Currently, only those NASD members that are affiliated with the New York Stock Exchange ("NYSE") and the American Stock Exchange ("AMEX") are required to forward proxy material upon the request of a "person" other than the issuer of the stock.[6] The NASD has proposed the instant rule change in order to eliminate the disparity that exists in the rules regarding the forwarding of proxy material between NASD members that are affiliated with the NYSE and/or AMEX and those NASD members that are not so affiliated.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to the NASD. By requiring NASD members to forward proxy material upon the request of persons other than issuers, investors will be aided in evaluating the character of the securities they hold and in their ability to act upon the rights and responsibilities that accompany ownership of securities. Further, the Commission believes that the potential for improved communications between shareholders will be of mutual benefit to both NASDAQ-listed companies and their shareholders. Finally, because these amendments will prevent unwarranted discrimination in the level of information provided to investors by creating a uniform standard of service by NASD members forwarding proxy information, the Commission finds that the proposed rule change is consistent with the requirements of section 15A(b)(6) of the Act.[7] Section 15A(b)(6) requires, in part, that the rules of the NASD be designed "to promote just and equitable principles of trade * * * to protect investors and the public interest * * *" and "are not designed to permit unfair discrimination * * *."

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.[8]

Margaret H. McFarland,

Deputy Secretary.

Self-Regulatory Organizations; Proposed Rule Change by National Association of Securities Dealers, Inc., Relating to Market Maker Registration in Mergers or Acquisitions

March 16, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on January 21, 1992, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD.[1] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing amendments to Schedule D to the NASD By-Laws to permit same-day registration for market makers in certain merger or acquisition situations.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Change

The Association is proposing an amendment to part VI of schedule D to the NASD By-Laws to permit immediate on-line registration of market makers in situations where a merger or acquisition has been publicly announced. The NASD proposes to allow a market maker registered in either one of the two affected companies to register in the other company on a same-day basis. Further, the NASD is proposing that if a market maker in this narrowly construed situation has withdrawn from one of the affected securities, the withdrawal shall be considered an excused withdrawal so long as the market maker has remained registered in the other issue. The 20-day prohibition against reregistering in the security contained in Part VI of Schedule D will, therefore, not apply to market makers that have withdrawn from a company and subsequently wish to register in the stock pursuant to the same-day registration procedures for a publicly announced merger or acquisition, so long as the market maker has remained active in one of the companies.

Current registration requirements contained in Schedule D include a one-day waiting period to avoid a form of "fair-weather" market making. The one-day provision was implemented as a cooling off period to prevent market makers from registering in a stock immediately after good news is announced or with the intent to execute a single customer order, with the possibility of withdrawing immediately thereafter.

The situation where a merger or acquisition is publicly announced and it is anticipated that there will be only one surviving entity after the event has occurred is a different situation. Market makers in one security may wish to register immediately in the second company to provide liquidity and depth in both issues and to more effectively manage the risk of their positions in the first entity. If a market maker is already registered in one of the two securities, the NASD believes that in these narrowly drawn situations, an immediate on-line registration as a NASDAQ market maker is appropriate.

Additionally, the NASD believes that if the market maker has previously been registered in both securities and has withdrawn from one of the issues, the withdrawal should be considered excused if a merger or acquisition is subsequently announced. The 20-day penalty period for market makers that voluntarily withdraw from NASDAQ issues was promulgated to prevent market makers from dropping out of issues during turbulent markets and reentering the issues immediately thereafter. The NASD believes that merger and acquisition situations are sufficiently different and do not represent similar opportunities for fair-weather market making. Therefore, granting excused withdrawal status is appropriate in these situations as long as the market maker has remained an active market maker in one of the two affected companies.

The NASD believes the proposed rule change is consistent with section 15A(b)(6) of the Act. Section 15A(b)(6) requires that the rules of a national securities association be designed "to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market * * *." The proposed rule change will facilitate market liquidity in companies that are involved in mergers or acquisitions.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the NASD consents, the Commission will:

A. By order approved such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Person making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by April 13, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92-6806 Filed 3-20-92; 8:45 am]

BILLING CODE 8010-01-M

[1] On February 4 and March 2, 1992, the NASD filed, respectively, Amendments 1 and 2 to the proposed rule change. The amendments clarify that a market maker must have withdrawn in one of the affected securities *prior to* the public announcement of a merger or acquisition, in order to qualify for an excused withdrawal when it seeks to reregister in the security. Copies of the two amendments are available for inspection and copying in the Commission's Public Reference Room.

[File No. 1-10430]

Issuer Delisting; Notice of Application To Withdraw From Listing and Registration (Interneuron Pharmaceuticals, Inc., Common Stock, $0.001 Par Value)

March 17, 1992.

Interneuron Pharmaceuticals, Inc. ("Company") has filed an application with the Securities and Exchange Commission, ("Commission") pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the Boston Stock Exchange, Inc. ("BSE" or "Exchange").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

According to the Company, commencing on March 17, 1992, its Common Stock will be listed for quotation on the National Association of Securities Dealers, Inc. National Market System ("NASDAQ/NMS"), and the rules of the BSE and NMS do not permit a security to be listed on both the BSE and the NMS.

Any interested person may, on or before April 7, 1992 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 92-6657 Filed 3-20-92; 8:45 am]

BILLING CODE 8010-01-M

[File No. 1-7626]

Issuer Delisting; Notice of Application to Withdraw from Listing and Registration; (Universal Foods Corporation, Common Stock, $.10 Par Value; Rights to Purchase Common Stock)

March 17, 1992.

Universal Foods Corporation ("Company") has filed an application with the Securities and Exchange Commission, ("Commission") pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified securities from listing and registration on the Pacific Stock Exchange, Inc. ("PSE").

The reasons alleged in the application for withdrawing these securities from listing and registration include the following:

According to the Company, the Common Stock and Rights are currently listed on both the New York Stock Exchange ("NYSE") and the PSE. The Company listed the Common Stock and Rights on the PSE in August of 1986 after purchasing a frozen products business located on the West Coast. At that time, the Company anticipated that this new business, together with the Company's existing dehydrated products business, which is also located on the West Coast, would contribute to increased interest in the Company by investors residing on the West Coast. Based upon this belief and the Company's hope that an active trading market for the Company's securities would develop on the West Coast, the Company decided to list the Common Stock and Rights on the PSE. An active trading market on the PSE for the Common Stock and Rights, however, never developed. During the last three years, less than 3% of the daily trading volume of the Common Stock and Rights has been on the PSE. Accordingly, the Company decided that it was in the best interests of the Company and its shareholders to delist the Common Stock and Rights from the PSE. The Common Stock and Rights, however, will continue to be listed on the NYSE.

Any interested person may, on or before April 7, 1992 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 92-6656 Filed 3-20-92; 8:45 am]

BILLING CODE 8010-01-M

[File No. 1-10787]

Issuer Delisting; Notice of Application to Withdraw from Listing and Registration; (Veterinary Centers of America, Inc., Common Stock, $0.001 Par Value; Redeemable Warrants)

March 17, 1992.

Veterinary Centers of America, Inc. ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the above specified securities from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing these securities from listing and registration include the following:

According to the Company, its Board of Directors unanimously approved resolutions on December 2, 1992 to withdraw the Company's Common Stock and Warrants from listing on the Amex and, instead, list such Common Stock and Warrants on the National Association of Securities Dealers Automated Quotations National Market System ("NASDAQ/NMS"). The decision of the Board followed a lengthy study of the matter, and was based upon the belief that listing of the Common Stock and Warrants on NASDAQ/NMS will be more beneficial to its shareholders than the present listing on the Amex because:

(1) The Company believes that the NASDAQ/NMS system of competing market makers will result in increased visibility and sponsorship for its Common Stock and Warrants than is presently the case with the single specialist on the Amex;

(2) The Company believes that the NASDAQ/NMS system will offer the Company's shareholders more liquidity than is presently available on the Amex and less volatility in quoted prices per share when trading volume is slight;

(3) The Company believes that the NASDAQ/NMS system will offer the opportunity for the Company to secure its own group of market makers and expand the capital base available for trading in the Common Stock and Warrants; and

(4) The Company believes that the firms making a market in the Company's Common Stock and Warrants on the NASDAQ/NMS system will also be inclined to issue research reports concerning the Company, thereby increasing the number of firms providing institutional research and advisory reports.

Any interested person may, on or before April 7, 1992 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Meeting of the President's Council of Advisors on Science and Technology

The President's Council of Advisors on Science and Technology will meet on April 2-3, 1992. The meeting will begin at 9 a.m. on Thursday, April 2, 1992 in the Conference Room, Council on Environmental Quality, 722 Jackson Place, NW., Washington, DC. The meeting will conclude at approximately 12:00 Noon on Friday April 3, 1992.

The purpose of the Council is to advise the President on matters involving science and technology.

Proposed Agenda

1. Briefing of the Council on the current activities of the Office of Science and Technology Policy.

2. Briefing of the Council on current federal activities and policies in science and technology.

3. Discussion of progress of working group panels.

Portions of the April 2-3 meeting will be closed to the public.

A portion of the briefings on current federal activities and policies in science and technology will require discussion of budget preparation procedures of the Executive Office of the President and other federal agencies which, if prematurely disclosed, would significantly frustrate the implementation of decisions made requiring agency action. Also, a portion of the discussion of panal progress will necessitate discussion of information which is formally classified in the interest of national security. Accordingly, these portions of the meeting will be closed to the public pursuant to 5 U.S.C. 552b(c)(1), (2), and (9)(B).

Because of the security requirements, persons wishing to attend the open portion of the meeting should contact Ms. Ann Barnett (202) 395-4692, prior to 3 p.m. on April 1, 1992. Ms. Barnett is available to provide specific information regarding time, place, and agenda.

Dated: March 12, 1992.

Ms. Damar W. Hawkins,

Executive Assistant, Office of Science and Technology Policy.

[FR Doc. 92-6683 Filed 3-20-92; 8:45 am]

BILLING CODE 3170-01-M

TENNESSEE VALLEY AUTHORITY

Acid Rain Program Designated Representative

AGENCY: Tennessee Valley Authority.

ACTION: Notice.

SUMMARY: TVA is announcing the selection of a "designated representative" and "alternate designated representative" to serve as the agency's point of contact with the U.S. Environmental Protection Agency and States on acid rain program matters.

FOR FURTHER INFORMATION CONTACT: Jerry L. Golden, Manager, Clean Air Program, 2 C Missionary Ridge Place, 1101 Market Street, Chattanooga, Tennessee 37402-2801; (615) 751-6779.

SUPPLEMENTARY INFORMATION: Under Title IV of the Clear Air Act Amendments, sec. 402, Public Law 101-549, 104 Stat. 2588, affected utility units are authorized to act through a "designated representative" (DR) and "alternate designated representative" (ADR) in the conduct of SO_2 allowance and acid rain permitting activities. On February 19, 1992, at a public meeting, the TVA Boards Directors selected TVA's Senior Vice President, Fossil and Hydro Power, J.W. Dickey, to be TVA's DR for its affected utility units, and TVA's Vice President, Fossil and Hydro Projects, W.M. Bivens, to be TVA's ADR who will act when the DR is unavailable. TVA's affected utility units are those at its Allen, Bull Run, Cumberland, Gallatin, John Sevier, Johnsonville, Kingston, and Watts Bar fossil plants in Tennessee; Colbert and Widows Creek fossil plants in Alabama; and Paradise and Shawnee fossil plants in Kentucky.

Dated: March 6, 1992.

Edward S. Christenbury,

General Counsel and Secretary.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Notice 92-3]

Commercial Space Transportation Advisory Committee; Open Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C. app. 1), notice is hereby given of a meeting of the Commercial Space Transportation Advisory Committee (COMSTAC). The meeting will take place on Wednesday, April 8, 1992, from 8:30 a.m., to 4:30 p.m. in room 2230 of the Department of Transportation's headquarters building at 400 Seventh Street, SW. in Washington, DC. This will be the fifteenth meeting of the Committee. The meeting will address such issues as orbital debris, international competitiveness, and technology and innovation. The COMSTAC will receive an update on congressional activities followed by reports from the COMSTAC working groups. A tentative agenda is attached. This meeting is open to the interested public, but may be limited to the space available. Additional information may be obtained by contacting Ms. Linda Strine at (202) 366-5770.

Dated: March 17, 1992.

Stephanie E. Myers,

Director, Office of Commercial Space Transportation.

Aviation Proceedings; Agreements Filed During the Week Ended March 13, 1992

The following Agreements were filed with the Department of Transportation under the provisions of 49 U.S.C. 412 and 414. Answers may be filed within 21 days of date of filing.

Docket Number: 48028.
Date filed: March 9, 1992.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 548 (Japan-China fares) r-1-014a, r-2-085hh, r-3-092v.
Proposed Effective Date: March 16, 1992.

Docket Number: 48029.
Date filed: March 9, 1992.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 549 (TC23/TC123 revalidation except to/from US Terr.).
Proposed Effective Date: October 1, 1992.

Docket Number: 48030.
Date filed: March 9, 1992.
Parties: Members of the International Air Transport Association.
Subject: Mail Vote 545 (Fares between Japan & Korea) r-1 to r-9.
Proposed Effective Date: April 1, 1992.

Docket Number: 48031.
Date filed: March 9, 1992.

Parties: Members of the International Air Transport Association.
Subject: Mail Vote 550 (TC23/TC123 revalidation to/from US Terr.).

BILLING CODE 4910-62-M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended March 13, 1992

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et seq.). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 48038.
Date filed: March 9, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scopes: April 6, 1992.
Description: Application of Cargo D'OR Limited, pursuant to section 402 of the Act and subpart Q of the Regulations applies for a foreign air carrier permit which would authorize Cargo D'Or to provide nonscheduled foreign air transportation of property and mail between the United States and Ghana. Cargo D'Or also requests authority to operate cargo charters pursuant to part 212 of the Department's Economic Regulations.

Docket Number: 48047.
Date filed: March 13, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: April 10, 1992.
Description: Application of Twin Cities Air Service Inc., pursuant to section 401(d)(3) of the Act and subpart Q of the Regulations requests authority to engage in interstate and overseas charter air transportation of persons, property, and mail: Between any point in the State in the United States or the District of Columbia, or any territory or possession of the United States and any point or points in the Republic of Ireland and any point or points in the United States, with or without stopovers. (B) Between any point or points in the United States and any point or points in a third country or countries, with or without stopovers, provided that such traffic is carried via Ireland and makes a stopover in Ireland for at least two consecutive nights. Translift Airways also seeks authority to engage other trips in foreign air transportation subject to regulations governing charters.

Docket Number: 48048
Date filed: March 13, 1992.
Due Date or Answers, Conforming Applications, or Motion to Modify Scope: April 10, 1992.
Description: Application of Twin Cities Air Service Inc., pursuant to section 401(d)(3) of the Act and subpart Q of the Regulations requests authority to engage in foreign charter air transportation of persons, property, and mail: Between any point in any State in the United States or the District of Columbia, or any territory or possession of the United States, and Canada and the Bahamas and Mexico.

Docket Number: 48049.
Date filed: March 13, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: April 10, 1992.
Description: Application of Translift Airways Limited applies, pursuant to section 402 of the Act for a foreign air carrier permit authorizing Translift Airways to engage in charter foreign air transportation of persons and their accompanying baggage, and cargo, including but not limited to, freight forwarder, split, and combination charters, as follows: (A) Between any point or points in the Republic of Ireland and any point or points in the United States, with or without stopovers. (B) Between any point or points in the United States and any point or points in a third country or countries, with or without stopovers, provided that such traffic is carried via Ireland and makes a stopover in Ireland for at least two consecutive nights. Translift Airways also seeks authority to engage other trips in foreign air transportation subject to regulations governing charters.

Docket Number: 48001.
Date filed: March 12, 1992.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: March 19, 1992.
Description: Application of Federal Express Corporation, pursuant to Department of Transportation Notice, Served February 26, 1992, applies, pursuant to section 401 of the Act and subpart Q of the Regulations, for issuance of an amended certificate of public convenience and necessity for Route 205–F, so as to authorize Federal Express to provide foreign air transportation of property and mail between a point or points in the United States, on the one hand, and points in the Peoples Republic of China, on the other hand, via intermediate points (including change-of-gauge operations) on Federal Express' certificate for Route 205–F.

Research and Special Programs Administration

[Docket No. WPDA-1]

City of New York Request for Temporary Waiver of Preemption Pending Determination Upon Application for Waiver of Preemption as to Fire Department Regulations Concerning Pickup/Delivery Transportation of Flammable and Combustible Liquids and Flammable and Combustible Gases

APPLICANT: The City of New York.

LOCAL LAW AFFECTED: New York City. Fire Prevention Directives 3–76, 5–63, 6–76, and 7–74.

APPLICABLE FEDERAL REGULATIONS: Hazardous Materials Transportation Act (49 App. U.S.C. 1801 *et seq.*) and the Hazardous Material Regulations (49 CFR parts 171–180) issued thereunder.

MODE AFFECTED: Highway.

SUMMARY: This is an administrative ruling by the Department of Transportation (DOT) on a request by the City of New York (City) "for a temporary stay of preemption, as to those Fire Department regulations for which the City has sought a permanent waiver, until that application is decided." City's February 28, 1992 letter request (NYC Request), p. 1. The procedures set forth at 49 CFR 107.215–107.227 apply to the City's application for a waiver of preemption. DOT has not promulgated regulations or otherwise established procedures applicable to a request for a temporary waiver of preemption pending a decision on the application for waiver itself or, as described by the City, a "temporary stay of preemption."

RULING: The City's request for a temporary stay of preemption, as contained in its February 28, 1992 letter, is denied.

FOR FURTHER INFORMATION CONTACT: Frazer C. Hilder, Attorney, Office of the Chief Counsel, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590–0001 (Tel. No. 202–366–4400).

I. General Authority and Waiver of Preemption Under the HMTA

The Hazardous Materials Transportation Act (HMTA), 49 app. U.S.C. 1801 *et seq.*, as amended by the Hazardous Materials Transportation Uniform Safety Act of 1990, Public Law 101–615, preempts certain requirements of States, political subdivisions and Indian tribes relating to the transportation of hazardous materials. 49 App. U.S.C. 1804(a)(4), 1804(b)(4), 1811(a). The HMTA also provides that the Secretary of Transportation may waive preemption, in response to an application of a State, political subdivision or Indian tribe which acknowledges preemption, if the Secretary determines that the State, local or Indian tribe requirement (1) affords an equal or greater level of protection to the public than is afforded by the requirements of the HMTA and the regulations issued under the HMTA, and (2) does not unreasonably burden commerce. 49 app. U.S.C. 1811(d).

The preemption provisions contained in the HMTA, including those governing a waiver of preemption; the delegation of authority from the Secretary of Transportation to the Research and Special Programs Administration (RSPA) to issue preemption determinations and waivers of preemption; and RSPA's regulations applicable to preemption determinations and waivers of preemption are set forth and discussed in detail in the Public Notice and Invitation to Comment upon the City's application for a waiver of preemption, published at 56 FR 58126 (Nov. 15, 1991).

II. Background

With its October 9, 1991 letter, the City submitted an application for a waiver of preemption as to requirements set forth in 24 separate sections (or subsections) of New York City Fire Department Fire Protection Directives (FPDs) 3–76, 5–63, 6–76, and 7–74. With the exception of a "no smoking" prohibition in FPD 6–76 § 25–1, these requirements were among those which RSPA determined to be preempted in Inconsistency Ruling 22 (IR–22), 52 FR 46574, Dec. 8, 1987; correction, 52 FR 49107, Dec. 29, 1987, and the RSPA Administrator's Decision on Appeal (IR–22(A)), 54 FR 26698, June 23, 1989.

In the letter accompanying its application, the City requested a temporary stay of preemption as to the FPD requirements for which a waiver of preemption was sought. On October 18, 1991, in *National Paint & Coatings Ass'n v. City of New York*, No. CV–84–4525 (ERK), the United States District Court for the Eastern District of New York issued an Order confirming that the City had acknowledged preemption of certain provisions of FPDs 3–76, 5–63, 6–76, and 7–74 and enjoined the City from further enforcement of those provisions. However, the Court stayed for 150 days its injunction against enforcement of the provisions in the FPDs for which the City has applied to DOT for a waiver of preemption. The City's waiver application and the Court's Order were published as part of the Public Notice and Invitation to Comment at 56 FR 58126 (Nov. 15, 1991).

As also discussed in that notice, in a further letter dated October 29, 1991, the City advised RSPA of the Court's October 18, 1991 Order and stated that the Court's stay of its own injunction avoided any need for RSPA to rule on the City's request for a temporary stay at that time. However, the City requested that it be notified and given an opportunity to renew its request if a determination on its application for a waiver of preemption had not been completed by March 15, 1992, the expiration of the Court's 150-day stay.

As stated in a Public Notice and Reopening of Rebuttal Comment Period, published at 57 FR 6767 (Feb. 27, 1992), RSPA received several comments supporting and opposing the City's application for a waiver of preemption after the date originally set for the comment period to expire; in fairness to all interested parties, RSPA extended the rebuttal comment period through March 13, 1992. RSPA notified the City that it did not expect to issue a determination on the City's application by March 15, 1992. In the February 27, 1992 notice, RSPA repeated the statement in the November 15, 1991 notice that "there is no authority in the HMTA for the Secretary or RSPA to temporarily stay preemption. The authority to grant such relief lies, if anywhere, with the courts." 57 FR at 6768.

The City submitted a renewed request for a temporary stay of preemption in a February 28, 1992 letter, which was received by RSPA by March 2, 1992 (by telefax) and March 5, 1992 (letter form). The City's letter indicated that a copy had been furnished to John J. Collins, Esq. And Timothy L. Harker, Esq., individuals to whom comments and rebuttal comments on the City's waiver application must be provided in accordance with the November 15, 1991, and February 27, 1992 public notices. On March 3, 1992, RSPA notified Messrs. Collins and Harker by telefax that any opposition to, or comments upon, the City's renewed request for a temporary

stay of preemption should have been submitted in time to reach RSPA by noon, March 6, 1992. Mr. Harker's law firm submitted comments opposing the City's request in a March 6, 1992 letter on behalf of the American Trucking Associations, Inc., National Tank Truck Carriers, Inc., and National Paint and Coatings Association, Inc. The City submitted further comments in a March 6, 1992 letter. All these comments, all materials previously submitted with respect to the City's waiver application in Docket WPDA–1, and all materials contained in Docket IR–22 (IRA–40A) have been considered in ruling on the City's present request.

III. Discussion

The City has characterized its request in different language at different times. Initially, it asked "for a temporary stay of preemption." October 9, 1991 letter, p. 2; NYC Request, p. 1. At another place, it styled the relief it desired as an exercise of the power to waive preemption "on an interim basis." NYC Request, p. 2. In its March 6, 1992 reply letter, the City stated it is seeking "a preliminary waiver of preemption."

As discussed below, the FPDs involved in the City's application for waiver have already been preempted. Accordingly, the City's request for interim relief must be for a postponement of the effects of HMTA's preemption of the FPDs at issue here. This means that the City's request asks RSPA to do one of two things: (1) extend the existing injunction granted by the Court, or (2) grant a temporary (or "preliminary") waiver of preemption pending RSPA's decision on the City's waiver application itself. Because RSPA does not have authority to do either, it must deny the City's present request.

At page 2 of its waiver application, the City "acknowledges that certain sections of its regulations that it wishes to continue to enforce are preempted." 56 FR at 58128. It further agreed and the Court found that "the FPDs in the covered subject areas of 49 U.S.C. app. 1804(a)(4)(B) are preempted and enjoined from further enforcement." October 18, 1992 Order, p. 2, 56 FR at 58142. While the Court stayed its injunction for a period of 150 days, or until March 15, 1992, during this period the City will not prosecute violations of these regulations. *Id.*, 56 FR at 58143.

The City requests RSPA for "an extension of this relief" granted under the Court's October 18, 1992 Order, that is a continuation of the *"status quo."* NYC Request, pp. 2,4. As a basis for its request, it refers to language in the Court's Order that "The City may petition the Secretary of Transportation for further relief." October 18, 1992 Order, p. 2, 56 FR at 58143. It also cites the decision in *National Nutritionol Foods Ass'n* v. *Food & Drug Admin.*, 504 F.2d 761 (2d Cir. 1974), *cert. denied*, 420 U.S. 946 (1975), as authority for a Federal agency "to extend the Court's stay, if necessary, to give itself adequate time to rule on applications." NYC Request, p. 2. However, neither authority cited by the City gives RSPA the power to extend the Court's injunction against enforcement of the City's FPDs.

The Court's language that the City may seek "further relief" from DOT does not give RSPA any authority that it did not already possess. A Federal agency's power derives from Congress, *Lyng* v. *Payne*, 476 U.S. 926, 937 (1986), and no statute authorizes RSPA to extend or otherwise make any change in a court injunction. Indeed, basic considerations of the separation of powers between executive and judicial branches of our government would appear to foreclose any such attempt.

The National Nutritional Foods case does not hold to the contrary. In that decision, an appeals court stayed the effectiveness of FDA regulations to permit additional review by the FDA, and then noted that the FDA could "extend the stay," further delaying the effective date of its own regulations. 504 F.2d at 785 n.27. But such an extension would be merely the exercise of a power inherently possessed by a Federal agency as a part of the process of promulgating regulations; just as an agency has the power to specify the effective date of a regulation, it has the authority to postpone that date to allow continued review, whether such review is ordered by a court or considered appropriate by the agency itself. Here, the City seeks a further postponement of the effects of the Court's October 18, 1992 Order, not a stay of RSPA's own actions. RSPA has no power to continue the Court's injunction.

RSPA does have the discretionary authority under the HMTA to waive preemption of local governmental requirements if it finds that the local regulations (1) afford an equal or greater level of protection to the public than afforded by the HMTA and the regulations thereunder, and (2) do not unreasonably burden commerce. 49 app. U.S.C. 1811(d). That is the process in which RSPA is presently engaged upon the City's waiver application of October 9, 1991, a process expected to take until approximately May 15, 1992, as previously announced. 57 FR 6767, 6768 (Feb. 27, 1992).

However, no language in the HMTA or the regulations thereunder (or anywhere else) speaks of a temporary waiver of preemption, which would allow local regulations to continue in effect until that decision is made. The statutory requirement that the applicant for a waiver must explicitly "acknowledge[]" preemption strongly implies the opposite, *i.e.*, that a local regulation loses any effectiveness, and that enforcement ceases, during the pendency of a waiver application. Thus, there is no force to the City's argument that "nothing in the statute prohibits the Secretary (or his designee) from exercising that power (to grant a waiver of preemption) on an interim basis, where equity makes that appropriate." NYC Request, p.2.

In the absence of a transcript and in the face of an explicit denial, see Harker Firm March 6, 1992, letter, p.3, there is a reluctance to rely upon the City's assertion that "Judge [Korman] did say specifically that he believed the power to grant ultimate relief—a waiver of preemption—necessarily included the power to grant preliminary relief of the same nature." NYC reply letter, p.2. The alleged off-the-record comments are hardly persuasive that the Court found the agency has authority to temporarily waive preemption, and that it intended such a finding to be binding on DOT. RSPA has a duty to determine its authority under the HMTA, just as the general rule provides that an "agency should make the initial determination of its own jurisdiction." *California ex rel. Christensen* v. *FTC*, 549 F.2d 1321, 1324 (9th Cir.), *cert. denied, Christensen* v. *FTC* and *California Milk Producers Adv. Bd.* v. *FTC*, 434 U.S. 876 (1977).

The concept of "equitable principles" that might apply to RSPA's exercise of "discretionary powers," NYC Request, p.3, necessarily implies the existence of those powers in the first place. Considerations of equity cannot justify the exercise of a power which is lacking. Moreover, it is doubtful that the City has set forth facts that would support an exercise of discretion in its favor.

In this context, the City suggests that the applicable standards are a "strong likelihood of success for its waiver application" and "irreparable injury" if a temporary waiver is not granted. *Id.*, p. 4; but see NYC March 6, 1992 reply letter, p.1 ("likelihood of success on the merits, and equitable reasons favoring the applicant"). However, neither finding can be made at this time.

The City has applied for a waiver of preemption as to 24 separate sections or subsections of four FPDs, grouping them in seven categories as applied variously to the transportation of: flammable mixtures and liquids by tank truck (FPD 7–74), combustible mixtures and liquids by tank truck (FPD 6–76), compressed gases by any vehicle (FPD 5–63), and inflammable and other liquids by platform truck (FPD 3–76). As to some of the sections or subsections, there are significant factual materials and comments both supporting and opposing the City's regulations; as to others, there are few materials or argument. Virtually every proposition advanced by the City is contested by opponents.

In order to make the findings required under HMTA, RSPA must evaluate carefully the equipment, operating practices and permitting requirements under the City's FPDs as compared to those under the Hazardous Materials Regulations. The agency must then assess the burden on commerce in terms of the effects of the City's requirements and whether local benefits outweigh those effects. *Brown-Forman Distillers Corp.* v. *New York State Liquor Auth.* 476 U.S. 573, 579 (1986); *Pike* v. *Bruce Church, Inc.*, 397 U.S. 137, 142 (1970). The comments and other materials offered by the City are not so overwhelming to find, at present, a strong likelihood that a waiver of preemption will be granted for all or any significant portion of the sections and subsections covered by the City's application.

The only "irreparable injury" to which the City alludes is a possible "catastrophic accident involving a large aluminum gasoline tanker * * * in the interim period." NYC Request, pp. 4–5. But such an incident is not certain to occur in the absence of a temporary waiver of preemption. Moreover, the likelihood and consequences of such an incident must be balanced against a possible reduction in the number of accidents; larger trucks would need to make fewer trips to deliver the same amount of product, as acknowledged by the City. Application, p. 25, 56 FR at 58133. In addition, the City has stated that elimination of the City's regulations would not be followed by an immediate and total use of larger tank trucks for deliveries of gasoline and fuel oil in New York City. *See* NYC January 16, 1992 Reply Comments, pp. 31–32 and the statements and other materials cited there. The materials and arguments presented by the City do not enable RSPA to conclude that the number and severity of accidents involving hazardous materials will increase to such an extent that, in the absence of a temporary waiver, irreparable injury will occur during the pendency of the City's waiver application.

It should be emphasized that the "equitable principles" advanced by the City as applicable to its request for interim relief are different from those which, under the HMTA, must be followed in making a ruling on the City's waiver application itself. The above statements are not, and should not be interpreted as, an indication of the ruling on that application which remains to be made.

IV. Ruling

For the foregoing reasons, there is no authority for RSPA to extend the stay of the injunction in the October 18, 1992 Order of the United States District Court for the Eastern District of New York in *National Paint & Coatings Ass'n* v. *City of New York, NO. CV–84–4525 (ERK)* nor is there authority in the HMTA or otherwise to grant a temporary waiver of preemption under the HMTA. The City's request for a "temporary stay of preemption" is, therefore, denied.

Issued in Washington, DC on March 12, 1992.

Alan I. Roberts,

Associate Administrator for Hazardous Materials Safety.

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS

Provision for the Delivery of Legal Services Committee Meeting Notice

TIME AND DATE: A hearing and meeting of the Board of Directors Provision for the Delivery of Legal Services Committee will be held on April 7, 1992. The hearing and meeting will commence at 10:00 a.m.

PLACE: The Stouffer Austin Hotel, 9761 Arboretum Blvd., The Fabine Room, Austin, Texas 78759, (512) 343-2626.

STATUS OF MEETING: Open.

MATTERS TO BE CONSIDERED:

1. Approval of Agenda.
2. Public Comment On Alternative Dispute Resolution Mechanisms.
3. Consideration of Public Comment On Alternative Dispute Resolution Mechanisms.

CONTACT PERSON FOR INFORMATION: Members of the public wishing to comment on the above-described matter are requested to contact Christopher

Sundseth at (202) 863-1839 not later than March 30, 1992.

Date Issued: March 19, 1992.

Patricia D. Batie,

Corporate Secretary.

Corrections

Federal Register
Vol. 57, No. 56
Monday, March 23, 1992

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 685

[Docket No. 911175-2029]

RIN 0648-AE24

Pelagic Fisheries of the Western Pacific Region

Correction

In rule document 92-5040 beginning on page 7661 in the issue of Wednesday, March 4, 1992, make the following corrections:

1. On page 7662, in the first column, in the second full paragraph, in the fourth line from the bottom, "handling" should read "handline".

2. On the same page, in the second column, in the second full paragraph, in the ninth line "Councils" should read "Council's"; and in the fifth line from the bottom, "permised" should read "promised".

Part II

Department of Labor

Employment and Training Administration

20 CFR Part 603

Federal-State Unemployment Compensation Program; Confidentiality and Disclosure of State Records; Proposed Rule

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Part 603

RIN: 1205-AA74

Federal-State Unemployment Compensation Program; Confidentiality and Disclosure of State Records

AGENCY: Employment and Training Administration, Labor.

ACTION: Proposed rule.

SUMMARY: The Employment and Training Administration of the Department of Labor proposes to revise the regulations implementing the Income and Eligibility Verification System (IEVS). Under the IEVS the agency charged with the administration of the State unemployment compensation law must request and exchange certain information with other State and local agencies administering several Federally-assisted programs and furnish information to the Secretary of Health and Human Services regarding programs under titles II and XVI of the Social Security Act (SSA) for the purposes of verifying eligibility for, and the amount of, benefits under these programs. The proposed rule modifies and expands the IEVS regulations to include all of the requirements of statutory provisions relating to the confidentiality and disclosure of State records compiled or maintained for the purposes of the Federal-State unemployment compensation program. In summary, the proposed rule sets forth—

—The Secretary's interpretation of section 303(a)(1), SSA, with respect to the general rules on the confidentiality and disclosure of information,

—The disclosure requirements under: Subsections (a)(7), (c)(1), (d), (e), (f), (h), and (i) of section 303, SSA; section 3304(a)(16), Federal Unemployment Tax Act; and section 3(b), Wagner-Peyser Act,

—The disclosure permitted under section 303(g), SSA,

—Provision for payment of costs, safeguarding information, and execution of agreements with respect to the disclosure of information, and

—Conformity and compliance with the Federal law requirements.

DATES: Written comments on this proposal must be received in the Department of Labor by the close of business on May 22, 1992.

ADDRESSES: Comments on this proposed rule may be mailed or delivered to Mary Ann Wyrsch, Director of the Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., room S-4231, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Virginia Chupp, Unemployment Insurance Program Specialist, Unemployment Insurance Service, 202-535-0200 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: The Employment and Training Administration of the Department of Labor proposes to revise the Income and Eligibility Verification System (IEVS) regulations at 20 CFR part 603. The present rule implements section 303(f) of the Social Security Act (SSA), requiring that each State unemployment compensation agency (State agency) provide that information be requested and exchanged with State and local agencies administering several Federally-assisted programs and furnish information to the Secretary of Health and Human Services regarding programs under titles II and XVI, SSA, for the purposes of verifying eligibility for, and the amount of, benefits under these programs.

Besides the disclosures required under section 303(f), SSA, and present part 603, there are six other provisions in the SSA (subsections (a)(7), (c)(1), (d), (e), (h), and (i) of section 303), and one each in Federal Unemployment Tax Act (FUTA) (section 3304(a)(16)), and the Wagner-Peyser Act (section 3(b)) which require State agencies to disclose certain information to outside parties. The provisions vary with respect to the specific information to be disclosed and the terms and conditions under which disclosure is made. In addition, section 303(g), SSA, does not expressly require disclosure of information, but disclosure is implicit in the method of recovery of overpayments provided by this section.

The present provisions of part 603, relating to the IEVS system required by section 303(f) of the SSA, are placed in subpart C of the proposed rule in this document, with the general provisions applicable to all of new part 603 being revised and placed in subpart A. All other required disclosure provisions referred to above are placed in subparts D through L.

Also, in subpart B of the proposed rule are set forth the basic confidentiality and disclosure requirements for the Federal-State unemployment compensation program, which have their origin in the beginning of the program and are derived from section 303(a)(1) of the SSA. It is necessary to set forth these basic requirements in part 603 because they are not contained in any other published rule, and all of the required disclosure provisions (subparts C through L) are statutory exceptions to the basic rule of confidentiality.

Because an exception is permitted to the basic rule of confidentiality (relating in general to disclosure of information to public officials if authorized under the State law), and because all of the mandatory disclosure provisions stand as exceptions to the basic rule of confidentiality, there are set forth in subpart B uniform rules on (1) payment of costs of making disclosures which are not in the course of administration of the State unemployment compensation laws, (2) safeguards required for any such disclosed information, and (3) agreements between the State agency and agencies or entities requesting information which set forth the terms and conditions for making disclosures of information and the remedies that apply in the case of breach of an agreement.

On payment of costs the proposed rule is an expanded version of what is contained in present part 603, and reflects the position long held under section 303(a)(1) of the SSA. On safeguards and agreements the provisions of the proposed rule are somewhat revised versions of the provisions contained in present part 603. Finally, in subpart B is set out a specific provision on effectuating conformity and compliance with the requirements of section 303(a)(1), which simply sets forth the procedural steps required by section 303(b) of the SSA and existing regulations at 20 CFR 601.5.

Where payment of costs is required by other subparts of new part 603, reference is made to the cost principles as set forth in subpart B. Similarly, where it is appropriate in such other subparts, reference is made to the provisions of subpart B on safeguards, agreements, and effectuating compliance. Uniformity is thereby achieved in all subparts on these subjects, although there are some differences of content in the various subsections of section 303. For example, not all subsections explicitly require payment of costs or adoption of safeguards, and none specifically requires agreements. Uniformity in these common provisions is essential, however, for ease of administration of the various subparts; differing provisions would complicate administration and are unwarranted. Under section 303(a)(1) there is no basis for differing treatment of costs or agreements, and safeguards must also be uniform to provide the same protections to all disclosed information.

Therefore, ample support for such uniform treatment is found in section 303(a)(1), which is controlling on the details of the terms and conditions surrounding disclosures which are exceptions to the basic rule of confidentiality. Accordingly, uniformity is achieved on costs, safeguards, and agreements by addressing the basic requirements in subpart B, and by referring to those basic provisions in the other subparts.

The provisions on effectuating conformity and compliance also are made uniform throughout new part 603. As to conformity, the only statutes involved are sections 303(a)(1) and 303(a)(7) of the SSA and section 3304(a)(16) of the FUTA. The provisions on effectuating conformity in subparts B, D, and K simply track the relevant statutes and 20 CFR 601.5.

On compliance, however, there are some differences among the statutory provisions. Most of the statutory provisions require substantial compliance with the Federal requirements, but section 303(c)(1) does not employ the term, and there is no enforcement language for section 303(d)(2), section 303(f), or section 303(g), or for section 3(b) of the Wagner-Peyser Act insofar as it is made applicable to State unemployment compensation agencies. Section 303(c)(1) is interpreted as requiring substantial compliance, although the statutory language would support a stricter criterion, to achieve uniformity among all of the compliance requirements of section 303. The Department does not believe that the absence of explicit enforcement language in the other cited provisions of section 303 of the SSA indicates any Congressional intent that the provision was not to be enforced. Congress was aware that the Secretary has broad authority to implement and enforce the provisions of the SSA and the FUTA; presumably Congressional silence on a specific enforcement provision for a disclosure requirement was based on that awareness.

Because each of those cited provisions are requirements for State administration of the unemployment compensation program, based upon its past practice, the Department has concluded that the enforcement provisions of section 303(b) and 20 CFR 601.5 shall be applicable to each of them. The Department consistently has taken the position in the past that a statutory requirement for State laws or State agencies in the Federal-State unemployment compensation program is enforceable under title III of the SSA (or the FUTA), regardless of the absence of express enforcement language (as in the case of sections 303(d)(2), 303(f), and 303(g)), or the placement of the statutory requirement somewhere other than in title III (or the FUTA) (as in the case of section 3(b) of the Wagner-Peyser Act). Making these requirements enforceable under title III of the SSA gives effect to the provisions in accordance with the intent evident in their enactment, brings them under the notice and opportunity for hearing provisions of section 303(b) of the SSA and 20 CFR 601.5, and also affords the States access to the judicial review provisions in section 304 of the SSA.

For the same reasons, the Department believes that the exclusion in section 304(a)(2) of subsections (f) and (g), which are not listed among the subsections with respect to which judicial review may be sought under section 304, is not an indication of Congressional intent that these provisions not be enforced. In new part 603 the Department makes section 304 applicable to all findings under title III and part 603, and, as noted below, also makes section 304 applicable to findings as to a State agency with respect to the requirements of section 3(b) of the Wagner-Peyser Act.

Section 3(b) of the Wagner-Peyser Act poses the same kind of problem. It imposes upon State unemployment compensation agencies, as well as State employment service agencies, the requirement of disclosing three specified items of information to a "public agency" administering a State plan under title IV.A of the SSA (AFDC) or any program or activity under title IV.D of the SSA (child support, etc.), or to a State agency administering the food stamp program. Insofar as section 3(b) applies to State employment service agencies, that matter is left to that Act and the employment service regulations and is not covered in new part 603. Insofar as section 3(b) applies to State unemployment compensation agencies, however, it is a matter that can be administered effectively and reasonably only by treating it as a requirement of title III of the SSA.

Accordingly, for the reasons stated above, in regard to sections 303 (f) and (g) of the SSA, enforcement of the requirements of section 3(b) of the Wagner-Peyser Act (insofar as such section imposes requirements upon State unemployment compensation agencies) is brought under section 303(b) of the SSA and 20 CFR 601.5, and the judicial review provisions of section 304 of the SSA. The Department will continue to enforce section 3(b) in the manner set forth in new part 603, as explained herein, until corrective legislation is enacted into law prescribing a different method of enforcing the unemployment compensation requirements of section 3(b).

An explanation of each subpart of new part 603 follows.

Explanation by Subpart

Subpart A—In General

Section 603.1, *Purpose*, describes in general terms the purposes of new part 603. This differs materially from the present § 603.1, because the present part 603 addresses only the 1984 provisions of section 303(f) of the SSA, whereas new part 603 addresses all of the Federal disclosure requirements (including the 1988 amendments to section 1137 of the SSA which affected section 303(f)) as well as the basic rule of confidentiality.

Section 603.2, *Scope*, describes the scope of new part 603, with a brief note about each subpart. There is no "scope" section in the present part 603.

Section 603.3, *Definitions*, defines the terms which are applicable to all of the subparts of new part 603.

Paragraph (a) of § 603.3 defines "compensation" and "unemployment compensation" as such terms are defined for the purposes of the Federal-State unemployment compensation program in section 3306(h) of the FUTA. These terms are not defined in the present part 603.

Paragraph (b) of § 603.3 defines "Department" as meaning the United States Department of Labor and, within the Department, the Employment and Training Administration and the Bureau of Labor Statistics (BLS). This definition establishes the authority for administering new part 603, in accordance with the delegation of authority from the Secretary of Labor to the Assistant Secretary of Labor for Employment and Training (Secretary's Orders 4-75 and 14-75). BLS is included in the definition because BLS has been delegated authority for collecting information under section 303(a)(6) of the SSA, as well as under 29 U.S.C. 2 and Secretary's Order No. 39-72. This definition is not included in the present part 603.

Paragraph (c) of § 603.3 defines "records" so as to make clear that, for the purposes of the mandatory disclosure provisions, the term includes only the records of the State unemployment compensation agency; and that, for the purposes of section 303(a)(1), it also includes all other records of the executive branch of the

State Government. This definition is not included in the present part 603; it was not needed because section 303(f), like other mandatory disclosure provisions, is applicable solely to records of the State agency.

Paragraph (d) of § 603.3 defines "request" as a written request for disclosure of records, and is applicable to any request for disclosure of information that the State agency is not required to make in the course of administration of the State law. This definition is not included in the present part 603, and is included in new part 603 as being essential to provide an auditable record of requests received under the various mandatory disclosure provisions.

Paragraph (e) of § 603.3 defines "Secretary" as meaning the Secretary of Labor. This definition is not included in the present part 603, and is included in new part 603 to emphasize the distinction between the Department and the Secretary as to the authority in regard to administration and enforcement of new part 603. The distinction is that the Department is responsible for the day-to-day administration of the Federal requirements, including part 603, whereas the Secretary has reserved the authority to make judicially reviewable findings on conformity and compliance. This important distinction is not specifically addressed in the present part 603.

Paragraph (f) of § 603.3 defines "State" as meaning the "states" included in the Federal-State unemployment compensation program. This defines the scope of new part 603, making all of the "states" subject to the requirements therein. This definition is not specifically included in the present part 603, although it is inherent in the definition of "State unemployment compensation agency."

Paragraph (g) of § 603.3 defines "State agency" in essentially the same terms as it is defined in the present part 603. It patently means and includes only the State unemployment compensation agency; that is, the State agency which administers the approved State unemployment compensation law. It does not mean or include the State employment service agency, or any other State agency or any local governmental agency.

Paragraph (h) of § 603.3 defines "State law" as meaning an approved State unemployment compensation law. This definition is not specifically included in the present part 603, but is alluded to in the definition of "State unemployment compensation agency."

Paragraph (i) of § 603.3 defines "wage information" as including, in substance, the same information as is included in the definition of such term in the present part 603. Other provisions of the present definition are either included in subpart C or omitted as being outdated.

These comprise all of the definitions deemed essential and relevant to all of the subparts of new part 603. Other definitions, such as the definition of "claim information" and some other definitions specifically applicable to a particular subpart, are included in such subpart.

Subpart B—Confidentiality Requirement of Section 303(a)(1) of the Social Security Act

Subpart B is entirely new. In it is set forth the interpretation of the confidentiality requirement to which the Department and its predecessors have adhered since the beginning of the Federal-State unemployment compensation program. Subpart B treats the subject comprehensively, adding provisions on mandatory disclosure, permissible exceptions to the rule of confidentiality, and the specific situations in which the rule of confidentiality is not applicable.

Section 603.10, *Purpose and application*, expressly states that the purpose of subpart B is to set forth the requirements of section 303(a)(1) of the SSA, as such requirements concern the confidentiality of information in the records of the State and State agency relating to the administration of the approved State unemployment compensation law. It is also expressly stated that subpart B applies not only to the State unemployment compensation agency, but also to the entire executive branch of the State Government. It is important to emphasize this application rule, because in the other subparts of new part 603, dealing with mandatory disclosures to other State and Federal agencies, only the records of the State agency are required to be disclosed.

Section 603.11, *Interpretation and application*, contains the substantive heart of subpart B. In this section are set forth the basic rules of confidentiality and mandatory disclosure, the exceptions, and the situations in which the rule of confidentiality is not applicable. This section is intended to be comprehensive, and cover every conceivable situation.

Paragraph (a)(1) of § 603.11 merely quotes the conformity requirement of the "methods of administration" required by section 303(a)(1) of the SSA.

Paragraph (a)(2)(i) of § 603.11 sets forth, in clause (A), the basic rule of confidentiality as an interpretation of the "methods of administration" requirement of section 303(a)(1). It requires to be kept confidential all information of whatever kind or form in the records of a State agency or in any other files of the executive branch of the State government. It prohibits the disclosure of any such information to any person, organization, or entity whatever, except for disclosure required or permitted by any other provision of § 603.11.

Underlying this interpretation is the fact that unemployment compensation is a public benefit, derived from employer taxes (or reimbursements), and paid from a special State fund as a matter of right to eligible unemployed individuals. The methods of administration adopted by a State must be reasonably calculated to insure the full payment of compensation when due under the State law. The Secretary of Labor has the statutory authority and responsibility to determine what methods of administration best accomplish this result. From the beginning of the Federal-State unemployment compensation program it has been determined that confidentiality of records is essential to the proper and efficient administration of the program, and no change is contemplated in the rule of confidentiality. Confidentiality avoids publicity about claimants and employers, and possible notoriety resulting from publicity. Publicity could have disrupting effects on the operations of the State agency, would be likely to discourage many individuals from claiming a statutory entitlement, and as likely act as a disincentive for employers to cooperate with the State agency in the administration of the State law. The confidentiality rule contributes to the proper and efficient administration of the program by allowing administrators to turn away requests that would otherwise consume time and resources in disclosing information, and otherwise tend to disrupt the operations of the State agency. It also conserves administration funds, which are granted to the States for the proper and efficient administration of the State law, since to permit disclosure other than in the course of administration of the State law would result in the dissipation of the funds for other purposes and thus be directly contrary to the purposes of section 302(a) of the SSA.

Confidentiality of records, therefore, has been determined to be an elementary factor necessary to the proper and efficient administration of the Federal-State unemployment compensation program, and it is this conclusion that is reflected in the interpretation in clause (A) of § 603.11(a)(2)(i).

The interpretation in clause (A) of § 603.11(a)(2)(i) has another important application that is not readily apparent in the language of clause (A) or in the explanation and justification given above. In addition to the information required from individuals and employers and employing units for the purposes of administration of the revenue and benefit provisions of the State laws, much more information is required to be obtained from the same and other sources for the purposes of the many statistical and data reports required by the Department pursuant to section 303(a)(6) of the SSA. Section 303(a)(6) is a conformity requirement for approved State laws, so that any information obtained from any source for the purposes of such reports, and maintained in the records of the State or the State agency, is information pertaining to the administration of the State law. To ensure the cooperation of sources furnishing such information, to avoid uses of the information for purposes other than those for which it is obtained, and to preclude States from becoming information clearinghouses and using granted funds for other than program purposes, all such information shall be deemed by the Department to be subject to the rule of confidentiality in clause (A).

It should be noted that, what is said about information obtained for the purposes of statistical and data reports required pursuant to section 303(a)(6) of the SSA has no bearing upon information obtained solely for the purposes of cooperative agreements entered into with the Bureau of Labor Statistics under the authority of 29 U.S.C. 2 and Secretary's Order No. 39–72. As provided in clause (iii) of § 603.11(b)(5), neither the rule of confidentiality, nor any other provision of subpart B, applies to any such information. It necessarily follows, therefore, that funds granted for the administration of the State law may not be used to collect, compile, tabulate, or report any such information under 29 U.S.C. 2.

There are, however, limitations on the rule of confidentiality, all of which are set forth explicitly in the following provisions of § 603.11, beginning with clause (B) of paragraph (a)(2)(i) of § 603.11.

Paragraph (a)(2)(i) of § 603.11 also sets forth, in clause (B), the essential counterpoint to clause (A), as an interpretation of section 303(a)(1). Clause (B) requires the disclosure to claimants and employers of all information that will reasonably afford them the opportunity to know, establish, and protect their rights and meet their responsibilities under the State law, and such disclosure as is required in accordance with any other provision of § 603.11.

Such openness towards claimants and employers is deemed as essential to the proper and efficient administration of the State law as is confidentiality towards others. Claimants and employers cannot fully or properly protect their rights, and meet their responsibilities, unless they are made fully aware of those rights and responsibilities. The State and the State agency must be made to bear the responsibility for assuring that claimants and employers are furnished all of the information they need for those purposes. Potential claimants are included to assure that not only active claimants are covered, but also any other person who might file a claim in the future. Employing units, i.e., non-covered employers, are included to assure that not only subject employers are covered, but also any other firm or person having or intending to have any person in its employ.

Mandatory disclosure of information to claimants and employers has been determined, therefore, to be another elementary factor necessary to the proper and efficient administration of the Federal-State unemployment compensation program, and it is this conclusion that is reflected in the interpretation in clause (B) of § 603.11(a)(2)(i).

Paragraph (a)(2)(ii) of § 603.11 states that the interpretations in clauses (A) and (B) of paragraph (a)(2)(i) are conformity and compliance requirements for the State laws and the States. It also states that the State laws must provide penalties for any disclosure of information which is inconsistent with any provision of § 603.11. It further provides that the requirements of paragraph (a)(2)(ii) will be deemed to be met if the State law and administration thereof fully accord with these requirements, including a penalty provision, and there is no other law of the State that is construed as requiring or authorizing a different or conflicting result.

Paragraph (a)(2)(ii) of § 603.11 simply expresses the law on the conformity and compliance requirements of section 303 of the SSA. There is nothing new or different in this statement of those requirements.

Subpart B of new part 603, therefore, fully sets forth positions of the Department on the confidentiality and disclosure requirements of section 303(a)(1) of the SSA. The basic interpretations in paragraph (a)(2)(i) of § 603.11 are precise statements of the Department's positions, although they have not heretofore been stated with such preciseness in any publication issued by the Department. Although the rule of confidentiality, as set forth in clause (A) of paragraph (a)(2)(i), is nothing new, it must be emphasized that the mandatory disclosure to claimants and employers, as set forth in clause (B) of paragraph (a)(2)(i), has not heretofore been expressed in such terms by the Department, and it must, therefore, be regarded as a new position for the purposes of this proposed rulemaking.

Paragraph (b) of § 603.11 covers all of the situations in which the rule of confidentiality set forth in paragraph (a)(2)(i)(A) is inapplicable, but with respect to which section 303(a)(1) is interpreted as requiring disclosure in the course of administering the State law. Paragraph (b) thus includes some of the required disclosure provisions referred to in the last clause of paragraph (a)(2)(i)(B).

Paragraph (b)(1) of § 603.11 requires the disclosure of information to or by officials and employees of the State and State agency as necessary for the proper administration of the State law, and restrictively defines the phrase "officials and employees of the State and State agency" to include only those persons having a need to know. Such disclosure is elementary to the proper and efficient administration of the State law, and therefore is deemed to be a "method of administration" required by section 303(a)(1) of the SSA. It is included in paragraph (b) because of the comprehensive scope of subpart B, and also to express the bounds of such required disclosure.

Paragraph (b)(2) of § 603.11 requires the disclosure of information by all officials and employees of the State and State agency to be made for the record in any judicial or quasi-judicial proceedings under the State law. Such disclosure is required to be made to the extent that it is necessary to a full development of the facts on the issues in the proceeding, and to such further extent as such disclosure will enable the presider to make an informed decision on all of the issues in the case. It is specifically provided that any information so disclosed and made a part of the record in the case shall not thereafter be subject to the rule of confidentiality in paragraph (a)(2)(i)(A) of § 603.11.

The disclosure of information required by paragraph (b)(2) is elementary to the proper and efficient administration of

the State law, and therefore is deemed to be a "method of administration" required by section 303(a)(1) of the SSA.

Paragraph (b)(3) of § 603.11 requires the disclosure of information to officials and employees of other State, local, and Federal agencies, as necessary for the proper administration of the State law. The phrase "other State, local, and Federal agencies" is expressly defined as including other agencies of the State Government or of another State (including the State agency of another State), local governmental agencies of the State, and any Federal agency.

Furthermore, it is expressly provided in paragraph (b)(3) that disclosures to Federal agencies shall include disclosure to the Immigration and Naturalization Service to the extent necessary for alien verification purposes, and may include disclosure of information or certifications requested or required by the Internal Revenue Service for any of the purposes of administration or enforcement of chapter 23 (FUTA) of the Internal Revenue Code of 1986.

Other disclosures covered by paragraph (b)(3) include disclosures as necessary under the Interstate Benefit Payment Plan, the Interstate Arrangement for Combining Employment and Wages (part 616 of this chapter), interstate offset and cross-program offset (subpart H of this part 603), and any other reciprocal arrangements which are consistent with section 303 of the SSA.

Disclosure in all such cases is elementary to the proper and efficient administration of the State law, and therefore is deemed to be a "method of administration" required by section 303(a)(1) of the SSA.

Paragraph (b)(4) of § 603.11 requires the disclosure of information to claimants and employers as necessary for the proper administration of the State law, and it is specifically stated that such disclosure is in addition to the disclosure required by paragraph (a)(2)(i)(B). The focus of these two provisions differs. The first focuses on the needs of claimants and employers; this paragraph (b)(4) focuses on the proper administration of the State law. They are identical, however, in including potential claimants and employing units. The last clause of paragraph (b)(4) bars the redisclosure by employers of information about claimants; the penalty provision required by paragraph (a)(2)(ii) would be applicable to any unauthorized redisclosure.

The provisions of paragraph (b)(4) are deemed by the Department to be necessary for the proper and efficient administration of the State law, and the last clause is necessary for consistency with the rule of confidentiality in paragraph (a)(2)(i)(A). Each such provision is, therefore, deemed to be a "method of administration" required by section 303(a)(1) of the SSA.

Paragraph (b)(5) of § 603.11 expressly provides that the rule of confidentiality in paragraph (a)(2)(i)(A) shall have no applicability to the Department concerning any information requested or required under Federal statutes or regulations for any of the purposes of the Federal-State unemployment compensation program. This exception to the rule of confidentiality for the Department is sweeping, and is intended as a complete bar to the use of the rule of confidentiality to withhold any information from the Department. The bar of paragraph (b)(5) applies throughout the executive branches of the State Governments, including the State agencies.

The rule of paragraph (b)(5) is critical to the administration of the Federal statutes relating to the Federal-State unemployment compensation program, and is indispensable to the carrying out of the duties and responsibilities of the Secretary of Labor and the Department under those Federal statutes and implementing regulations and other directives. For this purpose also a special definition is added to paragraph (b)(5) to specify that the "Department" includes the Inspector General, the Comptroller General, and any contractor for the Department or the Inspector General.

Section 303(a)(1) is interpreted, therefore, as excepting the Department from the rule of confidentiality as set forth in paragraph (a)(2)(i)(A), and as affirmatively requiring disclosure of all information to the Department as provided in paragraph (b)(5).

Clause (iii) of paragraph (b)(5) provides that none of the provisions of subpart B is applicable to any information obtained solely for the purposes of cooperative agreements entered into with the Bureau of Labor Statistics under the authority of 29 U.S.C. 2 and Secretary's Order No. 39–72.

It should be noted that paragraph (b)(5) of § 603.11 pertains solely to information required by the Department for any of the purposes of the Federal-State unemployment compensation program. No provision of paragraph (b), or any other provision of part 603, purports to interpret the provisions of section 303(a)(6) as to the information that may be required by that section to be disclosed to the Department. The Department interprets section 303(a)(6) broadly, however, and in addition to the information required for the purposes of the Federal-State unemployment compensation program, the Department also may require the disclosure of information for the purposes of any other program administered by the Department. For example, the Department may require the disclosure under section 303(a)(6) of information the Department deems necessary to evaluate programs under the Job Training Partnership Act, or to undertake research involving various labor issues within the scope of the Department's mission. Because section 303(a)(6) is the authority for requesting all such information, the disclosure of such information is a conformity and compliance requirement of section 303. In the light of this extended interpretation of the requirements of section 303(a)(6), comments are particularly invited on this subject.

Paragraph (c) of § 603.11 includes provisions on routine exceptions to the rule of confidentiality, and a note about the statutorily mandated exceptions to the rule of confidentiality that are covered in subparts C through L.

Paragraph (c)(1) covers the optional provisions for public officials and contractors of States and State agencies. Clause (i) of paragraph (c)(1) sets forth the Department's long-standing interpretation of section 303(a)(1) as not precluding the disclosure of any information in the records of a State or State agency to any public official (other than a public official referred to in paragraph (b)(1) or (b)(3)) for use in the performance of such public official's duties, and for a purpose which does not involve administration or enforcement of the State law, but only if—

(1) Disclosure of the specific information requested in any case is authorized by the State law, and

(2) The State or State agency determines in any case that such disclosure would not violate any other law of the State which is consistent with this section, or that such disclosure would not significantly hinder or delay the processing of claims for compensation or significantly hinder other activities of the State agency, or that such disclosure would not impede the efficient administration of the State law.

For the purposes of clause (i) of paragraph (c)(1), a "public official" includes only public officials in the executive branch of Federal, State, or local government, except that a State or State agency, at its option, may make disclosures in accordance with clause (i) to officials of a public agency or service

delivery area for the purposes of administration of the Job Training Partnership Act. In addition, the phrase "for use in the performance of such public official's duties" is specifically defined as meaning that disclosed information may be used solely for official business in connection with a law being administered or enforced by such public official. Therefore, the information which may be disclosed under clause (i) of paragraph (c)(1) to a public official for use in the performance of that public official's duties includes only information which is not required to be released under § 603.11(b) and which is not related to the administration or enforcement of the State law, even though the public official may be an official of the "State agency" which administers the unemployment compensation law or the employment service program.

Clause (i) of paragraph (c)(1) is an optional disclosure provision, and a State may, by law, adopt it to its fullest extent, or partially, or not at all. What a State may not do, however, is extend this optional disclosure beyond its scope as stated in clause (i), or dispense with any of the terms or conditions on such disclosures as set forth in clause (i) and in paragraph (d)(2).

Clause (ii) of paragraph (c)(1) deals with contractors of States and State agencies as a further exception to the rule of confidentiality. In accordance with clause (ii), information in the records of the State or State agency may be made available to a contractor of the State or State agency, provided that such disclosure is authorized by the State law, disclosure is made solely to the extent that it is necessary and proper to effectuate the contract, and the contract is fundable from title III granted funds.

Clause (ii) of paragraph (c)(1), like clause (i), is an optional provision, which is subject to the terms and conditions stated in clause (ii) and in paragraph (d)(2).

Paragraph (c)(2) of § 603.11 simply notes that the statutorily required exceptions to the rule of confidentiality, which are covered by subparts C through L of new part 603, are subject to the terms and conditions upon such disclosures as are set forth in the separate subparts. It is specifically noted in paragraph (c)(2) that the disclosure of any information to any public official, beyond that which is specifically required by subparts C through L, may be made solely in accordance with the optional provision of clause (i) of paragraph (c)(1), and under the terms and conditions applicable to such disclosures. What this means is, that if a State agency, in negotiating an agreement in accordance with subpart C (for example), wishes to disclose more information than is specifically required under subpart C, the agreement for providing such additional information will be required to be entered into in accordance with the terms and conditions of paragraphs (c)(1)(i) and (d)(2). No exceptions are permissible to this rule, for any of subparts C through L.

Paragraph (d) of § 603.11 states the terms and conditions on disclosures of information made in accordance with paragraphs (b), (c), and (f) of such section, which are in addition to the terms and conditions contained in such paragraphs.

Paragraph (d)(1)(i) provides that any disclosure made in accordance with paragraph (b) shall be made without regard to §§ 603.12, 603.13, and 603.14. Such terms and conditions are not appropriate or allowable with respect to disclosures made in accordance with paragraph (b).

Paragraph (d)(1)(ii) provides that any disclosure made in accordance with paragraph (f) may similarly be made without regard to § § 603.12, 603.13, and 603.14, except that, in the case of any disclosure made in accordance with paragraph (f) to anyone who is not a claimant or employer (referred to in paragraph (a)(2)(i)(B) or paragraph (b)(4)), or which is not made in the course of the administration of the State law, the State agency may require payment of its costs of making the disclosure. For disclosures of information in the public domain it would be inappropriate to require adherence to the requirements of §§ 603.12, 603.13, and 603.14.

Paragraph (d)(2) provides that optional disclosures made in accordance with clause (i) or (ii) of paragraph (c)(1) shall be made upon the terms and conditions as set forth therein and in §§ 603.12, 603.13, and 603.14, except that in the case of clause (ii) (State and State agency contractors) such disclosures may be made without requiring payment of costs as provided in § 603.12.

Paragraph (d)(3) provides that any mandatory disclosure referred to in paragraph (c)(2) shall be made solely upon the terms and conditions as set forth in the applicable subpart of new part 603.

Paragraph (e) of § 603.11 states the long-standing position of the Department on responses to subpoenas or other compulsory processes. Costs are payable from granted funds solely for actions taken which are consistent with this paragraph (e). Considerations of the use of granted funds also underlie the reason why the State or State agency should seek payment of its costs if the court orders disclosure.

Paragraph (f) of § 603.11 provides that the rule of confidentiality shall not be deemed to be applicable to any information in the records of the State or State agency which is in the public domain. Four separate clauses of paragraph (f) spell out the information that shall be considered to be in the public domain. There is then set forth three specific bases a State or State agency may cite as a reason for declining to disclose information in the public domain. None of these three reasons may be the basis for declining to disclose information to claimants or employers referred to in paragraphs (a)(2)(i)(B) or (b)(4).

With respect to the general rules on confidentiality and disclosure of information, comments are invited on the effect, if any, this proposed rule would have on academic research.

Section 603.12, *Payment of costs*, sets forth the rules on recovery of the State's and State agency's costs of making disclosures of information which are not made in the course of the administration of the State law. The statutory principle underlying these rules is that funds granted under title III of the SSA for the administration of the State unemployment compensation law may not be used for any other purpose whatever. This is required by the explicit statutory terms of section 302(a) of the SSA, and pursuant to section 303(a)(8) of the SSA this is a conformity requirement for approved State laws and is a compliance requirement for the States and State agencies under section 303(b) of the SSA.

Paragraph (a)(1) of § 603.12 provides that granted funds may be used to pay all costs of disclosures referred to in paragraphs (a)(2)(i)(B) and (b) of § 603.11, and for any other disclosures referred to in paragraph (c)(1)(ii) or (f) for which the costs are not charged to the recipient of the information. All such costs may be considered costs of administration of the State's law.

Paragraph (a)(2) of § 603.12 provides that granted funds may not be used to pay any of the costs of making optional disclosures referred to in paragraph (c)(1)(i) of § 603.11, except in isolated cases as set forth in paragraph (a)(2).

Paragraph (a)(3) of § 603.12 states the inclusive rule that granted funds may not be used to pay any of the costs of making any disclosure except as provided in paragraphs (a)(1) and (a)(2).

Paragraph (b) of § 603.12 provides that costs shall be calculated under the rules of 29 CFR part 97 and OMB Circular No.

A–87, and shall include any initial start-up costs. Postage or other delivery costs involved in making a disclosure shall be included as costs chargeable to the recipient. Further, penalty mail may not be used in any circumstances to transmit information being disclosed, except information referred to in paragraph (b), (c)(1)(ii), or (f) of § 603.11. Information that may not be sent by penalty mail may not be included in any mailing that may be sent by penalty mail.

With respect to the burden associated with information collection or recordkeeping required by this proposed rule, comments on any expected increase in such burden are invited from the State agencies.

Paragraph (c) of § 603.12 states the rule on payment and collection of the costs of making disclosures.

Section 603.13, *Safeguards for disclosed information*, sets forth the rules required to be imposed on recipients of disclosed information, to use the information solely for authorized purposes and to preclude the unauthorized redisclosure of the information.

Paragraph (a) of § 603.13 sets forth the general rules, which require the State or State agency to require of the recipient of disclosed information, that the recipient safeguard the information against unauthorized access or redisclosure as provided in paragraphs (b) and (c), and that the recipient be subject to penalties provided by the State law for unauthorized disclosure. The same general rules apply to a contractor for the State or State agency, and to any information obtained by the contractor from any other source in the execution of the contract.

The general rules stated in paragraph (a) reflect the Department's positions on these matters, and are a more complete statement of those rules than is contained in the present § 603.7(a). It is important to emphasize that significance is infused in the safeguards by requiring that recipients and their officials and employees must be subject to penalties provided by the State law for any unauthorized disclosure of information.

Paragraph (b)(1) of § 603.13 provides that the recipient shall be permitted to use disclosed information only for valid purposes involved in discharging the recipient's lawful responsibilities, and this also means only for the program purposes for which the information was disclosed. The recipient must also be prohibited from redisclosing the information except as provided in paragraph (c). This is a clarified version of present § 603.7(a)(1).

Paragraph (b)(2) of § 603.13 provides that the recipient shall be prohibited from using the information for any purpose not specifically authorized by an agreement which meets the requirements of § 603.14. This is the same as present § 603.7(a)(2).

Paragraph (b)(3) of § 603.13 provides that the recipient shall be required to store the disclosed information in a place physically secure from access by unauthorized persons. This is the same as present § 603.7(a)(3).

Paragraph (b)(4) of § 603.13 provides that information in electronic format shall be required to be stored securely. This is essentially the same as present § 603.7(a)(4).

Paragraph (b)(5) of § 603.13 provides that precautions shall be required to be taken to insure access only by authorized persons. This is essentially the same as present § 603.7(a)(5).

Paragraph (b)(6) of § 603.13 provides that the head of each recipient agency shall be required to give specified instructions to all personnel having access, and shall be required to sign an acknowledgment in the form specified in clause (ii) of paragraph (b)(6). This is essentially the same as present § 603.7(a)(6), but the terms of the acknowledgment are set forth with more specificity.

Paragraph (b)(7) of § 603.13 is not contained in the present § 603.7(a). It provides that the recipient shall be required to dispose of all disclosed information, and any copies thereof, after the purpose for which the information is disclosed has been served. An exception is made for any information filed in the record of any court case. Disposition instructions may include return of the information to the State or State agency, or destruction of the information, as directed by the State or State agency. Disposition includes deletion of personal identifiers by the State or State agency in lieu of destruction. It is further provided that any such information (or copies) shall not be archived or sent to any records center, and shall not be retained with personal identifiers for longer than ten years.

Paragraph (b)(7) is intended to counter a problem the Department has become aware of, involving the continual reuse of information long after the original purpose has ended, sometimes involving information that would not have been disclosable had subpart B been in effect at the time the information was obtained, or which was not disclosable under the Department's position at the time. This being the appropriate occasion to address the problem, and with disclosure today involving many more public officials, it has become evident that better controls must be instituted to avoid abuses in the use of disclosed information.

In paragraph (b)(7), therefore, two major controls are required. The first is to require disposal of the information after it has served its purpose. This control is made more effective by requiring disposition to be at the direction of the State or State agency that disclosed the information in the first instance. The second major control is to prohibit permanent records storage, and set an outside time limit on retaining the information. A ten-year time limit is deemed by the Department to be more than ample for this purpose.

The controls required by paragraph (b)(7) are essential to any meaningful management of an information system. These new controls, therefore, are deemed by the Department to be critical to effective safeguards of any disclosed information.

To effectuate the controls of paragraph (b)(7), as well as for the other purposes of subpart B, it will be necessary for the States and State agencies to document all disclosures of information (other than those referred to in paragraph (a) or (b) of § 603.11) and initiate a tracking system for all disclosures. The records will be required to be sufficient for purposes of auditing compliance with the requirements of subpart B.

It should be noted that the ten-year retention period is the longest retention period authorized by paragraph (b)(7), and each State will have the authority to prescribe a shorter period with respect to any specific information disclosed. It should be recognized that any retention period of three or more years with no maximum number of years would permit a recipient to establish and maintain a longitudinal data base for such period, and likely would engender requests that result in establishing continuous data bases that would be maintained indefinitely. States will be obligated to monitor the contract or agreement under which the data is disclosed throughout the entire retention period because of the enforcement requirements of § 603.14(c)(2). For these reasons, comments are particularly invited on the ten-year retention period.

Paragraph (c) of § 603.13 specifies the only four situations in which a recipient may redisclose information. This is essentially the same as present § 603.7(b), but with the addition of redisclosure in response to a subpoena as provided in § 603.11(e).

The provision for on-site inspections in paragraph (c) of present § 603.7 is not included in § 603.13, but is included in § 603.14.

Section 603.14, *Agreements and contracts*, sets out the terms and conditions for agreements with requesting agencies, and contracts with contractors, covering all information subject to the rule of confidentiality. Contracts with contractors also will be required to cover any information obtained by the contractors from any other source in the execution of the contracts.

Paragraph (a) of § 603.14 expresses the requirement for agreements and contracts as stated above.

Paragraph (b) of § 603.14 specifies the terms and conditions that must be included in all agreements and contracts, and also provides that the terms and conditions of any agreement or contract need not be limited to those specifically required. The provisions of paragraph (b) are essentially the same, with modifications for clarity and application to contracts, as are contained in the present § 603.6. The only significant difference is that the on-site inspection requirement of present § 603.7(c) is made a requirement for agreements and contracts by the addition of essentially the same provision in clause (7) of paragraph (b).

Paragraph (c) of § 603.14, on breach of an agreement and enforcement, is not contained in the present part 603, and is added as being essential to furnish guidance to the States and State agencies of the remedies they must have available to them under the State laws to assure conformity and compliance with the requirements of section 303(a)(1) of the SSA and subpart B.

Paragraph (c)(1) prescribes the steps that shall be taken in case of any breach of an agreement or contract, including failure to timely pay for the costs of any disclosure. First, the agreement or contract must be suspended, and any further disclosure is prohibited, until the State or State agency is satisfied that corrective action has been taken and that there will be no further breach of the agreement or contract. Second, in the absence of prompt and satisfactory corrective action the agreement or contract shall be cancelled, and the party shall be required to surrender all information obtained under the agreement or contract and any other information relevant to the agreement or contract.

It is important to the integrity of the rule of confidentiality that any breach of an agreement or contract, whatever its importance may seem in the abstract, be promptly addressed and corrected, and, in the absence of prompt and satisfactory correction, that the agreement or contract be cancelled and the State or State agency retrieve and secure all information.

Paragraph (c)(2) requires that the State law provide effective enforcement tools for the State and State agency, and that effective enforcement tools be utilized. Thus, in addition to the actions required to be taken in accordance with paragraph (c)(1), the State or State agency is required to undertake any other action under the agreement or contract, or under any law of the State or of the United States, to enforce the agreement or contract and secure satisfactory corrective action or surrender of information. Other remedial actions required to be undertaken include seeking damages, penalties, and restitution for any charges to granted funds, and recompense for all costs incurred by the State or State agency in pursuing the breach of the agreement or contract and enforcement as required by paragraph (c).

It must be kept in mind that, under sections 302(a) and 303(a)(6) of the SSA, granted funds may not be used in any manner or for any purpose in the administration or enforcement of such agreements and contracts. It follows that granted funds may not be used in pursuing breaches or enforcement of such agreements and contracts. Any costs incurred in regard to such matters must be fully recovered, and this underlines the importance of diligence in seeking recovery of such costs in connection with any and all breaches.

Section 603.15, *Notification of claimants and employers*, expresses one of the elementary requirements of developing law, that any information in the records of the State or State agency concerning any claimant or employer may be disclosed to others, and they are entitled to be notified of that possibility. This section is a restatement of the same requirement contained in present § 603.4, and is made applicable to employers as well as claimants. More detailed notification may be required by State privacy law, and, if so that will not be deemed to be inconsistent with this section.

Section 603.4 of the present part 603 implements the notification requirement applicable to the income and eligibility verification system (IEVS) in section 1137(a)(6) of the SSA. In § 603.15 the notification requirement of section 1137(a)(6) is restated as a general requirement of section 303(a)(1) of the SSA, and applicable to all disclosures that may be made in accordance with new part 603. Further, it is extended to cover employers, also as a requirement of section 303(a)(1).

The Department believes that the notification required by § 603.15 is a reasonable interpretation of the "methods of administration" requirement of section 303(a)(1), and that the thrust of section 1137(a)(6) is correct and justifiably extended to all of new part 603. The basis for this position is that claimants and employers are entitled to know everything the government does or may do that affects them, not only what their rights and responsibilities are under the State law, but also what use may be made of State records that may affect them directly or indirectly. Accordingly, for the purposes of section 303(a)(1), claimants and employers are entitled to be informed of what uses the government makes of information in State records, as well as information needed to protect their rights and carry out their responsibilities under the State law. On the other hand, because section 1137(a)(6) applies only to the IEVS implemented in subpart C, there would be justification in limiting the notification requirement to subpart C, either as set forth in present § 603.4 or as restated and extended to employers in § 603.15, and otherwise leave the matter of required notification of claimants and employers to the law of each State. Therefore, comments are particularly invited on this subject as follows.

In view of the fact that § 603.15 is a significant extension of present § 603.4, and has not heretofore been expressed by the Department as a requirement of section 303(a)(1), comments are invited on making such notification a general requirement of section 303(a)(1).

Notice, also, that this extended notification requirement is made applicable in subpart C to the IEVS, but no specific reference to § 603.15 is made in subparts D through L. Comments are invited on this extension of the notification requirement for subpart C, and as to whether § 603.15 should be referred to expressly in subparts D through L.

Section 603.16, *Effectuating conformity and compliance*, is not contained in the present part 603, and need not have been because section 303(f) (the requirement implemented in present part 603) is not a conformity requirement. Section 303(a)(1) is, however, both a conformity and a compliance requirement, and § 603.16 thus sets forth the statutory procedures for effectuating both conformity and compliance. There is nothing new or different in this section, however; set forth simply therein, for the edification of the States and State agencies, are the conformity and compliance procedures

prescribed by section 303(b) of the SSA and 20 CFR 601.5. Added in paragraph (c) is a provision on formal and informal resolution of issues, by reference to specific provisions of 20 CFR 601.5.

Subpart C—Income and Eligibility Verification System

Subpart C implements section 303(f) of the SSA, as amended in 1988.

Subpart C includes portions of the present subpart A, IEVS regulations first published in the **Federal Register** on February 28, 1986, at 51 FR 7199. Specifically, section 2651(d) of Public Law 98–396 added new section 303(f) to the SSA. This section requires States to have in effect an income and eligibility verification system, pursuant to which information is requested and exchanged for the purpose of verifying eligibility for, and the amount of, benefits available under several Federally-assisted programs including the Federal-State unemployment compensation program. Under the 1988 amendments to section 1137, SSA, subpart C also makes reference to the new provisions on verification of immigration status.

Subpart C replaces only those parts of unemployment insurance program letters (UIPLs) 1–85, and Change 1, 24–86, and 12–87 related to the disclosure of information under section 303(f), SSA.

Present § 603.1, *Purpose*, has been redesignated § 603.20 and retitled, *Purpose and application*, and revised to more accurately reflect the purpose of disclosure under IEVS. It also references the requirements under section 1137, SSA, that States have wage record systems and that claimants furnish statements regarding their social security account numbers and (under the 1988 amendments to section 1137, SSA) nationality or immigration status. In the paragraph on "Application" it is made clear that only State agencies, not States, are required to disclose information referred to in subpart C.

Present § 603.2, *Definitions*, is redesignated § 603.21. Definitions for State unemployment compensation agency and wage information have been moved to § 603.3 and modified for clarity and simplification.

Paragraph (a) of § 603.21 defines "claim information" in essentially the same terms as it is defined in the present part 603. This definition is based on section 1137(a)(4)(A) of the SSA which provides that agencies will exchange other information (besides wage information) in their possession for use in establishing or verifying eligibility or benefit amounts under the Federally-assisted programs.

Paragraph (b) of § 603.21 defines "requesting agency" in essentially the same terms as it is defined in the present part 603. Where applicable, cross references among the various subparts are added.

Present § 603.3, *Eligibility condition for claimants*, has been eliminated because it does not deal directly with the disclosure of confidential information. Reference to the requirement that claimants furnish statements regarding their social security account numbers and nationality or immigration status is included in § 603.20.

Present § 603.4, *Notification to claimants*, has been redesignated § 603.22 and retitled, *Notification to claimants and employers*, and makes applicable by reference the requirements of § 603.15. That section has been revised for clarity and to provide notification to employers of the potential use of information provided by them.

Present § 603.5, *Disclosure of information*, has been redesignated § 603.23 and modified for clarity and simplification.

Present § 603.6, *Agreement between State unemployment compensation agency and requesting agency*, has been redesignated § 603.27 and retitled, *Agreements*. This section has been changed to make applicable by reference the requirements of § 603.14 (b) and (c), which is a somewhat revised version of the language of present § 603.6. Paragraph (c) of present § 603.6, related to Federal, State, or local agencies in another State requesting information, is retained in § 603.27.

Present § 603.7, *Protection of confidentiality*, has been redesignated § 603.26 and retitled, *Safeguards for disclosed information*. This section has been changed to make applicable by reference the requirements of § 603.13 which is a somewhat revised version of the language of present § 603.7, except for moving the paragraph related to on-site inspections (§ 603.7(c)) to § 603.14(b)(7) on agreements in order to make the requirement enforceable by agreement.

Present § 603.8, *Obtaining information from other agencies and crossmatching with wage information*, has been redesignated § 603.24 and modified for clarity.

Present § 603.9, *Effective date of rule*, has been eliminated because the date (May 29, 1986) by which the States must have developed a plan describing a good faith effort to comply with the requirements of section 1137 (a) and (b), SSA, has passed, making the section outdated.

Section 603.25, *Payment of costs*, is added to explicitly require payment of costs to State agencies by Federal, State, and local agencies receiving information. In the present part 603, payment of costs is implied in § 603.6(b)(5) which requires provision for reimbursement in the agreements between the State agency and the agencies requesting disclosure. The statute provides for payment of costs under section 1137(a)(7), SSA. This section makes applicable by reference the requirements of paragraphs (b) and (c) of § 603.12.

Section 603.28, *Effectuating compliance*, makes applicable by reference the requirements of paragraphs (b) and (c) of § 603.16 and is added to this subpart, under the controlling interpretation of section 303(a)(1), SSA, to assure that State agencies comply substantially with the requirements of disclosure under subpart C.

Subpart D—Disclosure of Information to Agencies Charged With the Administration of Public Works or Assistance Through Public Employment

Subpart D implements section 303(a)(7), SSA.

Section 603.30, *Purpose and application*, sets forth the requirement under section 303(a)(7), SSA, that a State law provide that certain information be made available to any agency of the United States charged with the administration of public works or assistance through public employment. Subpart D applies only to State agencies.

Section 603.31, *Disclosure of information*, incorporates the statutory language and provides that disclosure be made upon request and only include, with respect to recipients for unemployment compensation, name, address, ordinary occupation, employment status, and a statement of such recipient's rights to further compensation under the State law.

Sections 603.32, 603.33, 603.34, and 603.35 address payment of costs, safeguards for disclosed information, agreements, and effectuating conformity and compliance, respectively, and make applicable by reference the requirements of the relevant sections of subpart B of part 603. Section 303(a)(7), SSA, requires conformity and substantial compliance with Federal requirements, but does not explicitly require payment of costs, adoption of safeguards, or execution of an agreement. All conditions are imposed under the controlling interpretation of section 303(a)(1), SSA.

Subpart E—Disclosure of Information to the Railroad Retirement Board

Subpart E implements section 303(c)(1), SSA.

Section 603.40, *Purpose and application*, sets forth the requirement under section 303(c)(1), SSA, that a State agency provide certain information to the Railroad Retirement Board. Subpart E applies only to State agencies.

Section 603.41, *Disclosure of information*, follows the statutory language and provides that disclosure be made upon request and include information as the Board deems necessary for its purposes.

Sections 603.42, 603.43, 603.44, and 603.45 address payment of costs, safeguards for disclosed information, agreements, and effectuating compliance, respectively, and make applicable by reference the requirements of the relevant sections of subpart B of part 603. Section 303(c)(1), SSA, explicitly requires payment of costs, but does not require adoption of safeguards and execution of an agreement. All conditions are imposed under the controlling interpretation of section 303(a)(1), SSA. Although the statutory language would support a stricter criterion, section 303(c)(1), SSA, is interpreted as requiring substantial compliance to achieve uniformity among all the compliance requirements of section 303, SSA.

Subpart F—Disclosure of Information to the Department of Agriculture and State Food Stamp Agencies

Subpart F implements sections 303(d)(1) and 303(d)(2)(B), SSA.

Subpart F replaces only those parts of UIPL 52–80, and Change 1, related to the disclosure of information under the above sections of the SSA.

Section 603.50, *Purpose and application*, follows the statutory language and sets forth the requirement under section 303(d)(1), SSA, that a State agency disclose certain information to officers and employees of the Department of Agriculture and to officers or employees of any State food stamp agency for purposes of determining an individual's eligibility for benefits, or the amount of benefits, under the food stamp program established under the Food Stamp Act of 1977 (7 U.S.C. 2011 *et seq.*).

Section 603.50 also implements section 303(d)(2)(B), SSA, which permits a State agency to notify the State food stamp agency of any individual who discloses on a new unemployment compensation claim that he or she owes an uncollected overissuance of food stamp coupons, and to forward any withheld compensation to the State food stamp agency.

Further, § 603.50 notes that regulations in this subpart do not implement clauses (i), (iii), and (iv) of section 303(d)(2)(B), SSA, which relate, respectively, to the disclosure by an individual to the State agency of an uncollected overissuance, to the deduction and withholding from unemployment compensation of such overissuance, and to the payment of the amount deducted and withheld to the appropriate State food stamp agency, except as the latter involves disclosure of information. The requirements of these clauses are excluded because they are incidental to the disclosures of information required in accordance with this subpart.

Also, § 603.50 notes that disclosure of information required by subpart F is in addition to the disclosure requirements of subparts C, implementing the IEVS, and L. Subpart F applies only to State agencies.

Section 603.51, *Definition*, incorporates statutory language by defining "State food stamp agency" as meaning any State or local agency described in 7 U.S.C. 2012(n)(1) which administers the food stamp program established under the Food Stamp Act of 1977.

Section 603.52, *Disclosure of information*, provides that the disclosure of information be made upon request and include certain information related to wages (in substance, present part 603 definition) and claims (as specified in the statute). Further, § 603.52 provides that disclosure be made of any information required in connection with the transmittal of withheld compensation to the appropriate State food stamp agency.

Section 603.52 also provides that a State agency may notify the State food stamp agency (to which an uncollected overissuance is owed) that any individual who discloses such a debt has been determined to be eligible for unemployment compensation (if such determination has been made by the State agency).

Sections 603.53, 603.54, 603.55, and 603.56 address payment of costs, safeguards for disclosed information, agreements, and effectuating compliance, respectively, and make applicable by reference the requirements of the relevant sections of subpart B of part 603. Section 303(d)(1), SSA, explicitly requires payment of costs, and adoption of safeguards, but does not require execution of an agreement. Section 303(d)(2), SSA, also requires payment of costs. All conditions are imposed on disclosures required by section 303(d) (1) and (2) under the controlling interpretation of section 303(a)(1), SSA. Section 303(d)(3), SSA, requires substantial compliance with respect to section 303(d)(1), SSA, but does not contain enforcement language for section 303(d)(2). In the proposed rule section 303(d)(2), as well, is interpreted as requiring substantial compliance.

Subpart G—Disclosure of Information to State or Local Child Support Enforcement Agencies

Subpart G implements sections 303(e)(1) and 303(e)(2)(A), SSA.

Subpart G replaces only those parts of UIPL 52–80, and Change 1, related to the disclosure of information under the above sections of the SSA.

Section 603.60, *Purpose and application*, sets forth the requirement under section 303(e)(1), SSA, that a State agency disclose certain information contained in the State agency's records directly to officers or employees of any State or local child support enforcement agency for purposes of establishing and collecting child support obligations from, and locating, individuals owing such obligations.

Section 603.60 also implements section 303(e)(2)(A), SSA, which requires that a State agency notify the State or local child support enforcement agency of any individual who discloses on a new unemployment compensation claim that he or she owes child support obligations, that the individual has been determined to be eligible for unemployment compensation if such determination has been made by the State agency, and requires forwarding any withheld compensation to the child enforcement agency.

Further, § 603.60 notes that the regulations in this subpart do not implement clauses (i), (iii), and (iv) of section 303(e)(2)(A), SSA, which relate, respectively, to the requirement that an individual disclose that he or she owes child support obligations, to the deduction and withholding from unemployment compensation of such obligations, and to the payment of the amount deducted and withheld to the appropriate State or local child support enforcement agency, except as the latter involves disclosure of information. The requirements of these clauses are excluded because they are incidental to the disclosures of information required in accordance with this subpart.

Also, § 603.60 indicates that disclosure of information required by subpart G is in addition to the disclosure requirements of subparts C, implementing the IEVS, I, and L. Subpart G applies only to State agencies.

Paragraph (a) of § 603.61, *Definitions*, incorporates statutory language by defining "child support obligations" as only including obligations which are being enforced pursuant to a plan described in section 454, SSA, which has been approved by the Secretary of Health and Human Services under part D of title IV, SSA.

Likewise, paragraph (b) of § 603.61 defines "State or local child support enforcement agency" as meaning any agency of a State or political subdivision thereof operating pursuant to a plan described in section 454, SSA, which has been approved by the Secretary of Health and Human Services under part D of title IV, SSA. Accordingly, disclosure of information under this subpart is restricted for use in administration of child support enforcement only. Subpart L provides for much broader disclosure of information to IV-D agencies, but does not include wage information.

Section 603.62, *Disclosure of information*, provides that disclosure be made upon request and include certain information related to wages (in substance, present part 603 definition). Further, § 603.62 provides that disclosure be made of any information required in connection with the transmittal of withheld compensation to the appropriate State or local child support enforcement agency.

Section 603.62 also provides, as required by statute, that a State agency notify the State or local child support enforcement agency, with respect to any individual who discloses on a new unemployment compensation claim that he or she owes child support obligations, that the individual has been determined to be eligible for unemployment compensation if such determination has been made by the State agency.

Sections 603.63, 603.64, 603.65, 603.66 address payment of costs, safeguards for disclosed information, agreements, and effectuating compliance, respectively, and make applicable by reference the requirements of the relevant sections of subpart B of part 603. Section 303(e)(1), SSA, explicitly requires payment of costs, and adoption of safeguards, but does not require execution of an agreement. Section 303(d)(2) also requires payment of costs. All conditions are imposed on disclosures required by section 303(e) (1) and (2) under the controlling interpretation of section 303(a)(1), SSA. Section 303(e)(3), SSA, requires substantial compliance with Federal requirements.

Subpart H—Disclosure of Information Related to Recovery of Overpayments

Subpart H implements the disclosure of information which is required under the interstate offset and cross-program offset agreements which are authorized by section 303(g), SSA. Subpart H does not implement the requirements for such offsets beyond those relating to disclosure of information.

Section 603.70, *Purpose and application*, explains that disclosure of information is required in carrying out the interstate offset and cross-program offset agreements which are authorized by section 303(g), SSA. Under this section, States are permitted to withhold unemployment compensation payable under State laws to recover overpayments of benefits made to individuals by other States. Also, an overpayment of State unemployment compensation may be recovered from a payment made under a Federal unemployment benefit or allowance program if the State has entered into an agreement with the Secretary of Labor under section 303(g)(2), SSA, pursuant to which it may recover overpayments of State benefits from payments made under a Federal unemployment benefit or allowance program if it reciprocally recovers overpayments made under a Federal unemployment benefit or allowance program from State payments. Specifically, this section permits interstate same program offsets (i.e., State from State and Federal from Federal) and intrastate and interstate cross program offsets (i.e., State from Federal and Federal from State). Such interstate and cross-program recovery of overpayments necessarily requires the disclosure of information contained in State agency records. Subpart H applies only to State agencies.

Also, § 603.70 defines "Federal unemployment benefit or allowance program" as meaning any program established by Federal statute and administered by the Department, which provides for the payment from Federal funds of compensation to individuals. Under this definition, the only programs currently existing are those providing for the payment of unemployment compensation to Federal employees, unemployment compensation to ex-servicemembers, trade readjustment allowances under the trade adjustment assistance program, disaster unemployment assistance, and weekly layoff benefits under the redwood employee protection program.

Section 603.71, *Disclosure of information*, provides that the State agency may disclose to State agencies in other States only that unemployment compensation information which is necessary to effectuate recovery of overpayments from individuals as authorized by State law in accordance with section 303(g), SSA. Further, to effectuate the purposes of interstate same program and cross-program offset the State agency shall disclose such information from its records as is necessary to accomplish these purposes. Similarly, a State agency effecting an offset may disclose to the other State agency only such information as is necessary for the purposes of the interstate agreement. This section does not specifically indicate the information which may be disclosed because State laws vary considerably and different information may be required by the States in order to effectuate an offset; however, it does limit the information to only that required for an offset.

Section 603.72, *Payment of costs*, provides that payment of costs by the receiving State agency is neither appropriate nor required with respect to disclosures of information under this subpart because granted funds paid to a State under section 302(a), SSA, may be used to pay all costs of disclosure under this Subpart.

Section 603.73, *Safeguards for disclosed information*, provides that the State agency receiving information disclosed under this subpart may use it only for purposes of recovering the overpayment for which the information was disclosed. This section makes applicable by reference the confidentiality requirements of § 603.13 of part 603.

Section 603.74, *Agreements*, explains that section 303(g)(2), SSA, requires an agreement between each State and the Secretary of Labor to authorize cross-program offsets (either intrastate or interstate). A properly executed agreement must be in effect before any cross-program offset may occur or information may be disclosed. No agreement with the Secretary is required for interstate, same program offsets. For interstate, same program offsets, reciprocal arrangements between and among the States are appropriate. Accordingly, an agreement such as that required under § 603.14 of part 603 is neither appropriate nor required under subpart H.

Section 603.75, *Effectuating compliance*, provides that where the Department has reason to believe that a State or State agency (the disclosing agency or the receiving agency) has failed to comply substantially with any of the requirements of subpart H, the requirements of paragraphs (b) and (c) of § 603.16 are applicable. Section

303(g), SSA, does not contain enforcement language, but substantial compliance is imposed under the controlling interpretation of section 303(a)(1), SSA.

Subpart I—Actions Required by State Agencies to Enable the Secretary of Health and Human Services to Obtain Prompt Access to Information

Subpart I implements section 303(h), SSA.

Subpart I replaces only those parts of UIPL 11–89 related to disclosure of information under section 303(h), SSA.

Section 603.80, *Purpose and application*, sets forth the requirement under section 303(h), SSA, that a State agency take action necessary to enable the Secretary of Health and Human Services (HHS), in accordance with the "Memorandum of Understanding" (appendix A to part 603) between the Secretaries of Labor and HHS, to obtain prompt access to certain information contained in the State agency's records for purposes of carrying out the child support enforcement program under title IV, section 453, SSA. As specified in that section, the Office of Child Support Enforcement (OCSE), Federal Parent Locator Service (FPLS), performs this function on behalf of the Secretary of HHS.

Also, § 603.80 notes that disclosure of information required by subpart I is in addition to the disclosure requirements of subparts C, implementing IEVS, G and L. Subpart I applies only to State agencies.

Section 603.81, *Disclosure of information*, provides that disclosure be made upon request and include certain wage information, claim information (both, in substance, present part 603 definitions), and other information (not specified in the statute other than to qualify it as useful in locating absent parents or parents' employers) contained in the records of such State agency.

Sections 603.82, 603.83, and 603.85 address payment of costs, safeguards for disclosed information, and effectuating compliance, respectively, and make applicable by reference the requirements of the relevant sections of subpart B of part 603. Section 303(h), SSA, explicitly requires substantial compliance, but does not require payment of costs and adoption of safeguards. All conditions are imposed under the controlling interpretation of section 303(a)(1), SSA.

Section 603.84, *Agreements*, explains that as specified in the "Memorandum of Understanding" between the Secretaries of Labor and Health and Human Services (appendix A to part 603), the Secretaries have agreed that the OCSE will enter into a written agreement with a State agency to act as OCSE's agent in establishing an arrangement with a contractor coordinating the information exchange for the purpose of facilitating the transmission of requests and responses to requests for information as provided in § 603.81. With respect to agreements for purposes of this subpart, § 603.84 makes applicable by reference the requirements of § 603.14, which also addresses breaches of agreements.

Subpart J—Disclosure of Information to the Department of Housing and Urban Development and Public Housing Agencies

Subpart J implements section 303(i), SSA.

Subpart J replaces only those parts of UIPL 11–89 related to the disclosure of information under section 303(i), SSA.

Section 603.90, *Purpose and application*, sets forth the requirement under section 303(i), SSA, that a State agency disclose certain information to officers and employees of the Department of Housing and Urban Development and to representatives of a public housing agency for the purposes of determining an individual's eligibility for, or amount of, benefits under a housing assistance program of the Department of Housing and Urban Development. Subpart J applies only to State agencies.

Also, § 603.90 notes that section 904(c)(2) of the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Pub. L. 100–628) provides certain protections for applicants for, and recipients of, benefits under the programs of the Department of Housing and Urban Development in connection with the use of information obtained pursuant to section 303(i), SSA.

In addition, § 603.90 notes that section 904(c)(3) of the Stewart B. McKinney Act sets forth criminal penalties for certain misconduct in connection with information within the purview of section 303(i), SSA, as well as certain remedies for applicants and recipients who were subjected to misconduct with respect to such information. The Department of Labor is not, however, responsible for administering sections 904(c)(2) and 904(c)(3) of the Stewart B. McKinney Act.

Paragraph (a) of § 603.91, *Definitions*, defines "consent form" by reference to section 904(b) of the Stewart B. McKinney Act of 1988 (Pub. L. 100–628). The form, giving consent for release of information, must be signed by an individual before the State agency provides information specified in § 603.92.

Paragraph (b) of § 603.91 defines "public housing agency" by reference to section 3(b)(6) of the United States Housing Act of 1937 (42 U.S.C. 1437a(b)(6)). The term means any State, county, municipality, or other governmental entity or public body (or agency or instrumentality thereof) which is authorized to engage in or assist in the development or operation of low-income housing. The term does not include a private owner responsible for determining eligibility for or level of benefits under the Act.

Section 603.92, *Disclosure of information*, incorporating statutory language, provides that disclosure be made upon request and include certain wage (in substance present part 603 definition) and limited claim (as specified in the statute) information contained in the records of the State agency.

Section 603.93, *Frequency and format of disclosure*, provides that the frequency and format of the information disclosed under this subpart be determined by agreement in accordance with paragraph (b)(3) of § 603.14. The format and frequency are not specifically prescribed in order to allow the needed flexibility among State agencies and Federal, State, and local agencies requesting information.

Sections 603.94, 603.95, 603.96, and 603.97 address payment of costs, safeguards for disclosed information, agreements, and effectuating compliance, respectively, and make applicable by reference the requirements of the relevant sections of subpart B of part 603. Section 303(i), SSA, explicitly requires payment of costs, adoption of safeguards, and substantial compliance with Federal requirements, but does not require execution of an agreement. All conditions are imposed under the controlling interpretation of section 303(a)(1), SSA.

Subpart K—Disclosure of Information to Public Agencies Administering Programs of Aid to Families with Dependent Children

Subpart K implements section 3304(a)(16), FUTA, (26 U.S.C. 3304(a)(16)).

Subpart K replaces only those parts of UIPL 21–78 related to the disclosure of information under section 3304(a)(16), FUTA.

Section 603.100, *Purpose and application*, sets forth the requirement under section 3304(a)(16), FUTA that a State agency disclose certain

information to a State or political subdivision thereof administering a State plan for aid and services to needy families with children approved under part A of title IV, SSA, for purposes of determining an individual's eligibility for aid or services, or the amount of such aid or services.

Also, § 603.100 notes that disclosure of information required by subpart K is in addition to the disclosure requirements of subparts C, implementing IEVS, and L. subpart K applies only to State agencies.

Section 603.101, *Disclosure of information*, incorporating statutory language, provides that disclosure be made upon request and include wage information (determined necessary by the Secretary of Health and Human Services) contained in the records of the State agency.

Sections 603.102 and 603.104 address payment of costs and agreements, respectively, and make applicable by reference the requirements of the relevant sections of subpart B of part 603. Section 3304(a)(16), FUTA, does not require payment of costs or adoption of an agreement, but these conditions are imposed under the controlling interpretation of section 303(a)(1), SSA.

Section 603.103, *Safeguards for disclosed information*, makes applicable by reference the requirements of 45 CFR 205.50. Section 3304(a)(16), FUTA, requires establishment of safeguards as determined necessary by the Secretary of Health and Human Services. Regulations at 45 CFR 205.50 will govern the adoption of safeguards required by this subpart.

Section 603.105, *Effectuating conformity and compliance*, makes applicable the conformity and substantial compliance requirements of section 3304(c), FUTA, and 20 CFR 601.5(a). Section 3304(c), FUTA, requires such conformity and substantial compliance with the requirements of section 3304(a)(16).

Subpart L—Disclosure of Information Under the Wagner-Peyser Act

Subpart L implements section 3(b) of the Wagner-Peyser Act with respect to the disclosure of information by State unemployment compensation agencies. It is not applicable to State employment service agencies.

Section 603.110, *Purpose and application*, sets forth the requirement under section 3(b) of the Wagner-Peyser Act that a State agency disclose upon request certain information to various agencies administering Federally-assisted programs. The relevant agencies are:

—A public agency administering or supervising the administration of a State plan approved under part A of title IV of the Social Security Act;
—A public agency charged with any duty or responsibility under any program or activity authorized or required under part D of title IV of such Act; the programs referred to are not limited to those related to child support enforcement as in subparts C, G, and I of part 603 because section 3(b) of the Wagner-Peyser Act includes all programs of IV.D agencies; and
—Any State or local agency (as defined in 7 U.S.C. 2012(n)(1)) which is charged with the administration of the food stamp program in the State under the Food Stamp Act of 1977 (7 U.S.C. 2011 *et seq.*). Indian tribal organizations are not included in this subpart.

Also, § 603.110 notes that the disclosure of information required by subpart L is in addition to the disclosure requirements of subparts C, implementing IEVS, F, G, I, and K. Subpart L applies only to State agencies.

Section 603.111, *Disclosure of information*, incorporating statutory language, provides that the disclosure of information be made upon request and include specific information related to unemployment compensation (language similar to present part 603) and offers of employment (as specified in the statute).

Sections 603.112, 603.113, and 603.114 address payment of costs, safeguards for disclosed information, and agreements, respectively, and make applicable by reference the requirements of the relevant sections of subpart B of part 603. Section 3(b) of the Wagner-Peyser Act does not explicitly require payment of costs, adoption of safeguards, or execution of an agreement, but these conditions are imposed under the controlling interpretation of section 303(a)(1), SSA.

Section 603.115, *Effectuating compliance*, makes applicable the substantial compliance requirements of paragraphs (b) and (c) of § 603.16 insofar as section 3(b) of the Wagner-Peyser Act imposes requirements upon State (unemployment compensation) agencies. The rationale and justification for this treatment are fully discussed in the first part of the **SUPPLEMENTARY INFORMATION** section of this preamble. The statute furnishes no effective enforcement tool applicable to State agencies.

General Comments

It is the Department's intent that these rules shall preempt any State open records or similar law that is inconsistent with them. Therefore, pending implementation of the final rule, each State should plan to review its open records law in order to amend the statute, where necessary, to ensure that the law of the State contains provisions which are interpreted and applied consistently with the requirements of part 603.

Again, pending implementation of the final rule, each State should plan to review all existing agreements with agencies, entities, or contractors requesting disclosure of information to ensure that the requirements of § 603.14 are met. For example, existing agreements required by present part 603 would be required to be changed to accord with subpart C of this part 603.

Drafting Information

This document was prepared under the direction and control of the Director, Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210, telephone: 202–535–7831 (this is not a toll free number).

Classification—Executive Order 12291

The proposed rule in this document is not classified as a "major rule" under Executive Order 12291 on Federal Regulations, because it is not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory impact analysis is required.

Paperwork Reduction Act

A request to revise the approval of the information collection requirements contained in this proposed rule has been submitted to the Office of Management and Budget (OMB) in accordance with the Paperwork Reduction Act of 1980, as amended. The collection requirements of present part 603 (Income and Eligibility Verification System) have been approved under control number 1205–0238, expiring August 31, 1994.

The estimated annual recordkeeping burden is approximately 32 hours per State (based on an average 8 records per State at 4 hours per record); the estimated total annual burden is 1,696 hours. Send comments regarding this burden estimate or any other aspect of this recordkeeping requirement to Mary Ann Wyrsch, Director of the Unemployment Insurance Service, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., room S–4231, Washington, DC 20210, and to the Office of Management and Budget, Paperwork Reduction Project (1205–0238), Washington, DC 20503.

Regulatory Flexibility Act

This proposed rule will have no "significant economic impact on a substantial number of small entities" under 5 U.S.C. 605(b). This proposed rule amends the regulations for the State Income and Eligibility Verification System and affects only the States, and State agencies, which are not within the definition of "small entity" under 5 U.S.C. 601(6). The Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. Accordingly, no regulatory flexibility analysis is required.

List of Subjects in 20 CFR Part 603

Employment and Training Administration, Labor, and Unemployment Compensation.

Catalogue of Federal Domestic Assistance Number

This program is listed in the Catalogue of Federal Domestic Assistance at No. 17.225, Unemployment Insurance.

Words of Issuance

For the reasons set forth in the Preamble, it is proposed that part 603 of title 20, Code of Federal Regulations, be revised as set forth below.

Signed at Washington, DC on March 13, 1992.

Roberts T. Jones,

Assistant Secretary of Labor.

PART 603—FEDERAL-STATE UNEMPLOYMENT COMPENSATION PROGRAM; CONFIDENTIALITY AND DISCLOSURE OF STATE RECORDS

Subpart A—In General

Sec.
603.1 Purpose.
603.2 Scope.
603.3 Definitions.

Subpart B—Confidentiality Requirement of Section 303(a)(1) of the Social Security Act

603.10 Purpose and application.
603.11 Interpretation and application.
603.12 Payment of costs.
603.13 Safeguards for disclosed information.
603.14 Agreements and contracts.
603.15 Notification to claimants and employers.
603.16 Effectuating conformity and compliance.

Subpart C—Income and Eligibility Verification System

603.20 Purpose and application.
603.21 Definitions.
603.22 Notification to claimants and employers.
603.23 Disclosure of information.
603.24 Obtaining information from other agencies and crossmatching with wage information.
603.25 Payment of costs.
603.26 Safeguards for disclosed information.
603.27 Agreements.
603.28 Effectuating compliance.

Subpart D—Disclosure of Information to Agencies Charged With the Administration of Public Works or Assistance Through Public Employment

603.30 Purpose and application.
603.31 Disclosure of information.
603.32 Payment of costs.
603.33 Safeguards for disclosed information.
603.34 Agreements.
603.35 Effectuating conformity and compliance.

Subpart E—Disclosure of Information to the Railroad Retirement Board

603.40 Purpose and application.
603.41 Disclosure of information.
603.42 Payment of costs.
603.43 Safeguards for disclosed information.
603.44 Agreements.
603.45 Effectuating compliance.

Subpart F—Disclosure of Information to the Department of Agriculture and State Food Stamp Agencies

603.50 Purpose and application.
603.51 Definition.
603.52 Disclosure of information.
603.53 Payment of costs.
603.54 Safeguards for disclosed information.
603.55 Agreements.
603.56 Effectuating compliance.

Subpart G—Disclosure of Information to State or Local Child Support Enforcement Agencies

603.60 Purpose and application.
603.61 Definitions.
603.62 Disclosure of information.
603.63 Payment of costs.
603.64 Safeguards for disclosed information.
603.65 Agreements.
603.66 Effectuating compliance.

Subpart H Disclosure of Information Related to Recovery of Overpayments

603.70 Purpose and application.
603.71 Disclosure of information.
603.72 Payment of costs.
603.73 Safeguards for disclosed information.
603.74 Agreements.
603.75 Effectuating compliance.

Subpart I—Actions Required by State Agencies to Enable the Secretary of Health and Human Services to Obtain Prompt Access to Information

603.80 Purpose and application.
603.81 Disclosure of information.
603.82 Payment of costs.
603.83 Safeguards for disclosed information.
603.84 Agreements.
603.85 Effectuating compliance.

Subpart J—Disclosure of Information to the Department of Housing and Urban Development and Public Housing Agencies

603.90 Purpose and application.
603.91 Definitions.
603.92 Disclosure of information.
603.93 Frequency and format of disclosure.
603.94 Payment of costs.
603.95 Safeguards for disclosed information.
603.96 Agreements.
603.97 Effectuating compliance.

Subpart K—Disclosure of Information to Public Agencies Under the Federal Unemployment Tax Act

603.100 Purpose and application.
603.101 Disclosure of information.
603.102 Payment of costs.
603.103 Safeguards for disclosed information.
603.104 Agreements.
603.105 Effectuating conformity and compliance.

Subpart L—Disclosure of Information to Public Agencies under the Wagner-Peyser Act

603.110 Purpose and application.
603.111 Disclosure of information.
603.112 Payment of costs.
603.113 Safeguards for disclosed information.
603.114 Agreements.
603.115 Effectuating compliance.

Appendix A—Memorandum of Understanding Between the Secretaries of Labor and Health and Human Services

Authority: 42 U.S.C. 1302(a); 26 U.S.C. 7805(a); Secretary's Order No. 4–75 (40 FR 18515).

Subpart A—In General

§ 603.1 Purpose.

The regulations in this part 603:

(a) Prescribe comprehensive rules for protecting the confidentiality of State records for the purposes of the Federal-State unemployment compensation program;

(b) Define the limits on the rule of confidentiality;

(c) Set forth the statutorily required and permitted exceptions to the rule of confidentiality;

(d) Prescribe the conditions under which required and permitted disclosures may be made; the conditions include payment of costs, safeguards for disclosed information, and execution of agreements; and

(e) Set forth the processes through which the Secretary of Labor determines whether a State law fails to conform with Federal law requirements for State laws or whether a State or State agency has failed to comply substantially with

any of the requirements of applicable Federal law and this part 603.

§ 603.2 Scope.

This part 603 is a compendium of all of the requirements of statutory provisions relating to the confidentiality and disclosure of State records compiled or maintained for the purposes of the Federal-State unemployment compensation program. Part 603 is arranged in the following subparts:

(a) *Subpart A* describes the purpose and scope of part 603 and the definitions common to all subparts;

(b) *Subpart B* prescribes the rule of confidentiality, the disclosures required notwithstanding such rule, the exceptions to such rule, the conditions common to subparts B through L on disclosure of information, and the remedial processes for resolving conformity and compliance issues (section 303(a)(1) of the Social Security Act);

(c) *Subpart C* sets forth the requirements for disclosure of information under the Income and Eligibility Verification System, with references to the requirements that States have wage record systems and that claimants furnish statements regarding their social security account numbers and nationality or immigration status (section 303(f) of the Act);

(d) *Subpart D* sets forth the requirements for disclosure of information to agencies of the United States charged with the administration of public works or assistance through public employment (section 303(a)(7) of the Act);

(e) *Subpart E* sets forth the requirements for disclosure of information to the Railroad Retirement Board (section 303(c)(1) of the Act);

(f) *Subpart F* sets forth the requirements for disclosure of information to the United States Department of Agriculture and State food stamp agencies, with reference to the intercept of unemployment compensation to cover food stamp overissuances (section 303(d) of the Act);

(g) *Subpart G* sets forth the requirements for disclosure of information to State and local governmental child support enforcement agencies with reference to the intercept of unemployment compensation to cover child support obligations (section 303(e) of the Act);

(h) *Subpart H* sets forth the requirements for disclosure of information necessary to effect interstate offset and cross-program offset of overpayments (section 303(g) of the Act);

(i) *Subpart I* sets forth the requirements for disclosure of information to the Secretary of the United States Department of Health and Human Services for the purposes of the child support enforcement program (section 303(h) of the Act);

(j) *Subpart J* sets forth the requirements for disclosure of information to the United States Department of Housing and Urban Development and public housing agencies, with references to protection for applicants and recipients and applicable criminal penalties and civil actions for improper disclosures (section 303(i) of the Act);

(k) *Subpart K* sets forth the requirements for disclosure of information to public agencies which administer the Federally-assisted program of aid to families with dependent children (section 3304(a)(16) of the Federal Unemployment Tax Act);

(l) *Subpart L* sets forth the requirements for disclosure of information to public agencies administering programs under parts A and D of title IV of the Social Security Act and the Food Stamp Act (section 3(b) of the Wagner-Peyser Act).

§ 603.3 Definitions.

For the purposes of this part 603:

(a) *Compensation* and *unemployment compensation* mean cash benefits payable to individuals with respect to their unemployment.

(b) *Department* means the United States Department of Labor and, within the Department, the Employment and Training Administration and the Bureau of Labor Statistics.

(c) *Records* means all information in the files of a State agency, or, in the case of wage information, files accessible by the State agency as required by section 1137(a)(3) of the Social Security Act, 42 U.S.C. 1320b–7(a)(3): Provided, that, for the purposes of subpart B of this part 603, the term "records" also means all information in any other files of the executive branch of the State Government which relate to the administration of the State law.

(d) *Request* means a written request from an authorized official of a Federal, State, or local governmental agency requesting information contained in the records of a State agency.

(e) *Secretary* means the Secretary of Labor, the cabinet officer heading the United States Department of Labor.

(f) *State* means one of the States of the United States of America, the District of Columbia, the Commonwealth of Puerto Rico, and the United States Virgin Islands.

(g) *State agency* means the agency charged with the administration of the State unemployment compensation law which has been approved under section 3304(a) of the Internal Revenue Code of 1986 (26 U.S.C. 3304(a)).

(h) *State law* means the unemployment compensation law of a State, approved under section 3304(a) of the Internal Revenue Code of 1986 (26 U.S.C. 3304(a)).

(i) *Wage information* means information contained in the records of a State agency concerning—

(1) The wages paid to an individual,

(2) The social security account number (or numbers, if more than one) of such individual, and

(3) The name, address, State, and the Federal employer identification number of the employer who paid such wages to such individual.

Subpart B—Confidentiality Requirement of Section 303(a)(1) of the Social Security Act

§ 603.10 Purpose and application.

(a) *Purpose.* The regulations in this subpart B set forth the Department of Labor's interpretation of the "methods of administration" requirements of section 303(a)(1) of the Social Security Act (42 U.S.C. 503(a)(1)), as such requirements concern the confidentiality of information in the records of a State or State agency relating to the administration of the State law.

(b) *Application.* This subpart B applies to each State agency, and to the executive branch of the State Government of each State.

§ 603.11 Interpretation and application.

(a) *Interpretation and application of section 303(a)(1).*—(1) *Statute.* Section 303(a)(1) of the Social Security Act (42 U.S.C. 503(a)(1)) provides that, for the purposes of certification of payment of granted funds to a State under section 302(a) (42 U.S.C. 502(a)), the State law of the State shall include provision for "[s]uch methods of administration * * * as are found by the Secretary of Labor to be reasonably calculated to insure full payment of unemployment compensation when due * * *".

(2)(i) *Interpretation.* Section 303(a)(1) of the Social Security Act is interpreted by the Department as requiring that the "methods of administration" that are reasonably calculated to insure the full payment of unemployment compensation when due must include provision for—

(A) Maintaining the absolute confidentiality of all information of whatever kind or form in the records of a State agency (or in any other files of the executive branch of the State Government) which pertain to the State law or the administration thereof, and barring the disclosure of any such information to all persons, organizations, and entities whatever, except as disclosure may be required or permitted in accordance with any other provision of this section, and

(B) The mandatory disclosure to claimants and potential claimants for compensation, and to employers and employing units, of all information in the records of a State or State agency, but only to the extent that such disclosure will reasonably afford such claimants and employers the opportunity to know, establish, and protect their rights and meet their responsibilities under the State law, and such disclosure as is required in accordance with any other provisions of this section.

(ii) *Application.* Each State law must contain provisions which are interpreted and applied consistently with the interpretations in this paragraph (a)(2), and provide for penalties for any disclosure of information which is inconsistent with any provision of this section by any official or employee of the State or State agency, or contractor, or by any other person, organization, or entity. The requirements of this clause (ii) will be deemed to be met if the State law and administration fully accord with these requirements, and there is no other law of the State that is construed as requiring or authorizing a different or conflicting result.

(b) *Interpretative rule inapplicable.* The rule of confidentiality specified in paragraph (a)(2)(i)(A) of this section shall be deemed to be inapplicable, and section 303(a)(1) of the Social Security Act is interpreted as requiring disclosure of all relevant information in the following circumstances:

(1) *State agency.* (i) *In general.* Disclosure of information to or by officials and employees of the State and State agency, shall be required to the extent that such disclosure is necessary for the proper administration of the State law.

(ii) *Definition.* The phrase "officials and employees of the State and State agency" means and includes only those public officials and public employees of the executive branch of the State government engaged in the administration or enforcement of the State law, and to the extent that officials and employees of political subdivisions of the State are involved in the enforcement of the State law such phrase also includes such local governmental officials and employees.

(2) *Judicial and quasi-judicial proceedings.* Disclosure of information by all officials and employees of the State and State agency shall be required to be made for the record in any judicial or quasi-judicial proceedings under the State law, including first and second stage appeals, to the extent that such disclosure is necessary to a full development of the facts on the issues in any such proceeding and to enable the presider to make an informed decision on the merits. Any information so disclosed, and made a part of the record in any such proceedings, shall not thereafter be subject to the rule of confidentiality as set forth in paragraph (a)(2)(i)(A) of this section.

(3) *Other agencies.* (i) *In general.* Disclosure of information to officials and employees of other State, local, and Federal agencies shall be required to the extent that such disclosure is necessary for the proper administration of the State law. For the purposes of this paragraph (b)(3), disclosures to Federal agencies—

(A) Shall include disclosure of information to the United States Immigration and Naturalization Service relative to the verification of immigration status as required by section 1137(d) of the Social Security Act, and

(B) May include disclosure of information or certifications requested or required by the Internal Revenue Service of the United States Department of the Treasury for any of the purposes of administration or enforcement of Chapter 23 of the Internal Revenue Code of 1986.

(ii) *Definition.* The phrase "other State, local, and Federal agencies" includes other agencies of the State Government or of another State (including the State agency of another State), local governmental agencies of the State, and any Federal agency.

(4) *Claimants and employers.* In addition to the disclosure of information required by paragraph (a)(2)(i)(B) of this section, disclosure of information to claimants and potential claimants for compensation, and to employers and employing units, shall be required to the extent that such disclosure is necessary for the proper administration of the State law, except that, as provided in paragraph (a)(2)(ii) of this section, employers and employing units may not disclose or redisclose the name or any identifying particular about a claimant or potential claimant for compensation for any purpose other than the administration of the State law.

(5) *Department of Labor.* (i) *In general.* The rule of confidentiality specified in paragraph (a)(2)(i)(A) of this section shall have no applicability to the Department concerning any information requested or required under—

(A) Title III, VII, IX, XI, or XII of the Social Security Act, and chapter 23 (FUTA) of the Internal Revenue Code of 1986,

(B) Parts 601 through 608 and parts 615, 616, 640, and 650 of this chapter, and any subsequently added parts of this chapter pertaining to the Federal-State unemployment compensation program,

(C) Parts 31, 32, 93, 96, 97, and 98 of title 29 of the Code of Federal Regulations, and any subsequently added parts of such title 29 which are applicable to the Federal-State unemployment compensation program, or

(D) Section 3(b) of the Wagner-Peyser Act (29 U.S.C. 49b(b)),

for any of the purposes of the Federal-State unemployment compensation program, or with respect to any information the Department deems necessary to assure the correctness or verification of any such information requested or required for any such purpose.

(ii) *Definition.* For the purposes of this paragraph (b)(5) the term "Department" includes the Department (as defined at § 603.3(b)), the Inspector General for the Department, the Comptroller General of the United States, and any contractor for the Department or the Inspector General.

(iii) *Bureau of Labor Statistics.* None of the provisions of this Subpart B shall be applicable to any information obtained solely for the purposes of cooperative agreements entered into with the Bureau of Labor Statistics under the authority of 29 U.S.C. 2 and Secretary's Order No. 39–72.

(c) *Exceptions.* (1) *Optional.* (i) *In general.* (A) As an exception to the rule of confidentiality specified in paragraph (a)(2)(i)(A) of this section, the Department interprets section 303(a)(1) of the Social Security Act as not precluding the disclosure, upon request, of any information in the records of a State or State agency to any public official (other than a public official of a State, local, or Federal agency referred to in paragraph (b)(1) or (b)(3) of this section) for use in the performance of such public official's duties, and for a purpose which does not involve administration or enforcement of the State law, but only if—

(*1*) Disclosure of the specific information requested in any case is authorized by the State law, and

(*2*) The State or State agency determines in any case that such

disclosure would not violate any other law of the State which is consistent with this section, or that such disclosure would not significantly hinder or delay the processing of claims for compensation or significantly hinder other activities of the State agency, or that such disclosure would not impede the efficient administration of the State law.

(B) (*1*) The term "public official" as used in this paragraph (c)(1)(i) means only public officials in the executive branch of Federal, State, or local government, but such term may also be deemed to include the officials of a public agency or service delivery area for the purposes of administration of the Job Training Partnership Act (29 U.S.C. 1501 *et seq.*).

(*2*) The phrase "for use in the performance of such public official's duties" as used in this paragraph (c)(1)(i) means that the disclosed information may be used by the public official solely for official business in connection with a law being administered or enforced by such public official.

(ii) *Contractor of State or State agency.* As a further exception to the rule of confidentiality specified in paragraph (a)(2)(i)(A) of this section, the Department interprets section 303(a)(1) of the Social Security Act as not precluding the disclosure of information in the records of a State or State agency to an individual, organization, company, or an agency for the purpose of the administration or enforcement of the State law, but only if—

(A) Disclosure of the specific information involved is authorized by the State law, and

(B) Solely to the extent that such disclosure is necessary and proper to effectuate a contract by the State or State agency with such individual, organization, company, or an agency that is fundable from funds granted under section 302(a) of the Social Security Act (42 U.S.C. 502(a)).

(2) *Mandatory.* Various statutory provisions in section 303 of the Social Security Act, section 3304(a)(16) of the Internal Revenue Code of 1986, and section 3(b) of the Wagner-Peyser Act, explicitly require the disclosure to certain public officials of specified information in the records of each State agency. All of these statutory disclosure provisions stand as exceptions to the rule of confidentiality as specified in paragraph (a)(2)(i)(A) of this section, and all of them are fully set forth in the following subparts of this part 603. The disclosure of any information in the records of a State agency to any public official, beyond that which is specifically required by any of the following subparts of this part 603, may be made only if it is consistent with the optional provisions of clause (1)(i) of this paragraph (c) and the other terms and conditions of this subpart B.

(d) *Conditions on disclosures.* (1) *In general.* (i) Any disclosure of information referred to in paragraph (b) of this section shall be made without regard to § 603.12 (relating to payment of costs), § 603.13 (relating to safeguards), and § 603.14 (relating to agreements).

(ii) Any disclosure of information referred to in paragraph (f) of this section may similarly be made without regard to §§ 603.12, 603.13, and 603.14, except that, in the case of any disclosure made to anyone who is not a claimant or employer referred to in paragraph (a)(2)(i)(B) or paragraph (b)(4) of this section, or in the case of any disclosure which is not made in the course of the administration of the State law, the State agency may require payment of its costs of making the disclosure.

(2) *Optional disclosures.* (i) Any disclosure of information to a public official which is referred to in paragraph (c)(1)(i) of this section shall be made upon the terms and conditions as set forth therein and in §§ 603.12, 603.13, and 603.14.

(ii) Any disclosure of information to a State or State agency contractor which is referred to in paragraph (c)(1)(ii) of this section shall be made upon the terms and conditions as set forth therein and in §§ 603.13 and 603.14, but may be made without requiring payment of costs as provided in § 603.12.

(3) *Mandatory disclosures.* Any mandatory disclosure of information which is referred to in paragraph (c)(2) of this section shall be made solely upon the terms and conditions as set forth in the applicable subpart of this part 603.

(e) *Subpoenas.* Whenever a subpoena or other compulsory process of a lawful authority is served upon a State agency or the State, or any official or employee thereof, which requires the production of records or appearance for testimony upon any matter concerning administration of the State law, the State or State agency shall file and pursue diligently in the appropriate court a motion to quash the subpoena or other compulsory process. Only if such motion is denied, after a hearing in the court appropriate to the case, may the information be disclosed, and only upon such terms as the court may order, including payment of costs to the State agency and the State.

(f) *Information in the public domain.* The rule of confidentiality in paragraph (a)(2)(i)(A) of this section shall not be deemed to be applicable to information in the public domain, which shall include—

(1) Information as to the organization of the State and the State agency, the officials and employees thereof, and appellate authorities,

(2) Information as to State law (and applicable Federal law) provisions, rules, regulations, and interpretations thereof, including statements of general policy and interpretations of general applicability, and determinations and decisions on coverage of employers, employment, and wages,

(3) Any agreement of whatever kind or nature, including interstate arrangements and reciprocal agreements and any agreement with the Department or the Secretary, relating to the administration of the State law, and

(4) Any other information or data in statistical or other general form (including charts and tables) which pertains to claims filed, benefits paid, contributions or payments in lieu of contributions, or the State unemployment fund, a Federal account, or any other special fund or account, so long as any such disclosure does not in any manner reveal the name or any identifying particular about any past or present claimant for compensation or any past or present employer or employing unit, but a State agency may decline to disclose any such information in the public domain (except to claimants and employers as provided in paragraphs (a)(2)(i)(B) and (b)(4) of this section) if the State agency determines in any case that such disclosure would violate any other law of the State which is consistent with this section, or that such disclosure would significantly hinder or delay the processing of claims for compensation or significantly hinder other activities of the State agency, or that such disclosure would impede the efficient administration of the State law.

§ 603.12 Payment of costs.

(a) *In general.* (1) Granted funds paid to a State under section 302(a) of the Social Security Act may be used to pay all costs of disclosures referred to in paragraphs (a)(2)(i) (B) and (b) of § 603.11, and for any other disclosures referred to in paragraph (c)(1) (ii) or (f) for which the costs are not charged to the recipient in accordance with § 603.11.

(2) Granted funds paid to a State under section 302(a) of the Social Security Act may not be used to pay any of the costs of making a disclosure referred to in paragraph (c)(1)(i) of § 603.11, except that payment of costs may be waived in the case of a single, isolated request for disclosure of information if not more than an incidental amount of staff time and no more than nominal processing costs are involved in making the disclosure.

(3) Except as provided in paragraphs (a) (1) and (2) of this section, granted funds may not be used to pay any of the costs of making any disclosure.

(b) *Calculation of costs.* The costs to a State or State agency of processing and handling a request for disclosure of information shall be calculated in accordance with the cost principles and administrative requirements of 29 CFR part 97 and Office of Management and Budget Circular No. A–87. For the purpose of calculating such costs, any initial start-up costs incurred by the State agency in preparation for making the requested disclosure(s) shall be charged to and paid by the recipient. Postage or other delivery costs incurred in making any disclosure shall be considered part of the costs of making the disclosure. Penalty mail, as defined in 39 U.S.C. 3201(1), may not be used in any circumstances to transmit information being disclosed, except information referred to in paragraph (b), (c)(1)(ii), or (f) of § 603.11.

(c) *Payment of costs.* The costs to a State or State agency of making a disclosure of information, calculated in accordance with paragraph (b) of this section, shall be paid by and collected from the recipient of the information either in advance or by way of reimbursement, but if the recipient is not a public official such costs, except for good reason, must be paid and collected in advance. For the purposes of this paragraph (c), payment in advance means full payment of all costs before or at the time the disclosed information is given in hand or sent to the recipient.

§ 603.13 Safeguards for disclosed information.

(a) *In general.* With respect to disclosures of information referred to in paragraph (c)(1) of § 603.11, a State or State agency shall require the recipient to safeguard the information disclosed against unauthorized access or redisclosure, as provided in paragraphs (b) and (c) of this section, and subject to penalties provided by the State law for unauthorized disclosure of information. Such safeguards shall also be required to protect the confidentiality of all information obtained by a contractor of a State or State agency from any other source in the execution of a contract.

(b) *Recipient.* (1) The information referred to in paragraph (a) of this section shall be permitted to be used by the recipient only to the extent necessary to further the valid purposes of the recipient in discharging his or her lawful responsibilities, and may be redisclosed by the recipient only as provided for in paragraph (c) of this section.

(2) The recipient shall be prohibited from using the information for any purpose not specifically authorized by an agreement that meets the requirements of § 603.14.

(3) The information shall be required to be stored in a place physically secure from access by unauthorized persons.

(4) Information in electronic format, such as magnetic tapes or discs, shall be required to be stored and processed in such a way that unauthorized persons cannot obtain the information by any means.

(5) Precautions shall be required to be taken to insure that only authorized personnel are given access to information stored in computer systems.

(6) The head of each recipient agency or entity shall be required to—

(i) Instruct all personnel having access to the information regarding confidentiality requirements, the requirements according with this subpart B, and the sanctions specified in the State law for unauthorized disclosure of information, and

(ii) Sign an acknowledgment on behalf of the recipient agency or entity attesting that all personnel having access to the information have been instructed in accordance with paragraph (b)(6)(i) of this section and will adhere to the State's or State agency's confidentiality requirements and procedures which are consistent with this subpart B and the agreement required by § 603.14, and agreeing to report any infraction of these rules to the State agency fully and promptly.

(7) The information disclosed or obtained, and any copies thereof made by the recipient agency, entity, or contractor, shall be disposed of after the purpose for which the information is disclosed is served, except for information in the record of any court of record. Disposal means return of the information to the disclosing State or State agency or destruction of the information, as directed by the State or State agency. Disposal includes deletion of personal identifiers by the State or State agency in lieu of destruction. In any case, the information disclosed shall not be archived or sent to a records center, and shall not be retained with personal identifiers for longer than ten years after receipt of the information.

(c) *Redisclosure of information.* Any recipient of information referred to in paragraph (a) of this section shall be authorized to redisclose the information solely as follows:

(1) To the individual or employer who is the subject of the information;

(2) To an attorney or other duly authorized agent representing the individual or employer;

(3) In any civil or criminal proceedings for or on behalf of a recipient agency or entity, if provision for such redisclosure is authorized under the State law and the agreement required by § 603.14; and

(4) In response to a subpoena only after a motion to quash is denied as provided in § 603.11(e).

§ 603.14 Agreements and contracts.

(a) *Requirement.* A State or State agency shall enter into a written agreement with the head of any agency or entity intending to request disclosure(s) of information, and shall enter into a written contract with any contractor to whom any information may be disclosed or who may obtain information from any other source, which is subject to the confidentiality requirements of this subpart B.

(b) *Contents of agreement or contract.* Any agreement or contract required by paragraph (a) of this section shall include, but need not be limited to, the following terms and conditions:

(1) The purposes for which the information will be requested, or furnished, and the specific information to be requested, furnished, or obtained.

(2) Identification of all officials and employees, by position, with authority to request, receive, or obtain information;

(3) The methods and timing of requests for information, including the format to be used, and the period of time needed to furnish or obtain the information;

(4) The basis for establishing the reporting periods for which information will be furnished or obtained;

(5) Provisions for paying the State agency for any costs of furnishing information, as referred to in § 603.12;

(6) Provisions for safeguards of information disclosed or obtained, as referred to in § 603.13; and

(7) Provision for on-site inspections of the agency, entity, or contractor, to assure that the requirements of the State's law and the agreement or contract required by this section are being met.

(c) *Breach of agreement or contract.* (1) *In general.* If an agency, entity, or contractor, or any official, employee, or agent thereof, fails to comply with any provision of an agreement or contract required by this section, including timely payment of the State's or State agency's costs billed to the agency, entity, or contractor, the agreement or contract

shall be suspended, and further disclosure of information (including any disclosure being processed) to such agency, entity, or contractor is prohibited, until the State or State agency is satisfied that corrective action has been taken and there will be no further breach of the agreement or contract. In the absence of prompt and satisfactory corrective action, the agreement or contract shall be cancelled, and the agency, entity, or contractor shall be required to surrender to the State or State agency all information (and copies thereof) obtained under the agreement or contract which has not previously been furnished to the State or State agency, and any other information relevant to the agreement or contract.

(2) *Enforcement.* In addition to the actions required to be taken by paragraph (c)(1) of this section, the State or State agency shall undertake any other action under the agreement or contract, or under any law of the State or of the United States, to enforce the agreement or contract and secure satisfactory corrective action or surrender of information, and shall take other remedial actions to effect adherence to the requirements of this subpart B, including seeking damages, penalties, and restitution for any charges to granted funds and all costs incurred by the State or the State agency in pursuing the breach of the agreement or contract and enforcement as required by this paragraph (c).

§ 603.15 Notification to claimants and employers.

(a) *Claimants.* Every claimant for compensation shall be notified, at the time of filing an initial claim for compensation, and periodically thereafter, through a written statement on or provided with the initial claim form, that information in the records of the State and State agency pertaining to the claimant may be requested and utilized as provided by paragraphs (b) and (c) of § 603.11 and subparts C through L of this part 603.

Provision of a printed notice on or attached to subsequent additional claims will satisfy the requirement for periodic notice thereafter.

(b) *Employers.* Every employer subject to a State's law shall be notified, through a written statement on or provided with the employer's quarterly wage report form or reimbursement billing, that wage information, as defined in § 603.3(i), and other information pertaining to the employer may be requested and utilized as provided by paragraphs (b) and (c) of § 603.11 and subparts C through L of this part 603.

§ 603.16 Effectuating conformity and compliance.

(a) *Conformity.* Pursuant to section 303(b) of the Social Security Act (42 U.S.C. 503(b)) and § 601.5(a) of this chapter, whenever the Secretary of Labor, after reasonable notice and opportunity for hearing to the State agency of a State, finds that the State law fails to conform with any of the requirements of section 303(a)(1) of the Act as provided in this subpart B, the Secretary shall notify the Governor of the State and such State agency that further payments for the administration of the State law will not be made to the State until the Secretary is satisfied that there is no longer any such failure. Until the Secretary is so satisfied, the Department shall withhold certification of further payments to such State. Section 304 of the Act (42 U.S.C. 504) shall be applicable to any finding made pursuant to this paragraph (a).

(b) *Compliance.* Pursuant to section 303(b) of the Social Security Act and § 601.5(a) of this chapter, whenever the Secretary of Labor, after reasonable notice and opportunity for hearing to the State agency of a State, finds that the State or the State agency has failed to comply substantially with any of the requirements of section 303(a)(1) of the Act as provided in this subpart B, the Secretary shall notify the Governor of the State and such State agency that further payments for the administration of the State law will not be made to the State until the Secretary is satisfied that there is no longer any such failure to comply. Until the Secretary is so satisfied, the Department shall withhold certification of further payments to such State. Section 304 of the Act shall be applicable to any finding made pursuant to this paragraph (b).

(c) *Resolving issues.* For the purposes of resolving conformity and compliance issues, the provisions of paragraphs (a)(1), (a)(4), (b), and (d) of § 601.5 of this chapter shall apply.

Subpart C—Income and Eligibility Verification System

§ 603.20 Purpose and application.

(a) *Purpose.* The regulations in this subpart C implement section 303(f) of the Social Security Act, 42 U.S.C. 503(f). Section 303(f) of the Act requires States to have in effect an income and eligibility verification system, which meets the requirements of section 1137 of the Act, 42 U.S.C. 1320b–7, pursuant to which information is requested and exchanged for the purpose of verifying eligibility for, and the amount of, benefits available under several Federally-assisted programs including the Federal-State unemployment compensation program.

(b) *Application.* This subpart C applies only to a State agency.

(Note: Section 1137(a)(1) of the Social Security Act provides that each State shall require claimants for compensation to furnish to the State agency their social security account numbers, as a condition of eligibility for compensation, and further requires that the States shall utilize such account numbers in the administration of the State laws. Section 1137(a)(3) of the Act further provides that employers are required to make quarterly wage reports to a State agency, or an alternative agency, for use in verifying eligibility for, and the amount of, benefits. Section 1137(d)(1) of the Act further provides that each State shall require claimants for compensation, as a condition of eligibility, to declare in writing, under penalty of perjury, whether or not the individual is a citizen or national of the United States, and, if not, that the individual is in a satisfactory immigration status. Administration of this requirement will necessarily involve the disclosure of information (in the records of a State agency) which is incidental to the disclosure of information referred to in subpart C. Other provisions of section 1137(d) of the Act require the States to obtain, and individuals to furnish, documentation relevant to immigration status, and require the States to verify immigration status with the United States Immigration and Naturalization Service. Disclosure for this purpose is governed by § 603.11(b)(3)(i)(A) and is incidental to the disclosure of information required in accordance with subpart C.)

§ 603.21 Definitions.

For the purposes of this subpart C:

(a) *Claim information* means information contained in the records of a State agency concerning:

(1) Whether an individual is receiving, has received, or has applied for unemployment compensation;

(2) The amount of compensation the individual is receiving or is entitled to receive;

(3) The individual's current (or most recent) home address; and

(4) Whether the individual has refused an offer of work and, if so, a description of the job offered including the terms, conditions, and rate of pay.

(5) Any other information contained in the records of the State agency which is needed by the requesting agency to verify eligibility for, and the amount of, benefits.

(b) *Requesting agency* means:

(1) *Aid to Families with Dependent Children.* Any State or local agency charged with the responsibility of administering the provisions of the Aid to Families with Dependent Children program under a State plan approved under part A of title IV of the Social Security Act. (Disclosure to any such agency as a requesting agency under this subpart C is in addition to the disclosure requirements under subparts K and L of this part 603.)

(2) *Medicaid.* Any State or local agency charged with the responsibility of administering the provisions of the Medicaid program under a State plan approved under title XIX of the Social Security Act.

(3) *Food Stamps.* Any State or local agency charged with the responsibility of administering the provisions of the Food Stamp Program under the Food Stamp Act of 1977. (Disclosure to any such agency as a requesting agency under this subpart C is in addition to the disclosure requirements under subparts F and L of this part 603.)

(4) *Other Social Security Act Programs.* Any State or local agency charged with the responsibility of administering a program under a State plan approved under title I, X, XIV, or XVI of the Social Security Act.

(5) *Child Support Enforcement.* Any State or local child support enforcement agency charged with the responsibility of enforcing child support obligations under a plan approved under part D of title IV of the Social Security Act. (Disclosure requirements under this subpart C for purposes of child support enforcement are in addition to disclosure of information requirements under subparts G, I, and L.)

(6) *Health and Human Services.* The Secretary of Health and Human Services in establishing or verifying eligibility or benefit amounts under titles II and XVI of the Social Security Act.

(c) *Wage information.* Has the same meaning as such term as defined in § 603.3(i).

§ 603.22 Notification to claimants and employers.

Every claimant for compensation and employer shall be furnished the notification required by § 603.15.

§ 603.23 Disclosure of information.

(a) *Disclosure of information.* Each State agency shall disclose, upon request, to any requesting agency, as defined in § 603.21(b), and which has entered into an agreement referred to in § 603.27, wage and claim information contained in the records of such State agency.

(b) *Format.* Standardized formats established by the Secretary of Health and Human Services (in consultation with the Secretary of Agriculture) and defined in 42 CFR 435.980 will be adhered to by the State agency.

§ 603.24 Obtaining information from other agencies and crossmatching with wage information.

(a) *Crossmatch with information from requesting agencies.* Each State agency shall obtain such information from the Social Security Administration and any requesting agency as may be needed in verifying eligibility for, and the amount of, compensation payable under the State law.

(b) *Crossmatch of wage and benefit information.* To the extent that such information shall be determined likely to be productive in identifying ineligibility for benefits and preventing incorrect payments, the State agency shall crossmatch quarterly wage information with unemployment compensation payment information.

(c) *Amplification on compliance requirements.* To the extent necessary, the Department, pursuant to section 1137(a)(2) of the Social Security Act, will amplify on the requirements for State compliance with this section in instructions issued and published for comment in the **Federal Register.**

(Approved by the Office of Management and Budget under control number 1205–0238)

§ 603.25 Payment of costs.

As a condition for receiving information referred to in § 603.23, any Federal, State, or local agency requesting such information shall be required to reimburse the State agency for all costs incurred in making any such disclosure, including any initial start-up costs. Costs required by this section to be reimbursed shall be required to be calculated and paid in accordance with paragraphs (b) and (c) of § 603.12.

§ 603.26 Safeguards for disclosed information.

Each State agency shall establish safeguards, as required by section 1137(a)(5) of the Social Security Act and set forth in § 603.13, to insure that information disclosed as required by § 603.23 is used only for the purpose for which the information was disclosed.

§ 603.27 Agreements.

(a) *Agreement required.* Prior to disclosing information as required by § 603.23, each State agency shall enter into a written agreement with any requesting agency (as defined in § 603.21(b)) intending to request any such information, and any such agreement shall accord with the requirements of § 603.14(b) with respect to the contents of such agreement. The requirements of this paragraph (a) also shall apply to any requesting agency in another State which intends to request information referred to in § 603.24 and required to be disclosed by a State agency.

(b) *Breach.* The provisions of § 603.14(c) shall be applicable in the case of any breach of an agreement referred to in paragraph (a) of this section.

§ 603.28 Effectuating compliance.

Whenever the Department has reason to believe that a State or State agency has failed to comply substantially with any of the requirements of this subpart C, the provisions of paragraphs (b) and (c) of § 603.16 will apply for the purposes of effecting compliance with the requirements of section 303(f) of the Social Security Act as provided in this subpart C, except that any action under this section shall be based upon section 303(f) of the Act, § 601.5(a) of this chapter, and this subpart C.

Subpart D—Disclosure of Information to Agencies Charged With the Administration of Public Works or Assistance Through Public Employment

§ 603.30 Purpose and application.

(a) *Purpose.* The regulations in this subpart D implement section 303(a)(7) of the Social Security Act, which requires a State law to provide that certain information contained in a State agency's records shall be made available to any agency of the United States charged with the administration of public works or assistance through public employment.

(b) *Application.* This subpart D applies only to a State agency.

§ 603.31 Disclosure of information.

Each State agency shall make available, upon request, to any agency of the United States charged with the administration of public works or assistance through public employment, with respect to each recipient of unemployment compensation, information from its records concerning such recipient's—

(a) Name,

(b) Address,

(c) Ordinary occupation,

(d) Employment status, and

(e) A statement of such recipient's rights to further compensation under the State law.

§ 603.32 Payment of costs.

As a condition for receiving information referred to in § 603.31, any agency requesting such information shall be required to reimburse the State agency for all costs incurred in making any such disclosure, including any initial start-up costs. Costs required by this

section to be reimbursed shall be required to be calculated and paid in accordance with paragraphs (b) and (c) of § 603.12.

§ 603.33 Safeguards for disclosed information.

Each State agency shall establish safeguards, as set forth in § 603.13, to insure that information disclosed as required by § 603.33 is used only for the purpose for which the information was disclosed.

§ 603.34 Agreements.

(a) *Agreement required.* Prior to disclosing information to an agency of the United States, as required by § 603.31, each State agency shall enter into a written agreement with that Federal agency, and any such agreement shall accord with the requirements of § 603.14(b) with respect to the contents of such agreement.

(b) *Breach.* The provisions of § 603.14(c) shall be applicable in the case of any breach of an agreement referred to in paragraph (a) of this section.

§ 603.35 Effectuating conformity and compliance.

Whenever the Department has reason to believe that an issue of conformity or compliance has arisen under this subpart D with respect to a State or a State agency, the provisions of paragraphs (a), (b), and (c) of § 603.16 will apply for the purposes of effecting conformity and compliance with the requirements of section 303(a)(7) of the Social Security Act as provided in this subpart D.

Subpart E—Disclosure of Information to the Railroad Retirement Board

§ 603.40 Purpose and application.

(a) *Purpose.* The regulations in this subpart E implement section 303(c)(1) of the Social Security Act, which requires that a State agency shall provide certain information contained in the State agency's records to the Railroad Retirement Board.

(b) *Application.* This subpart E applies only to a State agency.

§ 603.41 Disclosure of information.

Each State agency shall, upon request, make available information from, and furnish copies of, its records to the Railroad Retirement Board as the Board deems necessary for its purposes.

§ 603.42 Payment of costs.

As a condition for receiving information referred to in § 603.41, the Railroad Retirement Board shall be required to reimburse the State agency for all costs incurred in making any such disclosure, including any initial start-up costs. Costs required by this section to be reimbursed shall be required to be calculated and paid in accordance with paragraphs (b) and (c) of § 603.12.

§ 603.43 Safeguards for disclosed information.

Each State agency shall establish safeguards, as set forth in § 603.13, to insure that information disclosed as required by § 603.41 is used only for the purpose for which the information was disclosed.

§ 603.44 Agreements.

(a) *Agreement required.* Prior to disclosing information as required by § 603.41, each State agency shall enter into a written agreement with the Railroad Retirement Board, and any such agreement shall accord with the requirements of § 603.14(b) with respect to the contents of such agreement.

(b) *Breach.* The provisions of § 603.14(c) shall be applicable in the case of any breach of an agreement referred to in paragraph (a) of this section.

§ 603.45 Effectuating compliance.

Whenever the Department has reason to believe that a State or State agency has failed to comply substantially with any of the requirements of this subpart E, the provisions of paragraphs (b) and (c) of § 603.16 will apply for the purposes of effecting compliance with the requirements of section 303(c)(1) of the Social Security Act as provided in this subpart E, except that any action under this section shall be based upon section 303(c) of the Act, § 601.5(a) of this chapter, and this subpart E.

Subpart F—Disclosure of Information to the Department of Agriculture and State Food Stamp Agencies

§ 603.50 Purpose and application.

(a) *Purpose.* (1) *Disclosure.* The regulations in this subpart F implement section 303(d)(1) of the Social Security Act, which requires that a State agency disclose certain information contained in the State agency's records to officers and employees of the Department of Agriculture and to officers or employees of any State food stamp agency for purposes of determining an individual's eligibility for benefits, or the amount of benefits, under the food stamp program established under the Food Stamp Act of 1977 (7 U.S.C. 2011 *et seq.*).

(2) *Notification.* The regulations in this subpart F also implement section 303(d)(2)(B) of the Social Security Act, which permits the State agency to notify the State food stamp agency of any individual who discloses on a new unemployment compensation claim that he or she owes an uncollected overissuance (as defined in 7 U.S.C. 2022(c)(1)) of food stamp coupons.

(Note: The regulations in this subpart do not implement clauses (i), (iii), and (iv) of section 303(d)(2)(B) of the Social Security Act which relate, respectively, to the disclosure by an individual to the State agency of such uncollected overissuance, to the deduction and withholding from unemployment compensation of money to satisfy such an obligation, and to the payment of the amount deducted and withheld to the appropriate State food stamp agency, except as the latter involves the disclosure of information.)

(3) *Cross-reference.* Disclosure of information required by this subpart F is in addition to the disclosure requirements of subparts C and L.

(b) *Application.* This subpart F applies only to a State agency.

§ 603.51 Definition.

For purposes of this subpart F, "State food stamp agency" means any State or local agency described in 7 U.S.C. 2012(n)(1) which administers the food stamp program established under the Food Stamp Act of 1977.

§ 603.52 Disclosure of information.

(a) *Disclosure.* Each State agency shall disclose, upon request, to officers and employees of the Department of Agriculture and to officers or employees of any State food stamp agency any of the following information contained in the records of the State agency—

(1) Wage information (as defined in § 603.(i)),

(2) Whether an individual is receiving, has received, or has made application for, unemployment compensation, and the amount of any such compensation being received (or to be received) by such individual,

(3) The current (or most recent) home address of such individual,

(4) Whether an individual has refused an offer of employment and, if so, a description of the employment so offered and the terms, conditions, and rate of pay therefor, and shall disclose any information required to be disclosed in connection with the transmittal of withheld compensation in accordance with section 303(d)(2)(B)(iv) of the Social Security Act.

(b) *Notification.* A State agency which requires each new applicant for compensation to disclose whether the applicant owes an uncollected overissuance of food stamp coupons (as permitted by section 303(d)(2)(B)(i) of the Social Security Act) may notify the State food stamp agency (to which the uncollected overissuance is owed) that any individual who discloses such a debt has been determined to be eligible for unemployment compensation (if such determination has been made by the State agency).

§ 603.53 Payment of costs.

As a condition for receiving information referred to in § 603.52, any Federal, State, or local agency requesting such information shall be required to reimburse the State agency for all costs incurred in making any such disclosure, including any initial start-up costs. Costs required by this section to be reimbursed shall be required to be calculated and paid in accordance with paragraphs (b) and (c) of § 603.12.

§ 603.54 Safeguards for disclosed information.

Each State agency shall establish safeguards, as set forth in § 603.13, to insure that information disclosed as required by § 603.52 is used only for the purpose for which the information was disclosed.

§ 603.55 Agreements.

(a) *Agreement required.* Prior to disclosing information pursuant to § 603.52, the State agency shall enter into a written agreement with the Department of Agriculture and any State food stamp agency intending to request any such information, and any such agreement shall accord with the requirements of § 603.14(b) with respect to the contents of such agreement.

(b) *Breach.* The provisions of § 603.14(c) shall be applicable in the case of any breach of an agreement referred to in paragraph (a) of this section.

§ 603.56 Effectuating compliance.

Whenever the Department has reason to believe that a State or State agency has failed to comply substantially with any of the requirements of this subpart F, the provisions of paragraphs (b) and (c) of § 603.16 will apply for the purposes of effecting compliance with the requirements of section 303(d) (1) and (2) of the Social Security Act as provided in this subpart F. Any action under this section to effect compliance with the requirements of section 303(d) (1) and (2) shall be based upon section 303(d)(3) of the Act, § 601.5(a) of this chapter, and this subpart F.

Subpart G—Disclosure of Information to State or Local Child Support Enforcement Agencies

§ 603.60 Purpose and application.

(a) *Purpose.* (1) *Disclosure.* The regulations in this subpart G implement section 303(e)(1) of the Social Security Act, which requires that a State agency disclose certain information contained in the State agency's records directly to officers or employees of any State or local child support enforcement agency for purposes of establishing and collecting child support obligations from, and locating, individuals owing such obligations.

(2) *Notification.* The regulations also implement section 303(e)(2)(A) of the Social Security Act which requires that the State agency notify the State or local child support enforcement agency of any individual who discloses on a new unemployment compensation claim that he or she owes child support obligations, that the individual has been determined to be eligible for unemployment compensation if such determination has been made by the State agency.

(Note: The regulations in this subpart do not implement clauses (i), (iii), and (iv) of section 303(e)(2)(A) of the Social Security Act which relate, respectively, to the requirement that an individual disclose that he or she owes child support obligations, to the deduction and withholding from unemployment compensation of money to satisfy such obligations, and to the payment of the amount deducted and withheld to the appropriate State or local child support enforcement agency, except as the latter involves disclosure of information.)

(3) *Cross-reference.* Disclosure of information required by this subpart G is in addition to the disclosure requirements of subparts C, I, and L.

(b) *Application.* This subpart G applies only to a State agency.

§ 603.61 Definitions.

For purposes of this subpart G—

(a) "Child support obligations" only includes child support obligations which are being enforced pursuant to a plan described in section 454 of the Social Security Act which has been approved by the Secretary of Health and Human Services under part D of title IV of the Act, and

(b) "State or local child support enforcement agency" means any agency of a State or political subdivision thereof operating pursuant to a plan described in section 454 of the Social Security Act which has been approved by the Secretary of Health and Human Services under part D of title IV of the Act.

§ 603.62 Disclosure of information.

(a) *Disclosure.* Each State agency shall disclose, upon request, directly to officers or employees of any State or local child support enforcement agency any wage information (as defined in § 603.3(i)) contained in the records of the State agency, and shall disclose any information required to be disclosed in connection with the transmittal of withheld compensation in accordance with section 303(e)(2)(A)(iv) of the Social Security Act.

(b) *Notification.* The State agency shall notify the State or local child support enforcement agency, with respect to any individual who discloses on a new unemployment compensation claim that he or she owes child support obligations, that the individual has been determined to be eligible for unemployment compensation (if such determination has been made by the State agency).

§ 603.63 Payment of costs.

As a condition for receiving information referred to in § 603.62, any agency requesting such information shall be required to reimburse the State agency for all costs incurred in making any such disclosure, including any initial start-up costs. Costs required by this section to be reimbursed shall be required to be calculated and paid in accordance with paragraphs (b) and (c) of § 603.12.

§ 603.64 Safeguards for disclosed information.

Each State agency shall establish safeguards, as set forth in § 603.13, to insure that information disclosed as required by § 603.62 is used only for the purpose for which the information was disclosed.

§ 603.65 Agreements.

(a) *Agreement required.* Prior to disclosing information as required by § 603.62, each State agency shall enter into a written agreement with any State or local child support enforcement agency intending to request any such information, and any such agreement shall accord with the requirements of § 603.14(b) with respect to the contents of such agreement.

(b) *Breach.* The provisions of § 603.14(c) shall be applicable in the case of any breach of an agreement referred to in paragraph (a) of this section.

§ 603.66 Effectuating compliance.

Whenever the Department has reason to believe that a State or State agency has failed to comply substantially with any of the requirements of this subpart G, the provisions of paragraphs (b) and (c) of § 603.16 will apply for the purposes of effecting compliance with the requirements of section 303(e) (1) and (2) of the Social Security Act as provided in this section to effect compliance with the requirements of section 303(e) (1) and (2) shall be based upon section

303(e)(3) of the Act, § 601.5(a) of this chapter, and this subpart G.

Subpart H—Disclosure of Information Related to Recovery of Overpayments

§ 603.70 Purpose and application.

(a) *Purpose.* (1) *In general.* The regulations in this subpart H govern the disclosure of information required in carrying out the interstate offset and cross-program offset agreements which are authorized by section 303(g) of the Social Security Act. Under section 303(g) of the Act, States are permitted to withhold unemployment compensation payable under State laws to recover overpayments of benefits made to individuals by other States. Also, an overpayment of State unemployment compensation may be recovered from a payment made under a Federal unemployment benefit or allowance program if the State has entered into an agreement with the Secretary of Labor under section 303(g)(2) of the Act, pursuant to which it may recover overpayments of State benefits from payments made under a Federal unemployment benefit or allowance program if it reciprocally recovers overpayments made under Federal unemployment benefit or allowance programs from State payments. Specifically, this section permits interstate same program offsets (i.e., State from State and Federal from Federal) and intrastate and interstate cross-program offsets (i.e., State from Federal and Federal from State). Such interstate recovery of overpayments necessarily requires the disclosure of information contained in State agency records to State agencies in other States. This subpart H does not implement the requirements for such offsets beyond those relating to the disclosure of information.

(2) *Definition.* For purposes of this section the term "Federal unemployment benefit or allowance program" means any program established by Federal statute and administered by the Department, which provides for the payment from Federal funds of compensation to individuals. Existing programs provide for the payment of unemployment compensation to Federal employees (part 609 of this chapter), unemployment compensation to ex-servicemembers (part 614 of this chapter), trade readjustment allowances under the trade adjustment assistance program (part 617 of this chapter), disaster unemployment assistance (part 625 of this chapter), and weekly layoff benefits under the redwood employee protection program (29 CFR part 92).

(b) *Application.* This subpart H applies only to a State agency.

§ 603.71 Disclosure of information.

Each State agency may disclose to a State agency of another State only that unemployment compensation information which is necessary to effectuate the recovery of overpayments from individuals as authorized by the State law in accordance with section 303(g) of the Social Security Act, and to effectuate the purposes of interstate same program and cross-program offset shall disclose such information from its records as is necessary to accomplish these purposes. Similarly, a State agency effecting an offset may disclose to the other State agency only such information as is necessary for the purposes of the interstate agreement.

§ 603.72 Payment of costs.

Payment of costs is neither appropriate nor required with respect to disclosures of information referred to in § 603.71. Penalty mail, as defined in 39 U.S.C. 3201(1), may be used in making such disclosures.

§ 603.73 Safeguards for disclosed information.

A State agency receiving information referred to in § 603.71 may use it only for purposes of recovering the overpayment for which the information was disclosed. With respect to any information received under the interstate agreement, the receiving State agency shall be subject to the confidentiality requirements of § 603.13 of subpart B of this part 603.

§ 603.74 Agreements.

Section 303(g)(2) of the Social Security Act requires an agreement between each State and the Secretary of Labor to authorize cross-program offsets (either intrastate or interstate). A properly executed agreement must be in effect before any cross-program offset may occur or information may be disclosed. No agreement with the Secretary is required for interstate, same program offsets. For interstate, same program offsets, reciprocal arrangements between and among the States are appropriate. An agreement such as that required by § 603.14 is neither appropriate nor required under this subpart H.

§ 603.75 Effectuating compliance.

Whenever the Department has reason to believe that a State or State agency (the disclosing State agency or the receiving State agency) has failed to comply substantially with any of the requirements of this subpart H, the provisions of paragraphs (b) and (c) of § 603.16 will apply for the purposes of effecting compliance with the requirements of section 303(g) (1) and (2) of the Social Security Act and the agreement between the State and the Secretary of Labor, as provided in this subpart H, except that any action under this section shall be based upon section 303(g) of the Act, § 601.5(a) of this chapter, and this subpart H.

Subpart I—Actions Required by State Agencies To Enable the Secretary of Health and Human Services To Obtain Prompt Access to Information

§ 603.80 Purpose and application.

(a) *Purpose.* (1) *In general.* The regulations in this subpart I implement section 303(h) of the Social Security Act, which requires that a State agency take action necessary to enable the Secretary of Health and Human Services (HHS), in accordance with the "Memorandum of Understanding" (appendix A of this part) between the Secretaries of Labor and HHS, to obtain prompt access to certain information contained in the State agency's records for purposes of carrying out the child support enforcement program under title IV, section 453 of the Act (42 U.S.C. 653). The Office of Child Support Enforcement (OCSE) in the Department of Health and Human Services performs this function on behalf of the Secretary of HHS.

(2) *Cross reference.* Disclosure of information required by this subpart I is in addition to the disclosure requirements of subparts C, G, and L.

(b) *Application.* This subpart I applies only to a State agency.

§ 603.81 Disclosure of information.

Each State agency shall disclose, upon request, to officers or employees of OCSE any of the following information contained in the records of such State agency—

(a) Wage information (as defined in § 603.3(i)),

(b) Claim information (as defined in § 603.21(a)),

and

(c) any other information that may be useful in locating an absent parent or such parent's employer.

§ 603.82 Payment of costs.

As a condition for receiving information referred to in § 603.81, the OCSE shall be required to reimburse the State agency for all costs incurred in making any such disclosure, including any initial start-up costs. Costs required by this section to be reimbursed shall be required to be calculated and paid in accordance with paragraphs (b) and (c) of § 603.12.

§ 603.83 Safeguards for disclosed information.

Each State agency shall establish safeguards, as set forth in § 603.13, to insure that information disclosed as required by § 603.81 is used only for the purpose for which the information was disclosed.

§ 603.84 Agreements.

(a) *Agreement required.* As specified in the "Memorandum of Understanding" between the Secretaries of Labor and Health and Human Services (appendix A of this part), the Secretaries have agreed that the OCSE will enter into a written agreement with a State agency to act as OCSE's agent in establishing an arrangement with a contractor coordinating the information exchange for the purpose of facilitating the transmission of requests and responses to requests for information as provided in § 603.81. Prior to disclosing any information as required by § 603.81, each State agency shall enter into a written agreement with OCSE and any such agreement shall accord with the requirements of § 603.14(b) with respect to the contents of such agreement.

(b) *Breach.* The provisions of § 603.14(c) shall be applicable in the case of any breach of an agreement referred to in paragraph (a) of this section.

§ 603.85 Effectuating compliance.

Whenever the Department has reason to believe that a State or State agency has failed to comply substantially with any of the requirements of this subpart I, the provisions of paragraphs (b) and (c) of § 603.16 will apply for the purposes of effecting compliance with the requirements of section 303(h) of the Social Security Act as provided in this subpart I, except that any action under this section shall be based upon section 303(h)(2) of the Act, § 601.5(a) of this chapter, and this subpart I.

Subpart J—Disclosure of Information to the Department of Housing and Urban Development and Public Housing Agencies

§ 603.90 Purpose and application.

(a) *Purpose.* The regulations in this subpart J implement section 303(i) of the Social Security Act, which requires that a State agency disclose certain information contained in the State agency's records to officers and employees of the Department of Housing and Urban Development and to representatives of a public housing agency for the purposes of determining an individual's eligibility for, or amount of, benefits under a housing assistance program of the Department of Housing and Urban Development.

(Note: Section 904(c)(2) of the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Pub. L. 100-628) provides certain protections for applicants for, and recipients of, benefits under the programs of the Department of Housing and Urban Development in connection with the use of information obtained pursuant to section 303(i) of the Social Security Act. In addition, section 904(c)(3) of the Stewart B. McKinney Act sets forth criminal penalties for certain misconduct in connection with information within the purview of section 303(i) of the Social Security Act, as well as certain remedies for applicants and recipients who were subjected to misconduct with respect to such information. The Department of Labor is not, however, responsible for administering sections 904(c)(2) and 904(c)(3) of the Stewart B. McKinney Act, 42 U.S.C. 3544 (c)(2) and (c)(3).)

(b) *Application.* This subpart J applies only to a State agency.

§ 603.91 Definitions.

For purposes of this subpart J—

(a) "Consent form" means the consent form referred to in section 904(b) of the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Pub. L. 100-628), which is signed by an individual to signify consent to the release of information contained in the State agency's records and specified in § 603.92 with respect to such individual.

(b) "Public housing agency", as described in section 3(b)(6) of the United States Housing Act of 1937 (42 U.S.C. 1437a(b)(6)), means "* * * any State, county, municipality, or other governmental entity or public body (or agency or instrumentality thereof) which is authorized to engage in or assist in the development or operation of low-income housing."

§ 603.92 Disclosure of information.

Each State agency shall disclose, upon request, to officers or employees of the Department of Housing and Urban Development and to representatives of a public housing agency, concerning any individual applying for or participating in any housing assistance program administered by the Department of Housing and Urban Development who has signed a consent form, any of the following information contained in the records of such State agency—

(a) Wage information (as defined in § 603.3(i)), and

(b) Whether the individual is receiving, has received, or has made application for, unemployment compensation, and the amount of any such compensation being received (or to be received) by such individual.

§ 603.93 Frequency and format of disclosure.

The frequency and format of the information disclosed shall be determined by agreement in accordance with paragraph (b)(3) of § 603.14.

§ 603.94 Payment of costs.

As a condition for receiving information referred to in § 603.92, the Department of Housing and Urban Development or any public housing agency receiving such information shall be required to reimburse the State agency for all costs incurred in making any such disclosure, including any initial start-up costs. Costs required by this section to be reimbursed shall be required to be calculated and paid in accordance with paragraphs (b) and (c) of § 603.12.

§ 603.95 Safeguards for disclosed information.

Each State agency shall establish safeguards, as set forth in § 603.13, to insure that information disclosed as required by § 603.92 is used only for the purpose for which the information was disclosed.

§ 603.96 Agreements.

(a) *Agreement required.* Prior to disclosing information as required by § 603.92, each State agency shall enter into a written agreement with the Department of Housing and Urban Development or a public housing agency intending to request any such information, and any such agreement shall accord with the requirements of § 603.14(b) with respect to the contents of such agreement.

(b) *Breach.* The provisions of § 603.14(c) shall be applicable in the case of any breach of an agreement referred to in paragraph (a) of this section.

§ 603.97 Effectuating compliance.

Whenever the Department has reason to believe that a State or State agency has failed to comply substantially with any of the requirements of this subpart J, the provisions of paragraphs (b) and (c) of § 603.16 will apply for the purposes of effecting compliance with the requirements of section 303(i)(1) and (2) of the Social Security Act as provided in this subpart J, except that any action under this section shall be based upon section 303(i)(3) of the Act, § 601.5(a) of this chapter, and this subpart J.

Subpart K—Disclosure of Information to Public Agencies Under the Federal Unemployment Tax Act

§ 603.100 Purpose and application.

(a) *Purpose.* (1) *In general.* The regulations in this subpart K implement section 3304(a)(16) of the Federal Unemployment Tax Act (26 U.S.C. 3304(a)(16)), which requires a State agency to disclose certain wage information contained in the State agency's records to a State or political subdivision thereof administering a State plan for aid and services to needy families with children approved under part A of title IV of the Social Security Act, for purposes of determining an individual's eligibility for aid or services, or the amount of such aid or services.

(2) *Cross-reference.* Disclosure of information required by this subpart K is in addition to the disclosure requirements of subparts C and L.

(b) *Application.* This subpart K applies only to a State agency.

§ 603.101 Disclosure of information.

Each State agency shall disclose, upon request, to any public agency referred to in § 603.100 any wage information (as determined necessary by the Secretary of Health and Human Services in regulations) contained in the records of the State agency.

§ 603.102 Payment of costs.

As a condition for receiving information referred to in § 603.101, any public agency requesting such information shall be required to reimburse the State agency for all costs incurred in making any such disclosure, including any initial start-up costs. Costs required by this section to be reimbursed shall be required to be calculated and paid in accordance with paragraphs (b) and (c) of § 603.12.

§ 603.103 Safeguards for disclosed information.

Each State agency shall establish safeguards as are determined necessary by the Secretary of Health and Human Services in regulations at 45 CFR 205.50.

§ 603.104 Agreements.

(a) *Agreement required.* Prior to disclosing information as required by § 603.101, each State agency shall enter into a written agreement with any public agency referred to in § 603.100 which intends to request any such information, and any such agreement shall accord with the requirements of § 603.14(b) with respect to the contents of such agreement. For purposes of this subpart K, the provision of safeguards as required by paragraph (b)(6) of § 603.14 refers to safeguards established under 45 CFR 205.50.

(b) *Breach.* The provisions of § 603.14(c) shall be applicable in the case of any breach of an agreement referred to in paragraph (a) of this section.

§ 603.105 Effectuating conformity and compliance.

Pursuant to section 3304(c) of the Federal Unemployment Tax Act and § 601.5(a) of this chapter, whenever the Secretary of Labor, after reasonable notice and opportunity for hearing to the State agency of a State, finds that a State law fails to contain each of the provisions required by section 3304(a)(16) of the Federal Unemployment Tax Act to be included therein, or has failed to comply substantially with any of the provisions of such section or this subpart K, the Secretary of Labor shall make no certification under section 3304(c) of the Act to the Secretary of the Treasury with respect to such State as of October 31 of the 12-month period with respect to which such finding is made. Section 3310 of the Federal Unemployment Tax Act shall be applicable to any finding made under this paragraph (a).

Subpart L—Disclosure of Information to Public Agencies under the Wagner-Peyser Act

§ 603.110 Purpose and application.

(a) *Purpose.* (1) *In general.* The regulations in this subpart L implement section 3(b) of the Wagner-Peyser Act, to the extent that such section requires a State agency to furnish certain information contained in the State agency's records to—

(i) An agency of the State or political subdivision thereof administering or supervising the administration of a State plan approved under part A of title IV of the Social Security Act,

(ii) A State or local agency charged with any duty or responsibility under any program or activity authorized or required under part D of title IV of such Act, and

(iii) Any State or local agency (as defined in 7 U.S.C. 2012(n)(1)) which is charged with the administration of the food stamp program in the State under the Food Stamp Act of 1977 (7 U.S.C. 2011 *et seq.*).

(2) *Cross references.* (i) *Part A of title IV.* The disclosure of information required by clause (1)(i) of this paragraph (a) is in addition to the disclosure requirements of subparts C and K.

(ii) *Part D of title IV.* The disclosure of information required by clause (1)(ii) of this paragraph (a) is in addition to the disclosure requirements of subparts C, G, and I.

(iii) *Food stamp program.* The disclosure of information required by clause (1)(iii) of this paragraph (a) is in addition to the disclosure requirements of subparts C and F.

(b) *Application.* This subpart L applies only to a State agency.

§ 603.111 Disclosure of information.

Each State agency shall disclose, upon request, to any public agency referred to in § 603.110, any of the following information contained in the records of the State agency—

(a) Whether an individual is receiving, has received, or has made application for, unemployment compensation, and the amount of any such compensation being received by such individual,

(b) The current (or most recent) home address of such individual, and

(c) Whether an individual has refused an offer of employment and, if so, a description of the employment so offered and the terms, conditions, and rate of pay therefor.

§ 603.112 Payment of costs.

As a condition for receiving information referred to in § 603.111, any public agency requesting such information shall be required to reimburse the State agency for all costs incurred in making any such disclosure, including any initial start-up costs. Costs required by this section to be reimbursed shall be required to be calculated and paid in accordance with paragraphs (b) and (c) of § 603.12.

§ 603.113 Safeguards for disclosed information.

Each State agency shall establish safeguards, as set forth in § 603.13, to insure that information disclosed as required by § 603.111 is used only for the purpose for which the information was disclosed.

§ 603.114 Agreements.

(a) *Agreement required.* Prior to disclosing information as required by § 603.111, each State agency shall enter into a written agreement with any public agency referred to in § 603.110 which intends to request any such information, and any such agreement shall accord with the requirements of § 603.14(b) with respect to the contents of such agreement.

(b) *Breach.* The provisions of § 603.14(c) shall be applicable in the case of any breach of an agreement referred to in paragraph (a) of this section.

§ 603.115 Effectuating compliance.

Whenever the Department has reason to believe that a State or State agency has failed to comply substantially with any of the requirements of section 3(b) of the Wagner-Peyser Act, as provided in this Subpart L for the purposes of the Federal-State unemployment compensation program, the provisions of paragraphs (b) and (c) of § 603.16 will apply for the purposes of effecting compliance with the requirements of section 3(b) of the Wagner-Peyser Act as provided in this subpart L, except that any action under this paragraph (b) shall be based upon section 303(b) of the Social Security Act, § 601.5(a) of this chapter, and this subpart L. Section 304 of the Social Security Act shall be applicable to any finding made under this paragraph (b).

Appendix A to Part 603—Memorandum of Understanding Between The Department of Labor and the Department of Health and Human Services

I. Purpose

To record the agreement and understanding between the Secretary of Labor and the Secretary of Health and Human Services to implement section 453(e)(3) of the Social Security Act (the Act), and assist with implementing the requirements of section 303(h) of such Act (as amended by section 124 of the Family Support Act of 1988, Pub. L. 100-485).

II. Background

A. Section 453 of the Social Security Act established the Federal Parent Locator Service (FPLS), within the Office of Child Support Enforcement (OCSE), to obtain and transmit information to authorized persons (as defined in the Act) concerning the whereabouts of any absent parent, to be used to locate such parent for the purpose of enforcing support obligations.

B. Section 124(a) of the Family Support Act of 1988 amended section 453(e) by adding a new paragraph (3), which requires the Secretary of Labor and the Secretary of Health and Human Services to enter into an agreement to provide the FPLS with prompt access to wage and unemployment compensation claims information maintained for or by the Department of Labor (DOL) or the State Employment Security Agencies (SESAs).

C. Section 124(b) of the Family Support Act of 1988 amended section 303 of the Social Security Act by adding a new subsection (h)(1), which reads as follows:

" . . . The State agency charged with the administration of the State law shall take such actions (in such manner as may be provided in the agreement between the Secretary of Health and Human Services and the Secretary of Labor under section 453(e)(3)) as may be necessary to enable the Secretary of Health and Human Services to obtain prompt access to any wage and unemployment compensation claims information (including any information that might be useful in locating an absent parent or such parent's employer) for use by the Secretary of Health and Human Services, for purposes of section 453, in carrying out the child support enforcement program under title IV."

D. The amendments made by section 124 become effective on the first day of the first calendar quarter which begins 1 year or more after the date of enactment of the Family Support Act of 1988, except that the Secretaries of Labor and Health and Human Services are directed to enter into the agreement required by section 453(e)(3) not later than 90 days after date of enactment.

E. This Memorandum of Understanding constitutes the formal agreement required by section 453(e)(3), and sets forth the responsibilities of both Departments and the SESAs under section 303(h)(1).

III. Understandings

A. The Secretaries agree that, pursuant to section 303(h)(1), the only information that may be requested under this agreement and the agreement with any SESA is wage and unemployment compensation claims information in the records of the SESA and any other information in the records of the SESA that might be useful in locating an absent parent or such parent's employer.

B. The Secretaries agree that the OCSE, with the assistance of DOL, will enter into specific written agreements with each SESA. Such agreements will include provisions:

(1) The purpose for which the information is requested;

(2) The specific information requested;

(3) How the information will be requested, including the request and response formats;

(4) The maximum number of records to be included in each request;

(5) Request and response schedules;

(6) Provisions for reprocessing requests;

(7) Cost of responding to requests;

(8) Reimbursement procedures;

(9) Provisions for safeguarding and protecting confidentiality of requests and responses, and limiting use or redisclosure of information to purposes authorized by law; and

(10) Provisions for notification by OCSE for appropriate action by DOL of any SESA's failure to provide prompt access to wage and unemployment compensation claims information.

C. The Secretaries agree that the OCSE will protect the confidentiality of the information obtained under the terms of this agreement against unauthorized access or redisclosure while under the control of OCSE. The OCSE will require each State to submit an annual certification that the information obtained pursuant to this agreement will only be used for child support enforcement purposes and that such information will be safeguarded.

D. The Secretaries agree that the OCSE will enter into a written agreement with a SESA to act as OCSE's agent in establishing an arrangement with a contractor coordinating the data exchange between SESAs for the purpose of facilitating the exchange of data between the FPLS and the SESAs.

E. The Secretaries agree that the OCSE will make a reasonable effort to ensure that requests for information pertain to absent parents who no longer work or reside in the State requesting locate information through FPLS.

F. The Secretaries agree that OCSE will notify DOL in writing of any SESAs failure to provide prompt access to wage and unemployment compensation claims information as required under this agreement and the agreement between the SESA and OCSE, and DOL will take appropriate action pursuant to section 303(h)(2) of the Act.

G. The Secretaries agree that the Department of Health and Human Services (DHHS) will implement procedures that provide for the timely payment by the DHHS to each SESA of all costs incurred in providing wage and unemployment compensation claims information in accordance with this agreement and the agreement between the OCSE and the SESA.

H. The Secretaries agree that OCSE will reimburse the appropriate SESA for any costs incurred by the SESA in implementing an agreement with OCSE.

This agreement was effective as of January 11, 1989.

Department of Labor.

Dated: January 18, 1989.

Roberts T. Jones,

Assistant Secretary of Labor.

Department of Health and Human Services.

Dated: January 23, 1989.

Wayne A. Stanton,

Director, Child Support Enforcement Administrator, Family Support Administration.

Environmental Protection Agency

Premanufacture Notices; Monthly Status Report for JANUARY 1992

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS-53151; FRL 4052-8]

Premanufacture Notices; Monthly Status Report for JANUARY 1992

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substance Control Act (TSCA) requires EPA to issue a list in the **Federal Register** each month reporting the premanufacture notices (PMNs) and exemption request pending before the Agency and the PMNs and exemption requests for which the review period has expired since publication of the last monthly summary. This is the report for JANUARY 1992.

Nonconfidential portions of the PMNs and exemption request may be seen in the TSCA Public Docket Office NE-G004 at the address below between 8 a.m. and noon and 1 p.m. and 4 p.m., Monday through Friday, excluding legal holidays.

ADDRESSES: Written comments, identified with the document control number "(OPPTS-53151)" and the specific PMN and exemption request number should be sent to: Document Processing Center (TS-790), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., rm. L-100, Washington, DC 20460, (202) 260-1532.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, Environmental Assistance Division (TS-799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. E-545, 401 M St., SW., Washington, DC 20460 (202) 260-3725.

SUPPLEMENTARY INFORMATION: The monthly status report published in the **Federal Register** as required under section 5(d)(3) of TSCA (90 Stat. 2012 (15 U.S.C. 2504)), will identify: (a) PMNs received during JANUARY; (b) PMNs received previously and still under review at the end of JANUARY; (c) PMNs for which the notice review period has ended during JANUARY; (d) chemical substances for which EPA has received a notice of commencement to manufacture during JANUARY; and (e) PMNs for which the review period has been suspended.Therefore, the JANUARY 1992 PMN Status Report is being published.

Dated: March 17, 1992.

Steven Newburg-Rinn,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

IV. 84 Chemical Substances for Which EPA Has Received Notices of Commencement To Manufacture

PMN No.	Identity/Generic Name	Date of Commencement
P 84-0660	G Substituted aryl olefin	February 9, 1988.
P 86-1014	G Substituted phosphine oxide	November 21, 1991.
P 86-1015	G Substituted phosphine oxide	November 21, 1991.
P 88-0316	G Substituted cyclohexylalkenone	November 20, 1991.
P 88-0805	G Substituted-phenyl-azo-alkyl phenol	November 6, 1991.
P 88-0763	G Mono substituted aromatic aldehyde	December 1, 1991.
P 88-0831	Phenol, 4,4'-(9H-fluoren-9-ylidene)bis-	August 27, 1989.
P 88-2193	G Substituted carboxylic acid, alkane diol polyester	December 22, 1988.
P 88-2495	G Fluorochloroolefin copolymer	November 22, 1991.
P 89-0451	G Silicone-imide block copolymer	November 20, 1991.
P 89-0821	G Substituted heteropolycyclic sulfonic acid, compound with alkanolamine	November 1, 1991.
P 89-1081	G Reaction product of alkyl carboxylic acids/alkane polyols polyester with an acrylate prepolymer	November 18, 1991.
P 90-0294	G NCO terminated urethane	December 18, 1991.
P 90-0559	1-(1-Methylbutoxy)-4-benzenamine hydrochloride	November 6, 1991.
P 90-0662	G Substituted epoxy resin	October 27, 1991.
P 90-1230	G Acrylic copolymers and salts thereof; styrene/acrylic copolymers and salts thereof	November 27, 1991.
P 90-1358	Cyclohexanecarbonitrile, 1,3,3-trimethyl-5-oxo-	November 15, 1991.
P 90-1533	G Modified olefin-based polymer	December 16, 1991.
P 90-1596	G Aryloxy substituted alkanoic acid, alkoxyphenyl hydrazide	November 25, 1991.
P 90-1597	G Acryloxy substituted alkanoyl chloride	November 7, 1991.
P 90-1598	G (Arylsulfonyl)aryloxy substituted alkanoic acid, alkoxyphenylhydrazide	November 7, 1991.
P 90-1625	G Carboxylic acid derivatives of polyoxyalkylenes	November 26, 1991.
P 90-1682	G Styrenated polyacrylate polymethacrylate	December 20, 1991.
P 90-1685	G Nonionic surfactant	November 13, 1991.
P 90-1707	G Metal carbonyl carboxylate	November 21, 1991.
P 90-1865	G Metal alkyl chloride	November 25, 1991.
P 90-1924	Siloxanes and silicone, di-me, hydrogen terminated, reaction products with polyethylene-polypropylene glycol, mono alkyl ether, succinates.	November 13, 1991.
P 90-1927	G Fluoroolefin copolymer	November 22, 1991.
P 91-0021	G Crosslinked polymer	December 4, 1991.
P 91-0065	3,9-Bis(2,4,6-tri-t-butylphenoxy)-2,4,8,10-tetroxa-3,9-diphosphaspiro(5.5)undecane	November 13, 1991.
P 91-0211	G Caprolactone modified polyester resin	January 3, 1992.
P 91-0257	G Waterborne polyurethane	November 20, 1991.
P 91-0332	G Aryl polyamideurea	November 14, 1991.
P 91-0365	G Fluorinated sulfonimide	November 26, 1991.
P 91-0386	G Tall oil fatty acids, ester with disubstituted triol	December 18, 1991

IV. 84 Chemical Substances for Which EPA Has Received Notices of Commencement To Manufacture—Continued

PMN No.	Identity/Generic Name	Date of Commencement
P 91-0419	G Alpic acid, polymer with 1,6-hexanediol, neopentylglycol, cycloalkanediol alkyl amine, cycloalkaneamine, 4,4-methylene bis(cyclohexyl isocyanated) and propanoic acid, 3-hydroxy-2(hydroxy methyl)2-methyl.	October 3, 1991.
P 91-0451	G Alkyl hydroxylamine	December 16, 1991.
P 91-0518	G Substituted alkyl amde	November 3, 1991.
P 91-0573	G Ethylene-siloxane copolymer	December 13, 1991.
P 91-0598	G Epoxidized copolymer of phenol and substituted phenol	November 7, 1991.
P 91-0620	G Polyester polyurethane	December 4, 1991.
P 91-0691	G Fluoroalkyl silane	September 11, 1991.
P 91-0731	Alpha, omega bis(2-hydroxyethyloxy)perfluoropolyoxyalkane	October 21, 1991.
P 91-0740	G Acid functional polyester	November 25, 1991.
P 91-0955	G Castor oil-tall polyol alkyd resin	November 18, 1991.
P 91-0963	G Reaction product of adiphatic diisocyanate, polycaprolactone polyol, and alkyl hydroxy acrylate	October 28, 1991.
P 91-1095	G Metal complex	November 12, 1991.
P 91-1099	G Acrylate/acrylamido derivative copolymer	November 21, 1991.
P 91-1132	G Styrene acrylic polyelectrolyte amine salt	November 25, 1991.
P 91-1133	G Styrene acrylic polyelectrolyte amine salt	November 25, 1991.
P 91-1134	G Styrene	November 25, 1991.
P 91-1135	G Styrene	November 25, 1991.
P 91-1136	G Styrene	November 25, 1991.
P 91-1137	G Styrene	November 25, 1991.

Department of Transportation

Research and Special Programs Administration

National Tank Truck Carriers, Inc.; Application for Preemption Determination; Notice

DEPARTMENT OF TRANSPORTATION

[Docket No. PDA-2]

National Tank Truck Carriers, Inc.; Application for Preemption Determination Concerning a Massachusetts Statute Requiring an Audible Warning Device on Bulk Tank Vehicles or Trailers Used To Deliver Gasoline or Other Flammable Materials

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Public notice and invitation to comment.

SUMMARY: The National Tank Truck Carriers, Inc. has applied for an administrative determination whether a Massachusetts statute, requiring an audible reverse-gear warning system on tank trucks and trailers used to deliver gasoline or other flammable materials, is preempted by the Hazardous Materials Transportation Act (HMTA).

DATES: Comments received on or before May 8, 1992, and rebuttal comments received on or before June 30, 1992, will be considered before an administrative ruling is issued by the Associate Administrator for Hazardous Materials Safety, Research and Special Programs Administration. Rebuttal comments may discuss only those issues raised by comments received during the initial comment period and may not discuss new issues.

ADDRESSES: The application and any commetns received may be reviewed in the Dockets Unit, Research and Special Programs Administration, room 8421, Nassif Building, 400 Seventh Street SW., Washington, DC 20590-0001. Telephone: (202) 366-5046. Fax number: (202) 366-3753. Comments and rebuttal comments on the application may be submitted to the Dockets Unit at the above address, and should include the Docket Number (PDA-2). Three copies are requested. A copy of each comment and rebuttal comment must also be sent to Mr. Clifford J. Harvison, President, National Tank Truck Carriers, Inc., 2200 Mill Road, Alexandria, VA 22314 and to Mr. Jerold A. Gnazzo, Registrar, Registry of Motor Vehicles, 100 Nashua Street, Boston, MA 02114. A certification that a copy has been sent to each person must also be included with the comment. (The following format is suggested: "I hereby certify that copies of this comment have been sent to Messrs. Harvison and Gnazzo at the addresses specified in the Federal Register.")

FOR FURTHER INFORMATION CONTACT: Edward H. Bonekemper, III, Assistant Chief Counsel for Hazardous Materials Safety, Office of the Chief Counsel, Research and Special Programs Administration, 400 Seventh Street SW., Washington, DC 20590-0001, telephone number 202-366-4400.

SUPPLEMENTARY INFORMATION:

1. Background

The preemption provisions of the Hazardous Materials Transportation Act (HMTA), 49 App. U.S.C. 1801 *et seq.*, were amended by the Hazardous Materials Transportation Uniform Safety Act of 1990 (HMTUSA), Public Law 101-615. The Research and Special Programs Administration's (RSPA's) regulations have been revised to reflect these changes. 56 FR 8616 (Feb. 28, 1991); 56 FR 15510 (Apr. 17, 1991).

With two exceptions (discussed below), section 105(a)(4) of the HMTA (49 App. U.S.C. 1811(a)(4)), preempts "any law, regulation, order, ruling, provision, or other requirement of a State or political subdivision thereof or an Indian Tribe" which concerns a "covered subject" and "is not substantively the same" as any provision of the HMTA or any regulation under that provision concerning that subject. The "covered subjects" are defined in section 105(a)(4) as:

(i) The designation, description, and classification of hazardous materials.

(ii) The packing, repacking, handling, labeling, marking, and placarding of hazardous materials.

(iii) The preparation, execution, and use of shipping documents pertaining to hazardous materials and requirements respecting the number, content, and placement of such documents.

(iv) The written notification, recording, and reporting of the unintentional release in transportation of hazardous materials.

(v) The design, manufacturing, fabrication, marking, maintenance, reconditioning, repairing, or testing of a package or container which is represented, marked, certified, or sold as qualified for use in the transportation of hazardous materials.

RSPA has issued a Notice of Proposed Rulemaking proposing a specific definition for the term "substantively the same." 56 FR 36992 (Aug. 1, 1991).

In addition, section 105(b)(4) of the HMTA, 49 app. U.S.C. 1804(b)(4), addresses the preemption standards for hazardous materials highway routing requirements. The Secretary of Transportation has delegated responsibility for those highway routing issues, including the issuance of preemption determinations on highway routing issues, to the Federal Highway Administration. 56 FR 31343 (July 10, 1991).

Finally, section 112(a) of the HMTA, 49 App. U.S.C. 1611(a), provides that, with two exceptions discussed below, State, political subdivision and Indian tribe requirements not covered by those Section 105(a) or (b) provisions are preempted if—

(1) Compliance with both the State or political subdivision or Indian Tribe requirement and any requirement of (the HMTA) or of a regulation issued under (the HMTA) is not possible, (or)

(2) The State or political subdivision or Indian tribe requirement as applied or enforced creates an obstacle to the accomplishment and execution of (the HMTA) or the regulations issued under (the HMTA) * * *.

As indicated in the preamble to the final regulation implementing the HMTUSA preemption provisions, 56 FR at 8617 (Feb. 28, 1991), Section 112 codifies the "dual compliance" and "obstacle" standards which RSPA previously had adopted by regulation and used in issuing its advisory inconsistency rulings.

The two exceptions to preemption referred to above are for: (1) State, local or Indian tribe requirements "otherwise authorized by Federal law" and (2) State, local or Indian tribe requirements for which preemption has been waived by the Secretary of Transportation.

All of the above-described preemption standards are in RSPA's regulations at 49 CFR 107.202.

Section 112(c) of the HMTA provides for issuance of binding preemption determinations to replace the advisory inconsistency rulings previously issued by RSPA. Any directly affected person may apply for a determination whether a State, political subdivision or Indian tribe requirement is preempted by the HMTA. Notice of the application must be published in the **Federal Register**, and then the applicant is precluded from seeking judicial relief on that issue for 180 days after the application or until the preemption determination is issued, whichever occurs first. A party to a preemption determination proceeding may seek judicial review of the determination in U.S. district court within 60 day after the determination becomes final.

The Secretary of Transportation has delegated authority to issue preemption determinations, except for those concerning highway routing issues, to RSPA. 56 FR 31343 (July 10, 1991). RSPA's Associate Administrator for Hazardous Materials Safety will issue those determinations. RSPA's regulations concerning preemption determinations were issued on February 28, 1991 (56 FR 8616), and are at 49 CFR 107.203-21 and 107.227.

Preemption determinations do not address issues of preemption arising under the Commerce Clause of the Constitution or under statutes other than the HMTA unless it is necessary to do so in order to determine whether a requirement is "otherwise authorized by Federal Law." A State, local or Indian tribe requirement is not "otherwise authorized by Federal law" merely because it is not preempted by another Federal statute. *Colorado Pub. Utilities Comm'n* v *Harmon*, No. 89-1288 (10th Cir. Dec. 18, 1991), reversing No. 88-Z-1524 (D. Colo. 1989).

In issuing its preemption determinations under the HMTA, RSPA is guided by the priniciples enunciated in Executive Order No. 12, 612 entitled "Federalism" (52 FR 41685, Oct. 30, 1987). Section 4(a) of that Executive Order authorizes preemption of state laws only when the statute contains an express preemption provision, there is other firm and palpable evidence of Congressional intent to preempt, or the exercise of state authority directly conflicts with the exercise of Federal authority. The HMTA, of course, contains several express preemption provisions, which RSPA has implemented through regulations.

2. The Application for a Preemption Determination

On November 25, 1991, the National Tank Truck Carriers, Inc. submitted the following application for a preemption determination:

Before the Research & Special Programs Administration, United States Department of Transportation

In the matter of: A request for a Preemption determination with respect to: Certain laws and regulations of the Commonwealth of Massachusetts requiring audible warning devices on cargo tank motor vehicles used to deliver gasoline and other flammable material.

Filed by: National Tank Truck Carriers, Inc., 2200 Mill Road, Alexandria, VA 22314, (703) 838-1960, Clifford J. Harvison, President.

November 25, 1991.

Before the Administrator:

This petition for a preemption determination is filed by National Tank Truck Carriers, Inc. (NTTC). NTTC is a national trade association, the members of which specialize in the transportation of hazardous materials, hazardous substances and hazardous wastes in cargo tank motor vehicles, throughout the continental United States. Specific to this petition, it would be noted that many of our members conduct transportation operations, including loading, unloading and storage incidental thereto, within the Commonwealth of Massachusetts.

Subject of This Petition

Chapter 90, section 7 of the Motor Vehicle Laws of the Commonwealth of Massachusetts specifies (in part), "Every bulk tank vehicle, or trailer weighing, with its load, more than twelve thousand pounds, and used to deliver gasoline or other flammable material, shall be equipped with an audible warning system when the vehicle's transmission is in reverse." (Note—for the sake of brevity, throughout this petition, NTTC will use the phrase "back up alarm" when referring to this requirement.)

Object of This Petition

NTTC believes that, pursuant to section 112(a) of the Hazardous Materials Transportation Uniform Safety Act of 1990 (HMTUSA), the above-noted requirement of the Commonwealth is preempted; and, we respectfully ask the Administrator to initiate a "Preemption Determination" in this matter.

Basis of This Petition

NTTC acknowledges that neither the Hazardous Materials Regulations (HMR) nor the Federal Motor Carrier Safety Regulations (FMCSR) specify requirements for back up alarms. Simply stated, there is nothing in title 49 CFR which would either require installation and use of such a device on a cargo tank motor vehicle, or prohibit such installation and use.

By the same token, Massachusetts has created a nexus between mandated installation and use of the device by specifying such installation and use only on a "* * * bulk tank vehicle * * * used to deliver gasoline and other flammable products." Without question, "gasoline and other flammable products" are hazardous materials (as designated by the Secretary), and subject to the regulatory jurisdiction of the Administrator.

Therefore, NTTC submits that the net effect of the Massachusetts law is to question the adequacy of the Administrator's regulations by the unilateral imposition of an equipment requirement only on vechicles transporting specified hazardous materials. We hold that such action is impermissible and must be preempted under Section 112 of HMTUSA.

Argument

In Inconsistency Ruling No. IR-22; Docket IRA-40A (issued: December 2, 1987), the Administrator discussed various "non containment" directives of the City of New York's Bureau of Fire Protection (BFP). Among such directives were: bumpers, drive axles, chassis weight, dedicated use, fuel tanks, brakes and electrical systems. These elements were consolidated in four BFP directives under review by RSPA.

In the relevant portion of his ruling, the Administrator stated:

"* * * virtually all of the provisions of those directives are 'triggered' by the transportation of hazardous materials (i.e. they do not apply to all vehicles or all trucks but only to those carrying specified hazardous materials.), fall within these exclusively Federal regulatory areas, and, therefore, are inconsistent with the HMTA and the HMR and thus preempted. No comparison with FMCSR provisions is necessary."

We note that, in this ruling, the Administrator did find directives which required rags or cotton waste to be kept in a metal container and New York City's "savings clause" to be consistent. These factors are neither comparable nor relevant to the issue raised in the petition.

Similarly, we are aware of the fact that, in IR-2 (dealing with specified regulations of the State of Rhode Island), the Administrator found "consistent" a mandate for certain vehicles to contain a "* * * two way radio". Relying on testimony given by Rhode Island officials in a related action in Federal District Court, the Administrator noted (the official's opinion) that the regulation could be complied with by use of a "CB radio". Based on that fact, the Administrator ruled that "non containment" requirement to be "consistent".

As in the above-noted reference to "rags or cotton wastes" and New York's "Savings Clause", the Administrator's ruling (regarding the "CB Radio") is neither comparable nor relevant to this proceeding. Unlike a "back up alarm", a "CB Radio" is not permanently installed in the vehicle and requires no mechanical alteration to the vehicle.

We submit that the Massachusetts requirement—in terms of its impact on the Congressional mandate for "* * * consistency in laws and regulations dealing with the transportation of hazardous materials—is inconsistent as a matter of law, and must be preempted.

Conclusion

There can be little doubt that the Administrator has comprehensive jurisdiction with respect to the issue raised, herein. Like the situation in New York, the Massachusetts requirement is "non containment" and is "triggered" by the hazardous nature of the vehicle's cargo. Regulations impacting the transportation of hazardous materials—particularly as they relate to vehicle equipment—are exclusively Federal.

As a party of interest to hazardous materials transportation, the Commonwealth has every right to petition the Administrator for appropriate regulatory amendment, but the Commonwealth has yet to exercise that option. Instead, Massachusetts has chosen to unilaterally impose a vehicle equipment standard, the singular impact of which is on the transportation of specified hazardous materials. Again, the net effect of Massachusetts' action is to question the adequacy of the Administrator's regulations.

We respectfully ask the Administrator to institute a "Preemption Determination" (in this matter); and, after public notice and comment, find Massachusetts' requirement for, "Every bulk tank vehicle, or trailer weighing, with its load, more than twelve thousand pounds, and used to deliver gasoline or other flammable material (to be) equipped with an audible warning system when the vehicle's transmission is in reverse", to be inconsistent with the HMR.

Respectfully submitted:
Clifford J. Harvison,
President.

On January 3, 1992, the applicant, as required by 49 CFR 107.205, perfected its application by providing a copy of its application to the Registrar of Motor Vehicles of the Commonwealth of Massachusetts.

3. Public Comment

Comments should be limited to the issue of whether the cited Massachusetts requirement is preempted by the HMTA. Comments should specifically address the "substantively the same," "dual compliance" and "obstacle" tests described in the "Background" section. Comments also should address the issue of whether the requirement is "otherwise authorized by Federal law."

Persons intending to comment on the application should review the standards and procedures governing the Department's consideration of applications for preemption determinations found at 49 CFR 107.201–107.211.

Alan I. Roberts,
Associate Administrator for Hazardous Materials Safety.

Issued in Washington, DC on March 10, 1992.

Part V

Department of the Treasury

Fiscal Service

31 CFR Part 205
Federal Funds Transfers, Cash Management Improvement Act of 1990; Proposed Rule

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 205

Federal Funds Transfers

AGENCY: Financial Management Service, Fiscal Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Financial Management Service issues this Notice of Proposed Rulemaking for a regulation to implement the Cash Management Improvement Act of 1990. This statute and proposed regulation impose a requirement for timely transfers of funds between Federal agencies and States, and impose a requirement to pay interest where transfers are not made in a timely fashion. The rulemaking is designed to encourage the development of efficient cash management systems and to ensure equity in the transfer of funds from Federal agencies to States and ultimately to program recipients.

DATES: Comments must be received on or before May 7, 1992.

ADDRESSES: Send written comments to: Financial Management Services (FMS), CMIA 90 Project Manager, room 521C, 401 14th Street SW., Washington, DC 20227.

FOR FURTHER INFORMATION CONTACT:
John Galligan, (Program Manager), (202) 874–6935,
Gary Grippo, (Program Specialist), (202) 874–6955,
Christopher Kubeluis, (Program Specialist), (202) 874–6873,
Steven D. Laughton, (Principal Attorney), (202) 874–6680.

SUPPLEMENTARY INFORMATION: This regulation is authorized by the Cash Managemernt Improvement Act of 1990, Public Law 101–453, October 24, 1990, (CMIA), whose substantive provisions are codified at 31 U.S.C. 3335 and 6503. CMIA centralizes authority for management of funds disbursement in the Secretary of the Treasury (hereinafter Secretary). It requires the Secretary to regulate and enforce timely disbursement by Federal agencies, and to negotiate and monitor agreements with the States to achieve the efficient transfer of Federal funds. The purpose of CMIA and this regulation is to ensure greater efficiency, effectiveness, and equity in the exchange of funds between the Federal Government and the States.

Until passage of CMIA, the only law that addressed the timing of Federal funds transfers to States was the Intergovernmental Cooperation Act, 31 U.S.C. 6503. This law allowed a State to retain for its own purposes any interest earned on Federal funds transferred to a State "pending its disbursement for program purposes."

Since passage of that law in 1968, Federal agencies have expressed concerns that States were drawing down Federal funds well in advance of the time those funds were needed by States to redeem checks. These premature drawdowns caused the Federal Government to lose interest earnings.

In addition, States had expressed concerns about having to pay out their own funds in advance of receiving funds from the Federal Government. This practice caused States to lose interest earnings on their own funds until they were reimbursed by the Federal Government.

To find solutions to these problems, the Joint Federal/State Cash Management Reform Task Force was created in 1983. It included six State officials and six Federal officials. The Task Force experimented with various cash management tracking procedures in a number of States, and made recommendations which assisted in the adoption of CMIA.

General Principles

These regulations are intended to convey the following:

- The use of recognized, sound cash management principles will ensure certainty in the timeliness of payments and will improve business relationships between the Federal and State governments.
- States have an obligation to request funds timely.
- Federal agencies have an obligation to disburse funds to States timely.
- Nothing in the regulations implementing CMIA reduces existing Federal agency responsibilities to minimize balances that may be on hand before there is a need for disbursement by a State.
- The computation and payment of interest is not the objective of the law. The interest provisions are intended to make the terms under which funds are transferred more equitable and to provide an incentive for better cash management.
- This regulation specifies that funding techniques are to be chosen by States subject to the approval of the Secretary. The Secretary considers funding techniques that necessarily result in interest liabilities to be undesirable. They will be acceptable only until a more efficient technique can be mutually agreed upon. To ensure optimal compliance with the spirit of CMIA, the Secretary expects that both the States and the Federal Government will structure their transactions to minimize and, wherever possible, eliminate interest payments. However, the Secretary will not impose a funding technique that is not workable.
- It is the Secretary's goal to ensure payment by Federal agencies for all properly received State requests for funds by the payment due date. This commitment to timely payment is a major step forward in reducing or eliminating the exchange of interest.
- The Secretary will make all reasonable efforts to enter into an Agreement with each State to define all provisions and procedures unique to the State in complying with the codified regulations. The State/Federal Agreement will address those elements which are specific to each State, such as: "Definition of a State"; "Funding Techniques"; and "Interest Calculation Methodology." There are default provisions in the proposed regulation for any State for which an Agreement cannot be reached.

Specific Issues

Phase-In and Threshold

The proposed regulation would phase-in CMIA over a 2-year period and would establish a threshold of materiality for programs which must be conducted in accordance with CMIA. A phase-in is proposed to alleviate the burdens implicit in complying with new regulations, to distribute start-up work and costs over a 2-year period, and to mitigate any unexpected problems which may result from the regulation. During the first year of implementation, the scope of the regulation would be limited to major Federal assistance programs that have funding over one billion dollars at the Federal level. One billion dollars is chosen as a threshold because it results in covering roughly 80 percent of the Federal funds granted to States, while limiting the number of programs to 19.

From the second year of implementation onward, the proposed regulation establishes a threshold of materiality for programs which must be conducted in accordance with CMIA. All programs defined as "major Federal assistance programs," pursuant to the Single Audit Act, 31 U.S.C. 7501(12), would be included. There are several advantages to this threshold. First, it is the existing Federal threshold of materiality applied for the audits of programs administered by States. Second, it serves to limit the administrative burden and costs of compliance, while still covering, in most

cases, over 90% of the Federal program funds transferred to States. Finally, the threshold is only a minimum standard; additional programs may be covered, subject to the mutual agreement of the State and the Federal Government.

Questions have arisen about the treatment of guaranteed student loan programs under CMIA. The proposed regulation excludes the guaranteed student loan programs, because the funds paid out by guarantor organizations to operate the program are not State funds. The reserve accounts out of which payments are made are a type of working capital fund containing earmarked Federal funds. Interest earned on these funds by the guarantor organization, moreover, must be used for program purposes.

Delaying Implementation

In discussions with FMS, several States have argued for a delay in the onset of CMIA, indicating that the will not be able to implement new cash management procedures by October 24, 1992. The Secretary has no authority to delay the onset of the interest provisions of CMIA, and the statute is plain in this regard:

> [S]ubsections (c) and (d) of section 6503 of title 31, United States Code, as added by subsection (b) of this section (relating to payments of interest between the Federal Government and State governments), *shall* take effect 2 years after the date of enactment of this Act.

Hence, interest will begin accruing on October 24, 1992, notwithstanding any powers of the Secretary to write regulations or to negotiate agreements with States.

The Secretary recognizes, however, that some States may not be able to develop clearance patterns and implement new funding techniques by October 24, 1992. Through a limited Interim Agreement, the Secretary will allow such States until July 1, 1993, to put in place the required cash management techniques.

States entering an Interim Agreement will be required to calculate or estimate, retrospectively if necessary, the interest liabilities for the period from October 24, 1992 to June 30, 1993. The Secretary will be flexible and will make all reasonable efforts to accommodate States when defining the provisional interest calculation requirements for the initial period. Interim Agreements must also specify the funds transfer procedures a State will use. The Secretary intends to afford States flexibility in selecting procedures, and may agree to provisional procedures or conventions other than the four funding techniques set forth in § 205.5. On or before July 1, 1993, all Interim Agreements would lapse, and States would either have to comply with a full State/Federal Agreement or comply with the default regulations.

Thus, States have three options for the onset period from October 24, 1992 to June 30, 1993. First, they may enter into an Interim Agreement, which would include a provisional interest calculation method and provisional funds transfer procedures. Second, a State may enter into a full-fledge State/Federal Agreement and proceed with complete implementation. Third, a State could enter into no agreement and subject itself to the full scope of the default regulations.

Cost Recovery

The proposed regulation provides that States be compensated for the costs of developing and maintaining clearance patterns and for the costs required for the actual calculation of interest payments, up to a maximum of $30,000 per year. Costs in excess of $30,000 may be eligible for reimbursement only if a State can justify to the Secretary that without such costs the State would be unable to develop clearance patterns or perform the actual calculation of interest. In discussions with the FMS, some States contended that cost recovery should not be defined this way and that States should be reimbursed for all costs associated with the implementation of the law. Some Federal agencies contended that States should not receive any reimbursement under CMIA for their expenses in implementing the statute. In this matter, the draft regulation follows the guidance of the House of Representatives Committee Report on CMIA. That report notes that the statute is a compromise between the views of Federal and State officials, and establishes "that the States be directly reimbursed for those costs incurred by the States which would be considered unique to the cash management procedures required" by CMIA, and that such costs "would be those costs directly related to the interest calculations. . . ." House of Representatives Committee Report No. 696, 101st Congress, 2nd Session 9–11 (1990).

The FMS also shares the view expressed on page 10 of the same report that such costs will be "relatively minor." Furthermore, certain costs associated with CMIA are currently eligible for reimbursement under Office of Management and Budget (OMB) Circular A–87, such as developing and implementing new cash management policies and procedures, negotiating the State/Federal Agreements, or training State employees to implement new procedures. For these reasons, the FMS views the $30,000 cost reimbursement limit as reasonable. Because CMIA speaks of cost reimbursement only in connection with State/Federal Agreements, only those States that have entered into such an Agreement will be eligible for reimbursement. The FMS will routinely review State cost claims and disallow unreasonable costs. The Paperwork Reduction Act estimate of an annual reporting and/or recordkeeping burden of 250 to 750 hours per State will be used as a guideline for determining the reasonableness of a direct cost claim.

Direct costs incurred prior to July 22, 1991, will not be eligible for reimbursement, unless a State makes separate application to the Secretary with justification and documentation. Normally, costs incurred prior to the publication of a Final Rule are ineligible for reimbursement. In the case of CMIA, however, start-up costs are necessary, and the Final Rule will be published within months of the October 24, 1992, implementation date. For these reasons, costs incurred after July 22, 1991, rather than after the date of the Final Rule, will be eligible for reimbursement. July 22, 1991, is chosen because it was the date the FMS circulated a pre-clearance draft of these regulations to all States and other interested parties.

Definition of a State

The definition of a "State" has been a troublesome issue for some States. According to CMIA "'State' means a State of the United States, the District of Columbia, a territory or possession of the United States, and an agency, instrumentality, or fiscal agent of a State but does not mean a local government of a State." The issue has been most controversial when considering whether entities with some measure of autonomy, like public universities in many States, should be considered part of the State for CMIA purposes.

The proposed regulation provides for using the United States Bureau of the Census' lists of Dependent State Agencies as the basis for developing an inclusive list, to be contained in the State/Federal Agreement, of all entities considered to be agencies, instrumentalities or fiscal agents of the State. States will be afforded the opportunity to propose adjustments to the Census Bureau list, accounting for any misrepresented or omitted entities. Examples include agencies or departments that have been created or disbanded since the last update of the list, and any entity for which the State

can provide justification acceptable to the Secretary for exclusion as part of the State for purposes of this regulation. Since this proposed regulation applies to all major Federal assistance programs, States and Federal agencies should be advised that State colleges and universities, public authorities, and other entities on the Census Bureau list are subject to this proposed regulation if they receive funding under a major Federal assistance program. Thus, while the Secretary may agree to a 1-year grace period for States that do not have direct fiscal control over such entities, in many cases States will be required to develop plans to cover them.

Additionally, while this Notice of Proposed Rulemaking specifies the use of Census Bureau standards as explained above, the Secretary is considering other options for defining "State." One possibility is to use generally accepted accounting principles defining the State reporting entity. Another option is to use a definition derived from OMB Circulars on grant administration requirements. State entities subject to OMB Circular A–102 could be covered by CMIA, and State entities subject to A–110 (institutions of higher education, hospitals, and other non-profit organizations) could be excluded from the provisions of CMIA. A third option is to use a program-driven definition, where all State entities that administer programs above a funding threshold would be considered part of the State for the purposes of CMIA.

The Secretary recognizes the importance of this issue and continues to solicit comments from States and professional associations on the definition of "State" for the purposes of CMIA.

Indirect Costs/Administrative Expenses

Some States and Federal agencies have indicated that due to the complexities of cost accounting for Federal programs and the difficulty of assigning and charging an indirect or administrative expenditure to a specific drawdown under a particular program, in most cases the effort and costs required to calculate interest liabilities for such transfers will be disproportionate to any benefits derived. Therefore, the regulation provides some options for the States. It lists three conventions which a State may choose for the funding of administrative and overhead type costs. For example, one convention is to key the transfer of funds for administrative expenses to a State's salary and wage run, since payroll represents about 70–80 percent of total administrative costs. If a State opts to use one of the conventions, no interest liabilities will accrue on the transfer of funds for administrative expenses or indirect costs. These conventions are intended to be cost efficient and equitable alternatives that would still provide certainty and efficiency in the transfer of funds. However, a State may apply some other drawdown convention or funding procedure for administrative expenses/indirect costs, subject to the approval and agreement of the Secretary. The State/Federal Agreement will specify rules for the accrual of interest in conjunction with any funding techniques agreed upon for these costs.

Interest Calculation Methodology

States and Federal officials have expressed concern that mandating an interest calculation methodology in the regulations would be inconsistent with the variety of administrative, banking, and accounting systems used by States. Therefore, States will be able to specify, in the State/Federal Agreement, their own methodology for calculating interest, subject to the general guidelines of the proposed regulation and the approval of the Secretary. An interest calculation method will be prescribed in the regulations only for those States that have not entered into a State/Federal Agreement.

Federally Mandated Reimbursable Funding Programs

The treatment of reimbursable funding programs under CMIA has been controversial. Reimbursable funding programs are programs for which Federal law mandates that a State must pay out its own funds before it is eligible to receive Federal funds.

Some States have contended that the Federal Government should be liable for interest from the day a State pays out its own funds until the day it is reimbursed by the Federal Government, without restriction or limitation. Federal agencies, on the other hand, contend that it would be unreasonable for the Federal Government to incur an interest liability prior to the day a State requests reimbursement, because the Federal Government would have a limitless liability for transactions over which it has no control or knowledge. They argue that the statutory goals of efficient and effective cash management mean that States should receive no interest before submitting a bill.

For Federally mandated reinbursable funding programs, the proposed regulation does not limit a State's entitlement to interest prior to requesting funds or billing. A State will be entitled to interest from the day the State expends its own funds until the day the State is reimbursed, without restriction.

The Secretary strongly encourages States to request funds, or bill, in a timely manner for mandatory reimbursable funding programs. Allowing interest to accrue for an unlimited period prior to the submission of bills may subsidize and encourage structural and administrative inefficiencies in State cash management systems, which is inconsistent with the stated purpose of the law. Accordingly, Federal agencies may allow States to make interim drawdowns, based on estimates, even when final requests must be submitted with reports.

Federal-Aid Highway Programs

For Federal-aid highway programs and projects, no Federal interest liability will accrue prior to the day the Federal Highway Administrtion (FHWA) receives a request for funds. This rule is needed for the following reasons.

First, any Federal interest liability for Federal-aid highway programs has the effect of reducing the funds available to States for program purposes. CMIA requires that interest paid to a State under a trust fund program must be charged against the trust fund. (Interest paid to a State for other programs will be charged against the General Fund of the Treasury.) Therefore, any interest paid to a State for Federal-aid highway programs must be charged against the Federal Highway Trust Fund. If a Federal interest liability is allowed to accrue prior to the day States submit bills, the interest charged against the trust fund is likely to substantially reduce trust fund balances, and thus reduce the funds available for program purposes.

Furthermore, if the Federal Government were to pay interest on State billing float for the Federal-aid highway programs, the result would be that States with efficient billing systems would subsidize those with less efficient systems. Only those States that did a poor job of billing would be paid interest. However, the total funds available for all highway projects would be reduced. Efficient States would not receive any interest payments, but would suffer along with the others as a result of the diminution of the funds available for program purposes.

It is not the intent of CMIA, directly or indirectly, to have a negative material effect on trust fund balances. Thus, while the rule for Federal-aid highway programs does not eliminate interest charges against the Federal Highway Trust Fund, it ensures that the obligatory accounting convention for trust funds will not result in an unintended material effect on the corpus of the trust.

As trustee of the Federal Highway Trust Fund, the Secretary believes this policy to be a reasonable and necessary step in fulfilling the fiduciary responsibility of administering the trust. The corpus of the Federal Highway Trust Fund would be materially diminished if States are to be paid interest on their billing float, and the investment proceeds of the trust should not be used to subsidize or indemnify inefficient billing practices by States.

Second, the regulation governing billing for the FHWA programs, (23 CFR 140.105), reads as follows: "In preparing a progress voucher, all eligible costs shall be included, provided a recorded liability exists or a cash disbursement has been made." Hence, States may bill the FHWA once they have recorded the expenditure, prior to issuing checks and prior to actullly paying out funds for program purposes. It is therefore a misnomer to call the FHWA programs "reimbursable," since States can bill well in advance of actually redeeming checks. Because States may bill on an accrual basis and because the proposed regulation requires Federal agencies to allow States to bill as often as daily, there is nothing to prevent States from applying one of the funding techniques set forth in § 205.4 of the proposed regulation, particularly the average date of clearance technique, which would facilitate billing and accounting for FHWA programs.

Discussions with State and Federal officials have provided further support for the proposed rule on FHWA programs, because it has become clear that several States bill and receive funds from the FHWA in advance of paying out their own funds. Simply put, Federal funding for FHWA programs does not under current practices necessarily differ from Federal funding for advance programs.

Pre-Clearance Draft

A pre-clearance draft of the regulations dated July 22, 1991 was disseminated to States, Federal agencies and other interested parties. Over half of the States responded with comments, as did the National Association of State Auditors, Comptrollers, and Treasurers, ten Federal agencies and the Federal Reserve. As a result of these comments, the FMS made several changes to the draft regulations, which are reflected in this Notice of Proposed Rulemaking.

The FMS considered and rejected a requirement that States submit a mid-year status report. This requirement has been withdrawn due to skepticism about its cost effectiveness, expressed by both State and Federal officials. This report was intended to serve as an "early warning" mechanism by which the States and the Federal Government could highlight inefficient cash management and assess and forecast potential interest exposure prior to the year and calculation of interest. In the absence of the mid-year report it will be incumbent upon Federal and State officials to prepare informally throughout the year for the potential requirement to exchange interest.

Unemployment Trust Fund and Programs

Due to the unique characteristics of the Unemployment Trust Fund (UTF), CMIA contains specific language addressing it. This is reflected in this regulation, which contains a separate section (Subpart B) to deal with the UTF programs.

Unemployment Insurance (UI) is a UTF program that pays benefits to qualified workers who are unemployed and available for work. Each State has its own UI laws, which must conform to a specific set of Federal requirements, and is responsible for determining who is eligible for benefits, the amount of benefits, and the duration of benefits.

The cash flows involved in the UI program are as follows:

a. The UI benefits are primarily financed by State taxes (contributions) on employer payrolls. States deposit employer contributions into clearing accounts in commercial banks from which they are transferred electronically to individual State accounts in the UTF in the Treasury, established by section 904 of the Social Security Act (SSA), 42 U.S.C. 1104. Section 303(a)(4) of the SSA, 42 U.S.C. 503(a)(4) and section 3304(a)(3) of the Federal Unemployment Tax Act (FUTA), 26 U.S.C. 3304(a)(3) require the immediate payment of all money received in the unemployment fund of a State to the Secretary of Treasury to the credit of the UTF. State accounts in the UTF consist of deposits of employer contributions required by State UI laws, reimbursements in lieu of contributions, reimbursements from States for transferring unemployment benefit payments made under the Interstate Arrangement for Combining Employment and Wages, recoveries of benefit overpayments, employee contributions, and, where applicable, penalty and interest. Penalty and interest may be excluded only if the State UI law provides for the payment of such collections to another State fund.

b. State UTF balances not immediately needed to pay benefits are invested by the Treasury, primarily in U.S. Government securities, with earnings deposited in individual State accounts in the UTF (SSA, section 904(b), 42 U.S.C. 1104(b)).

c. Funds requisitioned to pay benefits are transferred electronically to State benefit payments accounts, generally in commercial banks, to fund benefit checks or warrants drawn on such accounts. Section 303(a)(5) of the SSA, 42 U.S.C. 503(a)(5) and section 3304(a)(4) of the FUTA, 26 U.S.C. 3304(a)(4) require that all money withdrawn from the unemployment fund of a State be used for the payment of unemployment compensation exclusive of expenses of administration.

The withdrawal requirements of the SSA and the FUTA are affected by CMIA. Section 5(b) of CMIA, 31 U.S.C. 6503(c)(3)(B) addresses the special treatment of interest computation and exchange for funds drawn from State accounts in the UTF. States are permitted to invest residual daily balances in benefit payment accounts (see c. above), use earnings generated by those balances to pay "related banking costs" for maintaining those accounts, and return interest earnings in excess of "related banking costs" to the UTF annually.

The legislative history of the SSA and the FUTA indicate that the security and integrity of unemployment funds is the first priority of UI cash management. Liquidity and return on investment are important considerations, but secondary to security and intergrity considerations. This regulation supports that position and sustains the withdrawal requirements of the SSA and the FUTA within the framework of CMIA specifically by limiting investment of unemployment funds in State benefit payment accounts and requiring insurance/collateralization of all unemployment funds residing outside the UTF.

All existing provisions and requirements of the SSA, the FUTA and Department of Labor (DOL) regulations and policy apply to unemployment fund cash management with the following exceptions:

a. Benefit payment account balances may be invested in interest-bearing accounts and/or overnight reverse repurchase agreements of U.S. Government securities.

b. Earnings on those investments may be used to pay the related bank costs of State benefit payment account maintenance. Any excess earnings (i.e., amounts in excess of "related banking costs"), must be returned in full to the State's account in the UTF annually. The

restriction on the use of unemployment funds exclusively to pay benefits remains. Funds may not be drawn from the UTF for the purposes of investment or for the purpose of paying bank charges. Bank charges may be paid only with earnings on secured and/or insured investments.

Transfers to Non-State Entities

Subpart C is not a result of CMIA implementation. It is revision to the existing regulation at 31 CFR part 205, "Withdrawal of Cash from the Treasury for Advances Under Federal Grant and Other Programs." Subpart C is intended to be a shorter and clearer restatement of the rules contained in the existing 31 CFR part 205. It is not intended to make substantive changes in this area. It will govern transfer to non-State entities and State entities not covered by, or otherwise outside the Scope of subpart A, as defined by § 205.3. The interest provisions of the CMIA do not apply to subpart C, although all relevant provisions of OMB circulars do apply, including those dealing with the accrual of interest.

Record Retention

The proposed regulation requires States to retain records supporting interest calculations and clearance patterns for 5 years. The 5-year retention period is necessary because a State may use clearance pattern models, which are needed to schedule drawdowns and calculate interest, for up to five years before recertifying their accuracy. The records supporting clearance patterns need to be retained until a State is required to revisit the clearance pattern calculations.

Oversight

Compliance with this proposed regulation and with the requirements of CMIA will be monitored in several ways. The Secretary expects that States will be audited for compliance annually, through Single Audit procedures. Additionally, the Secretary may request Federal agencies to conduct audits of States, and will coordinate with the agencies to ensure that State compliance is investigated during on-site reviews. Annual reports submitted by States will be cross-checked for accuracy by both the Secretary and Federal agencies. Finally, States must make all records relating to CMIA available for review by the Secretary and the Federal agency Inspectors General, upon 30 days written notice.

Federal agencies will be evaluated for compliance with CMIA during the Secretary's periodic cash management reviews. Annual Reports submitted by States will be used to monitor the performance of Federal agencies, and when an agency is egregiously or repeatedly untimely in its payments, the Secretary may exact a charge against the agency's operating appropriation.

OMB Circulars

The OMB Circulars referenced in this proposed regulation may be obtained from the Office of Management and Budget, New Executive Office Building, 725–17th Street NW., Washington, DC 20503.

Public Comment

Public comment is solicited on all aspects of this proposed regulation. The FMS will consider all comments made on the substance of this proposed regulation, but does not intend to hold hearings on it.

Regulatory Analysis

It has been determined that this document is not a major regulation as defined in E.O. 12291 and a regulatory impact analysis is not required. Some States may have to make interest payments to the Federal Government for the use of Federal funds, but such costs are not expected to be major within the meaning of E.O. 12291. The provision for the reimbursement of the costs directly incurred by States in computing interest will reduct the economic impact of the regulation. In any event, the economic consequences of the regulation will be a direct result of the statutory mandate of CMIA.

Regulatory Flexibility Act

It is hereby certified that this regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. The States which will be affected by Subparts A and B of this regulation do not fit within the Regulatory Flexibility Act definition of "Small entity," 5 U.S.C. 601. Furthermore, as explained in the preceding paragraph, the economic impact is not expected to be major. The rules in subpart C of the draft regulation are not a substantive change from the existing rules at 31 CFR part 205.

Paperwork Reduction Act

The collections of information contained in this Notice of Proposed Rulemaking have been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. 3505(h). Comments on the collections of information should be sent to the Office of Management and Budget, Paperwork Reduction Project (1510–AA19), Washington, DC 20503, with copies to the Financial Management Service at the address specified at the beginning of this notice. The collection of information in this proposed regulation are in §§ 205.4, 205.8, 205.12 and 205.13. This information is required by the FMS to verify compliance with statutory requirements. This information will be used for purposes of reporting and verifying interest claims. The respondents are State governments.

Estimated total annual reporting and/or recordkeeping burden: 28,000 hours.

The estimated annual burden per respondent/recordkeeper varies from 250 hours to 750 hours, depending on individual circumstances, with an estimated average of 500 hours.

Estimated number of respondents and/or recordeepers: 56 (the fifty States, five territories and the District of Columbia).

Estimated annual frequency of responses: 1.

List of Subjects in 31 CFR Part 205

Grant programs, Grants administration, Intergovernmental relations, Electronic funds transfers.

Authority and Issuance

For the reasons set forth in the Preamble, part 205 of title 31, Code of Federal Regulations, is proposed to be revised to read as follows.

PART 205—FEDERAL FUNDS TRANSFER PROCEDURES

Subpart A—Major Federal Assistance Programs Administered by States

Sec.
205.1 Purpose.
205.2 Definitions.
205.3 Scope.
205.4 Funding techniques.
205.5 Requesting and transferring funds.
205.6 State/Federal agreements.
205.7 Federal agency responsibilities.
205.8 State responsibilities.
205.9 Federal interest liabilities.
205.10 State interest liabilities.
205.11 Interest calculation.
205.12 Direct costs of implementation.
205.13 Annual reports.
205.14 Interest payment.
205.15 Compliance.
205.16 Appeals and dispute resolution.
Appendix A to Subpart A of Part 205—Definition of Major Federal Assistance Program
Appendix B to Subpart A of Part 205—Alternate Interest Calculation Methodology

Subpart B—The Unemployment Trust Fund (UTF)

205.21 Purpose and scope.
205.22 Definitions.
205.23 Limitation on withdrawals.
205.24 Limitation of investment.
205.25 State held UTF funds.
205.26 Separate bank accounts.
205.27 Annuál payment of interest.

Subpart C—Other Recipients

205.31 Purpose and scope.
205.32 Definitions.
205.33 General.

Authority: 5 U.S.C. 301; 31 U.S.C. 3335, 6501, 6503.

Subpart A—Major Federal Assistance Programs Administered by States

§ 205.1 Purpose.

This subpart prescribes the rules for the transfer of funds between the Federal Government and the States for Federal programs subject to Public Law 101–453, the Cash Management Improvement Act of 1990 (hereinafter referred to as CMIA).

§ 205.2 Definitions.

For the purpose of this part:

Advance funding program means a program for which a State can request and receive Federal funds on or before the day funds are paid out for program purposes.

Authorized State Official means the Governor, Comptroller, Treasurer or any other State representative who possesses the legal authority to commit the State for the purposes of this regulation, or such official's designee as certified in writing.

Average clearance means a method of transferring funds to a State on the dollar-weighted average number of days after disbursement required for EFT payments to be settled and for checks to be presented.

Certified reports means reports whose accuracy and content are verified and signed by an Authorized State Official.

Check means a negotiable demand draft or warrant.

Clearance pattern means a statistical model showing the proportion of a total amount disbursed that is debited against the payor's bank account each day.

Day means a calendar day unless specified otherwise.

Disallowance means a decision by a Federal agency that a recipient was not entitled, in whole or part, to funds awarded for a particular claim.

Disburse means the issuance of check or initiation of an EFT payment.

Discretionary grant means an award made under a Federal program in which a Federal agency is statutorily authorized to exercise judgment in selecting the grantee, generally through a competitive process.

Drawdown means any process whereby States request and receive Federal funds. The phrase "draw down" is used as a verb form of this word.

Electronic funds transfer (EFT) means any transfer of funds, other than a transaction originated by check or similar paper instrument, that is initiated through an electronic terminal, telephone, or computer or magnetic tape, for the purpose of ordering, instructing, or authorizing a bank to debit or credit an account. The term includes Fedwire transfers, Automated Clearing House (ACH) transfers, and transfers made at automated teller machines and Point-Of-Sale (POS) terminals.

Equivalent rate means auction average equivalent yield, also known as the auction average investment rate of 13-week Treasury bills.

Estimated clearance (previously known as Delay-of-Draw) means a method of transferring Federal funds to a State on the date the funds are estimated to be paid out based on a clearance pattern.

Federal agency means any executive agency of the United States government, except for the Tennessee Valley Authority (TVA). (The TVA is statutorily excluded from this regulation.)

Federally mandated reimbursable funding program means a program for which Federal law mandates that a State make actual cash outlays of State funds for program purposes before the State can receive Federal funds.

Federal program or *program* means the range of activities generally encompassed under, and classified by, a unique Catalog of Federal Domestic Assistance number (CFDA #).

For program purposes means to fulfill the objectives of a Federal program. In the context of State payments of funds, it refers to making payments to non-State persons or organizations, or payments to the persons or organizations (including State agents and instrumentalities) that are the ultimate recipient of funds being disbursed. It does not include payments to intermediary grantees that are agents or instrumentalities of the State, as illustrated in the following examples.

Example 1: On Day 1, $1 million is transferred from the Federal Government to a central bank account of the State and subgranted (transferred) from the State to its Department of Human Resources. On Day 3, the funds are disbursed to Aid to Families with Dependent Children program (AFDC) recipients and presented for payment according to the following clearance pattern:

Day	Percent of $'s debited from the bank account
1 State receives $1 million and subgrants (transfers) it to the State Department of Human Resources	
2	
3 Checks issued to program recipients	0
4	0
5	0
6	30
7	50
8	10
9	10

Because funds are not considered paid out "for program purposes" until they are paid out to non-State persons or organizations (or the ultimate recipients), in the above example the State would accrue an interest liability to the Federal Government as follows: 5 days on $300,000; 6 days on $500,000; 7 days on $100,000 and 8 days on $100,000.

Example 2: On Day 1, $1 million is transferred from the Federal Government to a central bank account of the State and subgranted (transferred) from the State to a county government the same day. The funds clear the county's bank according to the same clearance pattern as in Example 1. However, because the funds were transferred to a non-State organization (i.e. the local government), and thus considered paid out "for program purposes" the same day they were received from the Federal Government, there would be no accrual of a State interest liability.

Head of an agency means the chief official of a Federal agency, or the authorized representative of such chief official.

Major Federal assistance program is defined in appendix A to subpart A of this part as derived from the Single Audit Act of 1984 at 31 U.S.C. 7501(12).

Obligational authority means the authority to obligate funds which is conferred upon a State when a Federal agency awards the State a grant, whereby the Federal Government provides funds or aid in kind to the State to carry out specified programs, services, or activities.

Pay out means to debit the payor's bank account for purposes of making a payment by EFT or check.

Pre-issuance funding (previously known as Checks Issued-Interest Remitted) means a method of tranferring Federal funds to a State whereby the State draws down the funds in advance of issuing payments via EFT or check.

Recipient means a person or organization outside the Federal Government receiving funds under Federal grant and other programs. *Primary recipient* means a recipient receiving funds directly from the Federal Government. *Subrecipient* means a

recipient receiving funds directly from a primary recipient or through another subrecipient.

Refunds means recoveries of funds previously paid out for program purposes, rebates, and other types of program income that are subject to return to the Federal Government.

Request for funds means a solicitation for funds that is submitted in accordance with Federal agency guidelines.

Secretary means the Secretary of the Treasury of the United States or his representative. The Financial Management Service shall act as the secretary's representative for all matters pertaining to this Act unless otherwise specified.

State means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the Virgin Islands, and the agencies, instrumentalities, or fiscal agents of a State, but does not include a local government within a State or a Federally recognized Indian tribal government. The United States Bureau of the Census' lists of dependent agencies for each State will be used as the initial basis for determining State agencies, instrumentalities, and fiscal agents. The listed agencies, instrumentalities, and fiscal agents, any successor entities, and any newly created entities of the State that administer Federal programs will be used for purposes of this Subpart.

State agent means any person or organization who transacts business on behalf of the State. Examples include a bank or any person or organization conducting banking or other fiscal services for the State.

Supplemental grant means an award granted as an addition to a quarterly, annual or other grant, when funds are exhausted before the end of the grant period.

Trust funds for which the Secretary is the trustee means trust funds administered by the Secretary.

Zero balance accounting (previously known as Checks Paid) means a method of transferring Federal funds to a State on the date funds are paid out.

§ 205.3 Scope.

(a) From October 24, 1992, to the end of each State's 1993 Fiscal Year, this Subpart applies, at a minimum, to the following programs, provided that they are major Federal assistance programs in a State's 1992 Fiscal Year or are estimated by the State to be major Federal assistance programs for its 1993 Fiscal Year:

Medical Assistance Program (CFDA 93.778);
Supplemental Security Income (CFDA 93.807);
Unemployment Insurance (CFDA 17.225);
Highway Planning and Construction (CFDA 20.205);
Family Support Payments to States (CFDA 93.020);
Chapter 1 Programs—Local Educational Agencies (CFDA 84.010);
Pell Grant Program (CFDA 84.063);
National School Lunch Program (CFDA 10.555);
Social Services Block Grant (CFDA 93.667);
Job Training Partnership Act (CFDA 17.250);
Foster Care—Title IV–E (CFDA 93.658);
Special Supplemental food Program for Women, Infants, and Children (CFDA 10.557);
Special Education—State Grants (CFDA 84.027);
Rehabilitation Services—Basic Support (CFDA 84.126);
State Administration Matching Grants—Food Stamp Program (CFDA 10.561);
Alcohol and DRug Abuse and Mental Health Services Block Grant (CFDA 93.992);
Child Support Enforcement (CFDA 93.023);
Low-Income Home Energy Assistance (CFDA 93.028);
Job Opportunities and Basic Skills Training (CFDA 93.021).

(b) From the beginning of each State's 1994 Fiscal Year and thereafter, this Subpart applies, at a minimum, to all major Federal assistance programs. Major Federal assistance programs will be determined based on expenditures from the most recent Fiscal Year for which complete Single Audit data is available from the U.S. Bureau of the Census, or on estimated funding, supported by documentation, for a State's upcoming Fiscal Year.

(c) Additional programs may be covered by this Subpart, subject to the mutual agreement of a State and the Secretary in a State/Federal Agreement.

(d) This Subpart does not apply to payments made to States acting as vendors on Federal contracts, which are subject to the Prompt Payment Act of 1982, as amended, 31 USC 3901 *et seq.*, OMB Circular A–125 "Prompt Payment," and the implementing regulation at 48 CFR part 32.

(e) This Subpart does not apply to the TVA or programs administered by the TVA.

§ 205.4 Funding techniques.

(a) *Choosing funding techniques.* The following funding techniques will be made available for selection by a State for advance funding programs, subject to the approval and agreement of the Secretary:

(1) *Zero balance accounting.* Using a zero balance account, a State requests Federal funds prior to a cutoff time the day EFT payments are settled or checks are presented at State banks. Interest liabilities will not normally be incurred.

(2) *Estimated clearance.* Based on a clearance pattern, a State requests Federal funds prior to a cutoff time the day before EFT payments are scheduled to be settled or checks are expected to be presented at State banks. Interest liabilities will not normally be incurred.

Example: A State mails $1,000,000 in checks to benefit recipients for a Federally funded program. The State has developed the following check clearance pattern for the program, based on when checks have been historically presented for payment:

Day	Percentage of $'s paid out
0 (checks mailed)	0
1	0
2	0
3	0
4	40
5	30
6	15
7	10
8	5

On Day 3, the State requests 40 percent of the funds disbursed, or $400,000, and the Federal agency deposits funds in the State account on Day 4 to coincide with the expected presentment of 40 percent of the total disbursement. On Day 4, the State requests 30 percent of the funds to pay for checks presented on Day 5, and so on. Neither the State nor the Federal Government incurs an interest liability in this example. Furthermore, if the State draws down $400,000 to pay for checks presented on Day 4 and only $390,000 in checks are presented, the State will not incur an interest liability on the $10,000 of Federal funds left in its account. Over the long term, the amounts drawn down and the amounts of checks paid will converge to the historical clearance pattern.

(3) *Pre-issuance funding.* A State requests Federal funds before it initiates EFT payments or issues checks. A State will incur an interest liability to the Federal Government from the day Federal funds are credited to a State account until the day they are paid out for program purposes.

Example: Two business days before a State mails $1,000,000 in checks, it requests $1,000,000 from a Federal agency, which deposits the funds in a State account the next day. The State has developed the following check clearance pattern, based on when the State's checks have historically been presented for payment:

Day	Percentage of $'s paid out
0 (funds deposited)	0
1 (checks mailed)	0
2	0
3	0
4	40
5	30
6	15
7	10
8	5

The State will owe the Federal Government 4 days of interest on 40 percent of the funds, or $400,000, since that amount will be paid out for checks presented 4 days after Federal funds are deposited in a State account. The State will owe 5 days of interest on 30 percent of the funds, or $300,000, 6 days of interest on 15 percent of the funds, and so on.

(4) *Other techniques.* The Secretary will approve other funding techniques that are mutually agreed upon by a State and the Secretary.

(b) *Average clearance.* A State may request approval to use an average day of clearance funding technique, where the State requests Federal funds the day before the dollar-weighted average number of days required for EFT payments to be settled and for checks to be presented at State banks. Interest liabilities will not normally be incurred.

Example: A State mails $1,000,000 in checks to contractors for a Federally funded program. The State has determined the average day of clearance, weighted by dollar amount, to be 5 days after checks are mailed:

Day	Percent of $'s paid out	Factor (day × percentage)
0 (checks mailed)	0	
1	0	
2	0	
3	0	
4	40	1.60
5	30	1.50
6	15	0.90
7	10	0.70
8	5	0.40
Average day of clearance		5.10

The State will request $1 million on day 4 and receive that amount on day 5, without the State or the Federal Government incurring an interest liability.

In determining the dollar-weighted average day of clearance, fractions of days will be rounded to the nearest whole number. The standards and maintenance requirements specified in paragraphs (c), (d) and (e) of this section applying to clearance patterns will apply to average day of clearance calculations.

(c) *Clearance patterns.* When required by the funding technique, clearance patterns will be used to schedule draw downs and to support the calculation of interest. A State may:

(1) Develop a separate clearance pattern for an individual program; or

(2) Develop a composite clearance pattern for a logical group of programs which have the same disbursement method and which can reasonably be expected to have comparable clearance activity. For example, three programs with payments delivered by check to individual recipients could be grouped and one clearance pattern developed. A composite clearance pattern for a group of programs will be applied separately to each program in the group when scheduling drawdowns or calculating interest; or

(3) Develop a clearance pattern on another basis that is approved and agreed upon by the Secretary.

(d) *Standards for clearance patterns.* A State shall ensure that clearance patterns are auditable and accurately represent the flow of Federal funds. The methodology used to develop clearance patterns must result in a reliable representation of a program's clearance activity throughout the Fiscal Year. An Authorized State Official shall certify that a clearance pattern corresponds to the program's clearance activity. The State/Federal Agreement set forth in § 205.6 must specify the methodology and standards the State will use to develop clearance patterns.

(e) *Maintaining clearance patterns.* Clearance patterns shall be re-certified by an Authorized State Official at least every 5 years. If a State has actual or constructive knowledge, at any time, that a clearance pattern no longer corresponds to a program's clearance activity, or if a program undergoes operational changes that may affect clearance activity, the State shall:

(1) Immediately notify the Secretary in writing of the program or programs requiring a new or modified clearance pattern, and

(2) Develop a new clearance pattern and certify that it meets the requirements of paragraphs (c) and (d) of this section.

(f) *Funding of indirect costs/administrative expenses.* Unless otherwise specified in the State/Federal Agreement, the following applies for the funding of administrative expenses and indirect costs:

(1) For programs with a separate grant award for administrative expenses, a State may either:

(i) Select and apply a separate funding technique for the administrative expenses of a program; or

(ii) Request a prorated amount of the quarterly administrative allowance not earlier than 1 business day prior to the disbursement of salary and wage payments under the payroll system of the department administering the program. For example, a State may request:

(A) One-third of the quarterly administrative allowance if payroll is monthly;

(B) One-sixth of the quarterly administrative allowance if payroll is semi-monthly;

(C) A prorated amount of the quarterly administrative allowance if payroll is bi-weekly or weekly.

(2) For programs where an indirect cost rate is applied, a State's drawdowns may include the proportionate share of the indirect cost allowance by applying the indirect cost rate to the appropriate direct costs included in the drawdown.

(3) For programs where a portion of the program grant may be used for indirect costs/administrative expenses, a State's drawdowns may include a proportionate share of indirect costs or administrative expenses, up to any programmatic limitations or the amount of the grant award.

(4) If a State applies a separate funding technique for administrative expenses as provided in paragraph (f)(1)(i) of this section, interest liabilities will accrue in accordance with the interest provision of this Subpart.

(5) No interest liabilities will be incurred on the transfer of funds for administrative expenses or indirect costs if a State applies the funding conventions in paragraphs (f)(1)(ii), (f)(2) or (f)(3) of this section.

§ 205.5 Requesting and Transferring Funds.

(a) *Electronic funds transfer.* To increase the speed and efficiency of funds transfers, to eliminate float, and to reduce interest liabilities, it is the Secretary's goal that beginning January 1, 1995, Federal agencies will use EFT for all transfers of funds to States. Prior to this date, Federal agencies shall use EFT to the maximum extent practicable. States shall use EFT to make payments to Federal agencies for disallowances, refunds and other payments to the maximum extent practicable.

(b) *Minimizing the time between transfer and payment.* State and Federal agencies shall minimize the time elapsing between the transfer of funds from the United States Treasury and the settlement of EFT payments or the presentment of checks at State banks. For advance funding programs Federal

agencies and States shall adhere to the following procedures for each funding technique:

(1) *Zero balance accounting.* A State shall request funds prior to a cutoff time the same day it pays out funds for program purposes, and a Federal agency shall deposit funds in a State account the same day it receives a request for funds.

(2) *Estimated clearance.* A State shall request funds prior to a cutoff time 1 business day before it expects to pay out funds, in accordance with the clearance pattern developed by the State, and a Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

(3) *Average clearance.* A State request funds prior to a cutoff time 1 business day prior to the dollar-weighted average number of days required for EFT payments to be settled and for checks to be presented at State banks, and a Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

(4) *Pre-issuance funding.* A State shall request funds not earlier than 3 business days before the day on which it issues checks or initiates EFT payments, unless the State can justify, and the Secretary agrees to, an interval longer than 3 business days. A Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

§ 205.6 State/Federal Agreements.

Each State is strongly encouraged to enter into a written Agreement with the Secretary which sets forth the terms and conditions for implementing the requirements of this Subpart. If no such Agreement has been signed by October 24, 1992, the funds transfer procedures set forth in paragraph (i) of this section apply until an Agreement is executed and effective. An authorized representative(s) of the Secretary and an Authorized State Official(s) shall approve and sign the Agreement.

(a) *Purpose.* The purpose of the Agreement is to set forth the terms and conditions for using sound cash management practices in the transfer of funds between the Federal Government and the States.

(b) *Listing of covered entities.* The Agreement will include a list identifying entities considered to be agencies, instrumentalities, and fiscal agents of the State for purposes of this Subpart. The United States Bureau of the Census definition of a State will be used as the initial basis for determining the entities to be included in this list.

(c) *Listing of all covered programs.* The Agreement must include a list identifying all programs subject to this Subpart, and a listing of all major Federal assistance programs. This list will be modified as needed to incorporate new programs qualifying as major Federal assistance programs.

(d) *Selection, review and approval of funding techniques.* A State shall select funding techniques subject to the approval and agreement of the Secretary. The Agreement will include a section that identifies the funding technique for each program subject to this Subpart. A State shall not at any time unilaterally change or deviate from an agreed upon funding technqiue.

(e) *Method for calculating and documenting interest.* The Agreement must specify the method to be used for calculating and documenting interest payments and clearance patterns pursuant to the provisions of §§ 205.9 through 205.11 and § 205.4.

(f) *Costs.* The Agreement will clearly describe, and include a budget for, project direct costs for which the State may be reimbursed. These costs are subject to the provisions of § 205.12.

(g) *Expiration of the Agreement.* A State/Federal Agreement executed pursuant to this Subpart shall not be effective for more than five years.

(h) *Interim Agreements.* A State may enter into an Interim Agreement with the Secretary covering the period from October 24, 1992, to June 30, 1993.

(1) An Interim Agreement must specify the funds transfer procedures and the method for determining interest liabilities for the programs subject to this Subpart that are set forth in § 205.3(a).

(2) All Interim Agreements executed pursuant to this section shall expire on June 30, 1993. Beginning July 1, 1993, a State shall either comply with a State/Federal Agreement or comply with the default provisions set forth in paragraph (i) of this section.

(i) *Default procedures for States without Agreements.* Any State that does not have, at any time, an Interim Agreement or a State/Federal Agreement with the Secretary is subject to the following rules:

(1) Wherever practicable, funds transfers shall be made through a Zero Balance Accounting or Estimated Clearance funding technique.

(2) If there exists a Federal requirement or mandate that precludes usage of the mechanisms cited in paragraph (i)(1) of this section, then the Federal agency and the State, subject to approval by the Secretary, shall arrange for the transfer of funds to be made in accordance with such requirements and all applicable provisions of this Subpart.

(3) If it is not practicable for a State to use the techniques cited in paragraph (i)(1) of this section, the State shall propose to the Secretary an alternative, citing all relevant impediments, including but not limited to constitutional or statutory proscriptions.

(4) The State is encouraged to submit to the Secretary a proposal outlining a plan for entering into an Agreement. The proposal will identify the impediments to signing an Agreement, and will serve as a basis for further discussions and cooperative efforts aimed at reaching a mutually acceptable Agreement.

§ 205.7 Federal agency responsibilities.

The heads of Federal agencies disbursing funds to States shall be responsible for the following:

(a) Designating an official representative to serve as a lead contact for coordinating dealings with States and the Treasury that are related to this Subpart. The name of such representative shall be forwarded in writing to the Secretary by [Insert date 30 days after the effective date of the Final Rule]. If a Federal agency fails to notify the Secretary as indicated, then the Federal agency's Chief Financial Officer shall be considered the appropriate contact until written notification stating otherwise is received by the Secretary.

(b) Providing advice on the proposed provisions of the State/Federal Agreement if so requested by the Secretary.

(c) Ensuring that disbursements are:

(1) In accordance with the methods agreed to in the State/Federal Agreements for those States that have entered into such Agreements, or

(2) In accordance with the rules set forth in this Subpart for States with which there is no Agreement.

(d) Transferring only the immediate funds required by a State for carrying out approved programs and projects.

(e) Developing and maintaining the necessary systems and procedures required for making funds transfer through EFT.

(f) Allowing States to submit requests for funds, or bills, on a daily basis, for both advance funding and Federally mandated reimbursable funding programs. This requirement shall not be construed to change Federal agency guidelines defining a properly completed and submitted request for funds, or bill. The Secretary, in cases of repeated noncompliance with this requirement, shall collect from a Federal agency all, or a portion, of the interest liability incurred by the Federal Government due to the Federal agency's noncompliance, notwithstanding § 205.15(b). A Federal agency may request a waiver of payment of the interest charge, contingent upon the agency providing the Secretary with justification. From October 24, 1992, to June 30, 1993, this paragraph applies only to programs listed in § 205.3(a). Thereafter, this paragraph applies only to major Federal assistance programs.

(g) Paying State claims in accordance with the procedures established for funding techniques, as set forth in § 205.5.

(h) Reviewing the interest report submitted by the States for reasonableness, whenever requested by the Secretary. This may include comparing the report with agency records and determining whether or not the State is in compliance with this Subpart. The Annual Report will be available upon Federal agency request.

(i) Developing, maintaining, updating and certifying clearance patterns for programs where the Federal Government makes payment on behalf of States. The clearance pattern will conform to the standards established for State clearance patterns in § 205.4.

(j) Supplying each State with interest calculations and other data needed to complete the Annual Report for programs where the Federal agency makes payment on behalf of States, no later than December 31 for the State's most recently completed Fiscal Year.

(k) Making available to a State, the Secretary, the Comptroller General and the Federal agency's Inspector General, upon 30 days written notice, all records related to both the Federal agency's computation of interest due under paragraphs (h), (i), and (j) of this section, and the Federal agency's accounting for State program funds under this section. The Federal agency shall allow the above listed parties to verify the accuracy and reasonableness of its clearance patterns, interest calculations and its accounting for Federal program funds.

(l) Executing grant awards to States on a timely basis, consistent with program purposes and regulations of the Director, OMB, to assure the availability of funds and to preclude Federal interest liabilities.

§ 205.8 State responsibilities.

States receiving Federal funds regulated by this subpart shall be responsible for the following:

(a) Designating an official representative to serve as a lead contact person for coordinating dealings with the Secretary and other Federal agencies regarding the requirements of this Subpart. The name of such representative shall be forwarded in writing to the Secretary no later than [Insert date 30 days after the effective date of the Final Rule]. If a State fails to notify the Secretary as indicated, then the State's Chief Financial Officer(s) (or closest equivalent, as determined by the FMS) shall be the contact until written notification stating otherwise is received by the Secretary.

(b) Entering into negotiations with the Secretary concerning the establishment of a State/Federal Agreement as described in § 205.6.

(c) Ensuring that requests for Federal funds are:

(1) In accordance with the techniques agreed to in the State/Federal Agreements for those States that have entered into such Agreements; or

(2) In accordance with the rules set forth in this Subpart for States with which there is no Agreement.

(d) Drawing down only funds immediately required for carrying out approved programs and projects.

(e) Submitting requests for funds under Federally mandated reimbursable funding programs on a timely basis.

(f) Developing and maintaining necessary procedures that enable the State, its internal agencies, financial institution(s) and other fiscal agents to utilize EFT with respect to transfers with the Federal Government.

(g) Accounting for funds made available to the State as Federal Government funds in the accounts of the State. Neither this requirement, nor anything else in this subpart, will be interpreted so as to require a State to deposit funds received by it from the Federal Government in a separate bank account.

(h) Coordinating with the appropriate Federal agency the repayment of refunds of Federal funds. In accordance with Federal agency procedures or direction, the State shall:

(1) At the earliest practicable time, return such refunds to the Federal agencies administering the Federal program for which the disbursements were originally made; or

(2) Deduct the amount of such refunds from the amounts which would otherwise be subsequently disbursed to the State for such programs from the administering Federal agencies.

(i) Accounting for all interest that accrues as a result of disallowances, refunds, and other non-routine transactions. The calculation and reporting of such interest shall be performed as required under §§ 205.10 through 205.13.

(j) Developing, maintaining, updating and certifying clearance patterns for Federal funds as described under § 205.4.

(k) Calculating interest payable to and due from the Federal Government, as required under §§ 205.11 and 205.13.

(l) Maintaining separate, formal accounting records for direct costs.

(m) Ensuring that monitoring and accounting procedures are sufficient to permit the tracking of funds to the level of expenditure sufficient to verify interest liabilities for each Federal program.

(n) Retaining all records supporting interest calculations and clearance patterns for a period of 5 years from the end of the State Fiscal Year for which they were calculated, or until any applicable dispute is resolved, whichever period is longer, unless notified in writing by the Secretary to extend the retention period.

(o) Submitting an Annual Report as prescribed in § 205.13.

(p) Exchanging the aggregate net interest payable to or due or from the Federal Government, on an annual basis as prescribed under § 205.14.

(q) Making available to the Secretary, the head of a Federal agency, its Inspector General or the Comptroller General, upon 30 days written notice, all records related to the State's computation of interest and its accounting for Federal funds under this section. The State shall allow the above listed parties to verify the accuracy of its clearance patterns, interest calculations, direct cost claims and its accounting for Federal funds.

(r) Establishing procedures to minimize the time elapsing between the transfer of funds to a non-State subrecipient and the time those funds are paid out by such subrecipient.

§ 205.9 Federal interest liabilities.

(a) *General.* A State shall be entitled to interest from the Federal Government if it pays out its own funds for program purposes with valid authorization, appropriation, and obligational authority under Federal law, Federal regulation, or Federal-State agreement. The Federal Government shall incur an interest liability from the day a State pays out its own funds for program purposes to the day Federal funds are credited to a State account, subject to the following conditions and limitations.

(1) *Failure to request funds.* If a State fails to request funds in accordance with the procedures established for its funding techniques, as set forth in § 205.5(b) or in a State/Federal Agreement, the State shall not be

entitled to interest from the Federal Government for any period prior to the day a Federal agency receives a request for funds.

(2) *Discretionary grant programs.* A State shall not be entitled to interest if it pays out its own funds prior to the day a Federal agency officially notifies the State in writing that a discretionary grant project has been approved, notwithstanding any other provision in this section.

(3) *Supplemental grants.* Except as provided in paragraph (c)(2) of this section, a State shall not be entitled to interest if it pays out its own funds prior to the day a Federal agency officially notifies the State in writing of a supplemental grant award.

(4) *Federal-aid highway programs.* For programs and projects funded out of the Federal Highway Trust Fund, no Federal interest liability will accrue prior to the day the Federal Highway Administration receives a request for funds.

(b) *Late appropriations.* If a State pays out its own funds due to delay in passage of a Federal appropriations act, the State will be entitled to interest if an appropriations act, as enacted, covers the time period of the State's expenditure and permits payment for expenses already incurred by the State.

(c) *Lack of obligational authority.* If a State pays out its own funds for program purposes without receiving obligational authority from the grantor Federal agency, the State will be entitled to interest if obligational authority is explicitly given to the State retroactively to cover the day on which the State made its expenditure. This case includes, but is not limited to, the following situations:

(1) *Delays in award notifications.* If a State pays out its own funds due to a delay in receiving official notification of a quarterly or annual grant award from a Federal agency, the State will be entitled to interest only if the grant award covers the time period during which the State made its expenditure.

(2) *Supplemental grants for entitlement programs.* If a State pays out its own funds prior to the day a Federal agency officially notifies the State in writing of a supplemental grant award for an open-ended entitlement program, the State will be entitled to interest only if the supplemental grant award covers the time period during which the State made its expenditure.

(d) *Forward funding.* A State will not be entitled to interest if it pays out its own funds in anticipation of receiving funds that have been authorized or appropriated for a future Fiscal Year.

(e) *Exhausted appropriations under appropriated entitlements.* If a State pays out its own funds due to exhausted appropriations under an appropriated entitlement program, the State will be entitled to interest only if appropriation and obligational authority are explicitly provided retroactively to cover the day on which the State made its expenditure.

(f) *Disbursements on behalf of a State.* For programs in which the Federal Government makes payments on behalf of a State, such as Supplemental Security Income, a State will be entitled to interest from the Federal Government if State funds are in a Federal agency's account prior to the day the Federal agency pays out the funds for program purposes. The Federal Government will incur an interest liability from the day State funds are credited to the Federal agency's account to the day the Federal agency pays out the State funds for program purposes.

§ 205.10 State interest liabilities.

(a) *General.* The Federal Government will be entitled to interest from a State if Federal funds are in State accounts prior to the day the State pays out the funds for program purposes, except as provided in § 205.4(f). The State will incur an interest liability from the day Federal funds are credited to a State account to the day the State pays out the Federal funds for program purposes.

(b) *Refunds.* For each refund transaction of Federal program funds, a State will incur an interest liability from the day the refund is credited to a State account to the day the refunds are either paid out for program purposes or credited to a Federal agency's account.

(c) *Disallowances.* If a Federal agency disallows a State expenditure of Federal funds, the State will incur an interest liability from either the day the State paid out funds in connection with the disallowance or the day the State drew down funds in connection with the disallowance, whichever is later, to the day funds are credited to the Federal agency's account. If the date of drawdown or expenditure cannot be determined, the State will incur an interest liability from the median day of the quarter during which the State drew down funds in connection with the disallowance.

(d) *Payments on behalf of a State.* For programs in which the Federal Government makes payments on behalf of a State, the Federal Government will be entitled to interest from a State if it pays out Federal funds for program purposes on behalf of the State. The State will incur an interest liability from the day the Federal Government pays out the Federal funds for program purposes to the day State funds are credited to the Federal Government's account. However, no State interest liability will accrue prior to the day the State receives a request for funds.

(e) *Exception.* A State will not owe the Federal Government interest as set forth in this section if Federal law prescribes that interest earned on Federal funds must be used for program purposes.

§ 205.11 Interest calculation.

(a) *State.* States shall track and calculate interest liabilities owed to and due from the Federal Government in accordance with this section. States shall calculate interest liabilities for each program subject to this Subpart.

(b) *Federal.* A Federal agency shall track and calculate interest liabilities for all programs subject to this Subpart for which the Federal agency makes payments on behalf of States.

(c) *Trust funds.* States shall separately track and calculate interest owed to or due from each trust fund for which the Secretary is trustee, and where appropriate, each trust fund account.

(d) *Onset.* Interest will begin accruing October 24, 1992. The first computation period will be from October 24, 1992 to the end of each State's Fiscal Year. Thereafter, a State shall track and calculate interest for its Fiscal Year.

(e) *Interest rate.* The interest rate will be the annualized rate equal to the average equivalent yields of 13-week Treasury Bill auctioned during the period of the State's Fiscal Year. The Secretary will provide the rate to each State.

(f) *Interest calculation methodolgy.* The State/Federal Agreement set forth in § 205.6 will specify a State's interest calculation methodology. The methodology must be auditable and result in an interest calculation which accurately reflects the period of time Federal funds are subject to the provisions of this Subpart.

(g) *Sampling drawdowns for interest calculations.* If a State samples drawdowns when calculating interest, it must do so separately for each program subject to this Subpart. States may either include every drawdown or randomly sample drawdowns to ensure, at minimum, a 95 percent confidence interval subject to a .3 "weighted day" bound of error estimate. See appendix B to subpart A of this part for further explanation.

(h) *Unemployment trust funds.* A State shall account for the actual interest earned less related banking costs on funds drawn from its account in the UTF.

(i) *Alternate interest calculation methodology.* A State that does not have an Agreement with the Secretary, as set forth in § 205.6, shall calculate interest in accordance with appendix B to subpart A of this part.

§ 205.12 Direct costs of implementation.

(a) *Definition.* Direct costs of implementing this Subpart are those costs necessary for the development and maintenance of clearance patterns and those costs necessary for the actual calculation of interest payments.

(1) The State/Federal Agreement set forth in § 205.6 will clearly describe, and include a projected budget of, the direct costs a State expects to incur.

(2) Direct costs do not include expenses incurred for upgrading or modernizing of account systems.

(b) *Reimbursement of direct costs.* A State will be compensated annually for the direct costs of implementation, subject to the following rules and conditions:

(1) Only States that have entered into an Agreement with the Secretary as set forth in § 205.6 may receive any credit for direct costs.

(2) The Secretary will not consider direct costs incurred prior to July 22, 1991, unless a State makes separate application to the Secretary, with justification and documentation, for any such costs.

(3) Direct costs in excess of $30,000 in any year will not be eligible for reimbursement, unless a State can justify to the Secretary that without such costs the State would be unable to develop clearance patterns or perform the actual calculation of interest.

(4) The State must maintain separate, formal accounting records that support its claim for direct costs.

(5) The State must submit a claim for direct costs, certified for accuracy by an Authorized State Official, as part of its Annual Report. No direct costs for prior years will be considered.

(6) The Secretary shall review all direct cost claims for reasonableness. Unreasonable cost claims, as determined by the Secretary, shall not be reimbursed. The Secretary will notify a State of the amount of reasonable direct costs to be reimbursed.

(7) The Secretary will score each State's direct costs against the total interest owed by all States for the combined non-trust fund programs, to the extent possible. The Secretary will subsequently reduce State interest liabilities and, to the extent possible, adjust Federal interest liabilities, prior to offsetting the two, to effect direct cost reimbursement for each State.

(c) Direct costs of implementation, as defined in paragraph (a) of this section, will not be included for consideration by the State in the development of its State-wide cost allocation plan as provided for in OMB Circular A–87 "Cost Principles for State and Local Governments." Any other costs incurred by a State to implement this Subpart will be subject to the procedures provided in OMB Circular A–87.

(d) *Sunset review.* By July 1, 1996, the Secretary will review the policies in this section to determine their effectiveness.

§ 205.13 Annual reports.

(a) A State shall submit by December 31 an Annual Report for its most recently completed Fiscal Year. The Annual Report will be submitted to the FMS both in hard copy and on computer diskette, or by other electronic means as prescribed by the FMS, and will, at a minimum, contain the following:

(1) Gross interest owed by the Federal Government to the State for each program, excluding interest on overturned disallowances, refunds and other non-routine transactions.

(2) Gross interest owed by the State to the Federal Government for each program, excluding interest owed on disallowances, refunds, and non-routine transactions.

(3) Gross interest owed by the State to the Federal Government on disallowances, refunds, and other non-routine transactions.

(4) Gross interest owed by the Federal Government to the State on overturned disallowances, refunds and other non-routine transactions.

(5) Net interest owed by the State or Federal Government for each program.

(6) Gross interest owed by the Federal Government to the State for each trust fund.

(7) Gross interest owed by the State to the Federal Government for each trust fund.

(8) Net interest owed by the State or Federal Government for each trust fund.

(9) Gross interest owed by the Federal Government to the State for the combined non-trust fund programs.

(10) Gross interest owed by the State to the Federal Government for the combined non-trust fund programs.

(11) Net total interest owed by the State or Federal Government for the combined non-trust fund programs.

(12) Actual interest earnings on funds drawn from the State's account in the UTF.

(13) Related banking costs on funds drawn from the State's account in the UTF.

(14) Actual interest earnings less related banking costs on fund drawn from the State's account in the UTF.

(15) Gross interest owed by the Federal Government to the State for the combined programs for each Federal agency.

(16) Gross interest owed by the State to the Federal Government for the combined programs for each Federal agency.

(17) Net interest owed by the State or Federal Government for the combined programs for each Federal agency.

(18) Gross interest owed by the Federal Government to the State.

(19) Gross interest owed by the State to the Federal Government.

(20) Total net interest owed by the State or Federal Government.

(b) A State with a State/Federal Agreement shall submit as part of the Annual Report its claim for the reimbursement of direct costs, in accordance with § 205.12. An Authorized State Official shall certify the claim for accuracy.

(c) An Authorized State Official shall certify the hard copy of the Annual Report for accuracy.

(d) Upon request from a Federal agency, the FMS shall make available for review a State's Annual Report.

§ 205.14 Interest payment.

(a) *Adjusted interest.* Interest owed by a State to the Federal Government and interest owed by the Federal Government to a State for the combined non-trust fund programs will be adjusted by the Secretary, to the extent possible, to effect direct cost reimbursement.

(b) *Net interest payment.* Total interest owed by a State to the Federal Government and total interest owed by the Federal Government to a State for all programs, adjusted for cost reimbursement, will be offset. The payment of net total interest to or from a State for its most recently completed Fiscal Year will occur no later than March 1.

(c) *Disputed amounts.* If the amount of interest payable is disputed pursuant to § 205.16, payment shall be of any undisputed portions. The interest in dispute shall be paid within 14 days of receipt of the decision by an FMS official, as set forth in § 205.16.

(d) *Electronic funds transfer.* Interest payments must be made by EFT.

§ 205.15 Compliance.

(a) *Audits.* All records and documents relating to the transfer of funds, interest calculations, clearance patterns, and direct costs are subject to audit pursuant to the Single Audit Act of 1984, 31 U.S.C.

7501–7507, OMB Circular A–128, "Audits of State and Local Governments," OMB Circular A–133, "Audits of Institutions of Higher Education and other Non-Profit Institutions," the Comptroller General's "Standards for Audit of Governmental Organizations, Programs, Activities and Functions" and the American Institute of Certified Public Accountants audit and accounting guide, "Audits of State and Local Government Units."

(b) *Remedies for federal agency noncompliance.* If a Federal agency materially fails to comply with any of the requirements of this Subpart, the Secretary may charge the agency an amount equal to the cost to the General Fund of the Treasury caused by such noncompliance. In such cases, the Secretary will send a formal Notice of Assessment to an agency's designated cash management official. A separate notice will be sent for each charge. The Notice of Assessment will include, at a minimum, the nature of the deficiency, the amount of the charge, the method of calculation, the date the charge will be imposed and notice of the right to file an appeal. Any charges assessed by the Secretary shall be paid to the maximum extent practicable out of appropriations available for executive agency operations, and shall not be paid from amounts available for funding programs of an executive agency. Charges assessed on an agency that would otherwise cause the agency to be in violation of the Anti-Deficiency Act, 31 U.S.C. 1341, will be deferred to the following Fiscal Year. If no payment has been transferred to the Treasury after 45 calendar days of the date of the Notice of Assessment, the FMS will debit the appropriate account automatically. Nothing under this regulation eliminates or reduces an agency's existing responsibility to minimize cash held by grantees.

(1) *Assessment of a charge for noncompliance.* It is the intent of the Secretary to assess a charge on an agency only in cases of egregious or repeated noncompliance where such noncompliance results in the payment of interest from the General Fund of the Treasury. Such a situation exists where a Federal agency demonstrates a pattern of paying a State or States late.

(2) *Interest from other than federal agency noncompliance.* The accrual of a Federal interest liability will not constitute Federal agency noncompliance if such interest results from circumstances beyond the control of the Federal agency, such as a delay in passage of a Federal appropriations act.

(c) *Remedies for state noncompliance.* If a State egregiously or repeatedly fails to comply with any of the requirements of this Subpart, the Secretary may take one or more of the following actions, as appropriate in the circumstances:

(1) Request a Federal agency or the General Accounting Office to conduct an audit, to determine interest owed to the Federal Government, and implement procedures to recover such interest; or

(2) Disallow all or part of the direct costs the State claims for reimbursement; or

(3) Take other remedies legally available.

§ 205.16 Appeals and dispute resolution.

(a) *Appeal by a Federal agency.* A Federal agency may appeal any charge assessed by the Secretary for noncompliance by submitting an appeal in writing to the Assistant Commissioner, Federal Finance (hereinafter Assistant Commissioner), of the FMS, within 45 calendar days of the date of the Notice of Assessment. The appeal shall include a concise factual statement of the conditions leading to the Notice of Assessment, the basis of the appeal, and the action requested by the agency. In the event of an appeal, the charge imposed under the Notice of Assessment will be deferred pending the results of the appeal.

(1) *Appeal review process.* The Assistant Commissioner shall review the Notice of Assessment, any documentation supporting the Notice, and the written appeal from the agency. If based on this review, the Assistant Commissioner finds that additional information is required, the Assistant Commissioner may request the agency and the FMS to meet with the Assistant Commissioner and others selected by the Assistant Commissioner, as part of the review process.

(2) *Decision.* A written decision will be rendered by the Assistant Commissioner within 30 calendar days of receipt of the appeal. the Assistant Commissioner may unilaterally extend this period for an additional 30 calendar days if required. The decision of the Assistant Commissioner whether to uphold the Notice of Assessment, to overturn the Notice, or to mandate some other action will be stated in the written decision. Other actions mandated may include a reduced charge, a deferral of the charge, an alternate solution to cash management improvement, or any combination thereof. The basis of the decision, the amount of the charge and the effective date of the charge will be stated in the written decision. The effective date of the charge may be retroactive to the date indicated in the Notice of Assessment.

(b) *Resolution of disputes between a federal agency and a State.* In the event of a dispute between a Federal agency and a State concerning matters covered under CMIA or this Subpart, including a dispute between the Treasury and a State concerning the reimbursement of direct costs authorized in the State/Federal Agreement, the following dispute resolution mechanism will be available:

(1) The aggrieved party may submit a written appeal to the Assistant Commissioner within 60 calendar days from the date the State submits its Annual Report. The aggrieved party shall concurrently serve a copy of the written appeal to the other concerned parties.

(2) Within 30 days of the submission of the written appeal, the aggreived party shall submit to the FMS a written statement not exceeding 15 pages, with supporting documentation in appendices, which will articulate the dispute, the aggrieved party's position, and the relief sought. The aggrieved party shall concurrently serve its statement upon the other concerned parties.

(3) Within 30 days of receipt of the aggrieved party's statement, the responding party may submit a response statement not exceeding 15 pages, with supporting documentation in appendices, to the Assistant Commissioner. The responding party shall concurrently serve its response statement to the other concerned parties.

(4) The Assistant Commissioner shall issue a written decision no later than 14 days after the period for the submission of the response statement. The Assistant Commissioner's decision shall be the final agency action on the part of the Secretary for the purposes of judicial review procedures under the Administrative Procedures Act, 5 U.S.C. 701–706, unless either party invokes the provisions of the Administrative Dispute Resolution Act of 1990, 5 U.S.C. 581–593 (hereinafter the ADRA), pursuant to paragraphs (b)(5), (b)(6) and (b)(7) of this section.

(5) If either party does not agree with the decision of the Assistant Commissioner, either party may seek to invoke the assistance of a neutral party appointed under the provisions of the ADRA within 30 days of receipt of the appeal official's written decision. The party invoking the ADRA shall notify both the FMS official and the responding party in writing. With the written mutual consent of the parties, a neutral party appointed under the provisions of the ADRA may assist in resolving the dispute through the use of alternate means of dispute resolution as defined in the ADRA.

(6) If the party invoking the ADRA is unable to reach a satisfactory resolution of the problem using the ADRA, the Assistant Commissioner's decision shall be the final agency action on the part of the Secretary for purposes of the judicial review procedures under the Administrative Procedure Act, 5 U.S.C. 701–706.

Appendix A to Subpart A or Part 205—Definition of Major Federal Assistance Program

Major Federal Assistance Program, for State governments having Federal assistance expenditures between $100,000 and $100,000,000 means any program for which Federal expenditures during the applicable year exceed the larger of $300,000 or 3 percent of such total expenditures. Where total expenditures during the applicable year exceed $100,000,000, the following criteria apply:

Total expenditure of federal financial assistance for all programs		Major federal assistance program means any program that exceeds
More than	But less than	
$100 million	$1 billion	$3 million
1 billion	2 billion	4 million
2 billion	3 billion	7 million
3 billion	4 billion	10 million
4 billion	5 billion	13 million
5 billion	6 billion	16 million
6 billion	7 billion	19 million
over 7 billion		20 million

Appendix B to Subpart A of Part 205—Alternate Interest Calculation Methodology

(a) A State not entering into a State/Federal Agreement shall apply this section's interest calculation methodology to all major Federal Assistance Programs as specified in § 205.3.

(b) States shall refer to Table A: Weighted Program Interest Days, and Table B: Program Interest Calculation and apply the following methodology:

1. *Sampling drawdowns and sample population.* For each program subject to this Subpart, States may either include every drawdown or randomly sample drawdowns to ensure, at minimum, a 95 percent confidence interval no wider than plus-or-minus .3 "weighted day" about the estimated mean.

2. *Calculating weighted program interest days.* "Weighted Program Interest Days" is calculated according to the format established in Table A: Weighted Program Interest Days.

TABLE A.—WEIGHTED PROGRAM INTEREST DAYS

Program	Drawdown amount	Percent of total drawdowns	×	Interest days		=	Weighted days	
				Fed (+)	State (−)		Fed (+)	State (−)
Drawdown 1	$		×				o/0 =	
Drawdown 2			×				o/0 =	
Drawdown 3			×				o/0 =	
Drawdown N			×				o/0 =	
Totals		100					WPID	

where:

Program = Those programs subject to the provisions of this Subpart.

Drawdown Amount = Amount of Federal funds provided for a single drawdown request.

Percent of Total Drawdowns = The ratio of each "Drawdown Amount" to the total of all drawdown amounts expressed as a percentage. This is calculated by dividing each "Drawdown Amount" by the total of all sampled drawdowns.

Interest Days = The period of time during which an interest liability accrues under this regulation, expressed as days and fractions of days.

Fed (+) = Those interest days during which a State incurs an interest liability to the Federal Government. The positive (+) sign denotes that Federal funds were transferred prior to the day the State paid out funds for progrm purposes.

State (−) = Those interest days during which the Federal Government incurs an interest liability to a State. The negative (−) sign indicates that the Federal Government transferred funds after the State paid out its own funds.

Weighted Days = Dollar weighted number of days during which Federal and State interest liabilities accrue. "Weighted Days" is calculated by multiplying "Percent of Total Drawdowns" by either Federal or State "Interest Days". The result is recorded in the corresponding "Weighted Days" column.

Weighted Program Interest Days = Dollar weighted number of days (WPID) during which Federal and State interest liabilities accrue. "WPID" is determined by summing each "Weighted Days" column.

3. *Calculating program interest.* Program Interest is determined according to the methodology established in Table B: Program Interest Calculation.

TABLE B.—PROGRAM INTEREST CALCULATION

Program	Amount	×	i/365	×	WPID		=	Program interest		Net
					Fed (+)	State (−)		Fed (+)	State (−)	
Program 1	$	×	i/365	×			=			
Program 2		×	i/365	×			=			
Program 3		×	i/365	×			=			
Program Z		×	i/365	×			=			
Total										

where:

Program = Those programs subject to the provisions of this Act.

Amount = Total amount of Federal funds provided for a specific program.

i = Average annualized interest rate for the 13 week Treasury Bills auctions during a State's Fiscal Year.

Program Interest = Interest payable to or due from the Federal Government. A negative value denotes a Federal interest liability to a State. A positive value indicates a State interest liability to the Federal Government.

"Program Interest" is calculated by multiplying the program "Amount" by the interest rate "I" and dividing by 365 days. This product is next multiplied by both "Fed (+) WPID" and logged in the "Fed (+) Program Interest" column, and "State (−) WPID" and recorded in the "State (−) Program Interest" column.

Net = The interest liability due to or from the Federal Government. "Net" is calculated by subtracting "State Program Interest" from "Federal Program Interest" amounts. Positive values indicate an interest liability owed to the Federal Government, negative values represent a Federal Government interest liability due to a State.

(c) *Program interest calculation example.* For example, assume a State has only five programs (Medicaid, Aid for Families with Dependent Children, Highway Construction, Job Training Partnership Act, and Alcohol Abuse) that are subject to the reporting requirements of this Act. The State uses the Estimated Clearance method when drawing down Federal funds.

Interest calculation is a two step process. The State must first determine the number of Federal and State Interest Days each program has incurred. From this, each program's interest liability is calculated.

1. Calculation of Weighted Program Interest Days

Sample size. Rather than determine "Interest Days" for every drawdown made in a program, a State may randomly sample sufficient drawdowns to meet or exceed a 95 percent confidence interval plus-or-minus .3 "weighted days."

TABLE C.—WEIGHTED PROGRAM INTEREST DAYS EXAMPLE

Medicare	Drawdown amount	Percent of total drawdowns	×	Interest days		=	Weighted days	
				Fed (+)	State (−)		Fed (+)	State (−)
Drawdown 1	$3,000,000	1.0	×	0		=	0	
Drawdown 2	4,500,000	1.5	×	1		=	.02	
Drawdown 3	4,800,000	1.6	×		1	=		.02
Drawdown 4	3,700,000	1.2	×		2	=		.02
Drawdown 5	6,000,000	2.0	×	3		=	.06	
Totals	300,000,000	100.00				WPID	.08	.04

Percentage of total drawdowns. Each sampled drawdown is divided by the total amount of all sampled drawdowns. Thus, Drawdown 1 equals $3,000,000 or 1 percent of all sampled drawdowns.

Interest days. Rather than detail each sampled drawdown in Table C: Weighted Program Interest Days Example, only five are shown for illustrative purposes. "Interest Days" for each drawdown not shown is 0. Sampled drawdown amounts total $300,000,000. Federal and State interest days are calculated separately.

For Drawdown 1, zero "Interest Days" accrued—the Federal Government's transfer of $3,000,000 coincided with the settlement of those funds. A 1 Day Federal interest charge indicates that Federal funds where requested 1 day to soon, while a 1 Day State interest liability identifies a Federal transfer made one day late.

Weighted days. "Weighted Days" is derived by multiplying the "Percentage of Total Drawdowns" by either Federal or State "Interest Days". For Drawdown 5, 2.0 percent is multiplied by 3 "Federal Interest Days". The product, .06, is entered into the Federal "Weighted Days" column. The same is done for each sampled drawdown.

WPID. Federal and State WPID's are the sum of each "Weighted Days" column. Therefore, Federal WPID's equal .08 days while State WPID's equal .04 days.

The above is repeated separately for each program.

2. Program Interest Calculation

Refer to Table D: Program Interest Calculation Example. For each program, the total amount of program funds drawn down during the year (not the total sampled amount), is multiplied by the yearly interest rate and divided by 365. The result is then multiplied by both the Federal and State "WPID's" and recorded in the corresponding "Program Interest" columns.

TABLE D.—PROGRAM INTEREST CALCULATION EXAMPLE

Program	Amount	×	I/365	×	WPID		=	Program Interest		Net
					Fed (+)	State (−)		Fed (+)	State (−)	
Medicaid	3,000,000,000	×	.06/365	×	.08	.04	=	39,452	19,726	19,726
AFDC	2,500,000,000	×	.06/365	×	1.00	1.90	=	410,959	780,822	(369,863)
Highway Const	1,000,000,000	×	.06/365	×	1.60	.40	=	263,014	65,753	197,261
JTPA	450,000,000	×	.06/365	×	.86	.13	=	65,096	9,616	55,480
Alcohol Abuse	200,000,000	×	.06/365	×	.18	.21	=	5,918	6,904	(986)
Total	7,150,000,000				3.74	2.68		784,439	882,821	(98,382)

For Medicaid, $300,000,000 is multiplied by .06, divided by 365, then multiplied by .08 WPID to equal $39,452. This amount is recorded in the "Federal Program Interest" column. Likewise, the "State Program Interest liability" is calculated resulting in a $19,726 charge. The net amount, $39,452 minus $19,726, or $19,726 is the States' Medicare interest liability to the Federal Government. The same steps are repeated for each remaining program. The total net amount in this example is $98,382 owed to the State by the Federal Government.

Subpart B—The Unemployment Trust Fund (UTF)

§ 205.21 Purpose and scope.

This subpart implements section 5(b) of CMIA relating to the Unemployment Trust Fund (UTF). The definitions and rules in subpart A of this part apply to the UTF unless they are inconsistent with the rules set forth in this subpart.

§ 205.22 Definitions.

The following definitions apply only to this subpart:

Benefit payment account means the account which will consist of all moneys requisitioned from the State's account in the UTF in the Treasury of the United States for the payment of unemployment benefits. Funds withdrawn from the UTF are considered part of the benefit payment account until actually paid out, i.e., to settle EFT payments or to redeem benefit checks.

Clearing account means a State depository account into which employer contributions and other moneys for the UTF are deposited before transfer to the UTF.

Collateralization means the pledging of a security intended to guarantee the safety of unemployment funds outside the UTF (e.g., the benefit payment account).

Earnings means the income or profit secured from investment.

Insurance means protection provided by the Federal Deposit Insurance Corporation (FDIC).

Investments means the placing of capital or laying out of money in a way intended to secure income or profit from its employment.

Overnight means from prior to a financial institution's close of business one day to after its opening of business the next business day (counting Saturdays, Sundays and holidays as separate interest earning days).

Related banking costs means stand-alone, non-credit services which are considered necessary and/or customary for sustaining an account in a financial institution, whether in commercial financial institutions or State Treasurer accounts. Investment service fees are not considered related banking costs and may not be paid with earnings on unemployment funds.

§ 205.23 Limitation on withdrawals.

(a) *Limitation on uses of UTF funds.* In accordance with section 303(a)(5) of the Social Security Act (SSA), 42 U.S.C. 503(a) and Section 3304(a)(4) of the Federal Unemployment Tax Act (FUTA), 26 U.S.C. 3304(a)(3), funds withdrawn from the UTF must be used only for the payment of unemployment benefits, exclusive of the cost of administration.

(b) *Minimizing account balances.* To maximize the security and integrity of unemployment funds, balances in State accounts outside the UTF must be minimized. The DOL will maintain unemployment fund cash management performance measures which will monitor State clearing and benefit payment account balances to assure minimization of account balances.

(c) *Residual daily balances.* Residual daily closing balances must be employed for the benefit of the State account in the UTF through accumulation of interest earnings in interest-bearing accounts, generation of earnings credit to offset financial institution charges for maintenance of State benefit payment accounts, and/or earnings generated by overnight investment (see § 205.24).

§ 205.24 Limitation of investment.

(a) For the purpose of this regulation, investment is defined as a short term use of daily residual balances of unemployment funds in State benefit payment accounts as principal to generate interest earnings. Earnings credits provided by financial institutions on residual balances are also considered investment, although no hard dollar earnings are realized. Those earnings credit must be used to offset financial institution service charges for the custodian of the account.

(b) *Security and liquidity.* Security and liquidity of funds invested is mandatory. Investment of funds withdrawn by a State from its account in the UTF is limited to:

(1) Interest bearing accounts in financial institutions, e.g., Negotiable Order of Withdrawal (NOW) accounts. All funds withdrawn from the State's account in the UTF must be in FDIC insured accounts and/or collateralized for full principal and interest accrued. State/Federal Agreements executed under this regulation will specify insurance and collateralization requirements for each State; or

(2) Overnight reverse repurchase agreements of U.S. Government securities or securities backed by or insured by the full faith of the U.S. Government. Brokers/dealers for the reverse repurchase agreements comprising unemployment funds must be fully subject to and in compliance with Treasury regulations issued under the Government Securities Act of 1986, 31 U.S.C. 3121, 9110, and the reverse repurchase agreement must conform in substance to Public Securities Association master repurchase agreement.

§ 205.25 State held UTF funds.

(a) *Payment for services rendered by State treasurers.* State Treasurers who manage unemployment funds and provide bank services for benefit payment accounts may be paid for the related banking costs of such services. The related banking costs that are attributable to funds withdrawn from the State's account in the UTF may be paid from earnings on funds withdrawn from the State's account on deposit in State Treasurer accounts. The related banking cost are limited to State banking expenses exclusive of administrative costs.

(b) *Earnings on State treasurer investment pools.* Earnings on funds withdrawn from the State's account in the UTF included in State Treasurer investment pools must be credited a pro-rata share of interest earnings of the pool. Trust fund money withdrawn from the State's account in the UTF will only be invested as specified in § 205.24.

§ 205.26 Separate Bank Accounts.

(a) *Separation of State Clearing accounts.* Notwithstanding § 205.8(f), for the purpose of unemployment trust funds, State clearing accounts (incoming funds) must be separate from benefit payment accounts, although they may reside at the same or separate financial institution.

(b) *Tracking and accounting for UTF funds.* All State unemployment funds must be identifiable at all times, separately and completely accounted for, so that all types and volumes of transactions can be tracked as they flow through the State bank accounts. Moneys withdrawn from the State's account, the Federal Employees Compensation Account (FECA), the Extended Unemployment Compensation Account (EUCA), and the Federal Unemployment Account (FUA) in the UTF may be deposited into the same benefit payment account. Separate tracking, accounting, and record keeping must be maintained for these commingled funds from the source in the UTF through redemption of the payment instrument. Related banking costs and actual interest earnings on funds withdrawn from the State's account in the UTF must be allocated reasonably according to the appropriate source of funds.

(c) *Earnings on fund withdrawn from the State's account in the UTF.* Amounts of interest paid by a State on funds withdrawn from its account in the UTF will consist of actual interest earnings less related banking costs.

(d) *Interest on funds withdrawn from the FECA and EUCA accounts.* The provision for the payment of related banking costs does not apply to moneys withdrawn from the FECA, EUCA, and FUA accounts. Moneys withdrawn from the FECA and EUCA accounts are subject to the interest provisions applicable to all other Federal accounts, i.e. the interest rate will be the annualized rate equal to the average equivalent yields of 13-week Treasury Bills auctioned during the period of the State's Fiscal Year, as specified in § 205.11(d).

§ 205.27 Annual payment of interest.

Earnings and interest owed by a State on funds withdrawn from the UTF will be netted with interest owed to the State from the Federal Government and other trust funds, on an annual basis. Amounts owed to each account in the trust fund will be credited through an intragovernmental balancing. Actual earnings less related banking costs on amounts originating in the State's account in the UTF shall be returned to the State's account in the UTF. Interest charges on amounts originating in the FECA and EUCA will be returned to such accounts.

Subpart C—Other Recipients

§ 205.31 Purpose and scope.

The rules set forth in this Subpart apply to all transfers of Federal funds for:

(a) Federal programs that are administered by non-State recipients and non-State subrecipients, including non-State subrecipients receiving Federal funds through a State;

(b) Federal programs administered by a State, including State subrecipients, that are under the dollar threshold for classification as a major Federal assistance program, or are otherwise outside the Scope of subpart A of this part.

Vendor payments on Federal contracts subject to the provisions of the Prompt Payment Act of 1982, as amended, 31 U.S.C. 3901–3906, OMB Circular A–125, and the implementing regulation found at 48 CFR part 32, are not subject to this subpart.

§ 205.32 Definitions.

The following definition applies solely to this subpart:

Working capital advance basis means the procedure whereby funds are advanced to the recipient to cover its estimated funding needs for a given initial period. Thereafter, the recipient is reimbursed for the amount of its actual cash expenditures. The amount of the initial advance shall be geared to the reimbursement cycle so that after the initial period the payments are approximately equal to the average amount of the recipient organization's unreimbursed payments.

§ 205.33 General.

(a) Transfers of Federal funds to a recipient shall be limited to be in accord only with the actual, immediate funds requirements of the recipient in carrying out the purposes of the program or project. The timing and amount of a transfer will be as close as is administratively feasible to the actual disbursements by the recipient for direct program costs and the proportionate share of any allowable indirect costs, whether disbursement by the recipient occurs prior to or after the transfer of funds from the Treasury. It is the goal of the Secretary that within 3 years of the date of enactment of this regulation, all transfers of Federal funds to primary recipients shall be made through EFT, unless circumstances make transfer through an electronic means impracticable.

(b) Transfers from a primary recipient to a subrecipient will conform substantially to the same standards of timing and amount as set forth in the preceding paragraph for transfers from Federal agencies to primary recipients. Federal program agencies shall require primary recipients to develop procedures whereby secondary recipients can obtain funds from the primary recipient as needed for pay out.

(c) When a recipient demonstrates an unwillingness or inability to establish procedures that will minimize the time elapsing between transfer from the Treasury and disbursement for program purposes, the Federal program agency, unless prohibited by the statutes governing the program(s) in question, shall terminate any advance financing and shall require the recipient to finance its operations with its own working capital, making payments to such recipient on a reimbursement basis. In cases in which the reimbursement methods is not feasible, arrangements may be made whereby the operations of the recipient are financed on a working capital advance basis.

(d) Each Federal program agency shall be responsible for:

(1) Making such reviews of the financial practices of recipients, both primary and sub, as are necessary to ensure that the provisions of this Subpart are being compiled with; and

(2) Instituting such remedial measures as may be necessary in the event that the recipient demonstrates its unwillingness or inability to comply with these provisions. Federal program agencies shall formulate procedural instructions which specify the methods employed to carry out these responsibilities.

(e) Interest earned on Federal funds will be treated in accordance with the administrative requirements under the appropriate OMB Circulars.

Russell D. Morris,

Commissioner.

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

S.J. Res. 176/P.L. 102–257

To designate March 19, 1992, as "National Women in Agriculture Day". (Mar. 17, 1992; 106 Stat. 75; 1 page) Price: $1.00

Last List March 18, 1992

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 783-3238** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2233**.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and St. Louis, MO, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday, through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

ST. LOUIS, MO

WHEN: April 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO
RESERVATIONS: Call the Federal Information Center
St. Louis: 1-800-366-2998
Missouri (outside St. Louis): 1-800-735-8004

Title 3—

The President

Proclamation 6415 of March 20, 1992

National Safe Boating Week, 1992

By the President of the United States of America

A Proclamation

America's marine resources are a national treasure. The vast systems of lakes, rivers, and bays across this great land, and the oceans which touch our shores have played a pivotal role in the development of United States industry, agriculture, energy production, and commerce. Beautiful and inviting, our Nation's inland waterways and coastal regions have also provided generations of Americans with opportunities for relaxation and fun. This year, it is anticipated that more than 19 million Americans will engage in recreational boating.

While we Americans are fortunate to have the freedom to enjoy boating and related activities on the open water, at the same time, it is important to remember that an improperly handled watercraft can be dangerous or even deadly. Tragically, about 900 persons die each year on our Nation's waterways. All too often, these deaths are caused by human carelessness and neglect.

To help prevent boating-related accidents, the United States Coast Guard is working together with other government agencies and with private organizations around the country to encourage Americans to "Boat Smart." Smart boating begins with making safety the first priority of every pilot and passenger. Every watercraft operator should know his or her vessel—its equipment, its condition, and its capabilities—as well as the rules and courtesies of navigation. Pilots should have knowledge of and respect for the marine environment in which they will be operating, and all boaters should be aware of prevailing and forecasted weather conditions. Pilots and passengers alike should be equipped with life jackets and know what to do in the event of an emergency. Moreover, because the ability to "Boat Smart" requires clear judgment and physical readiness, no one should operate a watercraft while under the influence of alcohol or drugs.

As these fundamentals of safety indicate, smart boating goes hand in hand with common sense—and with a sense of personal responsibility and concern for others.

To help promote safe boating practices, the Congress, by joint resolution approved June 4, 1958 (36 U.S.C. 161), as amended, has authorized and requested the President to proclaim annually the week beginning on the first Sunday in June as "National Safe Boating Week."

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim the week beginning June 7, 1992, as National Safe Boating Week. I encourage the Governors of the 50 States and the Commonwealth of Puerto Rico and officials of other areas subject to the jurisdiction of the United States to provide for the observance of this week. I also urge all Americans to take this opportunity to learn more about boating safety.

IN WITNESS WHEREOF, I have hereunto set my hand this twentieth day of March, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

RIN 3206-AE27

Senior-Level and Senior Executive Service Positions

AGENCY: Office of Personnel Management.

ACTION: Final regulations

SUMMARY: The Office of Personnel Management (OPM) is issuing final regulations governing pay setting and employment procedures for senior-level, scientific and professional, and Senior Executive Service positions under the Federal Employees Pay Comparability Act of 190 (FEPCA). FEPCA abolished grades GS-16, 17, and 18 of the General Schedule; made changes affecting the pay of positions formerly at these grades, scientific and professional positions established under 5 U.S.C. 3104, and Senior Executive Service positions; and also made certain other changes affecting these positions and their incumbents. The regulations are intended to assure that all rights and benefits are maintained for covered employees.

EFFECTIVE DATE: April 23, 1992.

FOR FURTHER INFORMATION CONTACT: Neal Harwood at 202-606-1610 (FTS 266-1610).

SUPPLEMENTARY INFORMATION: The Federal Employees Pay Comparability Act of 1990 (FEPCA), Public Law 101-509 of November 5, 1990, and Executive Order 12748 of February 1, 1991, made a number of changes affecting the pay and employment conditions of executive positions and personnel. Interim regulations implementing these changes were published on April 23, 1991 (56 FR 18658). We received comments from seven agencies, one group of employees, and an executive organization. Comments are summarized below, along with any revisions that have been made in the interim regulations.

Senior Executive Service (SES) Aggregate Compensation

FEPCA established in 5 U.S.C. 5307 a Governmentwide limitation on certain payments during the calendar year when the payments together with basic pay would exceed pay for Executive Level I as of the end of the calendar year. These payments included allowances (including physicians comparability allowances and retention allowances), differentials, bonuses (including recruitment and relocation bonuses), awards (including SES performance and rank awards), and other similar cash payments. In the interim regulations we interpreted the limitation in 5 U.S.C. 5307 as impliedly superseding the fiscal year limitation on aggregate compensation that was in 5 U.S.C. 5383(b)(1) for SES employees alone because 5 U.S.C. 5307 was the broader, more general, and more recent law. Therefore, we revised 5 CFR 534.402 to provide that SES employees are subject to the aggregate compensation limitations in the new 5 CFR part 530, subpart B, which implemented 5 U.S.C. 5307, in lieu of the 5 U.S.C. 5383(b)(1) limitation.

The executive organization objected to applying the 5 U.S.C. 5307 limitation to SES employees and argued that they should still be subject to the limitation in 5 U.S.C. 5383(b)(1). It further argued that SES employees should continue to be able to carry over compensation in excess of Executive Level I to the next year as they were able to do under 5 U.S.C. 5383(b)(1). For the reasons stated at the time the interim regulations were published, it is still our interpretation that 5 U.S.C. 5383(b)(1) is superseded by 5 U.S.C. 5307. It should be noted, however, that all excess payments that could be carried over to the next year under 5 U.S.C. 5383(b)(1) by SES employees (i.e., performance awards, Presidential rank awards, and physicians comparability allowances) can still be carried over under 5 U.S.C. 5307. Further, under Public Law 102-77 of July 26, 1991, recruitment and relocation bonuses and retention allowances also can be carried over to the next calendar year by SES employees.

Section 534.403 of the regulations on SES performance awards has been revised to change the reference to the aggregate limitation on compensation from fiscal year to calendar year to conform with 5 U.S.C. 5307.

Senior-Level (SL) and Scientific and Professional (ST) Pay

(1) Background

FEPCA established a new 5 U.S.C. 5376 on pay setting for (a) senior-level (SL) positions classified above GS-15 (i.e., positions formerly graded at GS-16, 17, and 18 that were not administrative law judges or members of agency boards of contract appeals), and (b) scientific and professional (ST) positions engaged in research and development and established under 5 U.S.C. 3104 (these positions were formerly paid under 5 U.S.C. 5371). The interim regulations established a new subpart E of part 534 to cover pay for these two categories of positions.

(2) Effective Date of Pay Increases

The interim regulations provided in § 534.503 that agencies must adopt written procedures to show how pay for employees subject to 5 U.S.C. 5376 will be set. Under the interim regulations and FPM Letter 534-9, pay could not be increased until agency written procedures were established, except to meet the minimum rate established by the section; and increases in pay could be made on a prospective basis only.

The executive organization, one agency, and the group of employees who commented argued that agencies should be allowed to make pay increases on a retroactive basis. The various dates that were proposed were the effective date of the regulations (the first full pay period beginning on or after April 23, 1991); February 10, 1991, the first date that the regulations issued under FEPCA for SL and ST positions could have been effective; and the first full pay period in January 1991, when the most recent SES pay increases were effective.

It should be noted that SL employees in fact did receive a pay increase in January 1991 when they were in the General Schedule and the General Schedule salary rates were adjusted by an average 4.1 percent. Further, with the increase in the Executive Level V ceiling

on General Schedule pay in January 1991, all salary rates through GS–18 became fully payable; and employees at GS–16, step 6, and above received increases in payable salaries that exceeded 4.1 percent. Agencies in January 1991 also had the authority to increase ST pay, which at the time could be set between GS–16, step 1, and GS–18.

FEPCA provided that the pay provisions could be made effective not earlier than 90 days and not later than 180 days after enactment. There was no requirement in FEPCA that pay for SL and ST employees be increased, unless an employee's former rate of pay was less than the minimum rate provided under 5 U.S.C. 5376, in which case the increase to the minimum rate was to be made effective as of the effective date of the regulations. That was the only basis in law for making SL and ST pay increases retroactive. Since all other pay increases were optional with the agency, they had to be made on a prospective basis only, following necessary approvals within the agency.

(3) Definition of "Agency" for Pay-Setting Purposes

Two of the military departments recommended that "agency" for pay setting purposes be defined in subpart E of part 534 as including an executive agency or a military department as it is in § 534.401(a) of the regulations for the Senior Executive Service. The Department of Defense, however, has indicated it prefers that policies and procedures for setting SL and ST pay be established at the Department level and that the authority for individual pay setting be delegated by the Department to the military departments. Unlike the SES, where the law specifies that employees will be paid based on specific pay rates established by the President, in the SL and ST pay systems agencies may establish whatever pay structure they like within the minimum and maximum rates established by law. In view of the Department of Defense's wish to establish common policies and procedures for SL and ST pay throughout the Department, we have not defined "agency" to include a military department.

(4) Pay Setting Procedures

Under the interim regulations, agencies could use any dollar amount within the minimum and maximum amounts established by 5 U.S.C. 5376 (120 percent of GS–15, step 1, and Executive Level IV), establish a fixed number of specific rates, or establish a series of pay ranges. The executive organization stated that OPM should establish pay levels comparable to the six rates in the SES rather than allowing agencies to use the full pay range provided in the law. The organization argued that individuals should be paid based on their duties and responsibilities, that in most instances the duties and responsibilities of SL and ST employees are identical to those of SES employees, and that individuals performing similar duties in different agencies should receive the same pay.

In fact, if the duties and responsibilities of SL and ST positions were the same as for SES positions, the positions would have to be placed in the SES in accordance with 5 U.S.C. 3132(a) unless the agency or the positions were excluded from the SES by statute or by the President.

In any event, however, unlike the former GS–16, 17, and 18 pay system, the SL and ST pay systems do not base pay solely on the position the individual occupies. As in the SES, the duties and responsibilities of the position are one factor that an agency may take into account in adjusting pay; but agencies are supposed to consider other factors as well, such as performance.

Although by law there must be a fixed number of pay rates for SES positions, no such requirement exists for SL and ST positions. In view of the factors discussed above, we believe it is appropriate to continue to use the full pay range provided in law for SL and ST positions.

(5) Twelve-Month Waiting Period Between Pay Adjustments

The interim regulations at § 534.503(c) provided that pay for SL and ST employees may be adjusted only once every 12 months, similar to the restriction for pay setting in the SES. The regulations also provided that any annual adjustment in pay each January at the time General Schedule pay rates are adjusted would not be considered to start a new 12-month period if it did not exceed the General Schedule adjustment.

One agency stated that it would like to be able to increase the pay of an executive who is given additional responsibilities immediately, even if the executive had received a pay increase within the previous 12 months. Another agency recommended that temporary pay increases should be permitted when an employee assumes substantial additional duties for a specified period of time without regard to the 12-month waiting period and without regard to the adverse action procedures in 5 CFR part 752 when the employee is returned to the former pay level. We have not made either of these changes, however, since pay under the SL and ST systems is not based directly on the position that the executive occupies, but also takes into account qualifications, performance, etc.

Several agencies requested that agencies be allowed to increase pay at the time of the January adjustments up to the higher of either the General Schedule or SES adjustment that occur at the same time without regard to the 12-month waiting period. At least one agency wants to link certain of its SL and ST rates to the SES rates, and this would not be possible if the SES increases exceeded the General Schedule increases. The maximum pay rate for the SES may not exceed level IV of the Executive Schedule, and it is possible that the annual Executive Schedule increase could exceed the General Schedule increase, although for the January 1992 pay adjustment, the increase for the General Schedule was 4.2 percent and for the Executive Schedule 3.5 percent.

There is no automatic adjustment for SES pay rates each January, however, as there is for General Schedule and Executive Schedule rates based on changes in the Employment Cost Index. Rather, the President has the authority to adjust the rates within the minimum and maximum rates permitted by law; and it is possible for there to be different percentage increases for each of the rates. We do not believe it is appropriate, therefore, to link the SL and ST increases directly to the SES increases.

What we have done instead is to revise the regulations to provide that agencies may adjust SL and ST pay at the time of the annual January adjustments without regard to the 12-month waiting period if the adjustment does not exceed the greater of the General Schedule or the Executive Schedule increase at the time. In that case, the individual's pay may be increased even if the individual has had a pay adjustment within the previous 12 months; and the increase does not start a new 12-month waiting period.

The regulations also have been revised to clarify that the 12-month waiting period applies only to pay changes within an agency and not when an individual transfers between agencies. A similar provision already exists for pay setting in the SES.

Senior-Level (SL) and Scientific and Professional (ST) Employment Procedures

(1) Background

With the abolishment of the executive assignment system by Executive Order 12748, positions and incumbents formerly under the system became subject to the normal procedures governing the competitive and excepted services, except where special procedures are provided in regulation or the Federal Personnel Manual. A new part 319 was established covering employment procedures for scientific and professional (ST) and senior-level (SL) positions classified above GS–15 in the executive branch.

(2) Position Allocations

The interim regulations provided in §§ 319.201 and 319.301 that SL and ST positions could be established only under an allocation approved by OPM.

Two agencies recommended eliminating the requirement that OPM allocate SL position spaces to agencies on the basis that there is no statutory requirement that OPM provide allocations, elimination would simplify administration, and allocation will impede agencies in responding effectively to new program requirements and unduly lengthen the hiring process. Even though there is no statutory requirement for the allocation of SL positions, there is statutory authority in 5 U.S.C. 5108; and we consider it appropriate that SL positions be allocated as are ST and SES positions. Once an agency has its allocation, it may establish positions without the further approval of OPM. Advance planning should forestall any long delay in filling positions.

For the purpose of simplification, the allocation provisions in §§ 319.201 (SL positions) and 319.301 (ST positions) in the interim regulations have been combined at § 319.102(a); and the remaining paragraphs in § 319.102 have been renumbered accordingly. Further, the provision in 5 U.S C. 5108 that OPM may allocate SL positions only in executive agencies has been specified in the regulations.

(3) Competitive Appointments

Under the provisions of 5 U.S.C. 1104, the regulations delegate to agencies the authority to recruit and examine for SL positions in the competitive service, establish competitor inventories (registers), and issue certificates of eligibles. All actions must be taken in conformance with requirements of law, regulation, and FPM instructions. Most agencies have had this authority since 1979 under individual delegation agreements for GS–16, 17, and 18 positions.

Under 5 U.S.C. 3325, all ST positions are in the competitive service, but appointments are made without competitive examination. Therefore, there is no need to delegate examination authority for the filling of ST positions.

(4) Movements Between Pay Systems

One agency recommended that noncompetitive movements be allowed between senior-level (SL) and equivalent systems. These movements are allowed if both the old and new positions are in the competitive service (e.g., from an ST position to a career SL position), or if a career SES employee is moving to a career SL position and has reinstatement rights in the competitive service. (The agency is not required to use merit promotion procedures for such movements.) It should be noted, however, that any movement of a career SES employee to an SL (or ST) position must be voluntary unless the action is taken under reduction-in-force procedures.

Noncompetitive movements are not allowed of an SL or ST employee to a career SES appointment unless the individual has reinstatement rights in the SES since 5 U.S.C. 3393 requires competition for initial career appointment to the SES.

Miscellaneous

In addition to the changes in the interim regulations that were made to take into account the abolishment of grades GS–16, 17, and 18 and the executive assignment system, the following technical changes have been made in the final regulations.

(1) 5 CFR 212.301, which defines "competitive status," has been revised to indicate that career executive assignments under the former executive assignment system no longer exist, but were a basis previously for acquiring competitive status.

(2) 5 CFR 300.402, 317.901(c)(1)(ii), 335.102(a) and (f)(2), 338.101(b), 352.307(b), 352.703(b)(3), 352.803 (c) and (d), 352.904(b)(3), 359.406(b), 359.503(b), 359.701(a), and 432.102(f) have been revised to remove references to the former executive assignment system.

(3) 5 CFR 591.203 has been revised to make editorial corrections.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because it will only affect Federal Government employees who are in executive positions.

List of Subjects

5 CFR Parts 9, 212, 213, 214, 300, 305, 317, 319, 335, 336, 352, 353, 359, 432, and 630

Government employees.

5 CFR Parts 534, 536, and 591

Government employees, Wages.

U.S. Office of Personnel Management.

Constance Berry Newman,

Director

Accordingly, OPM's interim regulations removing 5 CFR parts 9 and 305, amending 5 CFR parts 213, 214, 300, 317, 353, 534, 536, 591, and 630, and adding 5 CFR part 319, published April 23, 1991 (56 FR 18658), are adopted as final with the following changes; and conforming amendments are made to 5 CFR parts 212, 335, 338, 352, 359, and 432 as set forth below:

PART 212—COMPETITIVE SERVICE AND COMPETITIVE STATUS

1. The authority citation for part 212 continues to read as follows:

Authority: 5 U.S.C. 1302, 3301, 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218.

2. In § 212.301, the first two sentences are revised to read as follows:

§ 212.301 Competitive status defined.

In this chapter, competitive status means an individual's basic eligibility for noncompetitive assignment to a competitive position. Competitive status is acquired by completion of a probationary period under a career-conditional or career appointment, or under a career executive assignment in the former executive assignment system, following open competitive examination, or by statute, Executive order, or the Civil Service rules, without open competitive examination.* * *

PART 300—EMPLOYMENT (GENERAL)

3. The authority citation for part 300 continues to read as follows:

Authority: 5 U.S.C. 552, 3301, and 3302; E.O. 10577, 3 CFR 1954–1958 Comp., page 218, unless otherwise noted.

Secs. 300.101 through 300.104 also issued under 5 U.S.C. 7201, 7204, and 7701; E.O. 11478, 3 CFR 1966–1970 Comp., page 803.

Secs. 300.401 through 300.406 also issued under 5 U S.C. 1302(c), 2301, and 2302.

Secs. 300.501 through 300.507 also issued under 5 U S.C. 1103(a)(5).

Sec. 300.603 also issued under 5 U S.C. 1104.

4. Section 300.402 is revised to read as follows.

§ 300.402 Coverage.

This part applies to filling positions in the competitive service; positions in the expected service under Schedules A, B, and C; and positions in the Senior Executive Service.

PART 317—EMPLOYMENT IN THE SENIOR EXECUTIVE SERVICE

5. The authority citation for part 317 continues to read as follows:

Authority: 5 U.S.C. 3392, 3393, 3393a, 3395, 3397, 3593, and 3595.

6. Section 317.901 is amended by revising paragraph (c)(1)(ii) to read as follows:

§ 317.901 Reassignments.

* * * * *

(c) * * *

(1) * * *

(ii) "Noncareer appointee" includes an SES noncareer or limited appointee, an appointee in a position filled by Schedule C, or an appointee in an Executive Schedule or equivalent position that is not required to be filled competitively.

* * * * *

PART 319—EMPLOYMENT IN SENIOR-LEVEL AND SCIENTIFIC AND PROFESSIONAL POSITIONS

7. The authority citation for part 319 continues to read as follows:

Authority: 5 U.S.C. 1104, 3104, 3324, 3325, 5108, and 5376.

8. Section 319.102 is revised to read as follows:

§ 319.102 Procedures.

The following procedures apply to positions subject to this part:

(a) SL positions in an executive agency and ST positions in any agency may be established only under a position allocation approved by OPM. Prior approval of OPM is not required to establish individual positions within the allocation, but the positions must be established in accordance with standards and procedures established by OPM in the Federal Personnel Manual. OPM reserves the right to require the prior approval of individual positions if the agency is not in compliance with these standards and procedures.

(b) Agency heads are responsible for establishing qualifications standards for SL and ST positions in accordance with criteria established by OPM in the Federal Personnel Manual.

(c) Agency heads are delegated authority to approve the qualifications of individuals appointed to SL and ST positions.

(d) Agency heads are delegated authority to recruit and examine applicants for SL positions in the competitive service, establish competitor inventories, and issue certificates of eligibles in conformance with the requirements of law, regulations, and Federal Personnel Manual instructions. ST positions are filled without competitive examination under 5 U.S.C. 3325.

(e) Pay is subject to subpart E of part 534 of this chapter.

8a. Part 319 is amended by removing subpart B, consisting of § 319.201, and subpart C, consisting of § 319.301.

PART 335—PROMOTION AND INTERNAL PLACEMENT

9. The authority citation for part 335 continues to read as follows:

Authority: 5 U.S.C. 3301, 3301, E.O. 10577; 3 CFR 1954–1958 Comp. p. 218.

10. The introductory text of § 335.102 and paragraphs (a) and (f)(2) are revised to read as follows:

§ 335.102 Agency authority to promote, demote, or reassign.

Subject to § 335.103 and, when applicable, to part 319 of this chapter, an agency may:

(a) Promote, demote, or reassign a career or career-conditional employee;

* * * * *

(f) * * *

(2) This paragraph applies to a career, career-conditional, status quo, indefinite, or term employee and to an employee serving under an overseas limited appointment of indefinite duration, or an overseas limited term appointment.

* * * * *

PART 338—QUALIFICATION REQUIREMENTS (GENERAL)

11. The authority citation for part 338 continues to read as follows:

Authority: 5 U.S.C. 3301, 3302, E.O. 10577, 3 CFR 1954–1958 Comp. p. 218.

12. Section 338.101 is amended by revising paragraph (b) to read as follows:

§ 338.101 Citizenship.

* * * * *

(b) A person may be given an appointment in the competitive service only if he or she is a citizen of or owes permanent allegiance to the United States. However, a noncitizen may be given an appointment in rare cases under § 316.601 of this chapter, unless the appointment is prohibited by statute.

* * * * *

PART 352—REEMPLOYMENT RIGHTS

Subpart C—Detail and Transfer of Federal Employees to International Organizations

13. The authority citation for subpart C of part 352 continues to read as follows:

Authority: 5 U.S.C. 3584, E.O. 11552, 3 CFR 1966–1970 Comp., p. 954; § 352.313 also issued under 5 U.S.C. 7701, et seq.

14. In subpart C, § 352.307 is amended by revising paragraph (b) to read as follows:

§ 352.307 Eligibility for transfer.

* * * * *

(b) A person serving in the executive branch in a confidential or policy-determining position excepted from the competitive service under Schedule C of part 213 of this chapter.

* * * * *

Subpart G—Reemployment Rights of Former Bureau of Indian Affairs and Indian Health Service Employees After Service Under the Indian Self-Determination Act in Tribal Organizations

15. The authority citation for subpart G of part 352 continues to read as follows:

Authority: Sec. 105(i), Pub. L. 93–638, 88 Stat. 2210 (25 U.S.C. 450); E.O. 11899; 41 FR 3459; § 352.707 also issued under 5 U.S.C. 7701, et seq.

16. In subpart G, § 352.703 is amended by revising paragraph (b)(3) to read as follows:

§ 352.703 Basic entitlement to reemployment rights on leaving Federal employment.

* * * * *

(b) * * *

(3) An employee serving under a Schedule C excepted appointment.

* * * * *

Subpart H—Reemployment Rights Under the Taiwan Relations Act

17. The authority citation for subpart H of part 352 continues to read as follows:

Authority: 22 U.S.C. 3310; E.O. 12143, 44 FR 37101; § 352.807 also issued under 22 U.S.C. 3310; E.O. 12143, 45 FR 37452.

18. In subpart H, § 352.803 is amended by revising paragraphs (c) (2) and (3), removing paragraph (c)(4), amending paragraph (d)(2) by replacing the comma at the end of the paragraph with a semicolon, revising paragraph (d)(3), removing paragraph (d)(4), and redesignating paragraph (d)(5) as (d)(4) to read as follows:

§ 352.803 Basic entitlement to reemployment rights on leaving Federal employment.

* * * * *

(c) * * *

(2) A non-temporary excepted service employee; or

(3) An employee serving under a career appointment in the Senior Executive Service.

(d) * * *

(3) An employee serving under a Schedule C excepted appointment; or

* * * * *

Subpart I—Reemployment Rights After Service With the Panama Canal Commission

19. The authority citation for subpart I of part 352 continues to read as follows:

Authority: Pub. L. 96–70, 22 U.S.C. 3643.

20. In subpart I, § 352.904 is amended by revising paragraph (b)(3) to read as follows:

§ 352.904 Eligibility.

* * * * *

(b) * * *

(3) An employee who is serving in a position excepted from the competitive service under Schedule C of part 213 of this chapter, or under Presedential appointment; or

* * * * *

PART 359—REMOVAL FROM THE SENIOR EXECUTIVE SERVICE; GUARANTEED PLACEMENT IN OTHER PERSONNEL SYSTEMS

21. The authority citation for part 359 continues to read as follows:

Authority: 5 U.S.C. 1302 and 3596, unless otherwise noted.

22. Section 359.406 is amended by revising paragraph (b) to read as follows:

§ 359.406 Restrictions.

* * * * *

(b) For purposes of this section, a noncareer appointee includes an SES noncareer or limited appointee, an appointee in a position filled by Schedule C, or an appointee in an Executive Schedule or equivalent position other than a career Executive Schedule or equivalent position.

* * * * *

23. Section 359.503 is amended by revising paragraph (b) to read as follows:

§ 359.503 Restrictions.

* * * * *

(b) For purposes of this section, a noncareer appointee includes an SES noncareer or limited appointee, an appointee in a position filled by Schedule C, or an appointee in an Executive Schedule or equivalent position other than a career Executive Schedule or equivalent position.

* * * * *

24. Section 359.701 is amended by removing paragraph (a)(2), redesignating paragraphs (a)(3) and (a)(4) as paragraphs (a)(2) and (a)(3) respectively, and revising newly designated paragraph (a)(2) to read as follows:

§ 359.701 Coverage.

* * * * *

(a) * * *

(2) To a position that meets the same criteria as a Schedule C position; or

* * * * *

PART 432—PERFORMANCE BASED REDUCTION IN GRADE AND REMOVAL ACTIONS

25. The authority citation for part 432 continues to read as follows:

Authority: 5 U.S.C. 4302a, 4303, and 4305.

26. Section 432.102 is amended by revising paragraph (f)(13), removing paragraph (f)(14), and redesignating paragraph (f)(15) as (f)(14) to read as follows:

§ 432.102 Coverage

* * * * *

(f) * * *

(13) An individual occupying a position in the excepted service for which employment is not reasonably expected to exceed 120 calendar days in a consecutive 12 month period; and

* * * * *

PART 534—PAY UNDER OTHER SYSTEMS

27. The authority citation for part 534 continues to read as follows:

Authority: 5 U.S.C. 1104, 5307, 5351, 5352, 5353, 5376, 5383, 5384, and 5385.

28. Section 534.403 is amended by revising paragraph (f) to read as follows:

§ 534.403 Performance awards

* * * * *

(f) Performance awards shall be paid in a lump sum except in those instances when it is not possible to pay the full amount because of the Executive Level I ceiling on aggregate compensation during a calendar year under subpart B of part 530 of this chapter. In that case, any amount in excess of the ceiling shall be paid at the beginning of the following calendar year in accordance with subpart B of part 530 of this chapter.

29. Section 534.501 is amended by revising paragraphs (a)(1) and (b)(1) to read as follows:

§ 534.501 Coverage.

(a) * * *

(1) Senior-level (SL) positions classified above GS–15 pursuant to 5 U.S.C. 5108; and

* * * * *

(b) * * *

(1) Senior Executive Service positions established under 5 U.S.C. 3132, unless the incumbent of the position declined to convert to the SES and under § 317.303 of this chapter remained at grade GS–16, 17, or 18 (now the SL pay system) or under the ST pay system;

* * * * *

30. Section 534.503 is amended by revising paragraph (c) to read as follows:

§ 534.503 Pay setting

* * * * *

(c) Pay of an individual may not be adjusted more than once in any 12-month period.

(1) A pay adjustment includes the assignment of a pay rate upon initial appointment.

(2) An annual adjustment in pay under § 534.504 of this subpart shall not be considered a pay adjustment under this paragraph if it does not exceed the greater of the annual General Schedule adjustment under 5 U.S.C. 5303 or the Executive Schedule adjustment under 5 U.S.C. 5318 effective the same date.

(3) Pay of an SL or ST employee transferring from another agency, or a military department, may be set at any rate. If the pay does not exceed the employee's former rate, the pay action does not start a new 12-month period.

* * * * *

31. Section 534.505 is amended by revising paragraph (b) to read as follows:

§ 534.505 Pay related matters.

* * * * *

(b) *Performance awards.* Performance awards may be paid under 5 U.S.C. 4505a and § 430.504 of this chapter.

PART 591—ALLOWANCES AND DIFFERENTIALS

32. The authority citation for part 591 continues to read as follows:

Authority: 5 U.S.C. 5941; E.O. 10,000; 3 CFR 1943–1948 Comp., p. 792; E.O. 12,510; 3 CFR 1985 Comp., p. 338.

33. Section 591.203 is amended by revising paragraphs (a)(5) and (a)(6) and adding paragraph (a)(7) to read as follows:

§ 591.203 Agencies and employees covered.

(a) * * *

(5) Administrative law judges paid under 5 U.S.C. 5372.

(6) Senior Executive Service.

(7) Senior-level and scientific and professional positions paid under 5 U.S.C. 5376.

BILLING CODE 6325-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-NM-191-AD; Amendment 39-8196; AD 92-06-16]

Airworthiness Directives; Boeing Model 757 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to Boeing Model 757 series airplanes, that requires inspection and repair or replacement, if necessary, of certain side-of-body floor panels. This amendment is prompted by reports of disbonded one-piece inserts in the side-of-body floor panels. The actions specified by this AD are intended to prevent side-of-body floor panels from breaking away from the floor beams during a 9g forward load event.

DATES: Effective April 28, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 28, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Rodriguez, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S; telephone (206) 227-2779. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to Boeing Model 757 series airplanes was published in the Federal Register on October 21, 1991 (56 FR 52488). That action proposed to require inspection for the installation of certain Hexcel side-of-body floor panels, and replacement or repair of those panels, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Two commenters questioned the number of work hours specified in the preamble to the notice that would be needed to accomplish the repairs required by this rule; one of the commenters states that the work hours were underestimated by approximately 150 hours. The FAA agrees with the commenter in part. The FAA estimated the number of work hours (18) based on the required actions only, namely, the inspection. The work hour estimate did not include the time necessary to open or close the access area, which is approximately 16 additional hours. The work hour estimate specified in the cost impact paragraph, below, is changed from 18 to 34 work hours to account for these actions. The economic analysis is limited only to the cost of procedures directly related to the required inspections, since replacement of the panels would be an "on condition" action. Not all airplanes are equipped with the subject panels; however, if the discrepant panels are installed on an airplane, the operator would be required to replace them with airworthy panels, regardless of AD direction, in order to correct an unsafe condition identified in an airplane and to ensure operation of that airplane in an airworthy condition, as required by the Federal Aviation Regulations.

One commenter requests that the proposed compliance time of 18 months be extended to 36 months; or that an 18-month compliance time for the inspection, followed by an 18-month compliance time for the repairs, be established. A 36-month compliance time would allow operators to accomplish the requirements of the AD during regularly scheduled maintenance, without disrupting service and avoiding special scheduling for the inspections. The FAA concurs that the compliance time may be extended somewhat. Based on the information available to date, the FAA finds that approximately 40 percent of the panels installed fleetwide could need repair or replacement. Therefore, in light of this data and the lengthy repair times, the FAA has determined that the compliance time may be extended to 24 months so that the inspection and any repair/replacement could be accomplished during regularly scheduled maintenance at a location where necessary special equipment and trained personnel would be available. This extension of 6 additional months will not adversely impact safety. The final rule has been revised accordingly.

The manufacturer requested that proposed paragraph (a) be revised to refer to replacement of the panel rather than to replacement of the one-piece inserts. The FAA notes that the only method for replacing these inserts is to replace the entire panel and, therefore, concurs that the clarification is appropriate. Paragraph (a) of the final rule has been revised and reformatted to clarify this point.

A third commenter concurs with the rule as proposed.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously describe. The FAA has determined that these changes will neither significantly increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 193 Boeing Model 757 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 113 airplanes of U.S. registry will be affected by this AD, that it will take approximately 34 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $211,310. This total cost figure assumes that no operator has yet accomplished the requirements of this AD action.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-06-16. Boeing: Amendment 39-8196. Docket 91-NM-191-AD.

Applicability: Model 757 series airplanes, listed in Boeing Alert Service bulletin 757-53A0060, dated August 8, 1991, certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To prevent side-of-body floor panels from breaking away from the floor beams during a 9g forward load event, accomplish the following:

(a) Within the next 24 months after the effective date of this AD, examine the identification placards of each side-of-body floor panel to determine the manufacturer and date of manufacturer of the panel, as specified in Figure 1 of Boeing Alert Service Bulletin 757-53A0060, dated August 8, 1991.

(1) If the panel was manufactured by Hexcel before January 7, 1991: Prior to further flight, repair all one-piece inserts in the panel or replace the panel, in accordance with Boeing Alert Service Bulletin 757-53A0060, dated August 8, 1991.

(2) If the panel was manufactured by Hexcel panel on or after January 7, 1991, or if the panel was not manufactured by Hexcel: No further actions is required.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD can be accomplished.

(d) The inspection shall be done in accordance with Boeing Alert Service Bulletin 757-53A0060, dated August 8, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington, 98124. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(e) This amendment becomes effective on April 28, 1992.

Issued in Renton, Washington, on February 27, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-6742 Filed 3-23-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-186-AD; Amendment 39-8198; AD 92-07-02]

Airworthiness Directives; Boeing Model 737-300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to Boeing Model 737-300 series airplanes, that currently requires a one-time inspection of the engines' nacelle strut firewall duct assemblies for proper application of firewall sealant. This amendment expands the applicability of the existing AD to add additional affected airplanes. This amendment is prompted by information from the manufacturer which indicates that the firewall sealant apparently was not applied properly during production on 141 additional airplanes. This condition, if not corrected, could compromise the integrity of the engines' nacelle strut firewall seal.

DATES: Effective April 28, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 28, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen Bray, Seattle Aircraft Certification Office, Propulsion Branch, ANM-140S; telephone (206) 227-2681; fax (206) 227-1181. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 90-08-08, amendment 39-6572 (55 FR 13259, April 10, 1990), which is applicable to Boeing Model 737-300 series airplanes, was published in the Federal Register on November 15, 1991 (56 FR 58002). The action proposed to expand the applicability of the existing AD to include additional affected airplanes.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Two commenters support the proposed rule.

A third commenter, the manufacturer, points out that the correct number of additional affected airplanes is 158 instead of 141, as was indicated in the preamble to the notice. The FAA concurs that the number of affected airplanes cited by the commenter is currently correct, and the economic analysis paragraph, below, has been changed to reflect the correct number of affected airplanes. This information does not change the applicability of this rule, however, since the applicability pertains to those specific airplanes "listed in Boeing Service Bulletin 737-54-1028, Revision 1, dated July 11, 1991."

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 349 Model 737-300 series airplanes of the affected design in the worldwide fleet. It is estimated that a total of 216 airplanes of U.S. registry will be affected by this AD; this number represents 121 airplanes affected initially by AD 90-08-08 and 95 additional airplanes that are affected directly by this new AD action. It will take approximately 2 work hours per

airplane to accomplish the required inspection actions, at an average labor charge of $55 per work hour. Based on these figures the total impact of this AD on U.S. operators is estimated to be $23,760.

The total cost impact of AD 90-06-06 on U.S. operators was $13,310. By expanding the applicability of the rule via this AD action, the total additional cost to U.S. operators is $10,450.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-6572 (55 FR 13259, April 10, 1990), and by adding a new airworthiness directive (AD), amendment 39-6198, to read as follows:

92-07-02. Boeing: Amendment 39-6198. Docket 91-NM-186-AD. Supersedes AD 90-06-06; Amendment 39-6572.

Applicability: Model 737-300 series airplanes, listed in Boeing Service Bulletin 737-54-1028, Revision 1, dated July 11, 1991, certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To ensure the integrity of the engines' nacelle strut firewall seal, accomplish the following:

(a) For airplanes listed in Boeing Service Bulletin 737-54-1028, dated August 17, 1989: At the next scheduled engine removal, or within 8,000 flight hours after May 14, 1990 (the effective date of AD 90-06-06, Amendment 39-6572), whichever occurs sooner, inspect the engines' nacelle strut door assemblies for proper application of firewall sealant in accordance with Boeing Service Bulletin 737-54-1028, dated August 17, 1989, or Revision 1, dated July 11, 1991. The door assemblies are located between nacelle station 200.00 and 235.00 and attached to the underside of the strut and spar web at approximately nacelle waterline 132.00. If there are gaps, holes, or voids in the firewall sealant, apply sealant prior to further flight, in accordance with the service bulletin.

(b) For airplanes listed in Boeing Service Bulletin 737-54-1028, Revision 1, dated July 11, 1991, that are not subject to paragraph (a) of this AD: At next scheduled engine removal or within 8,000 flight hours after the effective date of this AD, whichever occurs sooner, inspect the engines' nacelle strut door assemblies for proper application of firewall sealant in accordance with Boeing Service Bulletin 737-54-1028, Revision 1, dated July 11, 1991. The door assemblies are located between nacelle station 200.00 and 235.00 and attached to the underside of the strut and spar web at approximately nacelle waterline 132.00. If there are gaps, holes, or voids in the firewall sealant, apply sealant prior to further flight, in accordance with the previously described service bulletin.

(c) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manger, Seattle ACO.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

(e) The inspections shall be done in accordance with Boeing Service Bulletin 737-54-1028, Revision 1, dated July 11, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(f) This amendment becomes effective April 20, 1992.

Issued in Renton, Washington, on March 3, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-190-AD; Amendment 39-8194; AD 92-06-14]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to certain Boeing Model 727 series airplanes. This amendment requires inspection for cracks and web separation of the body station (BS) 950 side fitting, and repair or replacement of the fitting, if necessary. A terminating action is also provided, which if accomplished, eliminates the need for repetitive inspections. This amendment is prompted by reports of cracks and web separations of the BS 950 side fitting. The actions specified by this AD are intended to prevent failure of the fitting and subsequent depressurization of the airplane.

DATES: Effective April 28, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 28, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Kathi N. Ishimaru, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S; telephone (206) 227-2674; fax (206) 227-1181. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Boeing Model 727 series airplanes was published in the Federal Register on October 11, 1991 (56 FR 51346). That action proposed to require inspection for cracks and web separation of the body station (BS) 950 side fitting, and repair or replacement of the fitting, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

The Air Transport Association (ATA) of America, on behalf of several of its member operators, requests that the recommendations of the Airworthiness Assurance Task Force (AATF) be considered before adoption of this final rule. Several commenters do not want an AD to be issued at all, since they maintain that the 727 Structures Working Group (SWG), which is part of the AATF, should review the service bulletin and determine whether mandatory inspections and modifications are recommended. The FAA does not concur. The FAA has already determined that an unsafe condition exists that is likely to exist or develop on other airplanes of the same design. Service information has been developed, reviewed, and approved, which contains procedures to correct the problem. The FAA considers that any further delay in the issuance of this final rule is neither prudent nor warranted.

Several commenters indicate that, while the initial removal/installation of oversize fasteners may be acceptable, they recommend that the installed fasteners not be removed during subsequent inspections. These commenters consider that the ultrasonic or low frequency eddy current (LFEC) inspections will detect cracks with the fasteners installed, prior to the cracks reaching a critical length. The FAA does not concur. Eddy current inspections with the fasteners removed will detect much smaller cracks than the suggested procedures. Reliance upon ultrasonic or LFEC inspections without the fasteners removed would warrant the inspections to be conducted at more frequent, and likely unreasonable, inspection intervals.

One commenter recommends that a more efficient inspection method be developed, so that fastener removal would not be required at all, even during the initial inspection. The commenter only suggests some general alternatives, however, such as, "ultrasonic or low frequency eddy current" inspections. The FAA cannot concur with this request, since the commenter did not provide complete inspection instructions or data to substantiate that such inspections would be adequate. If such information can be provided, the FAA may consider the approval of the use of such an inspection as an alternative method of compliance, as provided by paragraph (g) of this AD.

Two commenters suggest that the proposed calendar time compliance periods be eliminated. One of the commenters points out that calendar time limits are not included in the referenced Boeing Service Bulletin 727-53-0196, dated February 14, 1991. The FAA does not concur with this request. The stress corrosion crack growth rate is variable, and is not completely dependent upon cyclic loading. Therefore, both calendar time and flight cycle intervals are necessary.

One commenter suggests that cold worked (reworked) holes should be inspected every 9,000 flight cycles, rather than 6,000 flight cycles as proposed in paragraph (c) of the rule. The commenter has been performing inspections approximately every 8,000 flight cycles, and only two cracked fittings have been found. Both of these fittings were replaced. The FAA cannot concur with the request at this time, since the commenter did not supply sufficient information to support the suggested extension of the inspection interval. Information such as the residual strength of the replaced cracked fittings, crack growth rates, detectable crack sizes, and inspection techniques would be needed in order for the FAA to adequately evaluate such an extension. If such information can be provided, the FAA may consider the approval of an extended inspection interval as an alternative method of compliance, as provided by paragraph (g) of this AD.

One commenter requests that cold working of fastener holes should not be required, since cold working and associated oversizing of fastener holes can result in short edge margins and an unserviceable part. The FAA notes that the rule does not specifically require cold working of the holes; however, it does provide different inspection procedures for holes that already have been reworked (cold worked) and for those that have not been reworked. Cold working of the fastener hole is optional on the part of the operator. If the operator decides not to cold work the fastener holes due to the possibility of creating short edge margins, then the operator should follow the procedures specified in paragraph (d) of the rule, which relate to holes that are not reworked.

Another commenter requests that cold working of fastener holes not be permitted. This commenter contends that, since cracks in the area of the holes are the result of stress corrosion and not fatigue, cold working would not provide significant benefits and may, in fact, create additional local stresses. This could accelerate cracking from stress corrosion. Again, the FAA notes that the rule does not require cold working of the holes. In general, however, the FAA does not concur with the commenter's statement. A light, cold work procedure will produce a comprehensive stress on the inside diameter of the hole; this will offset the tensile stress required for stress corrosion cracking to occur.

The same commenter recommends that the repetitive inspection interval for holes that have not been cold worked (reworked) be increased from the proposed 3,000 flight cycles to 6,000 flight cycles. The commenter contends that service experience does not justify a shorter inspection interval. The FAA does not concur. In developing the appropriate inspection interval, the FAA considered the service experience with regard to the addressed problem (eight reports of cracked or separated fittings), the detectable crack size, and the average crack growth rate. After consideration of all the available data, the FAA has determined that the proposed 3,000 flight cycle inspection interval is appropriate.

Several commenters request that the rule be revised to eliminate the requirement to remove weather caulking and to subsequently inspect between the skins at the butt joint. These commenters are concerned that the fitting might become damaged during removal of the weather caulking. One commenter contends that the required visual inspection would be of little value because the skin gap that is exposed after caulking is removed is so small that it will not allow a good visual inspection of the fitting. The FAA concurs with the commenters. The final rule has been revised to eliminate the requirement.

Two commenters requested clarification as to whether a dye penetrant inspection of lightening holes is required. The FAA responds that dye penetrant inspection is not required; the only inspections required are visual, eddy current, and ultrasonic inspections, as specified in paragraph (a) of the rule. This paragraph has been clarified to specify that the dye penetrant inspections are not required.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has

determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 800 Model 727 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 640 airplanes of U.S. registry will be affected by this AD. It will take approximately 88 work hours per airplane per cycle to accomplish the required actions at an average labor rate of $55 per work hour. (The deletion of the previously proposed requirements involving the removal of the weather caulking and inspection of the fitting through the gap between the skins does not significantly reduce the total number of work hours indicated.) Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $3,097,600. This total cost figure assumes that no operators have previously initiated the required inspections or performed any of the optional terminating actions provided by this AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "ADDRESSES."

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-06-14. Boeing: Amendment 39-8194. Docket 91-NM-190-AD.

Applicability: Model 727 series airplanes, listed in Boeing Service Bulletin 727-53-0126, Revision 6, dated December 21, 1989, certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To prevent failure of the body station (BS) 950 side fitting and subsequent depressurization of the airplane, accomplish the following:

(a) Prior to the accumulation of 15,000 total fight cycles or within the next 3,000 flight cycles or 18 months after the effective date of this AD, whichever occurs later, conduct visual, eddy current, and ultrasonic inspections of the body station (BS) 950 side fitting between stringers S-9 and S-13 for cracks and web separations, in accordance with Figure 1 of Boeing Service Bulletin 727-53-0196, dated February 14, 1991. Step 5 of Figure 1 of the service bulletin (which refers to dye penetrant inspections); and Steps 8, 9, 10, and 11 of Figure 1 of the service bulletin (which refer to the removal of weather caulking and inspection of the fitting through the gap between the skins); are not required to be accomplished.

(b) If cracks or separations are found, prior to further flight, repair the body station (BS) 950 side fitting in accordance with Boeing Service Bulletin 727-53-0196, dated February 14, 1991; or Boeing Service Bulletin 727-53-0126, Revision 6, dated December 21, 1989. After repairs, conduct repetitive inspections as follows:

(1) For airplanes on which outboard flange cracks are removed by oversizing the fastener holes, repeat the inspections required by paragraph (a) of this AD at intervals not to exceed 6,000 flight cycles or 3 years, whichever occurs first.

(2) For airplanes on which the external doubler is used to repair only outboard flange cracks, repeat the inspections required by paragraph (a) of this AD at intervals not to exceed 6,000 flight cycles or 3 years, whichever occurs first.

(3) For airplanes on which the external doubler is used to repair either web separations or web separations and outboard flange cracks, repeat the inspections required by paragraph (a) at intervals not to exceed 3,000 flight cycles or 18 months, whichever occurs first.

(4) For airplanes on which the external doubler and the internal angles are used for repair, conduct an x-ray inspection of the repaired area to detect crack growth at intervals not to exceed 12,000 flight cycles or 6 years, whichever occurs first, in accordance with Boeing Service Bulletin 727-53-0126, Revision 6, dated December 21, 1989.

(c) If no cracks or separations are found, and uncracked fastener holes have not been reworked in accordance with Figure 1 of Boeing Service Bulletin 727-53-0196, dated February 14, 1991, repeat the inspection requirements of paragraph (a) of this AD at intervals not to exceed 6,000 flight cycles or three years, whichever occurs first.

(d) If no cracks or separations are found and uncracked fastener holes have not been reworked in accordance with Figure 1 of Boeing Service Bulletin 727-53-0196, dated February 14, 1991, repeat the inspection requirements of paragraph (a) of this AD at intervals not to exceed 3,000 flight cycles or 18 months, whichever occurs first.

(e) The partial replacement of the body station (BS) 950 side fitting in accordance with Boeing Service Bulletin 727-53-0196, dated February 14, 1991, constitutes terminating action for the inspection requirements of this AD for the replaced portion of the fitting. Unreplaced portions must continue to be inspected in accordance with this AD.

(f) The complete replacement of the body station (BS) 950 side fitting in accordance with Boeing Service Bulletin 727-53-0126, Revision 6, dated December 21, 1989, constitutes terminating action for the inspection requirements of this AD.

Note: Replacement of the side fitting in accordance with Boeing Service Bulletin 727-53-0126, Revision 4, dated October 16, 1986; or Revision 5, dated May 28, 1988; is considered in compliance with this paragraph.

(g) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(h) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

(i) The inspections, repairs, and replacements shall be done in accordance with Boeing Service Bulletin 727-53-0196, dated February 14, 1991; and Boeing Service Bulletin 727-53-0126, Revision 6, dated December 21, 1989; as applicable. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(j) This amendment becomes effective April 28, 1992.

Issued in Renton, Washington, on February 27, 1992.

Darrell M. Pederson,

Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-NM-43-AD; Amendment 39-8195; AD 92-06-15]

Airworthiness Directives; McDonnell Douglas Model DC-3 Series Airplanes, Including Those Modified for Turbo-Propeller Power

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to McDonnell Douglas Model DC-3 series airplanes, which currently requires inspections of the wings to detect cracked structure, and repair and/or modification, if necessary. This action revises the inspection procedure, requires modification, and adds additional models to the applicability. This action is prompted by an in-flight wing separation. The actions specified by this AD are intended to prevent reduced structural integrity of the airplane.

DATES: Effective April 28, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 28, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90855-4056. This information may be examined at the FAA, Transport Airplanes Directorate, 1601 Lind Avenue SW., Renton, Washington; or at Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mike Lee, Aerospace Engineer, ANM-122L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90808; telephone (310) 988-5325; fax (310) 988-5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations by superseding AD 69-15-04, Amendment 39-1396 (34 FR 12159), which is applicable to certain McDonnell Douglas Model DC-3 series airplanes, was published in the **Federal Register** on December 19, 1991 (56 FR 65861). That action proposed to require inspection and modification of the wings, if necessary.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

A commenter suggests that the proposed rule include a requirement to install a ½-inch hole in frame 2004439-1 in order to allow better visual access for performing a boroscope inspection. The FAA does not concur. The FAA has determined that the area is sufficiently accessible for accomplishment of the required inspections, without modification to that area. Further, the commenter has not submitted any data to substantiate the continued structural integrity of the airframe once the suggested modification has been accomplished.

The same commenter requests that the proposal be revised to permit continued repetitive visual inspections to be conducted of low utilization airplanes, in lieu of the proposed modification. The FAA does not concur. The FAA has determined that long term continued operational safety will be better assured by design changes to remove the source of the problem, rather than by repetitive inspections. Long term repetitive inspection may not be providing the degree of safety assurance necessary for the transport airplane fleet. This, coupled with a better understanding of the human factors associated with numerous continual inspections, has led the FAA to consider placing less emphasis on repetitive inspection and more emphasis on design improvements. The proposed modification requirement is in consonance with that policy decision.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

There are approximately 2,000 Model DC-3 series airplanes of the affected design in the worldwide fleet. It is estimated that 610 airplanes of U.S. registry will be affected by this AD, that it would take approximately 150 work hours per airplane to accomplish the required initial actions, and that the average labor cost will be $45 per work hour. The cost for required parts is estimated to be $1,000 per airplane. Follow-on actions will require approximately 50 work hours per airplane at $45 per manhour to accomplish the required inspections. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $4,727,500 for the first year, or $7,750 per airplane; and $1,372,500 for each year thereafter, or $2,250 per airplane.

These figures are based on an assumption that no airplane has been modified previously in accordance with the requirements of this AD action.

According to FAA registration records, the mean number of Model DC-3 airplanes registered per owner is about 1.6. Over half of the owners have only one airplane, and the largest number currently operating in a single fleet is 12. There is no easily-available and accurate source of data on the types of businesses in which current U.S. Model DC-3 operators are engaged nor the total number of aircraft of all types that they operate. However, many Model DC-3's are known to be operated by for-hire carriers, especially unscheduled cargo carriers; such use in unscheduled for-hire carriage has been employed here for Regulatory Flexibility Act (RFA) determination purposes.

For air carriers, the FAA defines a "small entity" as one with 9 aircraft (any type) or less; and its criterion for a "significant impact' is at least $3,700 per year for an unscheduled carrier, and $51,800 per year for a scheduled carrier operating aircraft of fewer than 60 seats, such as a Model DC-3.

The estimated $7,750 initial modification expenditure that will be required by the AD for even one Model DC-3 converts at 10% (the 10% discount factor required by the Office of Management and Budget for reconciling non-inflation-adjusted future and present expenditure) to an annual equivalent of over $3,700 per year, unless it is considered to apply to a planning period of approximately 2½ years or more. It is thus conceivable that even a single airplane could generate significant costs for a small operator, in terms of the RFA, if the airplane had no economic use (and thus no sale value for future operation) beyond a 2½ year period after the modification, during which there would not have been enough use of the airplane to bring into effect fully or partially offsetting savings from the proposed reduced reinspection requirements.

However, there would seem to be a low likelihood of such an extreme end-of-life-cycle scenario for Model DC-3's belonging to a substantial number of small operators, and reinspection cost savings may be projected to completely offset initial expenditures within realistic future lifetimes for existing

Model DC-3's (if not in current operators' fleets, then in others to which they might be sold). Savings may be projected to completely offset initial expenditure within a nine-year future period even if the assumed average annual utilization of 667 hours were reduced in 333. Such a period would have added 9 × 333=2,997 additional hours to the airframe, not an unrealistic increment considering the demonstrated longevity of this type airplane.

Therefore, it is concluded that there is unlikely to be a significant negative economic impact on a substantial number of small entities stemming from the combined effects of the mandatory modification and relaxed inspection provisions of the AD.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "**ADDRESSES**."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(A), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-1306, and by adding a new airworthiness directive (AD), amendment 39-8195, to read as follows:

92-06-15. McDonnell Douglas: Amendment 39-8195. Docket 89-NM-43-AD. Supersedes AD69-15-04, Amendment 39-1306.

Applicability: Model DST, Super DC-3, DC-3, DC-3A, DC-3B, DC-3C, and DC-3D series airplanes; all military versions, C-41, C-41A, C-47, C47A, C-47B, C-48, C48A, C-49, C-49A, C49B, C-49C, C-49B, C-49J, C-49K, C-50, C-50A, C-50B, C-50C, C-50D, C-51, C-52, C-52A, C-52B, C-52C, C-53, C-53B, C-53C, C-53D, C-68, C-117A, C-117D, and R4D series airplanes, including those modified for turbo-propeller power; certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent structure failure of the wings, accomplish the following:

(a) For airplanes not modified with the repair or preventive doublers at both wing stations 94.250 and 127.750, in accordance with McDonnell Douglas Service Bulletin 229, any revision; or McDonnell Douglas Service Bulletin 263, any revision through Revision 8, dated December 15, 1971; or McDonnell Douglas Service Rework Drawing SR03578003, dated April 6, 1988; accomplish the following:

(1) Within 900 hours time-in-service after performing the last inspection in accordance with the AD 69-15-04, Amendment 39-1306, or within one year after the effective date of this AD, whichever occurs first, accomplish the following:

(i) Inspect the wing in accordance with McDonnell Douglas Service Rework Drawing SR03578001, dated March 11, 1988; or McDonnell Douglas Service Rework Drawing SR0357802, Revision A, dated September 26, 1988; for the applicable airplanes, using the visual and X-ray techniques specified. Repeat the visual inspection thereafter at intervals not to exceed 2,000 hours time-in-service.

(ii) Modify the airplane to incorporate access holes, in accordance with McDonnell Douglas Service Rework Drawing SR03548001, Revision A, dated March 7, 1989.

Note: Airplanes previously modified to incorporate access holes do not have to be remodified if visibility and access can be obtained.

(2) Within 2,000 hours time-in-service or two years after the effective date of this AD, whichever occurs first, modify the wing in accordance with McDonnell Douglas Service Rework Drawing SR03578003, dated April 6, 1988.

(b) For airplanes modified to incorporate the repair or preventive doublers at both wing stations 94.250 and 127.750, in accordance with McDonnell Douglas Service Bulletin 229, any revision; or McDonnell Douglas Service Bulletin 263, any revision through Revision 8, dated December 15, 1971; or McDonnell Douglas Service Rework Drawing SR03578003, dated April 6, 1988: Within 2,000 hours time-in-service after the last inspection in accordance with AD 69-15-04, Amendment 39-1306, and thereafter at intervals not to exceed 2,000 hours time-in-service, inspect the wing using the visual method specified in McDonnell Douglas Service Rework Drawing SR03578001, dated March 11, 1988; and McDonnell Douglas Service Rework Drawing SR03578002, Revision A, dated September 26, 1988; for the applicable airplanes.

(c) Cracked structure detected during the inspections required by paragraph (a) or (b) of this AD must be repaired or replaced prior to further flight, in accordance with McDonnell Douglas Service Rework Drawing SR03578003, dated April 6, 1988.

(d) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Los Angeles ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of paragraph (a) or (b) of this AD may be accomplished.

(f) The inspections, repairs, and modifications shall be done in accordance with McDonnell Douglas Service Rework Drawings No. SR03578003, dated April 6, 1988; No. SR03578001, dated March 11, 1988; No. SR03578002, Revision A, dated September 26, 1988; and No. SR03548001, Revision A, dated March 7, 1989. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846-0056. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(g) This amendment becomes effective April 28, 1992.

Issued in Renton, Washington, on February 27, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-6741 Filed 3-23-92; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 91-NM-53-AD; Amendment 39-8197; AD 92-07-01]

Airworthiness Directives; SAAB-Scania Model SF-340A Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to SAAB-Scania Model SF-340A series airplanes, which requires the installation of a new hydraulic pressure indicator. This amendment is prompted by reports of insufficient warning of hydraulic pressure loss, and the subsequent loss of nose wheel steering and brakes during taxi. The actions specified by this AD are intended to prevent unexpected loss of nose wheel steering and brakes during taxi.

DATES: Effective April 28, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of April 28, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from SAAB-Scania AB, Product Support, S-581.88, Linköping, Sweden. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Quam, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2145; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to SAAB-Scania Model SF-340A series airplanes was published in the **Federal Register** on April 11, 1991 (56 FR 14665). That action proposed to require the installation of a new hydraulic pressure indicator.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The comment suggests that the rule be revised to reduce the compliance time or, as an interim measure, to require that a placard be placed near the old hydraulic pressure indicators, stating that the indicator may not always be accurate. The FAA does not agree with the commenter's suggestion to install a placard. The currently installed indicators are sufficiently accurate, but the range of indication on the hydraulic pressure gauge between the last red warning line and actual loss of pressure is relatively small. The flight crew, therefore, must be acutely attentive to note when pressure is low. Installation of a placard, as suggested by commenter, will not solve the problem of attentiveness nor will it provide any additional level of safety unless the pilot or mechanic does not monitor the indictors. Whether the problem is actually a pilot problem or a design problem can be argued; however, in either case, the situation is improved by making a positive design change that adds a low pressure warning to the master caution from the main accumulator, as is required by this AD.

As for the request to reduce the proposed compliance time, the commenter provided no data that would justify such a reduction. In general, however, the FAA cannot conclude that a reduction of the proposed compliance time, without prior notice and opportunity for public comment, is warranted. In developing an appropriate compliance time, the FAA considered the safety implications, parts availability, and normal maintenance schedules for timely accomplishment of the modification. To reduce the compliance time of the proposal would necessitate (under the provisions of the Administative Procedure Act) reissuing the notice, reopening the period for public comment, considering additional comments received, and eventually issuing a final rule; the time required for that procedure may be as long as four additional months. In comparing the actual compliance date of the final rule after completing such a procedure to the compliance date of this final rule as issued, the increment in time is minimal. In light of this, and in consideration of the amount of time that has already elapsed since issuance of the notice, the FAA has determined that further delay of this final rule action is not appropriate. However, if additional data is presented that would justify a shorter compliance time, the FAA may consider further rulemaking on this issue.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 82 airplanes of U.S. registry will be affected by this AD, that it will take approximately 1 work hour per airplane to accomplish the required actions, and that the average labor cost will be $55 per work hour. The estimated cost for required parts is $1,008 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $87,186.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption "**ADDRESSES**."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-07-01. SAAB-Scania: Amendment 39-8197. Docket No. 91-NM-53-AD.

Applicability: Model SF-340 series airplanes, Serial Numbers 003 through 138, certificated in any category.

Compliance: Required within one year after the effective date of this AD, unless previously accomplished.

To prevent unexpected loss of nose wheel steering and brakes during taxi, accomplish the following:

(a) Remove main/emergency dual pressure indicator 3DB, Part Number (P/N) 522796 and install main/emergency dual pressure indicator 3DB, P/N 523250, in accordance with SAAB Service Bulletin SF340-29-004, Revision 1, dated November 9, 1990.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager,

Standardization Branch, ANM-113, FAA, Transport Airplane Directorate.

Note: The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplanes to a location where the requirements of this AD can be accomplished.

(d) The installation shall be done in accordance with SAAB-Scania Service Bulletin SF340-28-004, Revision 1, dated November 9, 1990, which includes the following list of effective pages:

Page No.	Revision level	Date
1, 2, 4, 5	1	November 9, 1990.
3	(Original)	September 15, 1988.

This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from SAAB-Scania AB, Product Support, S-581.88, Linköping, Sweden. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(e) This amendment (39-8197), AD 92-07-01, becomes effective on April 28, 1992.

Issued in Renton, Washington, on March 3, 1992.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8345]

RIN 1545-AP49

Arbitrage Restrictions on Tax Exempt Bonds; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to temporary regulations.

SUMMARY: This document contains a correction to the temporary regulations (T.D. 8345), which were published Thursday, April 25, 1991, (56 FR 19023). The regulations relate to the arbitrage rebate requirements applicable to tax exempt bonds issued by States and local governments under section 103 of the Internal Revenue Code.

EFFECTIVE DATE: April 25, 1991.

FOR FURTHER INFORMATION CONTACT: William P. Cejudo (202) 566-3283 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations amend the Income Tax Regulations (26 CFR part 1) promulgated with respect to sections 103, 148, and 149 of the Internal Revenue Code to simplify, clarify, and expand certain provisions of the temporary and proposed regulations §§ 1.148-0T through 1.148-9T and § 1.149(d)-1T published in the Federal Register for May 15, 1989 (54 FR 20787).

Need for Correction

As published, the temporary regulations contain an error which may prove to be misleading and is in need of clarification.

Correction of Publication

Accordingly, the publication of the temporary regulations (T.D. 8345), which was the subject of FR Doc. 91-9559, is corrected as follows:

Paragraph 1. On page 19028, second column, in § 1.148-0T, paragraph (b)(4), line 5 from the top of the column, the language "1991. See § 1.148-1T(d)(3)" is corrected to read "1991. See § 1.149(d)-1T(d)(3)".

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

[FR Doc. 92-6712 Filed 3-23-92; 8:45 am]

BILLING CODE 4830-01-M

26 CFR Part 301

[T.D. 8398]

RIN 1545-AN47

Sale of Seized Property; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to the final regulations (T.D. 8398), which were published Tuesday, March 3, 1992, (57 FR 7545). The final regulations provide guidance relating to requests for the sale of seized property under section 6355(f) of the Internal Revenue Code (the "Code").

EFFECTIVE DATE: April 2, 1992.

FOR FURTHER INFORMATION CONTACT: Kevin B. Connelly, (202) 535-9682 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections amend the Procedure and Administration Regulations (26 CFR part 301) pursuant to section 6335 of the Code.

Need for Correction

As published, the final regulations contain errors which may prove to be misleading and are in need of clarifications.

Correction of Publication

Accordingly, the publication of the final regulations (T.D. 8398), which was the subject of FR Doc. 92-4615, is corrected as follows:

Paragraph. 1. On page 7546, column 2, in the third paragraph, line 12, the language "interests of the taxpayer Because of" is corrected to read "interests of the Internal Revenue Service. Because of".

Par 2. On page 7546, column 2, in the third paragraph, line 30, the language "someone with one expertise in the area" is corrected to read "someone with no expertise in the area".

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

BILLING CODE 4830-01-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 4

RIN 2900-AF26

Disability Evaluations for HIV-Related Illnesses

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) has amended its rating schedule for evaluation of disabilities caused by the human immunodeficiency virus (HIV). This amendment is necessary because prior provisions in the rating schedule did not adequately address all levels of impairment which may be associated with these disabilities. The amendment reflects current medical knowledge regarding HIV-related diseases and allows more equitable evaluations.

EFFECTIVE DATE: This amendment is effective March 24, 1992.

FOR FURTHER INFORMATION CONTACT: Bob Seavey, Consultant, Regulations Staff, Compensation and Pension Service, Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 233-3005.

SUPPLEMENTARY INFORMATION: VA published a proposal to amend 38 CFR part 4 in the Federal Register of August 2, 1991 (56 FR 37053). Interested persons were invited to submit written comments, suggestions or objections on or before September 3, 1991. We received comments from the Veterans of Foreign Wars, the American Legion of Colorado, and two private individuals.

One commenter felt that all federal agencies should use the same classification system for HIV-related illnessses, and asked whether VA had considered using the Walter Reed staging classification or the system devised by the Centers for Disease Control (CDC).

VA's rating schedule is primarily a guide in the evaluation of disabilities, with percentage ratings representing average impairment in earning capacity. By law (38 U.S.C. 1155 [formerly 355]), the rating schedule must be constructed so as to provide ten grades of disability. We are aware of the several classification systems for HIV-related illnesses used by other agencies, but those systems were developed principally for medical purposes and are more suited to selecting treatment protocols or designing and evaluating clinical trials than to VA's statutory objective of assessing impairment of earning capacity. Also, those systems are not regulatory; they are subject to change without the notice-and-comment period required for VA regulations. For these reasons, the commenter's suggestion that the VA incorporate one of those classification systems intact into the rating schedule is not a reasonable alternative to the rule as proposed.

The same commenter believes that including depression in the evaluation criteria only at the 10 percent level creates confusion on rating HIV infection when mental illness is one of its manifestations.

As a general rating principle, the practice of evaluating one aspect of a disability under more than one diagnostic code is prohibited by regulation (see 38 CFR 4.14, "Avoidance of pyramiding"). The second Note following the rule as proposed emphasized this principle by stating that central nervous manifestations, opportunistic infections, and neoplasms may be rated separately under appropriate codes if a higher overall evaluation results, but not in combination with percentages otherwise assignable under the criteria for HIV-related illness. This general rating principle clearly applies to depression of other psychiatric manifestations of HIV-related illness. However, for the sake of clarity and in order to avoid the possibility of confusion which the commenter foresees, we have amended the second Note to specify that psychiatric manifestations may also be rated separately if doing so would be to the veteran's advantage.

The same commenter proposed an alternative rating method relying specifically on the CDC classifications. The commenter would require rating specialists to make a separate assessment of the veteran's functional limitations which would influence the evaluation assigned under the CDC categories.

In order to apply the alternative method recommended, VA would have to include in this regulation both the CDC classifications and a separate table of functional limitations. As previously explained, use of the unmodified CDC classifications is not suited to VA's statutory objectives. The principle of functional impairment is a basic and integral part of all evaluation criteria throughout the rating schedule (See 38 CFR 4.10). To establish a listing of functional limitations apart from the criteria themselves would be inconsistent with the arrangement of the schedule as a whole, and of no discernible advantage to veterans.

Another commenter recommended that the criteria proposed as 0 percent disabling (i.e., asymptomatic HIV infection with or without lymphadenopathy or decreased T4 cell count) should be 10 percent, and that the other levels below 100 percent be increased in percentage to accommodate this change.

VA does not concur. Specifically, this commenter suggested a 10 percent evaluation for HIV infection with either lymphadenopathy and decreased T4 cell count, or for low grade fever with skin rash and extreme fatigue. Since neither lymphadenopathy nor decreased T4 cell count is inherently symptomatic or disabling, they do not, either alone or in combination as the sole manifestation(s) of HIV-related illness, warrant a compensable evaluation. We also note that low grade fever, skin rash, and extreme fatigue would generally qualify for a 10 percent evaluation under this rule as "definite medical symptoms," since it is unlikely they would occur in the absence of a T4 cell count less than 500 and the need for approved medications.

The same commenter suggested that this section of the rating schedule be titled "systemic and infectious diseases" rather than "systemic conditions" because most of the listed conditions are infectious.

This suggestion is beyond the scope of the current rulemaking, which addresses solely the evaluation of HIV-related illness. Since VA is in the process of systematically reviewing each section of the rating schedule, it would be more appropriate for us to assess the suitability and accuracy of the title when that portion of the rating schedule dealing with systemic diseases is reviewed as a whole.

Another commenter suggested that HIV infections be evaluated solely on the extent of immune system destruction as measured by T4 cell count, and that opportunistic infections or other symptoms should be separately evaluated.

VA does not concur. Rating the clinical stage of a disease and its disabling manifestations separately would be a clear violation of the general rating principle prohibiting "pyramiding," as explained above. The current rule allows rating specialists the flexibility to rate according to the disabling symptoms or the stage of HIV-related illness, whichever is to the claimant's advantage, thereby assuring the greatest permissible evaluation.

Another commenter objected to a statement in the preamble to the proposed rule which included shortened lifespan among the aggregate effects of HIV illnesses, noting that the statutory authority for the rating schedule is limited to "average impairment of earning capacity" (38 U.S.C. 1155).

The commenter's reading of VA's statutory authority to create the rating schedule is generally correct. Shortened lifespan was mentioned in the preamble to the proposed rule as part of the total impact of HIV-related illness, and one of many factors demonstrating the need for a revision of that portion of the schedule. However, we did not mean to indicate that ratings would be based on shortened life expectancy, and in fact shortened life expectancy is not a criterion in the text of the rule.

VA appreciated the comments submitted in response to the proposed rule, which is now adopted with the amendment noted above.

The Secretary hereby certifies that this regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601-612. The reason for this certification is that this amendment would not directly affect any small entities. Only VA

beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), this amendment is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that this regulatory amendment is non-major for the following reasons:

(1) It will not have an annual impact on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Catalog of Federal Domestic Assistance numbers are 64.104 and 64.109.

List of Subjects in 38 CFR Part 4

Handicapped, Pensions, Veterans.

Approved: February 7, 1992.

Edward J. Derwinski,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, 38 CFR part 4, subpart B is proposed to be amended as set forth below:

PART 4—SCHEDULE FOR RATING DISABILITIES

Subpart B—Disability Ratings

1. The authority citation for part 4 continues to read as follows:

Authority: 72 Stat. 1125; 38 U.S.C. 1155.

2. Section 4.88a is amended by removing diagnostic codes 6352 and 6353; and revising the heading and diagnostic criteria for diagnostic code 6351 to read as follows:

§ 4.88a Schedule of ratings—systemic diseases.

* * * * *

	Rating
6351 HIV-Related Illness:	
AIDS with recurrent opportunistic infections or with secondary diseases afflicting multiple body systems; HIV-related illness with debility and progressive weight loss, without remission, or few or brief remissions	100
Refractory constitutional symptoms, diarrhea, and pathological weight loss; or minimum rating following development of AIDS-related opportunistic infection or neoplasm	60
Recurrent constitutional symptoms, intermittent diarrhea, and on approved medication(s); or minimum rating with T4 cell count less than 200, or Hairy Cell Leukoplakia, or Oral Candidiasis	30
Following development of definite medical symptoms, T4 cell count less than 500, and on approved medication(s); or with evidence of depression or memory loss with employment limitations	10
Asymptomatic, following initial diagnosis of HIV infection, with or without lymphadenopathy or decreased T4 cell count	0

Note (1): The term "approved medication(s)" includes medications prescribed as part of a research protocol at an accredited medical institution.

Note (2): Psychiatric or central nervous manifestations, opportunistic infections, and neoplasms may be rated separately under appropriate codes if higher overall evaluation results, but not in combination with percentages otherwise assignable above.

[FR Doc. 92-6580 Filed 3-23-92; 8:45 am]

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[CA-12-6-5261; FRL-4115-6]

Approval and Promulgation of Implementation Plans; State of California; South Coast Air Quality Management District and San Diego County and Ventura County Air Pollution Control Districts

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rulemaking.

SUMMARY: On April 5 and May 13, 1991, the California Air Resources Board (CARB) submitted to the EPA revisions to the California State Implementation Plan (SIP) for the South Coast Air Quality Management District (AQMD), San Diego County and Ventura County Air Pollution Control Districts (APCDs). This notice takes direct final action on rules that control organic compounds from dry cleaning facilities. EPA is approving these revisions under section 110(k)(3) as meeting the requirements of section 110 and part D of the Clean Air Act, as amended (CAA).

DATES: This action will be effective on May 26, 1992 unless notice is received within 30 days of publication that adverse or critical comments will be submitted. If the effective date is delayed, a timely notice will be published in the **Federal Register**.

ADDRESSES: Comments should be sent to: Daniel A. Meer, Chief, Southern California and Arizona, Rulemaking Section, A-5-3; Air and Toxics Division, Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105, FAX: (415) 744-1076.

Copies of the rule revisions and EPA's evaluation reports of each rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule revisions are also available for inspection at the following locations:

California Air Resources Board, Rule Evaluation Section, Stationary Source Division, 1219 K Street, Sacramento, CA 95814.

San Diego County Air Pollution Control District, 9150 Chesapeake Drive, San Diego, CA 92123.

South Coast Air Quality Management District, 21865 E. Copley Drive, Diamond Bar, CA 91765-4182.

Ventura County Air Pollution Control District, 702 County Square Drive, Ventura, CA 93003.

Public Information Reference Unit, U.S. Environmental Protection Agency, 401 "M" Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Cynthia G. Allen, Southern California and Arizona, Rulemaking Section, (A-5-3), Air and Toxics Division, Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105, Tel: (415) 744-1189 or FTS: 484-1189.

SUPPLEMENTARY INFORMATION:

Background

On March 3, 1978, EPA promulgated a list of ozone nonattainment areas under the provisions of the Clean Air Act, as amended in 1977 (1977 CAA), that included the South Coast AQMD and San Diego County and Ventura County APCDs. 43 FR 8964, 40 CFR 81.305. Because these areas were unable to reach attainment by the statutory attainment date of December 31, 1982, California requested, and EPA approved, an extension of the attainment date for ozone to December 31, 1987. 1977 CAA section 172(a)(2). On May 26, 1988, EPA notified the Governor of California that the above districts' portions of the California State Implementation Plan (SIP) were inadequate to attain and maintain the ozone standard and requested that deficiencies in the existing SIP be corrected (EPA's SIP-Call). On November 15, 1990, the Clean Air Act Amendments of 1990 were enacted.

Public Law 101-549, 104 Stat. 1399, codified at 42 U.S.C. 7401-7671q. In amended section 182(a)(2)(A), Congress statutorily adopted the requirement that nonattainment areas fix their deficient reasonably available control technology (RACT) rules for ozone and established a deadline of May 15, 1991 for states to submit corrections of those deficiencies.

Section 182(a)(2)(A) applies to pre-amendment section 107 nonattainment areas that were again designated nonattainment upon enactment and classified as marginal or above under section 181(a)(1) by operation of law. Such areas must adopt and correct RACT rules pursuant to pre-amended section 172(b) as interpreted in preamendment guidance.[1] EPA's SIP-Call used that guidance to indicate the necessary corrections for specific nonattainment areas. The South Coast AQMD and the San Diego and Ventura Areas were subject to the RACT fix-up requirement and the May 15, 1991 deadline.[2]

The State of California submitted many revised RACT rules for incorporation into its SIP on April 5 and May 15, 1991, including the rules being acted on in this notice. This notice addresses EPA's final action on the following rules:

April 5, 1991

San Diego County APCD

Rule 67.8 Dry Cleaning Facilities Using Halogenated Organic Solvent

Ventura County APCD

Rule 74.5 Dry Cleaning (*deletion*)
Rule 74.5.1 Petroleum Solvent Dry Cleaning
Rule 74.5.2 Synthetic Solvent Dry Cleaning

May 13, 1991

South Coast AQMD

Rule 1102 Petroleum Solvent Dry Cleaners
Rule 1102.1 Perchloroethylene Dry Cleaning Systems

[1] Among other things, the pre-amendment guidance consists of those portions of the proposed post-1987 ozone and carbon monoxide policy that concern RACT, 52 FR 45044 (November 24, 1987); "Issues Relating to VOC Regulation Cutpoints, Deficiencies, and Deviations, Clarification to Appendix D of November 24, 1987 **Federal Register** Notice" (Blue Book) (notice of availability was published in the **Federal Register** on May 25, 1988); and the existing Control Technique Guidelines (CTGs).

[2] The South Coast AQMD was designated nonattainment and classified as extreme and San Diego County and Ventura County APCDs were designated nonattainment and classified as serious by operation of law pursuant to section 107(d) and section 181(a) on November 15, 1990. See 56 FR 56694 (November 6, 1991).

San Diego County and Ventura County APCDs rules were found to be complete on May 21, 1991 and South Coast AQMD rules were found to be complete on July 10, 1991 pursuant to EPA's completeness criteria set forth in 40 CFR part 51, appendix V[3] and are being granted approval.

This notice addresses volatile organic compound (VOC) rules that control emissions from petroleum and perchloroethylene dry cleaning facilities. VOCs contribute to the production of ground level ozone. San Diego County rule 67.8, Ventura County rules 74.5.1 and 74.5.2, and South Coast AQMD rules 1102 and 1102.1 were originally adopted as part of San Diego's, Ventura's, and South Coast's effort to achieve the National Ambient Air Quality Standard (NAAQS) for ozone and have been revised in response to EPA's SIP-Call and the section 182(a)(2)(A) CAA requirement. The following is EPA's evaluation for San Diego's rule 67.8, Ventura's rules 74.5.1 and 74.5.2, and South Coast's rules 1102 and 1102.1.

EPA Evaluation

In determining the approvability of a VOC rule, EPA must evaluate the rule for consistency with the requirements of the CAA, EPA regulations, and EPA policy. These requirements are found in section 110 and part D of the CAA, 40 CFR part 51 (Requirements for Preparation, Adoption, and Submittal of Implementation Plans), and the guidance referred to in footnote 1. Among those provisions is the requirement that a VOC rule must, at a minimum, provide for the implementation of reasonably available control technology (RACT) for stationary sources of VOC emissions. This requirement was carried forth from the pre-amended Act.

For the purpose of assisting state and local agencies in developing RACT rules, EPA has prepared a series of Control Technique Guideline (CTG) documents which specify the minimum requirements that a rule must contain in order to be approved into the SIP. Under the amended Act, Congress ratified EPA's use of these documents, as well as other Agency policy, for requiring States to "fix-up" their RACT rules. See section 182(a)(2)(A). The CTG applicable to San Diego County rule 67.8, Dry Cleaning Facilities Using Halogenated Organic Solvent, Ventura County rule 74.5.2, Synthetic Solvent Dry Cleaning and South Coast AQMD rule 1102.1, Perchloroethylene Dry Cleaning Systems is entitled, "Control of Volatile Organic Emissions from Perchloroethylene Dry Cleaning Systems", EPA document No. EPA-450/2-78-050. The CTG applicable to Ventura County rule 74.5.1, Petroleum Solvent Dry Cleaning and South Coast AQMD rule 1102, Petroleum Solvent Dry Cleaners is entitled, "Control of Volatile Organic Compound Emissions from Large Petroleum Dry Cleaners", EPA document No. EPA 450/3-82-009. Further interpretation of EPA policy is found in the Blue Book. In general, these requirements have been set forth to ensure that VOC rules are fully enforceable and strengthen or maintain the SIP.

EPA has evaluted San Diego's submitted rule 67.8, Ventura's submitted rules 74.5.1 and 74.5.2, and South Coast's submitted rules 1102 and 1102.1 for consistency with the CAA, EPA regulations, and EPA policy and has found that the revisions address and correct the deficiencies previously identified by EPA. These corrected deficiencies have resulted in clearer, more enforceable rules. All of the rules will achieve greater enforceability through the inclusion of test methods and recordkeeping requirements. A brief description of each rule change is provided below.

San Diego County

Rule 67.8, Dry Cleaning Facilities Using Halogenated Organic Solvents

San Diego rule 67.8 regulates VOC emissions from dry cleaning operations. The "fugitive liquid leak" definition has been revised to include a visible mist of halogenated organic solvent. The exemption for facilities using methylene chloride has been deleted. The averaging period for measuring allowable exhaust concentration from drying tumblers, washers and cabinets has been reduced from five minutes to one minute. The rule adds sufficient recordkeeping requirements to show the dates and amounts of halogenated organic solvent being purchased and to show daily records of the total dry weight of fabric processed. The rule specifies the appropriate EPA test method to determine compliance.

South Coast AQMD

Rule 1102, Petroleum Solvent Dry Cleaners

South Coast rule 1102 controls emissions of VOCs from petroleum solvent dry-cleaning facilities. The revised rule adds new sections for definitions, recordkeeping requirements,

[3] EPA has since adopted completeness criteria pursuant to section 110(k)(1)(A) of the amended Act. See 56 FR 42210 (August 26, 1991). These will replace the completeness criteria currently set forth in 40 CFR part 51, appendix V.

and test methods. The small user exemption has been eliminated. A solvent recovery dryer is required which must remain closed for one minute until there is no visible flow of recovered solvent. The revised rule requires that the overall solvent consumption must be no more than 4.5 kilograms (kg) (or 6.5 kilograms for dry cleaners using a still) of solvent per 100 kilograms of fabrics cleaned. The revised rule requires that cartridge filters are to be used or filter waste losses are to be limited to 1 kilogram of solvent 100 kilograms of fabric cleaned. Articles to be dried must be transferred from the washer to the dryer within five minutes or stored in closed carts. The revised rule prohibits the operation of the equipment if it is leaking. Solvents must be stored in closed containers.

Rule 1102.1, Perchloroethylene Dry Cleaning Systems

South Coast Rule 1102.1 controls emissions of VOCs from perchloroethylene solvent dry-cleaning facilities. The revised rule adds recordkeeping requirements to verify claims for exemptions. The rule specifies the appropriate EPA test method to determine control efficiency. Requirements for visual inspection are added to comply with the liquid leak provisions.

Ventura County APCD

Rule 74.5, Dry Cleaning, previously approved on October 11, 1983 and April 17, 1987, is being deleted and is being replaced with rules 74.5.1, Petroleum Solvent Dry Cleaning and 74.5.2, Synthetic Solvent Dry Cleaning, submitted on April 5, 1991.

Rule 74.5.1, Petroleum Solvent Dry Cleaning

Ventura Rule 74.5.1 regulates emissions from petroleum dry cleaning operations. The rule deletes diatomaceous earth filters from the filter system options. The revised rule adds new requirements for solvent handling and operating requirements to reduce emissions and ensure compliance with state hazardous waste disposal laws. The revised rule allows small users until July 1, 1993, to install the control equipment needed to comply with the emission control requirements of this rule. The revised rule adds recordkeeping requirements and test methods.

Rule 74.5.2, Synthetic Solvent Dry Cleaning

Ventura rule 74.5.2 regulates emissions from dry cleaning operations using any halogenated solvent including perchloroethylene. The revised rule adds new definitions. The revised rule exempts facilities which use 320 gallons of solvent or less per year. The rule requires all equipment installed after the date of adoption to consist of dry-to-dry units. The revised rule adds new requirements for solvent handling and operating requirements to reduce emissions and requirements to ensure compliance with state hazardous waste disposal laws. The revised rule adds recordkeeping requirements and test methods.

EPA Action

EPA has concluded that the submitted rules listed above are consistent with the CAA, EPA regulations, and EPA policy and that the revisions address and correct all of the deficiencies previously identified by EPA. Moreover, these submitted rule revisions will improve and strengthen the current SIP Therefore, EPA is approving the submitted rules under section 110(k)(3) as meeting the requirements of section 110 and part D of the CAA.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any state implementation plan. Each request for revision to the state implementation plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

EPA is publishing this notice without prior proposal because the Agency views this as a noncontroversial amendment action and anticipates no adverse comments. This action will be effective May 26, 1992, unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted.

If such notice is received, this notice will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective May 26, 1992.

Regulatory Process

Under 5 U.S.C. 605(b), I certify that these SIP revisions will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709)

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and Table 3 SIP revisions (54 FR 2222) from the requirements of Section 3 of Executive Order 12291 for a period of two years. EPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. OMB has agreed to continue the temporary waiver until such time as it rules on EPA's request

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Ozone, Reporting and recordkeeping requirements.

Dated: March 4, 1992.

John Wise,

Acting Regional Administrotor.

Subpart F of part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart F—California

2. Section 52.220 is amended by adding paragraphs (c)(183) and (c)(184)(i)(B) to read as follows:

§ 52.220 Identification of plan.

* * * * *

(c) * * *

(183) New and amended regulations for the following APCD's were submitted on April 5, 1991, by the Governor's designee.

(i) Incorporation by reference.

(A) San Diego County Air Pollution Control District.

(*1*) Rule 67.8, adopted on December 18, 1990.

(B) Ventura County Air Pollution Control District.

40 CFR Part 52

[A-1-FRL-4115-3]

Approval and Promulgation of Air Quality Implementation Plans Single Source Revision; Connecticut; Connecticut Light and Power

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the State of Connecticut. This revision requires the use of low sulfur fuels in two units of the Connecticut Light and Power (CL&P) facility at Montville, Connecticut. It also requires the retirement of another unit at that facility. The intended effect of this action is to approve a Connecticut State Order which limits emissions in accordance with the provisions of subsection 22a–174–24(d) of Connecticut's Administrative Regulations for the Abatement of Air Pollution. This action is being taken in accordance with section 110 of the Clean Air Act.

DATES: This action will become effective May 26, 1992, unless notice is received within 30 days that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Comments may be mailed to Linda M. Murphy, Director, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region I, JFK Federal Building, Boston, MA 02203. Copies of the documents relevant to this action are available for public inspection during normal business hours, by appointment at the Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region I, One Congress Street, 10th Floor, Boston, MA; Public Information Reference Unit, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460; and the Bureau of Air Management, Department of Environmental Protection, State Office Building, 165 Capitol Avenue, Hartford, CT 06106.

FOR FURTHER INFORMATION CONTACT: Ian D. Cohen, (617) 565–3229; FTS 835–3229.

SUPPLEMENTARY INFORMATION: On February 28, 1991, the State of Connecticut submitted a formal revision to its State Implementation Plan (SIP). The SIP revision consists of State Order No. 7017. This order was issued to CL&P after modeling studies using the Industrial Source Complex Short-Term (ISCST) model revealed possible violations of the National Ambient Air Quality Standard (NAAQS) for sulfur dioxide (SO_2). No monitored violations occurred.

The State Order was issued to limit the emissions of SO_2 by requiring CL&P to retire one unit (Unit #4) and use low sulfur diesel fuel in its two diesel generators (Units D10 and D11). A modeling study, completed in accordance with the requirements listed in the EPA Guideline on Air Quality Models (EPA–450/2–78–027R, July 1986) and Connecticut's Ambient Impact Analysis Guide (AIAG), has shown that these actions will prevent future violations of the NAAQS.

Background Information

The Connecticut Light and Power Company (CL&P) operates a facility located on Lathrop Road in Montville, Connecticut. A Multi-source modeling study done in conjunction with a new source review conducted for a nearby facility, the U.S. Naval Base in Groton, Connecticut, revealed some potential violations of the NAAQS. Some of these violations were attributed to CL&P. The State of Connecticut issued notices of violation to two facilities in the area, CL&P and Stone Connecticut Paperboard Corporation. Two State orders, Nos. 1073A and 7017, have been submitted to EPA to make these conditions federally enforceable. This action only concerns State Order No. 7017.

State Order No. 7017 requires two changes in procedure for CL&P. They are to retire one unit (Unit #4) and use diesel fuel with a sulfur content no greater than 0.25% by weight in their two emergency diesel generators, D10 and D11, which are located at the same facility. The State Order also requires CL&P to maintain records of the sulfur content of all fuel oil delivered to the CL&P Montville facility. This will allow the State of Connecticut to monitor the fuel used by CL&P and insure their compliance with the sulfur-in-fuel restriction.

The retirement of Unit #4 was previously planned by CL&P. This unit is being replaced by a new unit, Unit #7. Unit #7 is powered by natural gas, and does not have significant emissions of SO_2.

The restrictions imposed by State Order No. 7017 will remain in force until CL&P is able to demonstrate that a relaxation of these restrictions will not cause violations of the NAAQS, and the demonstration is approved as a SIP revision by EPA.

Enforcement

State Order No. 7017 contains requirements that CL&P keep records of each purchase of fuel. These records will allow the state to monitor compliance. State Order No. 7017 also contains a schedule of fines which CL&P must pay if a violation occurs, as well as the name and address of the person at the Connecticut Department of Environmental Protection to whom payments are to be sent.

EPA has reviewed State Order No. 7017 and has determined that the restrictions in sulfur content and oil firing are sufficient to maintain the NAAQS in the vicinity of CL&P's facility in Montville, Connecticut.

EPA is approving this SIP revision without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective May 26, 1992, unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by simultaneously publishing two subesequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective on May 26, 1992.

Final Action

EPA is approving State Order No. 7017 as a revision to the Connecticut SIP. The provisions of State Order No. 7017 limit CL&P to the use of facilities and fuels which will provide sufficiently low sulfur emissions to maintain ambient air quality standards in the Montville, Connecticut area.

Under 5 U.S.C. section 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

This action has been classified as a table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225).

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any State implementation plan. Each request for revision to the State implementation

plan shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 26, 1992. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Intergovernmental relations, Reporting and recordkeeping requirements, Sulfur oxides.

Note: Incorporation by reference of the State Implementation Plan for the State of Connecticut was approved by the Director of the Federal Register on July 1, 1982.

Dated: March 6, 1992.

Paul Keough,

Acting Regional Administrator, Region I.

Part 52 of chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

Subpart H—Connecticut

2. Section 52.370 is amended by adding paragraph (c)(61) to read as follows:

§ 52.370 Identification of plan.

BILLING CODE 6560–50–M

40 CFR Part 52

[IL15–1–5139; FRL–4107–1]

Approval and Promulgation of Air Quality Implementation Plans; Illinois

AGENCY: United States Environmental Protection Agency (USEPA).

ACTION: Final rule.

SUMMARY: USEPA is today approving a site specific revision to the Illinois State Implementation Plan (SIP) for ozone. The revision being approved applies to a facility in Richland County, Illinois operated by Roadmaster Corporation. Roadmaster's facility uses black and white flowcoaters to apply extreme performance coatings to miscellaneous metal parts and products. The revision would set a ceiling of 5.9 pounds of Volatile Organic Matter (VOM) per gallon of paint, based on weekly averaging, for the existing black and white flowcoaters. This revision expires on January 1, 2000.

The Illinois SIP applies Reasonable Available Control Technology (RACT) statewide. Consequently, emission limits currently applicable to the Roadmaster facility for VOM are RACT. Those applicable limits are cited in § 215.204(j)(3) of title 35 of the Illinois Administration Code (IAC). This section was approved for incorporation in the Illinois SIP on February 21, 1980, (45 FR 11472) as Pollution Control Board Rule 205(n)(1). The State subsequently recodified this rule as part of the IAC. This section limits the VOM content of coating materials, excluding water, delivered to the applicator for coating miscellaneous metal parts and products for extreme performance coatings to 3.5 pounds of VOM per gallon of coating. The revision being approved would limit the coatings used by the Roadmaster facility's existing black and white flowcoaters to 5.9 pounds of VOM per gallon of coating, based on weekly averaging.

Richland County, Illinois is in attainment of the ozone National Ambient Air Quality Standard (NAAQS). While Part D of the Clean Air Act (CAA) requires RACT level controls only in nonattainment areas and does not require it in attainment areas, such as Richland County, Illinois, a state can impose more stringent requirements than those imposed by the CAA. Under the site specific revision, VOM emissions from Roadmaster's facility in excess of those allowed under the current applicable limit are estimated to be 37.5 tons per year, which additional emmissions are not expected to cause or contribute to a violation of the NAAQS for ozone.

DATES: This action will be effective May 26, 1992, unless notice is received within 30 days of publication that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region 5, Regulation Development Branch, 77 West Jackson Boulevard, Chicago, Illinois 60604.

Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Patricia Morris, Regulation Development Section; U.S. Environmental Protection Agency, Region V, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 353–8656 or (FTS) 353–8656.

SUPPLEMENTARY INFORMATION:

Background

Roadmaster manufactures bicycles, toy wagons, tricycles, exercise equipment and various related items. Roadmaster is located near Olney in Richland County, Illinois, an area that is attainment for ozone. See 40 CFR 81.314 (1988).

On April 26, 1990, The Illinois Pollution Control Board (Board) adopted final rulemaking which amended title 35 of the IAC, *Subtitle B:* Air Pollution, *Chapter I:* Pollution Control Board, *Subchapter C:* Emissions Standards and Limitations for Stationary Sources, Part 215, Organic Material Standards and Limitations, *Subpart F:* Coating Operations, by adding § 215.214 Roadmaster Emission Limits. On September 18, 1990, the Illinois Environmental Protection Agency (IEPA) submitted § 215.214 to USEPA as a proposed site-specific revision to the Illinois SIP for ozone.

Section 215.214, which expires January 1, 2000, provides as follows: Roadmaster would be allowed a VOM emissions exception on two existing flowcoater units at its manufacturing facility near Onley, Illinois. The VOM exception, from the generally applicable limit of 3.5 pounds of VOM per gallon of coating, required by § 215.204(j)(3) of the IAC, would be only for the existing black and white flowcoaters which under § 215.214 would be limited to 5.9 pounds of VOM per gallon of coating, based on weekly averaging, to account for daily and seasonal variations. This rule does not embrace new flowcoaters which may be added to the operation, but only the two existing units, in order to allow their continued present operation. New flowcoaters added to the operation must meet the requirements of § 215.204(j)(3).

As a result of public comments in response to First Notice publication in the Illinois Register, 13 Ill. Reg. 12384, July 1989, the Board found that certain revisions to the First Notice proposal were appropriate. Therefore, the Board required Roadmaster to fulfill additional conditions which it set forth in Section 215.214 (a), (b), (c), (d), and (e). The conditions include: (1) Roadmaster must contact at least three paint vendors each year in a continuing search for a compliant paint; (2) Roadmaster must report to IEPA each year on its efforts to find a compliant paint; (3) if a compliant paint is found and the cost is not more than 10 percent greater than the then current net annual expense incurred in the existing painting process, Roadmaster must convert to that compliant paint within 180 days; (4) this exception expires on January 1, 2000, at which time Roadmaster shall comply with the provisions that generally apply to VOM emissions.

Because Richland County and the surrounding area for at least 100 miles in all directions is attainment for ozone, the estimated 37.5 tons per year of VOM emissions in excess of the present rule would not cause or contribute to a violation of the National Ambient Air Quality Standard for ozone.

While Part D of the CAA requires RACT only in nonattainment areas and does not require it in attainment areas, such as Richland County, Illinois, a state can impose more stringent requirements than those imposed by the CAA. In addition to the Illinois SIP requiring RACT in nonattainment areas, it goes beyond the federal requirement of the CAA and requires RACT in attainment areas as well. The State of Illinois imposed the RACT level of control on a statewide basis as part of an accommodative SIP. With the accommodative SIP, new sources and major modifications locating in ozone attainment areas need not comply with the preconstruction monitoring requirements of USEPA's Prevention of Significant Deterioration (PSD) regulations. USEPA's approval of this requested SIP revision removes the accommodative SIP from Richland County until the rule expires on January 1, 2000. That means that all new major sources and modifications in Richland County must comply with all PSD monitoring requirements for the period of the SIP revision. Because the State's accommodative SIP as to Richland County never had any effect on any designated ozone nonattainment area SIP, the RACT relaxation in this notice will also have no effect on nonattainment areas. Any sources wishing to locate in nonattainment areas must provide offsets to net out of review or wait for Federal approval of a part D new source review program for Illinois.

There are several enforceability deficiencies in the submittal that would have necessitated a disapproval if Roadmaster's facility were located in a nonattainment area for ozone. USEPA, in this notice, is on record as noting these deficiencies so that any requested SIP revisions for nonattainment areas that contain these deficiencies may be disapproved, without any such disapproval appearing to be arbitrary or capricious. These deficiencies are: (1) There are no record keeping requirements contained in the submittal; (2) The test methods for solvent content of coatings are specified in section 215.208 which allows Director's Discretion; (3) It is not clear from the submittal whether line by line compliance or cross averaging is required. Because of these deficiencies, the USEPA would have disapproved this rule if the area were nonattainment for ozone. However, since Richland County is attainment for ozone and there is no CAA requirement for RACT level control in an attainment area, USEPA is approving this site specific rule change to the Illinois SIP.

We expect no adverse public or congressional reaction resulting from approval of this SIP revision. The State of Illinois is aware that USEPA plans to approve this revision and process it under the "Direct Final" procedures. The State of Illinois concurs with this decision.

USEPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective May 26, 1992, unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted.

If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective May 26, 1992.

Rulemaking Action

For the reasons stated above USEPA approves the incorporation of § 215.214 of 35 IAC into the Illinois SIP. This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 SIP revisions (54 FR 2222) from the requirements of section 3 of Executive Order 12291 for a period of two years.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities (See 46 FR 8709).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 26, 1992. Filing a petition for reconsideration by the Administrator of the final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. [See section 307(b)(2).]

List of Subjects in 40 CFR Part 52

Air pollution control, Hydrocarbons, Incorporation by reference, Ozone, Volatile organic compounds.

Authority: 42 U.S.C. 7401–7642.

Dated: February 11, 1992.

David Kee,

Acting Regional Administrator.

For the reasons stated in the preamble, chapter 1 of title 40 of the Code of Federal Regulations is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLAN

1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642

Subpart O—Illinois

2. Section 52.720 is amended by adding paragraph (c)(83) to read as follows:

§ 52.720 Identification of plan.

* * * * *

(c) * * *

(83) On September 18, 1990, the State of Illinois submitted a site specific emissions limit for Roadmaster Corporation which is located near Olney in Richland County, Illinois. The emission limit which is contained in § 215.214 of title 35 of the Illinois Administrative Code requested that volatile organic material (VOM) emissions for Roadmaster's existing black and white flowcoating operations not exceed a weekly average of 5.9 lbs/gallon as long as conditions are met. This emission limit expires on January 1, 2000, at which time Roadmaster shall comply with the provisions that generally apply to VOM emissions.

(i) Incorporation by reference.

(A) *Title 35:* Environmental Protection, *Subtitle B:* Air Pollution, *Chapter I:* Pollution Control Board, *Subchapter C:* Emission Standards and Limitations for Stationary Sources, Part 215 Organic Material Emission Standards and Limitations, *Subpart F:* Coating Operations, § 215.214 Roadmaster Emissions Limitations adopted at 14 Illinois Register 7596, effective May 8, 1990.

BILLING CODE 6560-50-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 672

[Docket No. 911176–2016]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of prohibition of retention.

SUMMARY: NMFS is prohibiting further retention of Pacific cod by operators of vessels using any gear that are fishing in the Western Regulatory Area of the Gulf of Alaska (GOA) and is requiring that Pacific cod be treated in the same manner as a prohibited species and discarded. The intent of this action is to promote optimum use of groundfish while conserving Pacific cod stocks.

EFFECTIVE DATES: From 12 noon, Alaska local time, (A.l.t.) March 18, 1992, through 12 midnight, A.l.t., December 31, 1992.

FOR FURTHER INFORMATION CONTACT: Patsy A. Bearden, Resource Management Specialist, NMFS, 907–586–7228.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) governs the groundfish fishery in the exclusive economic zone of the GOA under the Magnuson Fishery Conservation and Management Act. The FMP was prepared by the North Pacific Fishery Management Council and is implemented by regulations appearing at 50 CFR 611.92 and parts 620 and 672.

The amount of a species or species group apportioned to a fishery is the total allowable catch (TAC) as defined at §§ 672.20(a)(2) and 672.20(c)(1). The final notice of 1992 initial specifications of groundfish established the Pacific cod TAC in the Western Regulatory Area of the GOA at 23,500 metric tons (57 FR 2844, January 24, 1992).

The Director of the Alaska Region, NMFS, has determined that the TAC for Pacific cod in the Western Regulatory Area of the GOA has been taken. Therefore, under § 672.20(c)(3), further catches of Pacific cod in the Western Regulatory Area must be treated as a prohibited species and discarded under § 672.20(e) by vessels fishing in the Western Regulatory Area of the GOA after 12 noon, A.l.t., March 18, 1992.

Classification

This action is taken under 50 CFR 672.20, and is in compliance with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 57, No. 57
Tuesday, March 24, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 35

[Docket No. PRM–35–10]

American College of Nuclear Medicine; Receipt of Petition for Rulemaking; Correction

AGENCY: Nuclear Regulatory Commission.

ACTION: Petition for rulemaking: Notice of receipt, Correction.

SUMMARY: This document corrects a notice appearing in the **Federal Register** on March 9, 1992 (57 FR 8282). This action is necessary to correct a typographical error.

DATES: Submit comments by May 8, 1992. Comments received after this date will be considered if it is practical to do so but the Commission is able to assure consideration only for comments received on or before this date.

ADDRESSES: Submit written comments to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch.

For a copy of the petition, write: Rules Review Section, Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone: 301–492–7758 or Toll Free: 800–368–5642.

The petition and copies of comments received may be inspected and copied for a fee at the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC.

FOR FURTHER INFORMATION CONTACT: Michael T. Lesar, Chief, Rules Review Section, Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: 301–492–7758 or Toll Free: 800–368–5642.

SUPPLEMENTARY INFORMATION: On page 8282, in the second column, in the second line of paragraph (1) under the heading "Petitioner's Request," the citation "10 CFR 35.72(a)(2)" should read "10 CFR 35.75(a)(2).".

Dated at Bethesda, Maryland, this 18th day of March, 1992.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

FEDERAL FINANCIAL INSTITUTIONS EXAMINATION COUNCIL

12 CFR Part 1102

[Docket No. AS92–1]

Appraisal Subcommittee; Appraisal Regulation; Rules of Practice for Proceedings

AGENCY: Appraisal Subcommittee, Federal Financial Institutions Examination Council.

ACTION: Proposed rulemaking.

SUMMARY: The Appraisal Subcommittee ("ASC") of the Federal Financial Institutions Examination Council ("FFIEC") is publishing for comment proposed subpart B, Rules of Practice For Proceedings, under already proposed part 1102, Appraisal Regulation.[1] The new subpart is designed to govern proceedings under section 1118 [2] of title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA") [3] for the nonrecognition of State real estate appraiser licensing and certification designations and systems and other proceedings "to take such further action * * * to carry out the purposes" of title XI" under § 1119(c) [4] of that title. Congress intended title XI of FIRREA and the ASC and the Federal Financial Institutions Regulatory Agencies [5] and the Resolution Trust Corporation ("RTC") (collectively "Agencies") to protect federal financial and public policy interests in real estate-related financial transactions [6] requiring the services of an appraiser.[7]

DATES: Comments must be received on or before May 26, 1992.

ADDRESSES: Persons wishing to submit written comments should file them with Edwin W. Baker, Executive Director, Appraisal Subcommittee, at 1776 G Street, NW., suite 850B, Washington, DC 20006 (before April 1, 1992), or at 2100 Pennsylvania Avenue, NW., suite 200, Washington, DC 20037 (on and after April 1, 1992). All comment letters should refer to Docket No. AS92–1. All comments received will be available for public inspection and copying at the above location.

FOR FURTHER INFORMATION CONTACT: Edwin W. Baker, Executive Director, or Marc L. Weinberg, General Counsel, at the addresses above or at (202) 357–0133.

SUPPLEMENTARY INFORMATION:

I. Introduction

On August 9, 1989, Congress Adopted FIRREA, including section 1102 [8] of title XI, which established as ASC and placed it within the FFIEC. The ASC consists of representatives appointed by the heads of the federal financial institutions regulatory agencies and the Department of Housing and Urban Development. Congress intended title XI of FIRREA, the ASC and the Agencies to protect federal financial and public

[1] Proposed 12 CFR part 1102, subpart A, provides procedures for temporary waiver proceedings under section 1119(b) of title XI, 12 U.S.C. 3348(b) (1990). The ASC published subpart A for comment on November 26, 1991, at 56 FR 59699, and expects to adopt a final version of subpart A shortly.

[2] 12 U.S.C. 3347 (1990).

[8] 12 U.S.C. 3310 (1990).

policy interest [9] in real estate-related financial transactions requiring the services of an appraiser.

The ASC has several statutory duties under title XI. First, it must monitor the appraisal regulations adopted by the Agencies. Those regulations set out appraisal standards for federally related transactions [10] and define those federally related transactions requiring the services of a State certified or State licensed appraiser. Second, the ASC must monitor and review the practices, procedures, activities, and organizational structure of the Appraisal Foundation. Third, the ASC must monitor each State's certification and licensing programs for real estate appraisers [11] and must review each State's compliance with the requirements of title XI. It also is authorized by title XI to take action against non-complying States.[12]

II. Statutory Authority

A. Non-recognition proceedings

Pursuant to § 1118 [13] of title XI, financial institutions,[14] the Agencies, the Federal National Mortgage Association ("FNMA") and the Federal Home Loan Mortgage Corporation ("FHLMC") generally must accept appraisals in federally related transactions performed by persons licensed or certified by a State appraiser regulatory agency ("State Agency"). In monitoring State compliance with title XI, the ASC, however, can "disapprove" or "not recognize appraiser certifications and licenses from States whose appraisal policies, practices or procedures are found to be inconsistent with (Title XI)" [15]

Paragraph (b) of section 1118 describes what is meant by "non-recognition" in the context of title XI and sets out the grounds on which the ASC can order non-recognition. If the ASC were to order non-recognition of a State Agency's certifications and licenses, the ASC, all Federal financial institutions, and the Agencies, together with FNMA and FHLMC, could not rely on appraisals prepared by persons who are licensed and/or certified to appraise federally related transactions within that State Agency's jurisdiction. In effect, the State's real estate market in federally related transactions would be hindered, and Federally-insured banks and credit unions might have to bring in out-of-State certified or licensed appraisers (from complying States) to perform needed appraisals. The ASC can order non-recognition only if it makes a written finding that one or more of the following conditions are satisfied:

(1) The (State Agency) fails to recognize and enforce the standards, requirements, and procedures prescribed pursuant to (title XI);

(2) The (State Agency) is not granted authority by the State which is adequate to permit the agency to carry out its functions under (title XI); or

(3) Decisions concerning appraisal standards, appraiser qualifications and supervision of appraiser practices are not made in a manner that carries out the purposes of (title XI).[16]

Paragraph (c) of section 1118 [17] provides a State with certain procedural protections before the ASC can choose not to recognize its appraiser certifications and licenses. First, the ASC must provide the offending State Agency with a "written notice of the (ASC's) intention not to recognize the State's certified or licensed appraisers." [18] Second, the ASC must give the State Agency "ample opportunity to provide rebuttal information or to correct the conditions causing the refusal." [19] Last, the ASC must "adopt written procedures for * * * (non-recognition) actions.[20]

B. "Other Proceedings" Under § 1119(c) of Title XI

Section 1119(c) [21] requires the ASC to "report any action of a State certified or licensed appraiser that is contrary to the purposes of (title XI) * * * to the appropriate (State Agency) for a disposition of the subject of the referral." The State Agency then must provide the ASC "with a report on its disposition of the matter referred." [22] After receiving the report, the ASC "may take such further action, pursuant to written procedures, it deems necessary to carry out the purposes of (title XI).[23]

III. Description of the Proposed Rule

Proposed subpart B of part 1102 sets out a procedure for dealing with proceedings under sections 1118 and 1119(c) of title XI. The proposed rules are specifically tailored to afford expeditious administrative processing of these proceedings, while, at the same time, assuring parties to the proceedings sufficient procedural protections. For example, parties are provided with the right to counsel, notice of impending ASC actions, and an ample opportunity to contest ASC statements. The proposed rules also contain provisions implementing the ASC's intention to make a good faith effort, whenever possible, to work out all disputes, problems, issues, misunderstandings and other difficulties both before and after the commencement of formal proceedings.

A. Commencement of the Proceeding

The ASC may commence a proceeding under proposed subpart B by instructing the Secretary of the ASC [24] to provide the party, *e.g.*, a State Agency, with a written "Notice of Intention to Commence Proceeding" ("Notice of Intention").[25] The Notice of Intention

---

[9] Title XI's general purpose is "to provide that Federal financial and public policy interests * * * will be protected by requiring that (certain) real estate appraisals are performed in writing, in accordance with uniform standards, by individuals whose competency has been demonstrated and whose professional conduct will be subject to effective supervision." Section 1101 of title XI, 12 U.S.C. 3331 (1990).

[10] *See* section 1121(4) of title XI, 12 U.S.C. 3350(4) (1990), which defines a "federally related transaction."

[11] The ASC is required to "monitor State appraiser certifying and licensing agencies for the purpose of determining whether the * * * agency's policies, practices, and procedures are consistent with (title XI)." Section 1118(a) of title XI, 12 U.S.C. 3347(a) (1990). See also, 1103(a)(1) of title XI, 12 U.S.C. 3332(a)(1) (1990). The ASC must maintain a national registry of all state certified and licensed appraisers who are eligible to perform appraisals in federally related transactions. Each State with an appraiser certifying and licensing agency is responsible for transmitting to the ASC a roster of these appraisers, along with an annual registry fee.

[12] *See* 1118 of title XI, 12 U.S.C. 3347 (1990).

[13] *Id.*

[14] A "financial institution" is "an insured depository institution as defined in section 3 of the Federal Deposit Insurance Act or an insured credit union as defined in section 101 of the Federal Credit Union Act." Section 1121(7) of title XI, 12 U.S.C. 3350(7) (1990).

[15] Section 1118(a) of title XI, 12 U.S.C. 3347(a) (1990).

[16] Section 1118(b) of title XI, 12 U.S.C. 3347(b) (1990).

[17] 12 U.S.C. 3347(c) (1990).

[18] Section 1118(c)(1) of title XI, 12 U.S.C. 3347(c)(1) (1990).

[19] Section 1118(c)(2) of title XI, U.S.C. 3347(c)(2) (1990).

[20] Section 1118(c)(3), 12 U.S.C. 3347(c)(3), specifically makes ASC non-recognition decisions subject to judicial review.

[21] 12. U.S.C. 3348(c) (1990).

[22] Section 1119 of title XI also authorizes "any other Federal agency or instrumentality, or any federally recognized entity" to report questionable individual appraiser activities to State Agencies and to receive disposition reports from those State Agencies respecting those referrals.

[23] Only the ASC and "any other Federal agency or instrumentality" can take further action.

[24] The Secretary is the ASC's Executive Director. See ASC's Rules of Operation, section 306(b), 56 FR 28561 (June 21, 1991), at 28562.

[25] See proposed rules 1102.23, 1102.24, 1102.25 and 1102.26 for details regarding the requirements for the filing and service of papers by the ASC and by the other parties to the proceeding. In general, filing and service can be accomplished by personal service, delivery via reliable commercial courier, overnight delivery service, and the first class, registered, certified or express mail services of the U.S. Post Office. Filing and service and effective upon actual delivery for personal service or same-day commercial courier delivery and upon deposit

Continued

must contain statements setting out: (1) The ASC's legal authority and jurisdiction; (2) the matters of fact and law constituting the grounds for the proceeding; and (3) a date no earlier than 21 calendar days [26] after the issuance of the Notice of Intention on which the information-gathering phase of the proceeding will end.[27] The ASC must promptly publish the Notice of Intention in the **Federal Register**.

B. Election of Rebuttal or Notice Not To Contest

Pursuant to proposed Rule 1102.33, a party has 15 days in which to file with the Secretary a written Rebuttal or Notice Not To Contest. In a Rebuttal, a party generally has to admit or deny specifically each statement in the Notice of Intention. Statements not denied are considered admitted.[28] Alternatively, a party may choose not to contest the statements in the Notice of Intention and file a Notice Not To Contest. By filing a Notice Not To Contest, a party waives its right to rebut the ASC's statements, and the ASC is free to decide the matter as appropriate. Filing a Notice Not To Contest does not affect a party's right to judicial review.

C. Briefs, Memoranda or Statements

At any time between the commencement of the proceeding and the end of the proceeding's information-gathering phase, a party may file with the Secretary (and serve on other parties to the proceeding a copy of) a written brief, memorandum or other statement providing factual data and policy and legal arguments regarding the Notice of Intention. The Secretary will receive this document and will place it in the public file of the proceeding. Other parties to the proceeding then will have ten calendar days from when the documents are served on them to respond by written submission. The Secretary will receive responses and will place them in the public file. A responding party also must serve a copy of the response on other parties.

D. Oral Presentations

Between the commencement of the proceeding and seven calendar days before the end of the information-gathering phase, any party to the proceeding may file with the Secretary a letter requesting that the Secretary schedule an opportunity for the party to give an oral presentation to the ASC. That letter must include the reasons why an oral presentation is necessary. The Secretary must promptly forward the letter request to the Chairman of the ASC. The Chairman may obtain the informal views of other ASC members and the ASC's senior staff regarding the request. The Chairman then must instruct the Secretary to forward a letter to the party either: (1) Scheduling a date and time for the oral presentation; or (2) declining the request and providing the reasons therefor. The party's letter and the ASC's response will be included in the proceeding's public file.

On the appropriate date and time, the party (or his or her attorney (if any)) will make the oral presentation before the ASC. Any ASC member may ask the party or the representative, as the case by be, pertinent questions relating to the content of the oral presentation.

An oral presentation shall be considered as an opportunity to offer, emphasize and clarify the facts, policies and laws concerning the issues before the ASC. Oral presentations will not be recoded or otherwise transcribed. The Secretary, however, must enter into the proceeding's public file minutes summarizing the subjects discussed during the oral presentation.

E. Other Opportunities for Issue Clarification and Settlement of Actions

Proposed subpart B provides the ASC and parties with several methods of focusing, shortening and settling a proceeding, even before the proceeding is commenced formally by the ASC. Proposed rule 1102.39 states that the ASC and its staff (as authorized by the ASC) have a general duty to provide parties an ample opportunity to work out problems by consent, by settlement or in some other manner. After a proceeding is commenced, proposed rule 1102.36 enables any party at any time to submit to the Secretary, for the ASC's consideration, written offers or proposals for settlement of a proceeding, without prejudice to the rights of the parties. Moreover, proposed rule 1102.30(b) enables the parties at any time to agree to a stipulation of facts, law and the authenticity of documents.

Finally, proposed rule 1102.29(c) provides a vehicle for the parties and designated members of the ASC and its staff to meet together, among other things, to schedule aspects of the proceedings, to simplify and clarify issues, to enter into stipulations and admissions of fact, ad to deal with "such other matters as may aid in the orderly disposition of the proceeding * * *." Like oral presentations, conferences will not be recorded, and the Secretary must include in the public file a memorandum summarizing the results of the conference. Unless changed by the ASC, that memorandum will control the subsequent course of the proceeding.

F. Ethical Considerations in Proceedings

Proposed rule 1102.29 contains ethical considerations designed to comply with the spirit of the Administrative Procedure Act.[29] These provisions help to assure that ASC proceedings are fair and impartial.

G. ASC Decision

The ASC must issue an order in the matter no later than 45 days after the close of the information-gathering phase of the proceeding. The order must contain the ASC's findings of facts and conclusions of law and may contain such terms and conditions as the ASC deems appropriate. The Secretary must serve the order promptly on the parties, place it in the public file of the proceeding and publish it in the **Federal Register**. The ASC order is considered a final agency action from which judicial review can be taken.[30]

IV. Regulatory Flexibility Act Statement

Pursuant to section 605(b) of the Regulatory Flexibility Act, the ASC certifies that this notice of proposed rulemaking is not expected to have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required.

Proposed subpart B of part 1102 is designed to govern non-recognition proceedings under § 1118 [31] of title XI and "other proceedings necessary to carry out the purposes of (title XI)" under section 1119(c) of that title. These sections of FIRREA generally require the ASC to adopt written procedures.

The purpose of the proposed rules is to secure a just and orderly determination of administrative

---

or delivery to an appropriate point of collection for all other methods.

[26] Proposed rule 1102.27 deals with computing time. Intermediate Saturdays, Sundays and legal holidays (as recognized in the District of Columbia) are included unless the time frame is seven days or less. The last day of a time period, if falling on a Saturday, Sunday or such a legal holiday, moves to the next day that is not a Saturday, Sunday or legal holiday. A party will have three days added to a prescribed period if the party is served via U.S. mail. The period will begin running when the item is deposited in the U.S. mail.

[27] The ASC can extend this date for good cause upon the written request of a party or on its own initiative. A notice respecting this extension must be published promptly in the **Federal Register** by the Secretary of the ASC.

[28] The party also could admit and deny ASC statements in whole or in part.

[29] See 12 U.S.C. 556(b) and 557(b)(1) (1990).

[30] See generally 5 U.S.C. ch. 7 (1990), which deals with the right to judicial review of administrative agency actions, and section 1118(c)(3) of title XI, 12 U.S.C. 3347(c)(3) (1990)

[31] 12 U.S.C. 3347 (1990).

proceedings. Non-recognition proceedings by their very nature do not directly involve small entities; they concern States and their appraiser regulatory agencies. While "other action" under section 1119(c) of title XI conceptually could affect individual appraisers more directly, Congress intended the ASC to use this authority primarily to ensure that State Agencies appropriately discipline appraisers certified or licensed within their respective jurisdictions. Therefore, section 1119(c) actions also focus on States and their appraiser regulatory agencies.

V. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980,[33] forms, reporting and recordkeeping requirements included in proposed 12 CFR part 1102, subpart B, were submitted to the Office of Management and Budget for review and approval on March 4, 1992.[33] Proposed subpart B, when adopted, will provide the written procedures necessary to implement section 1118 of title XI of FIRREA fully.[34] The estimated number of respondents is six, each submitting one response per year, with an estimated average annual reporting burden of 60 hours per response.

VI. Executive Order 12291 Statement

The ASC has determined that this notice of proposed rulemaking does not constitute a "major rule" within the meaning of Executive Order 12291. Accordingly, a Regulatory Impact Analysis is not required on the grounds that this notice of proposed rulemaking, if adopted: (1) Would not have an annual effect on the economy of $100 million or more; (2) would not result in a major increase in the cost of financial institution operations or governmental supervision; and (3) would not have a significant adverse effect on competition (foreign or domestic), employment, investment, productivity or innovation, within the meaning of the Executive Order.

List of Subjects in 12 CFR Part 1102

Administrative practice and procedure, Appraisers, Banks, Banking, Mortgages, Reporting and recordkeeping requirements.

Text of the Proposed Rule

Chapter XI, title 12 of the Code of Federal Regulations, is amended as set forth below:

[33] 44 U.S.C. 35 (1990).
[33] 57 FR 8331 (March 9, 1992).
[34] 12 U.S.C. 3347 (1990).

Part 1102, proposed at 56 FR 59901, November 26, 1991, is amended to read as follows:

PART 1102—APPRAISAL REGULATION

1. The authority citation for part 1102 is removed and the authority citation for subpart A is added as follows:

Authority: 12 U.S.C. 3348(b).

2. Subpart B is added to read as follows:

Subpart B—Rules of Practice for Proceedings

Sec.
1102.20 Authority, purpose and scope.
1102.21 Definitions.
1102.22 Appearance and practice before the Subcommittee.
1102.23 Formal requirements as to papers filed.
1102.24 Filing requirements.
1102.25 Service.
1102.26 When papers are deemed filed or served.
1102.27 Computing time.
1102.28 Documents and exhibits in proceedings public.
1102.29 Conduct of proceedings.
1102.30 Rules of evidence.
1102.31 Burden of proof.
1102.32 Notice of Intention to Commence A Proceeding.
1102.33 Rebuttal or Notice Not To Contest.
1102.34 Briefs, memoranda and statements.
1102.35 Opportunity for informal settlement.
1102.36 Oral Presentations.
1102.37 Decision of the Subcommittee and judicial review.
1102.38 Compliance activities.
1102.39 Duty to cooperate.

Subpart B—Rules of Practice for Proceedings

Authority: 12 U.S.C. 3332, 3335, 3347, and 3348(c).

§ 1102.20 Authority, purpose, and scope.

(a) *Authority.* This subpart is issued under sections 1103, 1106, 1118 and 1119(c) of title XI of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 ("FIRREA") (12 U.S.C. 3332, 3335, 3347, and 3348(c)).

(b) *Purpose and scope.* This subpart prescribes rules of practice and procedure governing non-recognition proceedings under section 1118 of title XI (12 U.S.C. 3347); and other proceedings necessary to carry out the purposes of title XI under section 1119(c) of title XI (12 U.S.C. 3348(c)).

§ 1102.21 Definitions.

As used in this subpart:

(a) *Subcommittee* or *ASC* means the Appraisal Subcommittee of the Federal Financial Institutions Examination Council, as established under section 1011 of title XI (12 U.S.C. 3310).

(b) *Party* means the ASC or a person, agency or other entity named as a party, including, when appropriate, persons appearing in the proceeding under § 1102.22 of this subpart.

(c) *Respondent* means any party other than the ASC.

(d) *Secretary* means the Secretary of the ASC under its Rules of Operation.

§ 1102.22 Appearance and practice before the Subcommittee.

(a) *By attorneys and notice of appearance.* Any person who is a member in good standing of the bar of the highest court of any State or of the District of Columbia, or of any possession, territory, or commonwealth of the United States, may represent parties before the ASC upon filing with the Secretary a written notice of appearance stating that he or she is currently qualified as provided in this paragraph and is authorized to represent the particular party on whose behalf he or she acts.

(b) *By non-attorneys.* An individual may appear on his or her own behalf. A member of a partnership may represent the partnership, and an officer, director or employee of any government unit, agency, institution, corporation or authority may represent that unit, agency, institution, corporation or authority. The partner, officer, director or employee must file with the Secretary a written statement that he or she has been duly authorized by the partnership, government unit, agency, institution, corporation or authority to act on its behalf. The ASC may require the representative to attach to the statement appropriate supporting documentation, such as a corporate resolution.

(c) *Conduct during proceedings.* All participants in a proceeding shall conduct themselves with dignity and in an orderly and ethical manner. The attorney or other representative of a party shall make every effort to restrain a client from improper conduct in connection with a proceeding. Improper language or conduct, refusal to comply with directions, use of dilatory tactics, or refusal to adhere to reasonable standards of orderly and ethical conduct constitute grounds for immediate exclusion from the proceeding at the direction of the ASC.

§ 1102.23 Formal requirements as to papers filed.

(a) *Form.* All paper filed under this subpart must be double-spaced and printed or typewritten on 8½"×11" paper. All copies shall be clear and legible.

(b) *Caption.* All papers filed must include at the head thereof, or on a title page, the name of the ASC and of the filing party, the title and/or docket number of the proceeding, and the subject of the particular paper.

(c) *Party names, signatures, certificates of service.* All papers filed must set forth the name, address and telephone number of the attorney or party making the filing, must be signed by the attorney or party, and must be accompanied by a certification setting forth when and how service has been made on all other parties.

(d) *Copies.* Unless otherwise specifically provided in the notice of proceeding or by the ASC during the proceeding, an original and one copy of all documents and papers shall be furnished to the Secretary.

§ 1102.24 Filing requirements.

(a) *Filing.* All papers filed with the ASC in any proceeding shall be filed with the Secretary, Appraisal Subcommittee, 2100 Pennsylvania Avenue, NW., Suite 200, Washington, DC 20037.

(b) *Manner of filing.* Unless otherwise specified by the ASC, filing may be accomplished by:

(1) Personal service;

(2) Delivering the papers to a reliable commercial courier service, overnight delivery service, or to the U.S. Post Office for Express Mail delivery; and

(3) Mailing the papers by first class, registered, or certified mail.

§ 1102.25 Service.

(a) *Methods; appearing party.* A serving party, who has made an appearance under § 1102.22 of this subpart, shall use one or more of the following methods of service:

(1) Personal service;

(2) Delivering the papers to a reliable commercial courier service, overnight delivery service, or to the U.S. Post Office for Express Mail delivery; and

(3) Mailing the papers by first class, registered, or certified mail.

(b) *Methods; non-appearing party.* If a party has not appeared in the proceeding in accordance with § 1102.22 of this subpart, the ASC or any other party shall make service by any of the following methods:

(1) By personal service;

(2) By delivery to a person of suitable age and discretion at the party's last known address;

(3) By registered or certified mail addressed to the party's last known address; or

(4) By any other manner reasonably calculated to give actual notice.

(c) *By the Subcommittee.* All papers required to be served by the ASC shall be served by the Secretary unless some other person shall be designated for such purpose by the ASC.

(d) *By the respondent.* All papers filed in a proceeding under this subpart shall be served by a respondent on the Secretary and each party's attorney, or, if any party is not so represented, then upon such party. Such service may be made by any of the appropriate methods specified in paragraphs (a) and (b) of this section.

§ 1102.26 When papers are deemed filed or served.

(a) *Effectiveness.* Filing and service are deemed effective:

(1) For personal service or same-day commercial courier delivery, upon actual delivery; and

(2) For overnight commercial delivery service, U.S. Express Mail delivery, or first class, registered, or certified mail, upon deposit in, or delivery to, an appropriate point of collection.

(b) *Modification.* The effective times for filing and service in paragraph (a) this section may be modified by the ASC in the case of filing or by agreement of the parties in the case of service.

§ 1102.27 Computing time.

(a) *General rule.* In computing any period of time prescribed or allowed by this subpart, the date of the act, event or default from which the designated period of time begins to run is not included. The last day so computed is included, unless it is a Saturday, Sunday, or Federal holiday, in which event the period runs until the end of next day which is not a Saturday, Sunday or Federal holiday. Intermediate Saturdays, Sundays, and legal holidays shall be included in the computation, unless the time within which the act is to be performed is seven days or less. If seven days or less, intermediate Saturdays, Sundays and Federal holidays are not included.

(b) *For service and filing responsive papers.* Whenever a time limit is measured by a prescribed period from the service of any notice or paper, the applicable time periods are calculated as follows:

(1) If service is made by first class, registered or certified mail, add three days to the prescribed period; and

(2) If service is made by express mail or overnight delivery service, add one day to the prescribed period.

§ 1102.28 Documents and exhibits in proceedings public.

Unless and until otherwise ordered by the ASC or unless otherwise provided by statute or by ASC regulation, all documents, papers and exhibits filed in connection with any proceeding, other than those that may be withheld from disclosure under applicable law, shall be placed by the Secretary in the proceeding's public file and will be available for public inspection and copying at the address set out in § 1102.24 above.

§ 1102.29 Conduct of proceedings.

(a) *In general.* Unless otherwise provided in the notice of proceedings, all proceedings under this subpart shall be conducted as hereinafter provided.

(b) *Written Submissions.* All aspects of the proceeding shall be conducted by written submissions only, with the exception of oral presentations allowed under § 1102.36 of this subpart.

(c) *Disqualification.* A subcommittee member who deems himself or herself disqualified may at any time withdraw. Upon receipt of a timely and sufficient affidavit of personal bias or disqualification of such member, the ASC will rule on the matter as a part of the record and decision in the case.

(d) *Use of ASC staff.* Appropriate members of the ASC's staff who are not engaged in the performance of investigative or prosecuting functions in the proceeding may advise and assist the ASC in the consideration of the case and in the preparation of appropriate documents for its disposition.

(e) *Authority of Subcommittee Chairperson.* The Chairperson of the ASC, in consultation with other members of the ASC whenever appropriate, shall have complete charge of the proceeding and shall have the duty to conduct it in a fair and impartial manner and to take all necessary action to avoid delay in the disposition of proceedings in accordance with this subpart.

(f) *Conferences.* The ASC may on its own initiative or at the request of any party, direct all parties or counsel to meet with one or more duly authorized ASC members or staff at a specified time and place, or to submit to the ASC or its designee, suggestions in writing for the purpose of considering any or all of the following:

(1) Scheduling of matters, including a timetable for the information-gathering phase of the proceeding;

(2) Simplification and clarification of the issues;

(3) Stipulations and admissions of fact and of the content and authenticity of documents;

(4) Matters of which official notice will be taken; and

(5) Such other matters as may aid in the orderly disposition of the proceeding, including disclosure of the names of persons submitting affidavits or other documents and exhibits which may be introduced into the public file of the proceeding.

Such conferences will not be recorded, but the Secretary shall place in the proceedings' public file a memorandum summarizing the results of the conference. The memorandum shall control the subsequent course of the proceedings, unless the ASC for good cause modifies those results and instructs the Secretary to place an amendatory memorandum to that effect in the public file.

(g) *Changes or extensions of time and changes of place of proceeding.* The ASC at any time may instruct the Secretary to publish a notice in the **Federal Register** providing time limits different from those specified in this subpart, and may, on its own initiative or for good cause shown, change or extend any time limit prescribed by this subpart, including the date for ending the information-gathering phase of the proceeding.

(h) *Call for further briefs, memoranda, statements; reopening of matters.* The ASC may call for the production of further information upon any issue, the submission of briefs, memoranda and statements (together with written responses), and, upon appropriate notice, may reopen any aspect of the proceeding at any time prior to a decisions on the matter.

§ 1102.30 Rules of evidence.

(a) *In general.* (1) Except as is otherwise set forth in this section, relevant, material and reliable evidence that is not unduly repetitive is admissible to the fullest extent authorized by the Administrative Procedure Act and other applicable law.

(2) Evidence that would be admissible under the Federal Rules of Evidence is admissible in a proceeding conducted under this subpart.

(3) Evidence that would be inadmissible under the Federal Rules of Evidence may be deemed or ruled admissible in a proceeding conducted under this subpart if such evidence is relevant, material, reliable and not unduly repetitive.

(b) *Stipulations.* Any party may stipulate in writing as to any relevant matters of fact, law, or the authenticity of any relevant documents. The secretary shall place such stipulations in the public file, and they shall be binding on the parties.

(c) *Official notice.* Every matter officially noticed by the ASC shall appear in the public file, unless the ASC determines that the matter must be withheld from public disclosure under applicable Federal law.

§ 1102.31 Burden of proof.

The ultimate burden of proof shall be on the respondent. The burden of going forward with a *prima facie* case shall be on the ASC.

§ 1102.32 Notice of Intention To Commence A Proceeding.

The ASC shall instruct the Secretary or other designated officer acting for the ASC to publish in the **Federal Register** a Notice of Intention To Commence A Proceeding ("Notice of Intention"). The Notice of Intention shall be served upon the party or parties to the proceeding. The Notice of Intention shall state the legal authority and jurisdiction under which the proceeding is to be held; shall contain, or incorporate by appropriate reference, a specific statement of the matters of fact or law constituting the grounds for the proceeding; and shall state a date no sooner than 21 calendar days after service of the Notice of Intention is made for termination of the information-gathering phase of the proceeding. The ASC may amend a Notice of Intention in any manner and to the extent consistent with provisions of applicable law.

§ 1102.33 Rebuttal or Notice Not To Contest.

(a) *When required.* A party to the proceeding may file either a Rebuttal or a Notice Not to Contest the statements contained in the Notice of Intention or any amendment thereto with the Secretary within 15 calendar days after being served with the Notice of Intention or an amendment to such Notice. The Secretary shall place the Rebuttal or the Notice Not To Contest in the public file.

(b) *Requirements of Rebuttal; effect of failure to deny.* A Rebuttal filed under this section shall specifically admit, deny or state that the party does not have sufficient information to admit or deny each statement in the Notice of Intention. A statement of lack of information shall have the effect of a denial. Any statement not denied shall be deemed to be admitted. When a party intends to deny only a part or a qualification of a statement, the party shall admit so much of it as is true and shall deny only the remainder.

(c) *Notice Not To Contest.* A party filing a Notice Not To Contest the statement of fact set forth in the Notice of Intention shall constitute a waiver of the party's opportunity to rebut the facts alleged, and together with the Notice of Intention and any referenced documents, will provide a record basis on which the ASC shall decide the matter. The filing of a Notice Not To Contest shall not constitute a waiver of the right of such party to a judicial review of the ASC's decision, findings and conclusions.

(d) *Effect of failure to file Rebuttal or Notice Not To Contest.* Failure of a party to file a response required by this section within the time provided shall constitute a waiver of the party's opportunity to rebut and to contest the statements in the Notice of Intention and shall constitute authorization for the ASC, without further notice to the party, to find the facts to be as presented in the Notice of Intention and to file with the Secretary a decision containing such findings and appropriate conclusions. The ASC, for good cause shown, may permit the filing of a Rebuttal After the prescribed time.

§ 1102.34 Briefs, memoranda and statements.

Until the end of the information-gathering phase of the proceeding, any party may file with the Secretary a written brief, memorandum or other statement providing factual data and policy and legal arguments regarding the matters set out in the Notice of Intention. The filing party shall simultaneously serve other parties to the proceeding with a copy of the document. No later than ten calendar days after such service, any party may file with the Secretary a written response to the document and must simultaneously serve a copy thereof on the other parties to the proceeding. The Secretary will receive documents and responses and will place them in the public file.

§ 1102.35 Opportunity for informal settlement.

Any party may at any time submit to the Secretary, for consideration by the Subcommittee, written offers or proposals for settlement of a proceeding, without prejudice to the rights of the parties. No offer or proposal shall be included in the proceeding's public file over the objection of any party to such proceeding. This paragraph shall not preclude settlement of any proceeding by the filing of a Notice Not To Contest as provided in paragraph (c) of § 1102.33 or by the submission of the case to the ASC on a stipulation of facts.

§ 1102.36 Oral Presentations.

(a) *In general.* An oral presentation shall be considered as an opportunity to offer, emphasize and clarify the facts, polices and laws concerning the proceeding. A party does not have a right to an oral presentation.

(b) *Method and time of request.* Between the commencement of the proceeding and seven calendar days before the end of the information-gathering phase, any party to the proceeding may file with the Secretary a letter requesting that the Secretary schedule an opportunity for the party to give an oral presentation to the ASC. That letter shall include the reasons why an oral presentation is necessary.

(c) *ASC processing.* The Secretary must promptly forward the letter request to the Chairman of the ASC. The Chairman, after informally contacting other ASC members and the ASC's senior staff for their views, will instruct the Secretary to forward a letter to the party either:

(1) Scheduling a date and time for the oral presentation; or

(2) Declining the request and providing the reasons therefor. The party's letter request and the ASC's response will be included in the proceeding's public file.

(d) *Procedure on presentation day.* On the appropriate date and time, the party or his or her attorney (if any) will make the oral presentation before the ASC. Any ASC member may ask the party or the attorney, as the case may be, pertinent questions relating to the content of the oral presentation. Oral presentations will not be recorded or otherwise transcribed. The Secretary must enter promptly into the proceeding's public file a memorandum summarizing the subjects discussed during the oral presentation.

§ 1102.37 Decision of the Subcommittee and judicial review.

At a reasonable time after the end of the information-gathering phase of the proceeding, but not exceeding 45 calendar days, the ASC shall issue a final decision in the matter and shall cause the decision to be published promptly in the **Federal Register.** The Secretary shall serve the decision upon the parties promptly, shall place it in the proceeding's public file and shall furnish it to such other persons as the ASC may direct. Pursuant to the provisions of chapter 7 of title 5 of the U.S. Code and section 1118(c)(3) of title XI of FIRREA (12 U.S.C. 3348(c)(3)), a final decision of the ASC is a prerequisite to seeking judicial review.

§ 1102.38 Compliance activities.

(a) Where, from complaints received from members of the public, communications from Federal or State agencies, examination of information made by the ASC, or otherwise, it appears that a person has violated, is violating or is about to violate title XI of FIRREA or the rules or regulations thereunder, the ASC staff may commence an informal, preliminary inquiry into the matter. The ASC, in its discretion, may determine to commence a formal investigation respecting the matter and shall instruct the Secretary to create a public file for the formal investigation. The Secretary shall place in that file a memorandum naming the person or persons subject to the investigation and the statutory basis for the investigation.

(b) Unless otherwise instructed by the ASC or required by law, the Secretary shall ensure that all other papers, documents and materials gathered or submitted in connection with the investigation are non-public and for ASC use only.

(c) Persons who become involved in preliminary or formal investigations may, on their own initiative, submit a written statement to the Secretary setting forth their interests, positions or views regarding the subject matter of the investigation. Upon request, the staff, in its discretion, may advise such persons of the general nature of the investigation, including the indicated violations as they pertain to them and the amount of time that may be available for preparing and submitting such a statement prior to the presentation of a staff recommendation to the ASC. In the event a recommendation for the commencement of a proceeding is presented by the staff, the Secretary shall place any such statement in the public file of the proceeding.

(d) In instances where the staff has concluded its investigation of a particular matter and has determined that it will not recommend the commencement of a proceeding against a person, the staff, in its discretion, may advise the party that its investigation has been terminated. Such advice, if given, must in no way be construed as indicating that the party has been exonerated or that no action may ultimately result from the staff's investigation of the particular matter.

§ 1102.39 Duty to cooperate.

In the course of its investigations and proceedings, the ASC (and its staff, with appropriate authorization) must provide parties or persons ample opportunity to work out problems by consent, by settlement, or in some other manner.

By the Appraisal Subcommittee of the Federal Financial Institutions Examination Council.

Dated: March 18, 1992.

Fred D. Finke,

Chairman.

Coast Guard

33 CFR Part 143; 46 CFR Part 2

[CGD 91-030]

RIN 2115-AD78

Direct User Fees for Inspection or Examination of U.S. and Foreign Commercial Vessels

AGENCY: Coast Guard, DOT.

ACTION: Notice: reopening of the public comment period and schedule of public hearings.

SUMMARY: On December 18, 1991, the Coast Guard published in the **Federal Register** a notice of proposed rulemaking to establish user fees for Coast Guard services related to the inspection or examination of U.S. and foreign commercial vessels. Numerous individuals have requested additional time to comment on the proposed rulemaking; others have requested that the Coast Guard hold public hearings. In response to these requests, the Coast Guard has decided to reopen the comment period and to hold nine public hearings on this proposal at the locations specified in **SUPPLEMENTARY INFORMATION** below.

DATES: Written comments must be received on or before May 18, 1992. The dates of the public hearings are April 13, April 14, April 17, April 20, April 22, April 24, April 27, April 28, 1992 and May 1, 1992 as further explained in **SUPPLEMENTARY INFORMATION** below.

ADDRESSES: Written comments may be either mailed to the Executive Secretary, Marine Safety Council (G-LRA/3406) (CGD 91-030), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001, or delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, telephone no. (202) 267-1477.

The Executive Secretary maintains the publid docket for this rulemaking. Comments received will become part of the docket and will be available for

inspection or copying at room 3406, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001.

Public hearings on the proposed rule will be held in Baltimore, MD; Secaucus, NJ; Boston, MA; Miami, FL; New Orleans, LA; Chicago, IL; Seattle, WA; San Francisco, CA; and San Diego, CA. The date and location of each public hearing are specified in **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Jack Kelly, Office of Marine Safety, Security and Environmental Protection (G–MP–1), room 2420, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001, telephone no. (202) 267–0009.

SUPPLEMENTARY INFORMATION:

Request for Comments

In the Notice of Proposed Rulemaking published in the **Federal Register** on December 18, 1991 (56 FR 65786), the Coast Guard invited and encouraged interested persons to participate in this rulemaking by submitting comments, including written data, views, or arguments. Several individuals requested an extension of the comment period, citing the fact that members of the merchant marine are often away from their home port for 30 days or more. Others commented on the difficulty of studying the proposed rule and providing meaningful comments within the original 60 day public comment period. Extending the comment period will allow the Coast Guard to gather additional information which will be helpful in developing this rulemaking. Thus, the comment period is reopened effective March 24, 1992. The comment period will close on May 18, 1992.

Persons desiring to submit written comments should include their name and address; identify this rulemaking (CGD 91–030) and the specific section of this proposal to which each comment applies; and a reason for each comment. Persons desiring acknowledgment that their comments were received should enclose a stamped, self-addressed postcard or envelope. The proposed rule may be changed in light of the comments received. All comments received on or before the closing date of the comment period, including those received between February 18, 1992 and the date of this notice, will be considered before final action is taken on this proposal.

Public Hearings

The Notice of Proposed Rulemaking published in the **Federal Register** on December 18, 1991 (56 FR 65786) stated that the Coast Guard did not plan to hold public hearings. Numerous comments requested that the Coast Guard hold public hearings, stating that the Coast Guard possessed inadequate information upon which to predict the economic impact of the proposed fees on certain classes of vessels.

Because those comments indicated that oral presentations would provide information which would benefit the proposed rulemaking, the Coast Guard has decided that it will hold public hearings at the locations and times specified below. Each of the public hearings will begin at 10 a.m. and end at 5 p.m., or earlier, provided that all those individuals desiring to speak have been heard.

These public hearings are being held to permit the public to present their views orally on the regulatory proposal, suggest alternative actions, and provide supportive information documenting their positions. The Coast Guard is particularly interested in the expected impact of the proposed rule on small entities and requests that the following data, to the extent available, be provided: the number of vessels owned; the length of each vessel owned; the number of passengers for which each vessel is certificated; the route of each vessel; gross annual receipts; annual salaries; annual expenses; average revenue days per year; the number of days each vessel is typically operated annually; and the average number of trips per vessel per day.

Submission of a written statement is encouraged. Any person may appear and be heard at these public hearings. Persons planning to appear and be heard are requested to notify the Coast Guard contact person assigned to the respective hearing date and location listed below, indicating the amount of speaking time desired. Depending upon the number of scheduled speakers, it may be necessary to limit the amount of time allocated to each person. Any limitation on the amount of time allocated will be announced at the beginning of each public hearing.

The public hearing schedule is as follows:

—Baltimore, Maryland; 10 a.m. to 5 p.m.; Monday, April 13, 1992 at the Hyatt Regency Baltimore, 300 Light Street, Baltimore, MD 21201; Telephone No. (410) 528–1234; Coast Guard point of contact and telephone number: Shirley Boone, (410) 962–5122.

—Secaucus, New Jersey; 10 a.m. to 5 p.m.; Tuesday, April 14, 1992 at the Meadowlands Hilton Hotel, 2 Harmon Plaza, Secaucus, NJ 07094; Telephone No. (800) 445–0667; Coast Guard point of contact and telephone number: Lieutenant Commander John O'Brien, (212) 668–7494;

—Boston, Massachusetts; 10 a.m. to 5 p.m.; Friday, April 17, 1992 at the Black Falcon Terminal, 1 Black Falcon Avenue, Boston, MA 02110; Coast Guard point of contact and telephone number: Lieutenant commander Paul Von Protz, (617) 223–8130.

—Miami, Florida; 10 a.m. to 5 p.m.; Monday, April 20, 1992 at the Hyatt Regency Hotel Miami, 400 Southeast 2nd Avenue, Miami, FL 33131; Telephone No. (800)228–9290; Coast Guard point of contact and telephone number: Lieutenant Commander Terry Steinford, (305) 536–5651.

—New Orleans, Louisiana; 10 a.m. to 5 p.m.; Wednesday, April 22, 1992 at the Doubletree Hotel, 300 Canal Street, New Orleans, LA, 70130; Telephone No. (504) 581–1300; Coast Guard point of contact and telephone number: Lieutenant Commander Ken Parris, (504) 682–6271.

—Chicago, Illinois; 10 a.m. to 5 p.m.; Friday, April 24, 1992 at the Chicago O'Hare Howard Johnson, 8201 W. Higgins Road, Chicago, IL 60631; Telephone No. (312) 693–2323; Coast Guard point of contact and telephone number: Laura Halberstadt, (312) 353–1229.

—Seattle, Washington; 10 a.m. to 5 p.m.; Monday, April 27, 1992 at the NOAA Sand Point Western Regional Center, Building 9, 7600 Sand Point Way, NE, Seattle, WA 98115; Coast Guard point of contact and telephone number: Lieutenant Commander Alex Munoz, (206) 553–1711.

—San Francisco, California; 10 a.m. to 5 p.m.; Tuesday, April 28, 1992 at the Clarion Hotel San Francisco Airport, 401 East Millbrae Avenue, Millbrae, CA 94030; Telephone No. (415) 692–6363; Coast Guard point of contact and telephone number: Lieutenant Commander Bob Shilland, (213) 499–5335.

—San Diego, California; 10 a.m. to 5 p.m.; Friday, May 1, 1992, at the Sheraton Harbor Island Hotel, 1380 Harbor Island Drive, San Diego, CA 92101; Telephone No. (619) 291–2900; Coast Guard point of contact and telephone number: Lieutenant Commander Bob Shilland, (213) 499–5335.

Dated: March 19, 1992.

A. E. Henn,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety, Security and Environmental Protection.

BILLING CODE 4910–14–M

POSTAL SERVICE

39 CFR Part 20

Proposed Changes in International Priority Airmail (IPA) Service

AGENCY: Postal Service.

ACTION: Proposed changes in International Priority Airmail service.

SUMMARY: Pursuant to its authority under 39 U.S.C. 407, the Postal Service is proposing to change the eligibility requirements for IPA service to require a mailing to weigh at least 10 pounds to quality for the service.

DATES: Comments on the proposed change must be received on or before April 23, 1992.

ADDRESSES: Director, Office of Rates, Rates and Classification Department, U.S. Postal Service, Washington, DC 20260–5350. Copies of all written comments will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, room 1140, 475 L'Enfant Plaza, SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: John F. Alepa (202) 268–2650.

SUPPLEMENTARY INFORMATION:

International Priority Airmail (IPA) service is as fast as or faster than regular international airmail service and is available to bulk mailers of LC and AO items to all foreign countries except Canada. At present, a mailing must consist of either 10 pounds or 200 pieces to qualify for IPA service.

As of April 4, 1992, the Postal Service will offer IPA service at both worldwide (nonpresorted) and zoned (presorted) rates. The zoned rate option, which has three rate groups consisting of destination countries employing common terminal dues systems, requires a minimum of 10 pounds to a single rate group to qualify for the zoned rate for that rate group. In contrast, the worldwide rate option is available to mailings that simply meet the eligibility requirements for IPA service. Whatever portion of an IPA mailing that does not meet the zoned rates' qualifying minimum must be sent at the worldwide rate.

The IPA rate structure reflects the cost savings that come from the Postal Service's handling bulk mailings rather than individual items. In general, for nonpresorted IPA mail, those cost savings are a function of both the weight and the density of a particular mailing. However, the current 10-pound-or-200-piece qualifying minimum fails to recognize that high-density IPA mailings are proportionately more costly to the Postal Service than lower-density mailings. Thus, for instance, a 2-pound mailing consisting of 200 very lightweight items could qualify for the service even though the Postal Service's costs to deliver such a high-density mailing might approach its costs to deliver the same 200 items if they were deposited individually.

In order to avoid having such mailings qualify for IPA service, the Postal Service is proposing to adopt a flat 10-pound qualifying minimum. The Postal Service believes that a qualifying minimum based solely on weight would be more consistent with the rationale for IPA service than the current qualifying minimum. Further, as the proposed minimum would be equivalent to the minimum that the Postal Service established for the zoned rate option, mail preparation and verification would be simplified.

Although 39 U.S.C. 407 does not require advance notice and opportunity for submission of comments, and the Postal Service is exempted by 39 U.S.C. 410(a) from the advance notice requirements of the Administrative Procedure Act regarding proposed rulemaking (5 U.S.C. 553), the Postal Service invites interested persons to submit written data, views, or arguments concerning the proposed change.

Authority: 39 U.S.C. 407, 410.

Stanley F. Mires,

Assistant General Counsel, Legislative Division.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1035

[Ex Parte No. 495]

Bills of Lading

AGENCY: Interstate Commerce Commission.

ACTION: Proposed rulemaking; reestablishment of a comment due date.

SUMMARY: By a notice of proposed rulemaking published in the **Federal Register** on December 30, 1991, 56 FR 67269, the Commission proposed to vacate its prescription of railroad and water carrier uniform bills of lading and livestock contracts. Comments were requested by February 13, 1992, but a notice published in the **Federal Register** on February 12, 1992, 57 FR 5123, stayed that due date pending consideration of a petition seeking expansion of the rulemaking. That petition has now been denied and a new comment due date is established.

DATES: Comments are due by April 17, 1992.

ADDRESSES: Send an original and 10 copies of comments, referring to Ex Parte No. 495, to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660. [TDD for hearing impaired: (202) 927–5721].

Decided: March 17, 1992.

By the Commission, Chairman Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett.

Sidney L. Strickland, Jr.,

Secretary.

Tuesday, March 24, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

[Docket No. 92-001N]

Hazard Analysis and Critical Control Point (HACCP) Workshop; Solicitation of Participants

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: The Food Safety and Inspection Service (FSIS) intends to facilitate the meat and poultry industries' development of generic model Hazard Analysis and Critical Control Point (HACCP) plans. This notice solicits participation by technical experts from the meat and poultry industries at the workshop on Swine Slaughter (market hogs). This workshop will be held March 31 through April 2, 1992, at the Hyatt Regency, Minneapolis, Minnesota.

DATES: Interested participants for the workshop on Swine Slaughter (market hogs) should supply the requested information no later than March 27, 1992.

FOR FURTHER INFORMATION CONTACT: Dr. Dorothy Stringfellow, Acting Director, HACCP Special Team, United States Department of Agriculture, Food Safety and Inspection Service, room 2915, South Building, 14th and Independence Avenue, SW., Washington, DC 29250, (202) 690-2087.

SUPPLEMENTARY INFORMATION: FSIS recognizes the merits of HACCP as a system for sanitation and process control. The industries have expressed an interest in incorporating HACCP into the production of meat and poultry products. It is the intention of FSIS to facilitate the industries' development of generic HACCP models at product specific workshops. For this purpose, technical experts from the meat and poultry industries are being sought to work on the development of a generic HACCP model for Swine Slaughter (market hogs). Individuals or companies volunteering to participate in the development of the model during the workshop need not have previous experience in HACCP-based operations. In fact, it is desirable to include firms with varying degrees of prior HACCP experience.

The workshop on Swine Slaughter (market hogs) will be held on March 31 through April 2, 1992, at the Hyatt Regency, 1300 Nicollet Mall, Minneapolis, Minnesota 55403.

Anyone interested in participating in the workshop on Swine Slaughter (market hogs) should submit a written request noting the following:

(1) Organization affiliation, i.e., national and/or local trade associations(s), if any;

(2) Company, corporation, or independent operation represented by participant;

(3) Plant size, i.e., small, medium, or large; and

(4) Major product lines and approximate volumes.

The number of industry participants involved in the development of the generic HACCP models may have to be limited. If anyone is interested in participating in the workshop on Swine Slaughter (market hogs) and/or receiving technical information on the Agency's HACCP initiative, please submit written requests to Dr. Dorothy Stringfellow at the above address.

The workshop on Swine Slaughter (market hogs) will also be open to the public for observation. Space available for observers may be limited and seating will be based on a first come, first served basis. Therefore, those desiring to attend the workshop as observers are asked to submit requests in writing, indicating the following:

(1) Name, address, and phone number; and

(2) Name of company or corporation the observer is representing, if applicable.

Observers will be given an opportunity to comment during the course of the workshop session.

There is no registration fee, but transportation and per diem expenses must be borne by the participant or his/her sponsor.

Done at Washington, DC, on: March 16, 1992.

H. Russell Cross,

Administrator, Food Safety and Inspection Service.

[FR Doc. 92-6692 Filed 3-23-92; 8:45 am]

BILLING CODE 3410-DM-M

Office of the Secretary

Establishment of the Alternative Agricultural Research and Commercialization Board and the Alternative Agricultural Research and Commercialization Center

AGENCY: Department of Agriculture.

ACTION: Notice of establishment of the Alternative Research and Commercialization Board and the Alternative Agricultural Research and Commercialization Center.

This notice advises of the establishment of the Alternative Agricultural Research and Commercialization Board (Board) within the Department of Agriculture (USDA) and the establishment of the Alternative Agricultural Research and Commercialization Center (Center) within USDA in accordance with the Alternative Agricultural Research and Commercialization Act of 1990 (AARC Act), 7 U.S.C. 5901 *et seq.*

The Board shall consist of nine members appointed by the Secretary of Agriculture (Secretary). The Board responsibilities include the following: General supervision and policy control of the Center and Regional Centers; determination of high priority commercialization areas to receive assistance under the AARC Act; reviewing any grant, contract, cooperative agreement, or financial assistance transaction entered into by the Center; rendering of final decisions, by majority vote, on whether and how to provide assistance to an applicant; establishment of program policy, objectives, research and development, and commercialization priorities to implement the AARC Act, through a process of public hearings; development and establishment of a budget plan and a long-term operating plan to implement the AARC Act; and such other duties as necessary to implement the AARC Act.

The Center shall be operated as an independent entity within USDA under the general supervision and policy control of the Secretary. The Center shall be headed by a Director to be appointed by the Board and approved by the Secretary.

The Center shall have the authority to: Make grants to, and enter into cooperative agreements and contracts with, eligible applicants for research, development, and demonstration projects in accordance with the AARC Act; make loans, interest subsidy payments, and repayable grants and invest venture capital in accordance with the AARC Act; collect and disseminate information about State, regional, and local commercialization projects; search for new nonfood, nonfeed products that may be produced from agricultural commodities and for processes to produce such products; administer, maintain, and dispense funds from the Alternative Agricultural Research and Commercialization Revolving Fund to facilitate the conduct of activities under the AARC Act; and engage in other activities incident to carrying out its functions.

Dated: March 16, 1992.

Edward Madigan,

Secretary of Agriculture.

BILLING CODE 3410-01-M

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting to the California Advisory Committee

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the California Advisory Committee to the Commission will convene at 9 a.m. and adjourn at 12 noon, on April 11, 1992 at the Radisson Hotel, 1433 Camino Del Rio, San Diego, California 92108. The purpose of the meeting is to update the Committee on the border violence project and review other Committee programs.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Michael C. Carney or Philip Montez, Director of the Western Regional Division (213) 894-3437, TDD (213) 894-0508. Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, DC, March 18, 1992.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals for collections of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.
Title: Broadwoven Fabrics (Gray).
Form Number(s): MQ22T.
Agency Approval Number: 0607-0625.
Type of Request: Revision of a currently approved collection.
Burden: 1,400 hours.
Number of Respondents: 393.
Avg Hours Per Response: 1 hour.
Needs and Uses: This survey is part of the Census Bureau's Current Industrial Reports Program which measures production of various manufactured products. Census conducts this survey quarterly to gather information on the level of production of selected broadwoven fabrics. The interagency Committee for the Implementation of Textile Agreements (CITA) uses the data resulting from this collection to monitor potential market disruptions resulting from trade in the gray broadwoven fabric areas. Other government agencies, trade associations, and business firms use these data for making production, investment, and trade policy decisions. We are requesting clearance for a shortened version of the quarterly questionnaire which we will send annually to small companies in an effort to to reduce burden.
Affected Public: Businesses or other for-profit organizations, small businesses or organizations.
Frequency: Quarterly and annually.
Respondent's Obligation: Mandatory.
OMB Desk Officer: Maria Gonzalez, (202) 395-7313.

Agency: Bureau of the Census.
Title: 1992 Census of Governments-Property Values Survey.
Form Number(s): GP-31.
Agency Approval Number: None.
Type of Request: New collection.
Burden: 66,667 hours.
Number of Respondents: 200,000.
Avg Hours Per Response: 20 minutes.
Needs and Uses: The Census Bureau will conduct this survey in conjunction with the 1992 Census of Governments. We will collect information from buyers or sellers of real property on sales price and other sales characteristics. From this data and information on assessed values, which we will obtain from public records of transfers available from recording, assessing, or other offices in the local area, we will develop assessment-sales price ratios, which will in turn be used to produce estimates of real property values. State and local officials use the data to compare assessment performance of and between jurisdictions within their states. The data will be presented as a major component of the Census Bureau's report, **Taxable Property Values and Assessment/Sales Price Ratios.**
Affected Public: Individuals or households.
Frequency: Every five years.
Respondent's Obligation: Voluntary.
OMB Desk Officer: Maria Gonzalez, (202) 395-7313.

Agency: Bureau of the Census.
Title: 1992 Economic Censuses-General Schedule.
Form Number(s): NC-9923.
Agency Approval Number: None.
Type of Request: New collection.
Burden: 75,000 hours.
Number of Respondents: 300,000.
Avg Hours Per Response: 15 minutes.
Needs and Uses: The Census Bureau will conduct this survey as part of the economic censuses. We will contact approximately 300,000 unclassified businesses in order to assign them 4-digit Standard Industrial Classification (SIC) codes and obtain current information on their physical location. These businesses remain unclassified because of insufficient information reported to the Internal Revenue Service. They must be assigned SIC codes in order to provide detailed industry data for the 1992 Economic Censuses and the Standard Statistical Establishment List. The Census Bureau has contracted with the Bureau of Labor Statistics to receive classification information for unclassified businesses. However, after these efforts and our further attempts to assign these businesses SIC codes based on their company name there are still approximately 300,000 unclassified businesses on the 1992 Economic Censuses mailing list. These are the businesses to be contacted in this survey. The collection of this information will improve the accuracy and reliability of both the industry and geographic classification in the 1992 Economic Censuses, which constitute the primary source of facts about the structure and functioning of key sectors of our economy.

Affected Public: Businesses or other for-profit organizations, small businesses or organizations.

Frequency: Every five years.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Agency: Bureau of the Census.

Title: 1992 Economic Censuses–Classification Report.

Form Number(s): NC–9920.

Agency Approval Number: None.

Type of Request: New collection.

Burden: 9,166 hours.

Number of Respondents: 55,000.

Avg Hours Per Response: 10 minutes.

Needs and Uses: The Census Bureau will conduct this survey as part of the economic censuses. We will contact approximately 50,000 partially classified businesses in order to assign them complete 4–digit Standard Industrial Classification (SIC) codes and obtain current information on their physical location. These businesses remain partially classified because of insufficient information reported to the Internal Revenue Service. They must be assigned complete SIC codes in order to provide detailed industry data for the 1992 Economic Censuses and the Standard Statistical Establishment List. The Census Bureau has contracted with the Bureau of Labor Statistics to receive classification information for partially classified businesses. However, after these efforts, there are still approximately 50,000 partially classified businesses on the 1992 Economic Censuses mailing list. These are the businesses to be contacted in this survey. The collection of this information will improve the accuracy and reliability of both the industry and geographic classification in the 1992 Economic Censuses, which constitute the primary source of facts about the structure and functioning of key sectors of our economy.

Affected Public: Businesses or other for–profit organizations, small businesses or organizations.

Frequency: Every five years.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Agency: Bureau of the Census.

Title: Survey of Income and Program Participation–Data Users Evaluation Study.

Form Number(s): SSDU-1.

Agency Approval Number: None.

Type of Request: New collection.

Burden: 50 hours.

Number of Respondents: 100.

Avg Hours Per Response: 30 minutes.

Needs and Uses: This submission requests clearance of a survey questionnaire developed by the Bureau of the Census to assess Survey of Income and Program Participation (SIPP) data product utility and solicit users' suggestions for improving access to SIPP data products. The Bureau will administer the ½ hour questionnaire to 100 respondents, evaluate survey responses and make short– and long–term recommendations for improving the creation, accessibility, and dissemination of SIPP data products. The survey also includes nonusers of SIPP data to determine how the Census Bureau could make the data useful to a broader group of analysts and public policy makers.

Affected Public: Individuals or households, state or local governments, businesses or other for-profit organizations, Federal agencies or employees, non–profit institutions, small businesses or organizations.

Frequency: One time.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposals can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 377–3271, Department of Commerce, Room 5312, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collections should be sent to Maria Gonzalez, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: March 18, 1992.

Edward Michals,

Departmental Forms Clearance Officer, Office of Management and Organization.

[FR Doc. 92–6790 Filed 3–23–92; 8:45 am]

BILLING CODE 3510–07–F

Economic Development Administration

Notice of Petitions by Producing Firms for Determination of Eligibility to Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: To give firms an opportunity to comment.

Petitions have been accepted for filing on the dates indicated from the firms listed below.

Firm name	Address	Date petition accepted	Product
Aero Systems, Inc.	9650 Rush Street, South El Monte, CA 91733.	2/19/92	Customized Structural Aerospace Components.
Flair Electronics, Inc.	650 West Foothill Blvd., Glendora, CA 91740.	2/19/92	Design and Manufacture of Security Products: Contacts, Annunciators, and Detectors.
Pacific Protective Garments D/B/A Graphic Jackets.	4797 First Avenue South, Seattle, WA 98134.	2/19/92	Printed Jackets, Bags and Aprons.
Atlantic Termoplastics Company, Inc.	End of Carrington St, Off Rte 122, Blackstone, MA 01504.	2/20/92	Plastic Innersoles and Outer Soles for Shoes and Sandals.
Tropical Creations Manufacturing, Inc.	575 Waimahu Street, #620, Honolulu, HI 96813.	2/25/92	Gold Chains and Charms.
Safety Socket Screw Corporation.	6501 North Avondale Avenue, Chicago, IL 60631.	2/25/92	Screws of Steel, Threaded With Hexagonal or Socket Heads.
Sara & Roxie Associates, Inc. DBA S.A.R.A., Inc.	208 Market Street, Winnsboro, TX 75494.	2/28/92	Ladies Apparel.
John Ramming Machine Company.	4591 McRee Avenue, St. Louis MO 63110.	3/03/92	Rotary Tables and Cross Slide Tables Used With Boring Mills and Machining Centers.
Eastern Standard Corporation.	1601 Wicomico Street, Baltimore, MD 21230.	3/04/92	Aluminum Venetian Blinds and Aluminum Above-Ground Swimming Pool Parts.
Hoy Shoe Company, Inc.	4970 Kemper Avenue, St. Louis, MO 63139.	3/05/92	Children's Sandles.

Firm name	Address	Date petition accepted	Product
Alco Industries, Inc.	1045 W. 500 N., Logan, UT 84321.	3/06/92	Textile Bags, Coolers, Aprons, Portfolios, Briefcases, & Banners.
Photonamics, Incorporated.	558 Elm Grove Road, Rochester, NY 14606.	3/06/92	Printed Circuit Boards.
Ace Pattern & Foundry of Kansas, Inc.	1001 Sunshine Road, Kansas City, KS 66115.	3/09/92	Aluminum Sand and Mold Castings.
Niagara Straw Co., Inc.	72 Lakeview Avenue, Buffalo, NY 14201.	3/09/92	Plastic Drinking Straws.
John Heinrich Company, Inc. of Nevada.	240 South Stanford, Sparks, NV 89431.	3/10/92	Metal Automobile Parts.
Castings USA, Inc.	P.O. Box 7677, Pine Bluff, AR 71611.	3/10/92	Miscellaneous Steel Castings.
World Magnetics Company.	810 Hastings, Traverse City, MI 49684.	3/10/92	Magnetic Heads and Low Pressure Switches.
Thomas Electronics, Inc.	100 Riverview Drive, Wayne, NJ 07470.	3/10/92	Cathode-Ray Tubes for Video Displays.
Kartridg Pak Co. (The).	607 W. Kimberly Road, Davenport, IA 52806–3648.	3/10/92	Industrial Machinery & Equipment.

The petitions were submitted pursuant to section 251 of the Trade Act of 1974 (19 U.S.C. 2341). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Trade Adjustment Assistance Division, room 4015A, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance.

Dated: March 19, 1992.

Steven R. Brennen,

Acting Deputy Assistant Secretary for Program Operations.

BILLING CODE 3510–24–M

International Trade Administration

[A–588–809]

Certain Small Business Telephone Systems and Subassemblies Thersof From Japan; Termination of Antidumping Duty Administration Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of termination of antidumping duty administrative review.

SUMMARY: On January 23, 1992, the Department of Commerce (the Department) initiated an administrative review of the antidumping duty order on certain small business telephone systems and subassemblies thereof from Japan. The Department is now terminating that review.

EFFECTIVE DATE: March 24, 1992.

FOR FURTHER INFORMATION CONTACT: Todd Peterson or Thomas Futtner, Office of Antidumpting Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377–4106/3814.

SUPPLEMENTARY INFORMATION:

Background

On January 23, 1992, the Department published a notice of initiation of administrative review of the antidumping duty order on certain small business telephone systems and subassemblies thereof from Japan (57 FR 2704). That notice stated that we would review information submitted by one manufacturer/exporter, Iwatsu Electric Company, for the period December 1, 1990, through November 30, 1991. The petitioner, AT&T, subsequently withdrew its request for review. Since no other interested parties have requested an administrative review for this period, the Department is terminating this review.

This termination notice is published pursuant to section 751(a)(1) of the Tariff Act of 1930, as amended (19 U.S.C. 1675(a)(1)), and 19 CFR 353.22(a)(5).

Dated: March 12, 1992.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

[FR Doc. 92–6792 Filed 3–23–92; 8:45 am]

BILLING CODE 3510–DS–M

National Institute of Standards and Technology

National Voluntary Laboratory Accreditation Progam

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of workshop; Accreditation for Testing Energy Efficient Lighting Products Performance.

SUMMARY: The National Institute of Standards and Technology (NIST) will host a public workshop on May 14, 1992 to provide interested parties an opportunity to participate in the development of technical requirements for accrediting laboratories that perform lighting products and systems testing. There are no fees for participation in the workship

DATES: The workshop will be held on Thursday, May 14, 1992 from 8:30 a.m. to 3:30 p.m.

PLACE: The workshop will be held at the the Crystal City Marriott 1999 Jefferson Davis Highway, Arlington, VA (about 1 mile from National Airport).

A conference room has been reserved and will be listed on the directory. Special room rates have been arranged for overnight arrival before the meeting. (The location is accessible by metro).

FOR FURTHER INFORMATION CONTACT: Lawrence Galowin, NVLAP, National Institute of Standards and Technology, building 411, Gaithersburg, MD 20899. To assist in preparing for the meeting please provide information to NVLAP about individuals/organizations planning to attend the workshop. Contact Dr. L. Galowin by May 1, 1992 at the above address, or telephone call to (301) 975–4016, or FAX (301) 926–2884.

Draft technical douments and administrative details for the program will be available at the workshop.

SUPPLEMENTARY INFORMATION:

Background

This notice is issued in accordance with the NVLAP Procedures (15 CFR part 7). In a **Federal Register** notice dated May 15, 1991 (Vol. 56, No. 94 CFR 22396–22397) the National Institute of Standards and Technology (NIST) announced the establisment of the program for test laboratories, "accreditation for Testing Energy Efficient Electric Lighting Products Performance". Establishment of the program is pursuant to the request by the National Electrical Manufacturers Association (NEMA) in a letter of November 27, 1990; that announcement was made in the **Federal Register** of January 25, 1991. Accreditation will be offered to all applicant laboratories that fulfill the requirements of the National Voluntary Laboratory Accreditation Program (NVLAP).

Technical criteria, requirements, proficiency testing and procedures for the test methods included in the first phase of accreditation of laboratories performing testing of electrical lighting products and systems have been developed and will be presented at the workshop. All interested parties will have an opportunity to comment on the program. The workshop is part of the NVLAP process of assuring that accreditation programs are of high technical quality, responsive to the technical needs of the community, and are relevant to the needs of those affected by accreditation. The scope of the subsequent phases of the program to be developed will be indicated.

The following plans for the workshop have been established:

1. *Purpose:* The workshop will provide all interested persons with an opportunity to participate and contribute to the development of technical criteria, requirements, and procedures for evaluation and accreditation of laboratories that perform testing of lighting products by test methods from standards and/or other protocols applicable to the accreditation program.

2. *Procedure:* The workshop will be an informal, nonadversarial meeting. The presiding NIST chairperson will allocate the time available for discussion of each issue to be addressed, and exercise such authority as may be necessary to insure the equitable and efficient conduct of the workshop and to proceed in an orderly manner.

3. *Provisions:* This workshop will be open to the public. No registration fee is required for the public workshop; housing is the responsibility of attendees.

The workshop will take place on May 14, 1992 at the Crystal City Marriott Hotel, Arlington, VA.

Documents in Public Record

Summary minutes of highlights from the meeting will be made available for inspection in the NVLAP program office, room A146, TRF Building 411 at the campus in Gaithersburg, Maryland.

Dated: March 17, 1992.

John W. Lyons,

Director.

[FR Doc. 92–6093 Filed 3–23–92; 8:45 am]

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Pacific Fishery Management Council and its advisory entities will meet on April 6–10, 1992, at the Clarion Hotel, 401 East Millbrae Avenue, Millbrae, CA. Except as noted below, the meetings are open to the public.

The Council will begin its meeting on April 7 at 8 a.m. in closed session (not open to the public) to discuss personnel matters, litigation and sensitive international issues. The Council's open session begins at 8:30 a.m., to discuss 1992 salmon fishery management issues. On April 8, the Council will meet at 8 a.m. to discuss management of coastal pelagic species, administrative matters, and salmon plan amendment issues. Also, the Council will accept comments on items not listed on the agenda on April 8 at 4 p.m.

On April 9 at 8 a.m. the Council will discuss groundfish management issues. The discussion of groundfish items will continue on April 10, at 8 a.m. Following groundfish, the Council will set priorities for work load activities and may eliminate some activities in order to accomplish the most important. Also on April 10, the Council will conclude its meeting after adopting 1992 salmon management measures.

Specific items to be considered are the following:

Salmon management issues: (1) Review the results of consultations with federal agencies under the Endangered Species Act; (2) review causes of decline of Puget Sound salmon stocks; (3) adopt 1992 ocean salmon management measures; and (4) select salmon plan amendment issues and options to be analyzed.

Groundfish management issues: (1) Inseason management measure adjustments, (2) experimental fishing permit applications to allow shoreside sorting of salmon in the whiting fishery; (3) experimental fishing permit application to allow the use of small mesh to harvest shortbelly rockfish; (4) identification of objectives, selection of issues and options to be addressed, and adoption of a process for development of individual quotas in the groundfish and Pacific halibut fisheries; (5) review of objectives and selection of options to be analyzed for long-term allocations of Pacific whiting; (6) discuss development of a flexible framework for setting and changing opening dates for the Pacific whiting fisheries; (7) discuss changes to the definition of legal trawl gear; and (8) discuss how to monitor landings of groundfish from the Cobb Seamount (outside the EEZ).

Coastal Pelagic Species management issues: The Council will receive a status report from the plan development team and advisory subpanel on the development of a coastal pelagic species fishery management plan. The Council will discuss plan objectives and options for limiting access to this fishery.

The Scientific and Statistical Committee will meet on April 6 at 8:30 a.m., to address scientific issues on the Council's agenda, and reconvenue on April 7 at 8 a.m.

The Salmon Advisory Subpanel will meet on April 6 at 8 a.m., to address salmon fishery management issues on the Council's agenda, and reconvene on April 7–10 at 8 a.m., or as necessary, to complete its agenda.

The Salmon Technical Team will meet as necessary on April 6–10 to assist the Salmon Advisory Subpanel, and to prepare impact analyses for management options.

The Groundfish Management Team will meet on April 6 at 8 a.m., to address groundfish issues on the Council's agenda

The Habitat Committee will meet on April 6 at 1 p.m., to address activities affecting the habitat of fish stocks managed by the Council.

The Budget Committee will meet on April 6 at 3 p.m., to review the fiscal year 1992 Council budget and to make recommendations for adjustments if necessary.

The Groundfish Advisory Subpanel will meet on April 7 at 8 a.m., to address groundfish management issues on the Council's agenda, and will reconvene on April 8 at 8 a.m.

Enforcement Consultants will meet on April 7 at 7 p.m., to address enforcement issues on the Council's agenda.

Detailed agendas for the above meetings will be available to the public after March 26, 1992. For more information contact Lawrence D. Six, Executive Director, Pacific Fishery Management Council, Metro Center, suite 420, 2000 SW. First Avenue, Portland, OR 97201; telephone: (503) 326–6352.

Dated: March 18, 1992.

David S. Crestin,

Deputy Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

[FR Doc. 92–6739 Filed 3–23–92; 8:45 am]

BILLING CODE 3510-22-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Space Exploration Initiative Support

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Space Exploration Initiative Aupport will meet in closed session on April 9–10, 1992 at Science Applications International Corporation, Falls Church, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will review the status of DoD activities, consider cooperative areas for DoD involvement, particularly those areas where there may be dual use—civil and military.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law 92–463, as amended (5 U.S.C. app. II, (1988)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly this meeting will be closed to the public.

Dated: March 19, 1992.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92–6757 Filed 3–23–92; 8:45 am]

BILLING CODE 3810-01-M

Department of the Army Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement for Implementation of the Coastal Wetlands Planning, Protection, and Restoration Act (Pub. L. 101–646, Title III)

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent to prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: The Coastal Wetlands Planning, Protection, and Restoration Act (CWPPRA) requires preparation of a Restoration Plan to restore and prevent the loss of coastal wetlands in Louisiana. Wetland loss is a national concern and as much as 80 percent of the coastal wetland loss in the contiguous United States is occurring in Louisiana. Development and implementation of the Restoration Plan has been determined to be a major Federal action which may significantly effect the environment, therefore a DEIS will be prepared as part of the planning process. The DEIS will be submitted for compliance with the National Environmental Policy Act.

FOR FURTHER INFORMATION CONTACT: Questions concerning development of the Restoration Plan and DEIS should be directed to Mr. Richard Boe, (504) 862–1505, or Mr. Stan Green, (504) 862–1486. Their address is U.S. Army Corps of Engineers, Planning Division (CELMN–PD), P.O. Box 60267, New Orleans, Louisiana 70160–0267.

SUPPLEMENTARY INFORMATION:

1. Authority

The CWPPRA directs the Secretary of the Army to convene a Task Force and prepare a plan to identify coastal wetlands restoration projects, in order of priority, based on cost-effectiveness of such projects in creating, restoring, protecting, or enhancing the long-term conservation of coastal wetlands in Louisiana. Members of the Task Force are the Secretary of the Army who serves as chairman, the Administrator of the Environmental Protection Agency, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce, and the Governor of Louisiana.

2. Proposed Study

A hydrologic basin approach is being used to investigate causes of coastal wetland loss and methods for preserving, restoring, creating, and enhancing coastal wetlands in Louisiana. A comprehensive plan of action will be developed for coastal Louisiana which includes nine hydrologic basins. The CWPPRA requires that the Restoration Plan be completed by November 28, 1993. The Restoration Plan and DEIS will constitute the public disclosure and decision making of the CWPPRA Task Force.

3. Alternatives

Alternatives for addressing wetland loss will include, but are not limited to; erosion control structures, vegetative plantings, marsh creation or nourishment with dredged material, restoration of barrier islands (especially for the protection they afford to interior marshes), freshwater diversion from river systems, sediment diversion from river systems, sediment trapping devices, hydrologic restoration involving closures or flow restrictions of man-made channels, and active or passive marsh management involving manipulation of water levels. These action alternatives will be evaluated along with the no-action alternative.

4. Public Involvement and Scoping

Eleven scoping meetings have been held in south Louisiana. Four meetings were held with local government representatives and seven meetings were held with the general public. News releases were sent to local media and known interested parties announcing the meetings. The stated purpose of these early scoping meetings was to solicit the public's help in identifying coastal wetland loss areas, identifying reasons for the losses, and suggesting projects and opportunities to create, restore, or protect coastal wetlands. Comments and proposals submitted during this public involvement effort will be included in the DEIS.

A Citizen Participation Group has been formed by the Task Force and is active in the planning process. The goals and objectives of the Citizen Participation Group are to promote the development of CWPPRA activities, promote citizen participation and involvement in formulation of the Restoration Plan, and to assist and participate in the public involvement program. Member organizations have interests that include coastal wetland restoration and preservation, commercial and recreational fishing, non-consumptive recreation, navigation, water quality, agriculture, landowner rights, mineral production, and economic development.

Parish (county) representatives are invited to be actively involved in the

planning process and to attend planning meetings. These representatives provide the Task Force with input from the public sectors that they represent and relay planning progress back to local agencies and the public.

Additional public involvement during Restoration Plan development is planned and citizen participation is encouraged. Public meetings will be held when the DEIS is released to the public for review and comment.

5. Significant Issues

The DEIS will analyze the effects of coastal wetland preservation, restoration, creation, and enhancement efforts on coastal marshes, coastal swamps, submerged aquatic vegetation, barrier islands, oyster leases, fishery resources, wildlife resources, threatened and endangered species, navigation, water quality, historical and cultural resources, and socio-economic factors.

6. Cooperating Agencies

The U.S. Army Corps of Engineers is the lead agency for the Task Force preparation of the DEIS. Cooperating agencies are the other Task Force agencies and each Task Force agency shares responsibility in preparation of the DEIS.

7. Environmental Consultation and Review

Cooperating agencies will provide consultation and review concurrent with preparation of the DEIS as appropriate. A Draft Fish and Wildlife Coordination Act Report will accompany the DEIS.

8. Estimated Date of Availability

The DEIS is expected to be made available to the public in June 1993.

Dated: March 2, 1992.

Michael Diffley,

Colonel, U.S. Army District Engineer.

[FR Doc. 92-6702 Filed 3-23-92; 8:45 am]

BILLING CODE 3710-84-M

Department of the Army, Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Study of Future Operations at Harlan County Lake, NE

AGENCY: U.S. Army Corps of Engineers, Kansas City District, DoD.

ACTION: Notice of intent.

SUMMARY: The purpose of this study is to develop a plan for the future operation of Harlan County Lake with due consideration being given to all of the multiple purposes for which the lake was authorized by Public Law.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action and DEIS can be answered by Ms. Sue Owen, telephone number (816) 426-7345, Special Studies Branch, Planning Division, U.S. Army Corps of Engineers, 700 Federal Building, 601 East 12th Street, Kansas City, Missouri 64106-2896.

SUPPLEMENTARY INFORMATION: 1. The Kansas City District, Corps of Engineers is undertaking a Study of the Future Operations at Harlan County Lake, Nebraska. The Study will evaluate various minimum lake pool levels and water release rates to determine:

a. Recreation/irrigation costs and benefits.

b. Regional social and economic impacts.

Environmental impacts and mitigation measures of the various alternatives.

Supporting study work will analyze the costs and benefits of modifications to lake recreational facilities and the rate of inflow depletions. The impacts on operation and maintenance of the lake will be assessed in a separate NEPA document.

The minimum lake pool level and water release recommendation would be based upon current storage and anticipated inflows and how best to share limited resources among competing user groups, including agriculture, recreation, and environmental interests.

2. Reasonable alternatives range from no usage of the sediment pool for irrigation to releasing as much water from the sediment pool as physically possible for irrigation.

3. Scoping Process.

a. A series of public meetings to be held within the Republican River Basin in both Kansas and Nebraska beginning in April 1992. The times, dates, and locations of these meetings will be announced as details are finalized.

Additonal meetings will be held as the study progresses to keep the public informed about the stydy.

Collectively, these meetings, as well as meetings which were previously held pursuant to this issue, will serve as the scoping process for preparation of the DEIS. No formal "scoping" meeting will be held.

Draft documents forthcoming from the study will be distributed to Federal, State and local agencies, as well as interested members of the public, for review and comment.

b. Significant issues to be analyzed in depth include evaluations of:

(1) Various minimum pool levels and determinations of recreation/irrigation costs and benefits.

(2) Regional social and economic impacts.

(3) Environmental impacts and mitigation measures.

(4) Costs and benefits of modifications to recreational facilities.

(5) Rate of inflow depletions.

c. The Corps will request the following Federal agencies to be cooperating agencies for this study: the Bureau of Reclamation (BOR) and the U.S. Fish and Wildlife Service (FWS).

d. Environmental consultation and review will be conducted in accordance with the requirements of the National Envirnomental Policy Act of 1969, Council of Environmental Quality Regulations (40 CFR parts 1500-1508), and other applicable laws, regulations, and guidelines.

4. The anticipated date of availability of the DEIS for public review is May 1993.

Dated: March 3, 1992.

Michael J. Bart,

Chief, Planning Division.

[FR Doc. 92-6701 Filed 3-23-92; 8:45 am]

BILLING CODE 3710-KN-M

Intent To Prepare a Draft Environmental Impact Statement for the West Bay Sediment Diversion, LA, Project

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Notice of intent to prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: A large-scale diversion of sediments from the Mississippi River into West Bay is proposed for wetland restoration.

FOR FURTHER INFORMATION CONTACT: Questions related to the DEIS should be directed to Mr. Richard Boe, (504) 862-1505 or FTS 493-1505. His address is U.S. Army Corps of Engineers, Planning Division (CELMN-PD), P.O. Box 60267, New Orleans, Louisiana 70160-0267.

SUPPLEMENTARY INFORMATION:

1. Authority

The **Federal Register** of September 10, 1987 contained a Notice of Intent to publish a DEIS for the Land Loss and Marsh Creation Feature of the Louisiana Coastal Area, Louisiana Study. The Notice of Intent included uncontrolled sediment diversions within the active delta of the Mississippi River in the list of alternatives to be evaluated in the DEIS. Since publication of that Notice of Intent, the Corps of Engineers has studied the feasibility of sediment diversions under the Land Loss and Marsh Creation Study. On Novermber 28, 1990, Public Law 101-646, title III, the Coastal Wetlands Planning, Protection, and Policy Act (CWPPRA) was passed. The current proposal is to build a large-scale, uncontrolled sidiment diversion, similar to that which was being investigated under the Land Loss and Marsh Creation Study, under the authority and with funds provided by the CWPPRA. The Land Loss and Marsh Creation study is continuing without a large-scale sediment diversion as an alternative.

2. Proposed Study

The proposal is to divert sediments from the Mississippi River into West Bay for purposes of wetland restoration.

3. Alternatives

Alternative locations, designs, and capacities for the project are under consideration.

4. Public Involvement and Scoping

Public involvement conducted under the Land Loss and Marsh Creation Study included meetings in Belle Chasse, Houma, and Cameron, Louisiana in August 1984. A Scoping Input Request was mailed to appropriate agencies and other interested parties in September 1987 and numerous meetings have been held with Federal, state, and local agencies, groups, and individuals. Additional public comments are invited during preparation of the DEIS.

A Citizen Participation Group has been formed and is active in the planning process for the CWPPRA. The goals and objectives of the citizen participation group are to promote the development of CWPPRA activities, promote cifizen participation and involvement in formulation of projects, and to assist and participate in the public involvement program. Member organizations have interests that include coastal wetland restoration and preservation, commercial and recreational fishing, non-consumptive recreation, navigation, water quality, agriculture, landowner rights, mineral production, and economic development. Public meetings will be held when the DEIS is released to the public.

5. Significant Issues

The DEIS will analyze the effects of the proposed project on coastal marsh, coastal swamp, submerged aquatic vegetation, oyster leases, fishery resources, wildlife resources, threatened and endangered species, navigation, water quality, historical and cultural resources, and socio-economic factors.

6. Environmental Consultation and Review

The U.S. Fish and Wildlife Service will provide a Coordination Act Report. Coordination will be maintained with the U.S. Fish and Wildlife Service and the National Marine Fisheries Service concerning threatened and endangered species. An evaluation will be prepared to comply with section 404(b)(1) of the Clean Water Act, as amended, and submitted to the Environmental Protection Agency for their review. Coordination will be maintained with the State Historic Preservation Officer and the Advisory Council on Historic Preservation. The Louisiana Department of Natural Resources will be consulted regarding consistency with the Coastal Zone Management Act. Application will be made for a Water Quality Certificate from the Louisiana Department of Environmental Quality.

7. Estimated Date of Availability

The DEIS is expected to be made available to the public in May 1992.

Dated: March 2, 1992.

Michael Diffley,

Colonel, U.S. Army District Engineer

BILLING CODE 3710-84-M

DEPARTMENT OF EDUCATION

[CFDA No: 84.192]

Adult Education for the Homeless Program; Inviting Applications for New Awards for Fiscal Year (FY) 1993

Purpose of Program: The Adult Education for the Homeless Program provides assistance to enable State educational agencies to plan and implement, either directly or through contracts or subgrants, a program of literacy training and basic skills remediation for adult homeless individuals within their States.

Improving literacy skills for all Americans is National Education Goal Number 5 and is an important aspect of AMERICA 2000, the President's education reform strategy to move the Nation toward achievement of the National Education Goals. This program supports AMERICA 2000 by helping to prepare adult homeless individuals for responsible citizenship, further learning, and productive employment as called for by the National Education Goals.

Eligible Applicants: State educational agencies in the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands.

Deadline for Transmittal of Applications: June 5, 1992.

Deadline for Intergovernmental Review: August 4, 1992.

Applications Available: March 27, 1992.

Available Funds: $9,759,000 for fiscal year 1993.

Estimated Range of Awards: $75,000-$500,000 per project year.

Estimated Average Size of Awards: $280,000 per project year.

Estimated Number of Awards: 35.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 36 months.

Applicable Regulations: (a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR part 75 (Direct Grant Programs), 34 CFR part 77 (Definitions that Apply to Department Regulations), 34 CFR part 79 (Intergovernmental Review of Department of Education Programs and Activities), 34 CFR part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments), 34 CFR part 81 (General Education Provisions Act—Enforcement), 34 CFR part 82 (New Restrictions on Lobbying), 34 CFR part 85 (Governmentwide Debarment and Suspension (Non-procurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)), and 34 CFR part 86 (Drug-Free Schools and Campuses); and (b) The regulations for this program in 34 CFR part 441.

Selection Criteria

The Secretary assigns the 15 points, reserved in 34 CFR 441.20(b), as follows: 10 points to selection criterion (c)—Plan of operation—in 34 CFR 441.21(c) for a total of 25 points for that criterion; and 5 points to selection criter (d)—Quality of key personnel—in 34 CFR 441.21(d) for a total of 20 points for that criterion.

FOR FURTHER INFORMATION CONTACT: Paul R. Geib, Jr., Special Programs Branch, Division of National Programs, Office of Vocational and Adult Education, U.S. Department of Education, 400 Maryland Avenue, SW. (room 4512, Mary E. Switzer Building), Washington, DC 20202-7327. Telephone (202) 732-2364. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

Program Authority: 42 U.S.C. 11421.

Dated: March 13, 1992.

Betsy Brand,

Assistant Secretary, Office of Vocational and Adult Education.

[FR Doc. 92-6738 Filed 3-23-92; 8:45 am]

DEPARTMENT OF ENERGY

Office of Fossil Energy

[FE Docket No. 91-117-NG]

Rio Energy International, Inc.; Order Granting Blanket Authorization To Export Natural Gas to Mexico

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of order granting blanket authorization to export natural gas.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Rio Energy International, Inc. blanket authorization to export up to 54.8 Bcf of natural gas to Mexico over a two-year period beginning on the date of first delivery.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, March 18, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

[FE Docket No. 91-84-NG]

Tennessee Gas Pipeline Co.; Amendment of Authorizations To Import Natural Gas From Canada

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of order amending authorizations to import natural gas from Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice that it has issued an order amending two long-term natural gas import authorizations granted to Tennessee Gas Pipeline Company (Tennessee) by DOE/FE Opinion and Order Nos. 195-B and 254-A. In addition to the authority previously conferred, Tennessee may also import the volumes as an agent for others to whom Tennessee may assign its rights and obligations under existing gas contracts with Canadian suppliers.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, room 3F-056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on March 16, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

Office of Conservation and Renewable Energy

[Case No. F-028]

Energy Conservation Program for Consumer Products; Decision and Order Granting a Waiver From the Furnace Test Procedure to Armstrong Air Conditioning, Inc.

AGENCY: Office of Conservation and Renewable Energy, Department of Energy.

ACTION: Decision and order.

SUMMARY: Notice is given of the Decision and Order (Case No. F-028) granting a Waiver to Armstrong Air Conditioning, Inc. (Armstrong), from the existing Department of Energy (DOE) test procedure for furnaces. The Department is granting Armstrong its Petition for Waiver regarding blower time delay in calculation of Annual Fuel Utilization Efficiency (AFUE) for its GRTC series of rooftop furnaces.

FOR FURTHER INFORMATION CONTACT:

Cyrus H. Nasseri, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE-43, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9127.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC-41, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9507.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order as set out below. In the Decision and Order, Armstrong has been granted a Waiver for its GRTC series of rooftop furnaces, permitting the company to use an alternate test method in determining AFUE.

Issued in Washington, DC, March 11, 1992.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

Decision and Order

In the matter of: Armstrong Air Conditioning, Inc. (Case No. F-028).

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94-163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95-619, 92 Stat. 3266, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100-12, and the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Public Law 100-357, which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR part 430, subpart B.

DOE amended the prescribed test procedures by adding 10 CFR 430.27 to create a waiver process. 45 FR 64108, September 26, 1980. Thereafter, DOE further amended its appliance test procedure waiver process to allow the Assistant Secretary for Conservation and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 25, 1986.

The waiver process allows the Assistant Secretary to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative data. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

The Interim Waiver provisions added by the 1986 amendment allow the Assistant Secretary to grant an Interim Waiver when it is determined that the applicant will experience economic hardship if the Applicant for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the petition for Waiver. An Interim Waiver remains in effect for a period of 180 days or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary.

Armstrong filed a "Petition for Waiver," dated December 14, 1990, in accordance with § 430.27 of 10 CFR 430. DOE published in the Federal Register on March 13, 1991, Armstrong's petition and solicited comments, data and information respecting the petition. 56 FR 10553. Armstrong also filed an "Application for Interim Waiver" under § 430.27(g) which DOE granted on March 4, 1991. 56 FR 10553, March 13, 1991.

No comments were received concerning either the "Petition for Waiver" or the "Interim Waiver." DOE consulted with The Federal Trade Commission (FTC) concerning the Armstrong Petition. The FTC did not have any objections to the issuance of the waiver to Armstrong.

Assertions and Determinations

Armstrong's Petition seeks a waiver from the DOE test provisions that require a 1.5-minute time delay between the ignition of the burner and the starting of the circulating air blower. Armstrong requests the allowance to test using a 20-second blower time delay when testing its GRTC series of rooftop furnaces. Armstrong states that since the 20-second delay is indicative of how these models actually operate and since such a delay results in an improvement in efficiency of approximately 0.6 percent, the petition should be granted.

Under specific circumstances, the DOE test procedure contain exceptions which allow testing with blower delay times of less than the prescribed 1.5-minute delay. Armstrong indicates that it is unable to take advantage of any of these exceptions for its GRTC series of rooftop furnaces.

Since the blower controls incorporated on the Armstrong furnaces are designed to impose a 20-second blower delay in every instance of start up, and since the current provisions do not specifically address this type of control, DOE agrees that a waiver should be granted to allow the 20-second blower time delay when testing the Armstrong GRTC series of rooftop furnaces. Accordingly, with regard to testing the GRTC series of rooftop furnaces, today's Decision and Order exempts Armstrong from the existing provisions regarding blower controls and allows testing with the 20-second delay.

It is, therefore, ordered that:

(1) The "Petition for Waiver" filed by Armstrong Air Conditioning, Inc. (Case No. F-028), is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraphs (3), (4), and (5).

(2) Notwithstanding any contrary provisions of appendix N of 10 CFR part 430, supbart B, Armstrong Air Conditioning, Inc., shall be permitted to test its GRTC series of rooftop furnaces on the basis of the test procedure specified in 10 CFR part 430, with modifications set forth below:

(i) Section 3.0 of appendix N is deleted and replaced with the following paragraph:

3.0 Test Procedure testing and measurements shall be as specified in section 9 in ANSI/ASHRAE 103-82 with the exception of sections 9.2.2, 9.3.1, and 9.3.2, and the inclusion of the following additional procedures:

(ii) Add a new paragraph 3.10 to appendix N as follows:

3.10 Gas-and Oil-Fueled Central Furnaces. The following paragraph is in lieu of the requirement specified in section 9.3.1 of ANSI/ASHRAE 103-82. After equilibrium conditions are achieved following the cool-down test and the required measurements performed, turn on the furnaces and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner start-up, delay the blower start-up by 1.5 minutes (t-), unless: (1) The furnace employs a single motor to drive the power burner and the indoor air circulating blower, in which case the burner and blower shall be started together; or (2) the furnace is designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time results in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the later case, if the fan control is adjustable, set it to start the blower at the highest temperature. If the fan control is permitted to start the blower, measure time delay, (t-), using a stopwatch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ±0.01 inch of water column of the manufacturer's recommended on-period draft.

(iii) With the exception of the modifications set forth above, Armstrong Air Conditioning, Inc. shall comply in all respects with the test procedures specified in appendix N of 10 CFR part 430, subpart B.

(3) The Waiver shall remain in effect from the date of issuance of this Order until DOE prescribes final test procedures appropriate to the GRTC series of rooftop furnace manufactured by Armstrong Air Conditioning, Inc.

(4) This Waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by the petitioner. This Waiver may be revoked or modified at any time upon a determination that the factual basis underlying the petition is incorrect.

(5) Effective (Insert Date of Issuance), this Waiver supersedes the Interim Waiver granted Armstrong Air Conditioning, Inc. on March 4, 1991 56 FR 10553, March 13, 1991 (Case No. F-028).

Issued in Washington, DC, March 11, 1992.

J. Michael Davis,

Assistant Secretary Conservation and Renewable Energy.

[FR Doc. 92-6782 Filed 3-23-92; 8:45 am]

BILLING CODE 6450-01-M

[Case No. F-038]

Energy Conservation Program for Consumer Products; Decision and Order Granting a Waiver From the Furnace Test Procedure to Armstrong Air Conditioning, Inc.

AGENCY: Office of Conservation and Renewable Energy, Department of Energy.

ACTION: Decision and order.

SUMMARY: Notice is given of the Decision and Order (Case No. F-038) granting a Waiver to Armstrong Air Conditioning, Inc. (Armstrong), from the existing Department of Energy (DOE) test procedure for furnaces. The Department is granting Armstrong its Petition for Waiver regarding blower time delay in calculation of Annual Fuel Utilization Efficiency (AFUE) for its HWC and HW series of central gas furnaces.

FOR FURTHER INFORMATION CONTACT:

Cyrus H. Nasseri, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE-43, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9127.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC–41, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9507.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order as set out below. In the Decision and Order, Armstrong has been granted a Waiver for its HWC and HW series of central gas furnaces, permitting the company to use an alternate test method in determining AFUE.

Issued in Washington, DC, March 11, 1992.

J. Michael Davis,

Assistant Secretary Conservation and Renewable Energy

Decision and Order

In the matter of: Armstrong Air Conditioning, Inc. (Case No. F–036).

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95–619, 92 Stat. 3206, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100–12, and the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Public Law 100–357, which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR part 430, subpart B.

DOE amended the prescribed test procedures by adding 10 CFR 430.27 to create a waiver process. 45 FR 64108, September 26, 1980. Thereafter, DOE further amended its appliance test procedure waiver process to allow the Assistant Secretary for Conservation and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative data. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

The Interim Waiver provisions added by the 1986 amendment allow the Assistant Secretary to grant an Interim Waiver when it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the Petition for Waiver. An Interim Waiver remains in effect for a period of 180 days or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary.

Armstrong filed a "Petition for Waiver" dated May 29, 1991, in accordance with § 430.27 of 10 CFR part 430. DOE published in the **Federal Register** on December 6, 1991, Armstrong's petition and solicited comments, data and information respecting the petition. 56 FR 63941. Armstrong also filed an "Application for Interim Waiver" under section 430.27(g) which DOE granted on November 27, 1991. 56 FR 63941, December 6, 1991.

No comments were received concerning either the "Petition for Waiver" or the "Interim Waiver." DOE consulted with the Federal Trade Commission (FTC), concerning the Armstrong Petition. The FTC did not have any objections to the issuance of the waiver to Armstrong.

Assertions and Determinations

Armstrong's Petition seeks a waiver from the DOE test provisions that require a 1.5-minute time delay between the ignition of the burner and the starting of the circulating air blower. Armstrong requests the allowance to test using a 30-second blower time delay when testing its HWC and HW series of central gas furnaces. Armstrong states that, since the 30-second delay is indicative of how these models actually operate and since such a delay results in an improvement in efficiency of approximately 0.6 percent, the petition should be granted.

Under specific circumstances, the DOE test procedures contain exceptions which allow testing with blower delay times of less than the prescribed 1.5-minute delay. Armstrong indicates that it is unable to take advantage of any of these exceptions for its HWC and HW series of central gas furnaces.

Since the blower controls incorporated on the Armstrong furnaces are designed to impose a 30-second blower delay in every instance of start-up, and since the current provisions do not specifically address this type of control, DOE agrees that a waiver should be granted to allow the 30-second blower time delay when testing the Armstrong HWC and HW series of central gas furnaces. Accordingly, with regard to testing the HWC and HW series of central gas furnaces, today's Decision and Order exempts Armstrong from the existing provisions regarding blower controls and allows testing with the 30-second delay.

It is, therefore, ordered that:

(1) The "Petition for Waiver" filed by Armstrong Air Conditioning, Inc. (Case No. F–038), is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraphs (3), (4), and (5).

(2) Notwithstanding any contrary provisions of appendix N of 10 CFR part 430, subpart B, Armstrong Air Conditioning, Inc., shall be permitted to test its HWC and HW series of central gas furnaces on the basis of test procedure specified in 10 CFR part 430, with modifications set forth below:

(i) Section 3.0 of appendix N is deleted and replaced with the following paragraph:

3.0 Test Procedure. Testing and measurements shall be as specified in section 9 in ANSI/ASHRAE 103–82 with the exception of sections 9.2.2, 9.3.1, and 9.3.2, and the inclusion of the following additional procedures:

(ii) Add a new paragraph 3.10 to appendix N as follows:

3.10 Gas- and Oil-Fueled Central Furnaces. The following paragraph is in lieu of the requirement specified in section 9.3.1 of ANSI/ASHRAE 103–82. After equilibrium conditions are achieved following the cool-down test and the required measurements performed, turn on the furnaces and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner start-up, delay the blower start-up by 1.5 minutes (t-), unless: (1) the furnace employs a single motor to drive the power burner and the indoor air circulating blower, in which case the burner and blower shall be started together; or (2) the furnace is designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time results in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the latter case, if the fan control is adjustable, set it to start the blower at the highest temperature. If the fan control is permitted to start the blower, measure time delay, (t-), using a stopwatch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ±0.01 inch of water column of the manufacturer's recommended on-period draft.

(iii) With the exception of the modifications set forth above, Armstrong Air Conditioning, Inc. shall comply in all respects with the test procedures specified in appendix N of 10 CFR part 430, subpart B.

(3) The Waiver shall remain in effect from the date of issuance of this Order until DOE prescribes final test procedures appropriate to the HWC and HW series of central gas furnaces manufactured by Armstrong Air Conditioning, Inc.

(4) This Waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by the petitioner. This Waiver may be revoked or modified at any time upon a determination that the factual basis underlying the petition is incorrect.

(5) Effective (Insert Date of Issuance), this Waiver supersedes the Interim Waiver granted Armstrong Air Conditioning, Inc. on November 27, 1991. 56 FR 63941, December 6 1991 (Case No. F–038).

Issued in Washington, DC, March 11, 1992.

J. Michael Davis,

Assistant Secretary Conservation and Renewable Energy.

[FR Doc. 92–6783 Filed 3–23–92; 8:45 am]

BILLING CODE 6450–01–M

[Case No. F–039]

Energy Conservation Program for Consumer Products; Decision and Order Granting a Waiver From the Furnace Test Procedure to Ducane Co., Inc.

AGENCY: Office of Conservation and Renewable Energy, Department of Energy.

ACTION: Decision and Order.

SUMMARY: Notice is given of the Decision and Order (Case No. F–039) granting a Waiver to Ducane Company, Inc. (Ducane), from the existing Department of Energy (DOE) test procedure for furnaces. The Department is granting Ducane its Petition for Waiver regarding blower time delay in calculation of Annual Fuel Utilization Efficiency (AFUE) for its FPBA series of gas furnaces.

FOR FURTHER INFORMATION CONTACT: Cyrus H. Nasseri, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE–43, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9127.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC–41, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9507.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order as set out below. In the Decision and Order, Ducane has been granted a Waiver for its FPBA series of gas furnaces, permitting the company to use an alternate test method in determining AFUE.

Issued in Washington, DC, March 13, 1992.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

Decison and Order

In the matter of: The Ducane Company, Inc. (Case No. F–039).

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94–163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95–619, 92 Stat. 3206, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100–12, and the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Public Law 100–357, which require DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR part 430, subpart B.

DOE amended the prescribed test procedures by adding 10 CFR 430.27 to create a waiver process. 45 FR 64108, September 26, 1980. Thereafter, DOE further amended its appliance test procedure waiver process to allow the Assistant Secretary for Conservation and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufactures that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative date. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

The Interim Waiver provisions added by the 1986 amendment allow the Assistant Secretary to grant an Interim Waiver when it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the Petition for Waiver. An Interim Waiver remains in effect for a period of 180 days or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary.

Ducane filed a "Petition for Waiver," dated October 1, 1991, in accordance with section 430.27 of 10 CFR part 430. DOE published in the **Federal Register** on December 10, 1991, Ducane's petition and solicited comments, data and information respecting the petition. 56 FR 64510. Ducane also filed an "Application for Interim Waiver" under section 430.27(g) which DOE granted on November 27, 1991. 56 FR 64510, December 10, 1991.

No comments were received concerning either the "Petition for Waiver" or the "Interim Waiver." DOE consulted with The Federal Trade Commission (FTC) concerning the Ducane Petition. The FTC did not have

any objections to the issuance of the waiver to Ducane.

Assertions and Determinations

Ducane's Petition seeks a waiver from the DOE test provisions that require a 1.5-minute time delay between the ignition of the burner and the starting of the circulating air blower. Ducane requests the allowance to test using a 30-second blower time relay when testing its FPBA series of gas furnaces. Ducane states that since the 30-second delay is indicative of how these models actually operate and since such a delay results in an improvement in efficiency of approximately 1.0 percent, the petition should be granted.

Under specific circumstances, the DOE test procedure contain exceptions which allow testing with blower delay times of less than the prescribed 1.5-minute delay. Ducane indicates that it is unable to take advantage of any of these exceptions for its FPBA series of gas furnaces.

Since the blower controls incorporated on the Ducane furnaces are designed to impose a 30-second blower delay in every instance of start up, and since the current provisions do not specifically address this type of control, DOE agrees that a waiver should be granted to allow the 30-second blower time delay when testing the Ducane FPBA series of gas furnaces.

Accordingly, with regard to testing the FPBA series of gas furnaces, today's Decision and Order exempts Ducane from the existing provisions regarding blower controls and allows testing with the 30-second delay.

It is, therefore, ordered that:

(1) The "Petition for Wavier" filed by Ducane Company, Inc. (Case No. F-039), is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraphs (3), (4), and (5).

(2) Notwithstanding and contrary provisions of Appendix N of 10 CFR part 430, subpart B, Ducane Company, Inc., shall be permitted to test its FPBA series of gas furnaces on the basis of the test procedure specified in 10 CFR part 430, with modifications set forth below:

(i) Section 3.0 of Appendix N is deleted and replaced with the following paragraph:

3.0 Test Procedure. Testing and measurements shall be as specified in section 9 in ANSI/ASHRAE 103-82 with the exception of sections 9.2.2, 9.3.1, and 9.3.2, and the inclusion of the following additional procedures:

(ii) Add a new paragraph 3.10 to Appendix N as follows:

3.10 Gas- and Oil-Fueled Central Furnaces. The following paragraph is in lieu of the requirement specified in section 9.3.1 of ANSI/ASHRAE 103-82. After equilibrium conditions are achieved following the cool-down test and the required measurements performed, turn on the furnaces and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner start-up, delay the blower start-up by 1.5 minutes (t-), unless: (1) The furnace employs a single motor to drive the power burner and the indoor air circulating blower, in which case the burner and blower shall be started together; or (2) the furnace is designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time results in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the latter case, if the fan control is adjustable, set it to start the blower at the highest temperature. If the fan control is permitted to start the blower, measure time delay, (t-), using a stopwatch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ±0.01 inch of the water column of the manufacturer's recommended on-period draft.

(iii) With the exception of the modifications set forth above, The Ducane Company, Inc. shall comply in all respects with the test procedures specified in Appendix N of 10 CFR part 430, subpart B.

(3) The Waiver shall remain in effect from the date of issuance of this Order until DOE prescribes final test procedures appropriate to the FPBA series of gas furnaces manufactured by The Ducane Company, Inc.

(4) This waiver is based on the presumed validity of statements, allegations, and documentary materials submitted by the petitioner. This Waiver may be revoked or modified at any time upon a determination that the factual basis underlying the petition is incorrect.

(5) Effective March 24, 1992, this Waiver supersedes the Interim Waiver granted The Ducane Company, Inc. on November 27, 1991. 56 FR 64510, December 10, 1991 (Case No. F-039).

Issued In Washington, DC, March 13, 1992.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

BILLING CODE 6450-01-M

[Case No. F-044]

Energy Conservation Program for Consumer Products; Granting of the Application for Interim Waiver and Publishing of the Petition for Waiver of Furnace Test Procedure From Goodman Manufacturing Co.

AGENCY: Office of Conservation and Renewable Energy, Department of Energy.

SUMMARY: Today's notice publishes a letter granting an Interim Waiver to Goodman Manufacturing Company (Goodman) from the existing Department of Energy (DOE) test procedure for furnaces regarding blower time delay for the company's GDPS, GUPS, GDPI, GUPI, GDPX, GUPX, GUN, and GUS series of central gas furnaces.

Today's notice also publishes a "Petition for Waiver" from Goodman. Goodman's Petition for Waiver requests DOE to grant relief from the DOE furnace test procedure relating to the blower time delay specification. Goodman seeks to test using a blower delay time of 30 seconds for its GDPS, GUPS, GDPI, GUPI, GDPX, GUPX, GUN, and GUS series of central gas furnaces instead of the specified 1.5-minute delay between burner on-time and blower on-time. DOE is soliciting comments, data, and information respecting the Petition for Waiver.

DATE: DOE will accept comments, data, and information not later than April 23, 1992.

ADDRESS: Written comments and statements shall be sent to: Department of Energy, Office of Conservation and Renewable Energy, Case No. F-044, Mail Stop CE-90, room 6B-025, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-3012.

FOR FURTHER INFORMATION CONTACT:

Cyrus H. Nasseri, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE-43, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9127.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC-41, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9507.

SUPPLEMENTARY INFORMATION: The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94-163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95-619, 92 Stat. 3266, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100-12, and the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Public Law 100-357, which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR part 430, subpart B.

DOE amended the prescribed test procedures by adding 10 CFR 430.27 on September 26, 1980, creating the waiver process. 45 FR 64108. Thereafter DOE further amended the appliance test procedure waiver process to allow the Assistant Secretary for Conservation and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative data. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

The Interim Waiver provisions, added by the 1986 amendment, allow the Assistant Secretary to grant an Interim Waiver when it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the Petition for Waiver. An Interim Waiver remains in effect for a period of 180 days or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary.

On January 2, 1992 Goodman filed an Application for Interim Waiver regarding blower time delay. Goodman's Application seeks an Interim Waiver from the DOE test provisions that require a 1.5-minute time delay between the ignition of the burner and starting of the circulating air blower. Instead, Goodman requests the allowance to test using a 30-second blower time delay when testing its GDPS, GUPS, GDPI, GUPI, GDPX, GUPX, GUN, and GUS series of central gas furnaces. Goodman states that the 30-second delay is indicative of how these furnaces actually operate. Such a delay results in an energy savings of approximately 1.0 percent. Since current DOE test procedures do not address this variable blower time delay, Goodman asks that the Interim Waiver be granted.

Previous waivers for this type of timed blower delay control have been granted by DOE to Coleman Company, 50 FR 2710, January 18, 1985; Magic Chef Company, 50 FR 41553, October 11, 1985; Rheem Manufacturing Company, 53 FR 48574, December 1, 1988, 55 FR 3253, January 31, 1990, and 56 FR 2920, January 25, 1991; Trane Company, 54 FR 19226, May 4, 1989, and 56 FR 6021, February 14, 1991; Lennox Industries, 55 FR 50224, December 5, 1990; DMO Industries, 56 FR 4622, February 5, 1991; Heil-Quaker Corporation, 56 FR 6019, February 14, 1991; Carrier Corporation, 56 FR 6018, February 14, 1991; Inter-City Products corporation, 55 FR 51487, December 14, 1991, and 56 FR 63945, December 6, 1991; Amana Refrigeration Inc., 56 FR 27958, June 18, 1991, and 56 FR 63940, December 6, 1991; Snyder General Corporation, 56 FR 45960, September 9, 1991; Goodman Manufacturing Corporation, 56 FR 51713, October 15, 1991; Armstrong Air Conditioning, Inc., 57 FR 899, January 9, 1992; Thermo Products, Inc., 57 FR 903, January 9, 1992; and The Ducane Company, 56 FR 63943, December 6, 1991. Thus, it appears likely that the Petition for Waiver will be granted for blower time delay.

In those instances where the likely success of the Petition for Waiver has been demonstrated based upon DOE having granted a waiver for a similar product design, it is in the public interest to have similar products tested and rated for energy consumption on a comparable basis.

Therefore, based on the above, DOE is granting Goodman an Interim Waiver for its GDPS, GUPS, GDPI, GUPI, GDPX, GUPX, GUN, and GUS series of central gas furnaces. Pursuant to paragraph (e) of section 430.27 of the Code of Federal Regulations part 430, the following letter granting the Application for Interim Waiver to Goodman was issued.

Pursuant to paragraph (b) of 10 CFR part 430.27, DOE is hereby publishing the "Petition for Waiver" in its entirety. The petition contains no confidential information. DOE solicits comments, data, and information respecting the petition.

Issued in Washington, DC, March 13, 1992.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy

March 31, 1992.

Mr. Peter H. Alexander,

Vice President, Engineering, Goodman Manufacturing Company, 1501 Seamist, Houston, Texas 77008.

Dear Mr. Alexander: This is in response to your January 2, 1992, Application for Interim Waiver and Petition for Waiver from the Department of Energy (DOE) test procedure for furnaces regarding blower time delay for Goodman Manufacturing Company (Goodman) GDPS, GUPS, GDPI, GUPI, GDPX, GUPX, GUN, and GUS series of central gas furnaces.

Previous waivers for this type of timed blower delay control have been granted by DOE to Coleman Company, 50 FR 2710, January 18, 1985; Magic Chef Company, 50 FR 41553, October 11, 1985; Rheem Manufacturing Company, 53 FR 48574, December 1, 1988, 55 FR 3253, January 31, 1990, and 56 FR 2920, January 25, 1991; Trane Company, 54 FR 19226, May 4, 1989, and 56 FR 6021, February 14, 1991; Lennox Industries, 55 FR 50224, December 5, 1990; DMO Industries, 56 FR 4622, February 5, 1991; Heil-Quaker Corporation, 56 FR 6019, February 14, 1991; Carrier Corporation, 56 FR 6018, February 14, 1991; Inter-City Products Corporation, 55 FR 51487, December 14, 1991, and 56 FR 63945, December 6, 1991; Amana Refrigeration Inc., 56 FR 27958, June 18, 1991, and 56 FR 63940, December 6, 1991; Snyder General Corporation, 56 FR 45960, September 9, 1991; Goodman Manufacturing Corporation, 56 FR 51713, October 15, 1991; Armstrong Air Condition, Inc., 57 FR 899, January 9, 1992; Thermo Products, Inc., 57 FR 903, January 9, 1992; and The Ducane Company, 56 FR 63943, December 6, 1991.

Goodman's Application for Interim Waiver does not provide sufficient information to evaluate what, if any, economic impact or competitive disadvantage Goodman will likely experience absent a favorable determination on its application. However, in those instances where the likely success of the Petition for Waiver has been demonstrated, based upon DOE having granted a waiver for a similar product design, it is in the public interest to have similar products tested and rated for energy consumption on a comparable basis.

Therefore, Goodman's Application for an Interim Waiver from the DOE test procedure for its GDPS, GUPS, GDPI, GUPI, GDPX, GUPX, GUN, and GUS series of central gas furnaces regarding blower time delay is granted.

Goodman shall be permitted to test its line of GDPS, GUPS, GDPI, GUPI, GDPX, GUPX, GUN, and GUS series of central gas furnaces

on the basis of the test procedures specified in 10 CFR part 430, subpart B, appendix N, with the modifications set forth below.

(i) Section 3.0 in appendix N is deleted and replaced with the following paragraph:

3.0 Test Procedure. Testing and measurements shall be as specified in section 9 in ANSI/ASHARE 103–82 with the exception of sections 9.2.2, 9.3.1, and 9.3.2, and the inclusion of the following additional procedures:

(ii) Add a new paragraph 3.10 in Appendix N as follows:

3.10 Gas—and Oil-Fueled Central Furnaces. After equilibrium conditions are achieved following the cool-down test and the required measurements performed, turn on the furnace and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner startup, delay the blower start-up by 1.5 minutes (t-), unless: (1) the furnace employes a single motor to drive the power burner and the indoor air circulation blower, in which case the burner and blower shall be started together; or (2) the furnace is designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time results in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the latter case, if the fan control is adjustable, set it to start the blower at the highest temperature. If the fan control is permitted to start the blower, measure time delay, (t-), using a stop watch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ±0.01 inch of water column of the manufacturer's recommended on-period draft.

This Interim Waiver is based upon the presumed validity of statements and all allegations submitted by the company. This Interim Waiver may be revoked or modified at any time upon a determination that the factual basis underlying the application is incorrect.

The Interim Waiver shall remain in effect for a period of 180 days or until DOE acts on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180-day period, if necessary.

Sincerely,

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

BILLING CODE 6450-01-M

[Case No. F-037]

Energy Conservation Program for Consumer Products; Decision and Order Granting a Waiver From the Furnace Test Procedure to Rheem Manufacturing Co.

AGENCY: Office of Conservation and Renewable Energy, Department of Energy.

ACTION: Decision and order.

SUMMARY: Notice is given of the Decision and Order (Case No. F-037) granting a Waiver to Rheem Manufacturing Company (Rheem), from the existing Department of Energy (DOE) test procedure for furnaces. The Department is granting Rheem its Petition for Waiver regarding blower time delay in calculation of Annual Fuel Utilization Efficiency (AFUE) for its GDG and GLG series of gas furnaces.

FOR FURTHER INFORMATION CONTACT:

Cyrus H. Nasseri, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE-43, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9127.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC-41, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9507.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order as set out below. In the Decision and Order, Rheem has been granted a Waiver for its GDG and GLG series of gas furnaces, permitting the company to use an alternate test method in determining AFUE.

Issued in Washington, DC, March 11, 1992.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

In the matter of: Rheem Manufacturing Company (Case No. F-037).

Background: The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94-163, 89 stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95-619, 92 stat. 3266, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100-12, and the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Public Law 100-357, which requires DOE to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR part 430, subpart B.

DOE amended the prescribed test procedures by adding 10 CFR 430.27 to create a waiver process. 45 FR 64108, September 26, 1980. Thereafter, DOE further amended its appliance test procedure waiver process to allow the Assistant Secretary for Conservation and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provide materially inaccurate comparative data. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

The Interim Waiver provisions added by the 1986 amendment allow the Assistant Secretary to grant an Interim Waiver when it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the Petition for Waiver. An Interim Waiver remains in effect for a period of 180 days or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary.

Rheem filed a "Petition for Waiver," dated August 1, 1991, in accordance with section 430.27 of 10 CFR part 430. DOE published in the **Federal Register** on December 6, 1991, Rheem's petition and solicited comments, data and information respecting the petition. 56 FR 63946. Rheem also filed an "Application for Interim Waiver" under section 430.27(g) which DOE granted on November 27, 1991. 56 FR 63946, December 6, 1991.

No comments were received concerning either the "Petition for Waiver" or the "Interim Waiver." DOE consulted with The Federal Trade Commission (FTC) concerning the Rheem Petition. The FTC did not have any objections to the issuance of the waiver to Rheem.

Assertions and Determinations: Rheem's Petition seeks a waiver from the DOE test provisions that require a 1.5-minute time delay between the ignition of the burner and the starting of the circulating air blower. Rheem requests the allowance to test using a 30-second blower time delay when testing its GDG and GLG series of gas furnaces. Rheem states that since the 30-second delay is indicative of how these models actually operate and since such a delay results in an improvement in efficiency of approximately 2.0 percent, the petition should be granted.

Under specific circumstances, the DOE test procedure contain exceptions which allow testing with blower delay times of less than the prescribed 1.5-minute delay. Rheem indicates that it is unable to take advantage of any of these exceptions for its GDG and GLG series of gas furnaces.

Since the blower controls incorporated on the Rheem furnaces are designed to impose a 30-second blower delay in every instance of start up, and since the current provisions do not specifically address this type of control, DOE agrees that a waiver should be granted to allow the 30-second blower time delay when testing the Rheem GDG and GLG series of gas furnaces. Accordingly, with regard to testing the GDG and GLG series of gas furnaces, today's Decision and Order exempts Rheem from the existing provisions regarding blower controls and allows testing with the 30-second delay.

It is, therefore, ordered that: (1) The "Petition for Waiver" filed by Rheem Manufacturing Company (Case No. F-037), is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraphs (3), (4), and (5).

(2) Notwithstanding any contrary provisions of appendix N of 10 CFR part 430, subpart B, Rheem Manufacturing Company, shall be permitted to test its CDG and GLG series of gas furnaces on the basis of the test procedure specified in 10 CFR part 430, with modifications set forth below:

(i) Section 3.0 of Appendix N is deleted and replaced with the following paragraph:

3.0 Test Procedure. Testing and measurements shall be as specified in section 9 in ANSI/ASHRAE 103-82 with the exception of sections 9.2.2., 9.3.1, and 9.3.2, and the inclusion of the following additional procedures:

(ii) Add a new paragraph 3.10 to appendix N as follows:

3.10 Gas- and Oil-Fueled Central Furnaces. The following paragraph is in lieu of the requirement specified in section 9.3.1. of ANSI/ASHRAE 103-82. After equilibrium conditions are achieved following the cool-down test and the required measurements performed, turn on the furnaces and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner start-up, delay the blower start-up by 1.5 minutes (t-), unless: (1) The furnace employees a single motor to drive the power burner and the indoor air circulating blower, in which case the burner and blower shall be started together; or (2) the furnace is designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time results in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the latter case, if the fan control is adjustable, set it to start the blower at the highest temperature. If the fan control is permitted to start the blower, measure time delay, (t-), using a stopwatch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ±0.01 inch of water column of the manufacturer's recommended on-period draft.

(iii) With the exception of the modifications set forth above, Rheem Manufacturing Company shall comply in all respects with the test procedures specified in appendix N of 10 CFR part 430, subpart B.

(3) The Waiver shall remain in effect from the date of issuance of this Order until DOE prescribes final test procedures appropriate to the GDG and GLG series of gas furnaces manufactured by Rheem Manufacturing Company.

(4) This Waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by the petitioner. This Waiver may be revoked or modified at any time upon a determination that the factual basis underlying the petition is incorrect.

(5) Effective (Insert Date of Issuance), this Waiver supersedes the Interim Waiver granted Rheem Manufacturing Company on November 27, 1991. 56 FR 63946, December 6, 1991 (Case No. F-037).

Issued in Washington, DC, March 11, 1992.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

BILLING CODE 6450-01-M

[Case No. F-035]

Energy Conservation Program for Consumer Products; Decision and Order Granting a Waiver From the Furnace Test Procedure to Trane Company

AGENCY: Office of Conservation and Renewable Energy, Department of Energy.

ACTION: Decision and Order.

SUMMARY: Notice is given of the Decision and Order (Case No. F-035) granting a Waiver to Trane Company (Trane), from the existing Department of Energy (DOE) test procedure for furnaces. The Department is granting Trane its Petition for Waiver regarding blower time delay in calculation of Annual Fuel Utilization Efficiency (AFUE) for its YC(D,H) 036-060 rooftop furnaces.

FOR FURTHER INFORMATION CONTACT:

Cyrus H. Nasseri, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE-43, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9127.

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC-41, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9507.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order as set out below. In the Decision and Order, Trane has been granted a Waiver for its YC(D,H) 036-060 rooftop furnaces, permitting the company to use an alternate test method in determining AFUE.

Issued in Washington, DC, March 11, 1992.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

In the matter of: The Trane Company (Case No. F-035).

Background

The Energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Public Law 94-163, 89 stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Public Law 95-619, 92 stat. 3266, the National Appliance Energy Conservation Act of 1987 (NAECA), Public Law 100-12, and the National Appliance Energy Conservation Amendments of 1988 (NAECA 1988), Public Law 100-357, which requires DOE

to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR part 430, subpart B.

DOE amended the prescribed test procedures by adding 10 CFR 430.27 to create a waiver process. 45 FR 64108, September 26, 1980. Thereafter, DOE further amended its appliance test procedure waiver process to allow the Assistant Secretary for Conservation and Renewable Energy (Assistant Secretary) to grant an Interim Waiver from test procedure requirements to manufacturers that have petitioned DOE for a waiver of such prescribed test procedures. 51 FR 42823, November 26, 1986.

The waiver process allows the Assistant Secretary to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing according to the prescribed test procedures or when the prescribed test procedures may evaluate the basic model in a manner so unrepresentative of its true energy consumption as to provided materially inaccurate comparative data. Waivers generally remain in effect until final test procedure amendments become effective, resolving the problem that is the subject of the waiver.

The Interim Waiver provisions added by the 1986 amendment allow the Assistant Secretary to grant an Interim Waiver when it is determined that the applicant will experience economic hardship if the Application for Interim Waiver is denied, if it appears likely that the Petition for Waiver will be granted, and/or the Assistant Secretary determines that it would be desirable for public policy reasons to grant immediate relief pending a determination on the Petition for Waiver. An Interim Waiver remains in effect for a period of 180 days or until DOE issues its determination on the Petition for Waiver, whichever is sooner, and may be extended for an additional 180 days, if necessary.

Trane filed a "Petition for Waiver," dated October 11, 1991, in accordance with section 430.27 of 10 CFR part 430. DOE published in the **Federal Register** on December 11, 1991, Trane's petition and solicited comments, data and information respecting the petition. 56 FR 64609. Trane also filed an "Application for Interim Waiver" under section 430.27(g) which DOE granted on December 5, 1991. 56 FR 64609, December 11, 1991.

No comments were received concerning either the "Petition for Waiver" or the "Interim Waiver." DOE consulted with the Federal Trade Commission (FTC) concerning the Trane Petition. The FTC did not have any objections to the issuance of the Waiver to Trane.

Assertion and Determinations

Trane's Petition seeks a waiver from the DOE test provisions that require a 1.5-minute time delay between the ignition of the burner and the starting of the circulating air blower. Trane requests the allowance to test using a 30-second blower time delay when testing its YC(D,H) 036–060 rooftop furnaces. Trane states that since the 30-second delay is indicative of how these models actually operate and since such a delay results in an improvement in efficiency of approximately 0.7 percent, the petition should be granted.

Under specific circumstances, the DOE test procedure contain exceptions which allow testing with blower delay times of less than the prescribed 1.5-minute delay. Trane indicates that it is unable to take advantage of any of these exceptions for its YC(D,H) 036–060 rooftop furnaces.

Since the blower controls incorporated on the Trane furnaces are designed to impose a 30-second blower delay in every instance of start up, and since the current provisions do not specifically address this type of control, DOE agrees that a waiver should be granted to allow the 30-second blower time delay when testing the Trane YC(D,H) 036–060 rooftop furnaces. Accordingly, with regard to testing the YC(D,H) 036–060 rooftop furnaces, today's Decision and Order exempts Trane from the existing provisions regarding blower controls and allows testing with the 30-second delay.

It is, therefore, ordered that: (1) The "Petition for Waiver" filed by Trane Company (Case No. F–035), is hereby granted as set forth in paragraph (2) below, subject to the provisions of paragraphs (3), (4), and (5).

(2) Notwithstanding any contrary provisions of appendix N of 10 CFR part 430 subpart B, Trane Company, shall be permitted to test its YC(D,H) 036–060 rooftop furnaces on the basis of the test procedure specified in 10 CFR part 430, with modifications set forth below:

(i) Section 3.0 of appendix N is deleted and replaced with the following paragraph:

3.0 Test Procedure. Testing and measurements shall be as specified in section 9 in ANSI/ASHRAE 103–82 with the exception of sections 9.2.2, 9.3.1, and 9.3.2, and the inclusion of the following additional procedures:

(ii) Add a new paragraph 3.10 to appendix N as follows:

3.10 Gas- and Oil-Fueled Central Furnaces. The following paragraph is in lieu of the requirement specified in section 9.3.1 of ANSI/ASHRAE 103–82. After equilibrium conditions are achieved following the cool-down test and the required measurements performed, turn on the furnaces and measure the flue gas temperature, using the thermocouple grid described above, at 0.5 and 2.5 minutes after the main burner(s) comes on. After the burner start-up, delay the blower start-up by 1.5 minutes (t-), unless: (1) The furnace employs a single motor to drive the power burner and the indoor air circulating blower, in which case the burner and blower shall be started together; or (2) the furnace is designed to operate using an unvarying delay time that is other than 1.5 minutes, in which case the fan control shall be permitted to start the blower; or (3) the delay time results in the activation of a temperature safety device which shuts off the burner, in which case the fan control shall be permitted to start the blower. In the latter case, if the fan control is adjustable, set it to start the blower at the highest temperature. If the fan control is permitted to start the blower, measure time delay, (t-), using a stopwatch. Record the measured temperatures. During the heat-up test for oil-fueled furnaces, maintain the draft in the flue pipe within ±0.01 inch of water column of the manufacturer's recommended on-period draft.

(iii) With the exception of the modifications set forth above, Trane Company shall comply in all respects with the test procedures specified in appendix N of 10 CFR part 430, subpart B.

(3) The Waiver shall remain in effect from the date of issuance of this Order until DOE prescribes final test procedures appropriate to the YC(D,H) 036–060 rooftop furnaces manufactured by Trane Company.

(4) This Waiver is based upon the presumed validity of statements, allegations, and documentary materials submitted by the petitioner. This Waiver may be revoked or modified at any time upon a determination that the factual basis underlying the petition is incorrect.

(5) Effective March 24, 1992. This Waiver supersedes the Interim Waiver granted Trane Company on December 5, 1991. 56 FR 64609, December 11, 1991 (Case No. F–035)

Issued in Washington, DC, March 11, 1992.

J. Michael Davis,

Assistant Secretary, Conservation and Renewable Energy.

[FR Doc. 92–6787 Filed 3–23–92; 8:45 am]

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

Notice of Application Filed With the Commission

March 18, 1992.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. Type of Action: Intent to prepare Environmental Impact Statement and conduct scoping meeting.

b. Project No: 2916–004.

c. Date Filed: N/A.

d. Licensee: East Bay Municipal Utility District.

e. Name of Project: Lower Mokelumne River Project.

f. Location: Amador, Calaveras, and San Joaquin Counties, California.

g. Filed Pursuant to: N/A.

h. Applicant Contact: Mr. Jon A. Myers, East Bay Municipal Utility District, P.O. Box 24055, Oakland, CA 94623, (510) 287–1121.

i. FERC Contact: John A. Schnagl, (202) 219–2661.

j. Comment Date: May 15, 1992.

k. Description of Proceeding: The staff of the Federal Energy Regulatory Commission (Commission) has determined that proposed modifications in project facilities and/or operations of the Lower Mokelumne River Project may constitute a major Federal Action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969 and the Commission's regulations. Therefore, the staff will prepare an environmental impact statement (EIS) for the Lower Mokelumne River, Project No. 2916–004.

The staff's EIS will objectively consider both site specific and cumulative impacts of changes to facilities and/or operation of Camanche and Pardee reservoirs on the Mokelumne River. The purpose of changes under consideration are to conserve and develop fish and wildlife resources principally fall-run chinook salmon. The EIS will include economic, financial, and engineering analyses.

Scoping Meetings

The major issues to be evaluated in the EIS will be discussed at a scoping meeting scheduled to be held on Thursday, April 9, 1992. Prior to this date, a scoping document (Scoping Document I) will be mailed to all recipients of this notice; copies of this document will also be available at the scoping meeting. To reflect any new information provided at the scoping meeting, a revised scoping document (Scoping Document II) will subsequently be produced and mailed to all parties, interested agencies, Indian tribes, and individuals.

All interested individuals, organizations, Indian tribes, and agencies are invited to attend the scoping meeting and assist staff in identifying the scope of environmental issues that should be analyzed in the EIS. Individuals presenting statements for the record will be asked to identify themselves and to indicate the entity that they represent.

The scoping meeting will be held from 9:30 a.m. to 1:30 p.m. at the Stockton Inn, 4219 Waterloo Road, Stockton, California. This meeting will focus both on agency concerns and public input.

Objectives

At the scoping meeting, the staff will: (1) Present environmental issues that are identified for coverage in the EIS; (2) receive input from meeting participants on the issues presented; (3) clarify the significance of issues; (4) identify any additional issues that need treatment in the EIS; and (5) identify those issues that do not merit treatment in the EIS.

Procedures

The scoping meeting will be recorded by a stenographer and all statements (oral and written) will become part of the Commission's public record for this proceeding that was noticed on July 1, 1991. Interested persons who are unable to attend, or do not choose to speak at the scoping meeting, may submit written statements for inclusion in the public record. All written comments must be filed with the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, on or before May 15.

All written correspondence should clearly show on the first page of each document the following caption: Lower Mokelumne River Project No. 2916–004.

Further, parties are reminded of the Commission's Rules of Practice and Procedure, requiring parties filing documents about specific project(s) with the Commission to serve a copy of the document on each person whose name is on the official service list for that specific project(s). This service list is contained in Scoping Document I.

Lois D Cashell,

Secretary.

[FR Doc. 92–6722 Filed 3–23–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP88–171–021]

Tennessee Gas Pipeline Co.; Correction

March 17, 1992.

The notice published on March 12, 1992 at 57 FR 8746 should be corrected to revise the first full paragraph in column 2 on page 8746 to read as follows:

Comment date: March 26, 1992, in accordance with the first paragraph of Standard Paragraph F at the end of this notice.

Lois D. Cashell,

Secretary.

[FR Doc. 92–6726 Filed 3–23–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. CP92–365–00, et al.]

United Gas Pipe Line Co. et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. United Gas Pipe Line Company

[Docket No CP92–365–000]

March 11, 1992.

Take notice that on February 25, 1992, United Gas Pipe Line Company (United), 600 Travis, Post Office Box 1478, Houston, Texas 77251–1478, filed in Docket No. CP92–365–000 an application, as supplemented on March 6, 1992, pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the firm sales of natural gas for resale to the City of Vicksburg (Vicksburg), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United states that it proposes to sell to Vicksburg a maximum daily quantity (MDQ) of 10,000 million Btu per day at the Vicksburg City Gate Station, Warren County, Mississippi, pursuant to a firm sales service agreement dated October 1, 1991. United states that it would charge rates as provided by its Rate Schedule DG. It is stated that the primary term of the service agreement expires on October 1, 1994, but that the agreement would extend from year to year thereafter subject to termination

upon either party giving not less that ninety days prior written notice.

United indicates that to implement the sale it would use a 4-inch tap and 4-inch meter station originally constructed in 1987 under Section 311 of the Natural Gas Policy Act of 1978. United requests that the certificate authority in this filing include 7(c) authorization to convert the existing sales tap and meter station to jurisdictional facilities. United also states that the service agreement provides for a maximum delivery pressure obligation for the firm sales of 120 pounds per square inch gauge (psig). However, it is also stated that United and Vicksburg have entered into a pressure increase agreement dated October 1, 1991, providing for United to deliver the above-mentioned MDQ on a best efforts basis at a maximum delivery pressure of 130 psig.

United alleges that the sale would provide Vicksburg an opportunity to obtain gas supplies of natural gas at a competitive price.

Comment date: April 1, 1992, in accordance with Standard Paragraph F at the end of this notice.

2. Williston Basin Interstate Pipeline Company

[Docket No. CP92-395-000]

March 11, 1992.

Take notice that on March 6, 1992, Williston Basin Interstate Pipeline Company (Williston Basin), 200 North Third Street, Suite 300, Bismarck, North Dakota 58501, filed in Docket No. CP92-395-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205), for authorization to add a delivery tap, metering station and appurtenant facilities to serve Montana-Dakota Utilities Co. (Montana-Dakota) in Rapid City, South Dakota, under its blanket certificate issued in Docket No CP83-1-000, *et al.*, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Williston Basin requests authorization to construct and operate a delivery tap, a metering station and appurtenant facilities in order transport up to 40,000 dekatherms of natural gas per day for Montana-Dakota for further delivery to Black Hills Power and Light Company in Rapid City, South Dakota, for turbine electric generating facilities.

It is stated that the facilities constructed will consist of a turbine meter and miscellaneous regulators, gauges and valves. Williston Basin states that the cost of the proposed facilities will be $105,779. It is further stated that Montana-Dakota will reimburse Williston Basin for such costs.

Comment date: April 27, 1992, in accordance with Standard Paragraph G at the end of this notice.

3. Arkla Energy Resources, a division of Arkla, Inc.

[Docket No. CP92-401-000]

March 11, 1992.

Take notice that on March 9, 1992, Arkla Energy Resources, a division of Arkla, Inc. (AER), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP92-401-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate certain facilities in Arkansas, Oklahoma and Texas under the authorization issued in Docket No. CP82-384-000 and CP82-384-001 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

AER seeks authority to construct and operate four sales taps and related facilities for delivery of natural gas to Arkansas Louisiana Gas Company (ALG) for resale to domestic and commercial customers, and to operate three existing taps for the delivery of natural gas to ALG for resale to consumers other than the right-of-way grantors for whom the taps were orginally installed.

AER proposes to (1) install a new two-inch tap and two-inch meter station on its Line AC, Section 6, T5S-R20W, Hot Spring County, Arkansas, for initial service to domestic and commercial customers from ALG's new Rural Extension No. 1304,[1] using approximately 6,232 Mcf annually and 17 Mcf on a peak day to be constructed at an estimated cost of $20,800; (2) install a new one-inch tap on its Line AT-9, P.P. Rains Survey, A-258, Gregg County, Texas, for initial service to commercial customers from ALG's new Rural Extension No. 1303,[2] using approximately 1,600 Mcf annually and 20 Mcf peak day, to be installed at an estimated cost of $7,722; (3) install a new one-inch tap on its Line 638, Section 3, T2N-R9E, Coal County, Oklahoma, for initial service to ALG's domestic customers Jim Inman and David Crane, using approximately 150 Mcf annually and 3 Mcf peak day, and to be constructed at an estimate cost of $1,388; (4) install a new two-inch tap on its Line AC, Section 8, T4S-R32W, Polk County, Arkansas, for initial service to ALG's domestic customer Elmer Roberts, using approximately 85 Mcf annually and Mcf peak day, and to be constructed at an estimated cost of $3,650; (5) use an existing one-inch tap on its Line BM-21, Section 16, T9N-R11W, Cleburne County, Arkansas, for service to a new domestic customer, Terry G. Singletary, using approximately 85 Mcf annually and 1 Mcf peak day. It is stated that this customer will manifold onto the existing tap and new construction will not be necessary; (6) use an existing one-inch tap on its Line 303, section 6, T4N-R7W, Pontotoc county, Oklahoma, for service to new domestic customers, A. E. Pevehouse and Lonnie Manuel, using approximately 1,000 Mcf annually and 3 Mcf peak day. It is stated that these customers will manifold onto the existing tap and new construction will not be necessary; and (7) use an existing one-inch tap on its Line BM-21, section 33 T10N-R10W, Cleburne County, Arkansas, for service to a new domestic customer, Joseph N. Crawford, using approximately 85 Mcf annually and 1 Mcf peak day. It is stated that this customer will manifold onto the existing tap and new construction will not be necessary.

AER states that the gas required for the performance of these services will be delivered from its general system supply, which is adequate to provide the service. During 1991, AER stated that its system had total sales volumes of approximately 55,465,431 Mcf annually and 729,988 Mcf on a peak day. Thus, AER avers that the proposed connections will have a *de minimis* impact of supply.

Comment date: April 27, 1992, in accordance with Standard Paragraph G at the end of this notice.

4. Transcontinental Gas Pipe Line Corporation

[Docket No. CP92-391-000]

March 11, 1992.

Take notice that on March 4, 1992, Transcontinental Gas Pipe Line Corporation, Post Office Box 1396, Houston, Texas 77251, filed in Docket No. CP92-391-000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate a new point of delivery to Public Service Electric & Gas Company (PSE&G) under the blanket certificate issued in Docket No. CP82-426-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

It is stated that PSE&G is currently a sales, transportation and storage customer of Transco under various rate schedules, and has a maximum firm mainline capacity entitlement of 430,459 Mcf per day on Transco's system.

Transco states that it will construct, install, own, operate and maintain a new delivery point to PSE&G (referred to as the "Montclair Delivery Point"), which shall include a 4-inch tap valve, a single 3-inch meter station and appurtenance facilities at milepost 1828.90 on the Caldwell "B" lateral. PSE&G will construct minor appurtenant facilities to enable it to receive gas from Transco at such meter station.

The Montclair Delivery Point will be used by PSE&G to receive up to a maximum daily delivery point entitlement of 2,400 Mcf per day of gas from Transco on a firm and interruptible basis in order to enable PSE&G to serve the cogeneration needs of Montclair State College. The authorized total transportation service entitlement of PSE&G will not be altered from the current level, and the addition of the Montclair Delivery Point will have no effect on Transco's peak day or annual deliveries to PSE&G.Transco further states that it has sufficient system delivery flexibility to accomplish deliveries at the Montclair Delivery Point without detriment or disadvantage to Transco's other gas transportation and sales customers, and, therefore, the addition of such point will have no effect on Transco's peak day or annual deliveries to such other customers. Also, the addition of such delivery point is not prohibited by Transco's FERC Gas Tariff.

Comment date: April 27, 1992, in accordance with Standard Paragraph G at the end of this notice.

5. Mojave Pipeline Company

March 11, 1992.

[Docket No. CP92-376-000]

Take notice that on February 28, 1992, Mojave Pipeline Company (Applicant), 5001 E. Commercenter Drive, Bakersfield, CA 93309, filed in Docket No. CP92-376-000, an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act and subpart E of the Federal Energy Regulatory Commission's (Commission) Regulations thereunder for a certificate of public convenience and necessity under the optional procedures contained in subpart E of part 157 authorizing Applicant to construct, operate and own certain pipeline expansion facilities (Expansion Facilities), and abandon those facilities Mojave determines are no longer required upon termination of any of Mojave's contractual obligations, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Project Description

Applicant is proposing alternative authorization to construct one of three expansion designs. As part of each case, Mojave is proposing to construct the Kramer Junction Lateral, which consists of 36.4 miles of 12-inch diameter pipeline, extending north from near Kramer Junction, California. The Kramer Junction Lateral also would include the construction of a new meter station at the end of the lateral.

In addition to the Kramer Junction Lateral, the three cases consist of the following:

Case 1—Mojave/Kern River 651 MMcf/d Expansion

This case contemplates a Mojave 200 MMcf/d expansion in conjunction with an approximately 451 MMcf/d Kern River Gas Transmission Company (Kern River) expansion pursuant to Kern River's application in Docket No. CP92-198-000. It consists of (1) expansion of the existing Topock Compressor Station from 12,240 horsepower to 22,400 horsepower through the addition of two compressor units; (2) construction of a new compressor station at Mojave's existing Daggett Meter Station consisting of two compressor units with a combined horsepower of 28,200; (3) modification of existing metering facilities at the Daggett, SoCal and 17-Z Meter Stations; and (4) 19 miles of looping on the Common Facilities on the West Side Lateral, to be constructed by Kern River.

Case 2—Mojave Stand-Alone 200 MMcf/d Expansion

This case is very similar to Case 1, except that it assumes that the Kern River expansion is not constructed. It consists of (1) expansion of the existing Topock Compressor Station from 12,240 horsepower to 22,400 horsepower through the addition of two compressor units; (2) construction of a new compressor station at Mojave's existing Daggett Meter Station consisting of three compressor units with a combined horsepower of 19,500; (3) construction of a new compressor station on Kern River's pipeline near Daggett consisting of two compressor units with a combined horsepower of 9,280; and (4) modification of existing metering facilities at the Daggett, SoCal and 17-Z Meter Stations.

Case 3—Mojave 80 MMcf/d Expansion

This case consists of a smaller 80 MMcf/d Mojave expansion that could be either the first phase of Case 1 or Case 2 or a stand-along project. It consists of (1) expansion of the existing Topock Compressor Station from 12,240 horsepower to 17,340 horsepower through the addition of one compressor unit; and (2) modification of existing metering facilities at the Daggett and 17-Z Meter Stations.

Cost and Financing

The estimated total capital cost of the Expansion Facilities in 1993 dollars is approximately $74,210,000 for Case 1, $77,189,000 for Case 2, and $26,323,000 for Case 3. Applicant intends to fund the construction of the proposed facilities using a financing plan which will permit an approximate 70/30 debt-to-equity ratio on a nonrecourse basis.

Rates

Applicant proposes to charge rolled-in rates for transportation of natural gas over its pipeline systsem, whether such transportation occurs over Applicant's initial facilities or its Expansion Facilities. Applicant has committed to making a Section 4 rate filing prior to placing the Expansion Facilities in place in order to accomplish rolled-in rates. Applicant proposes to calculate its rolled-in rates pursuant to the same MFV rate design and 95% minimum throughput conditions applicable to its initial facilities.

Request Period

In accordance with the Commission's Regulations governing open access pipelines, priority of service within each class of service under Applicant's tariff will be determined on a "first come, first served" basis. Applicant will establish a priority of service among its initial customers on a first come, first served bases during a preliminary request period that will last a minimum of 30 days. Once this initial priority is determined, priority for any additional capacity will again be determined in accordance with first come, first served principles.

The request period will commence upon the publication of this notice on the Federal Register. Applicant will publish a notice in industry publications of general circulation prior to the close of the request period. Any party requesting service must submit a complete request for service in the form set forth in the Section 9 of the General

[1] It is stated that ALG's Rural Extension will consist of 8,448 feet of four-inch plastic pipe.

[2] It is stated that ALG's Rural Extension No. 1304 will consist of 500 feet of two-inch plastic pipe.

Terms and Conditions of Applicant's Tariff. Applicant will then tender to such a party a service agreement in the form set forth in the Applicant's Tariff, General Terms and Conditions, which must be executed and returned to Applicant within 30 days of receipt of such agreement. A priority of service shall then be established among all shippers who have executed Service Agreements during the request period according to the date of the request. The request date shall establish the tight to schedule firm and interruptible capacity, and the order in which their service shall be curtailed.

Comment date: April 1, 1992, in accordance with Standard Paragraph F at the end of the notice.

6. Natural Gas Pipeline Company of America

[Docket No. CP92-387-000]

March 11, 1992.

Take notice that on March 3, 1992, Natural Gas Pipeline Comapny of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP92-387-000, an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon, effective October 31, 1990, the rescheduling of deliveries service authorized in Docket No. CP76-353, as amended in Docket No. CP79-163, performed by Natural under its Rate Schedule X-72 for Northern Indiana Public Service Company (NIPSCO), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Natural states that, pursuant to its Rate Schedule X-72, and agreement between Natural and NIPSCO dated June 18, 1979, as amended December 13, 1978 (Agreement), it performed a rescheduling of deliveries service for NIPSCO. Natural further states that such service was effected by Natural rescheduling deliveries of up to 8,000,000 Mcf (6,000,000 Mcf authorized in Docket No. CP76-353 and an additional 2,000,000 Mcf authorized in Docket No. CP79-163) of sales gas sold to NIPSCO under Natural's Rate Schedule DMQ-1 during the period March 1 through October 31 of each year through October 31, 1990, and then delivering such gas for the account of NIPSCO to ANR Pipeline Company (ANR) at existing delivery points at a daily rate of up to 40,000 Mcf (30,000 Mcf was authorized in Docket No. CP76-353 and an additional 10,000 Mcf was authorized in Docket No. CP79-163) plus additional volumes for compressor fuel.

Natural states that it was informed that its deliveries of gas to ANR for the account of NIPSCO in Docket No. CP76-353 enabled NIPSCO to fulfill its delivery obligations under gas transportation agreements dated January 23, 1976, between NIPSCO and ANR (which among other things were subjects of ANR's application in Docket No. CP76-255) and thus allowed NIPSCO to avail itself of the storage service utilizing Michigan Consolidated Gas Company's (MichCon) W. C. Taggert Storage Field located in Mecosta and Montcalm Counties, Michigan pursuant to storage agreements dated January 23, 1976, between NIPSCO and MichCon (which among other things were subjects of MichCon's and its Interstate Storage Division's application filed in Docket No. CP76-254). Natural further states that it was informed that its deliveries of gas to ANR for the account of NIPSCO in Docket No. CP79-163 enabled NIPSCO to fulfill its delivery obligations under gas transportation agreements dated May 12, 1978, between NIPSCO and ANR and between NIPSCO and MichCon (which were the subject of ANR's and MichCon's applications filed in Docket Nos. CP78-545 and CP78-433, respectively) and thus allowed NIPSCO to avail itself of the storage service utilizing ANR Storage Company's Rapid River and Cold Springs Storage Fields.

Natural states that by a termination agreement dated October 31, 1991, Natural and NIPSCO agreed that the Agreement terminated as of October 31, 1990, and to cooperate in obtaining abandonment. Natural therefore proposes in the present application to abandon, effective October 31, 1990, the rescheduling of deliveries service authorized in Docket Nos. CP76-353 and CP79-163, performed by Natural under its Rate Schedule X-72 for NIPSCO.

Comment date: April 1, 1992, in accordance with Standard Paragraph F at the end of this notice.

7. Texas Eastern Transmission Corporation

[Docket No. CP92-389-000]

March 11, 1992.

Take notice that on March 4, 1992, Texas Eastern Transmission Corporation (Texas Eastern), 5400 Westheimer Court, Houston, Texas 77056-5310, a request pursuant to §§ 157.205 and 157.212 of the Regulations under the Natural Gas Act (18 CFR 157.205 and 157.212) for authorization to add two delivery points for the delivery of gas to Long Island Lighting Company (Lilco) under Texas Eastern's blanket certificate issued November 5, 1982, in Docket No. CP82-535-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Specifically, Texas Eastern proposes to add two additional existing delivery points for Lilco under Texas Eastern's Rate Schedules FT-1, CD-1, SS-1, SS-3, FTS-4, FTS-5 and FTS. It is also stated that the existing delivery points to be added are (1) Transco—Linden Point, located in Union County, New Jersey and designated as Texas Eastern's Meter Station 0244, and (2) Transco—Belle Meade Point, located in Somerset County, New Jersey and designated as Texas Eastern's Meter Station 0919. Texs Eastern indicates that the additional delivery points do not propose to add additional volumes or capacity to what is presently authorized. It is further stated that no new facilities would be required in order to provide the service.

Texas Eastern states that the addition of the existing delivery points will have no effect on Texas Eastern's peak day or accomplished without detriment or disadvantage to Texas Eastern's other customers.

Comment date: April 27, 1992, in accordance with Standard Paragraph G at the end of this notice.

8. EnMark Gas Gathering L.P.

[Docket No. CS92-2-000]

March 12, 1992.

Take notice that on March 6, 1992, EnMark Gas Gathering L.P. (Applicant) of 16475 Dallas Parkway, Suite 710, Dallas Texas 75248, filed an application pursuant to section 7(c) of the Natural Gas Act and § 157.40 of the Commission's regulations thereunder for a small producer certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Comment date: April 2, 1992, in accordance with Standard Paragraph J at the end of this notice.

9. Tennessee Gas Pipeline Company

[Docket No. CP92-393-000]

March 12, 1992.

Take notice that on March 5, 1992, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP92-393-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) to construct and operate a new delivery point to serve Reliance Gas Marketing Company (Reliance), a marketer of natural gas, under Tennessee's blanket certificate issued in Docket No. CP82-413-000 pursuant to section 7 of the Natural Gas Act, all as more fully detailed in the request which is on file with the Commission and open to public inspection.

Specifically, Tennessee proposes to construct facilities for a delivery point for service for Reliance in Jefferson Parish, Louisiana. It is stated that Tennessee would deliver up to 500 dt equivalent of gas on a peak day and 182,500 dt equivalent on an annual basis for the account of Reliance to Vintage Petroleum, Inc., a producer of natural gas, as part of a transportation service carried out pursuant to Tennessee's Rate Schedule IT. It is explained that the cost of the proposed facilities is $5,453, and that Tennessee would be reimbursed for the construction cost. It is asserted that the deliveries would have no impact on Tennessee's peak day and annual deliveries and that the volumes are within Reliance's currently authorized entitlement from Tennessee. It is further asserted that Tennessee can effect the deliveries without detriment or disadvantage to Tennessee's other customers.

Comment date: April 27, 1992, in accordance with Standard Paragraph G at the end of this notice.

10. Northwest Pipeline Corporation

[Docket No. CP92-399-000]

March 12, 1992.

Take notice that on March 6, 1992, Northwest Pipeline Corporation (Northwest) 295 Chipeta Way, Salt Lake City, Utah 84158, filed a request with the Commission in Docket No. CP92-399-000 pursuant to Section 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to partially abandon and replace obsolete facilities at the Oakland and Sutherlin meter stations in Douglas County, Oregon, in order to more efficiently accommodate its existing firm delivery obligations to WP Natural, a division of The Washington Water Power Company (WP Natural), formerly CP National Corporation, under Northwest's blanket certificate issued in Docket No. CP82-433-000, all as more fully set forth in the application which is open to public inspection.

Northwest proposes to abandon and replace the currently obsolete two-inch positive displacement meters at both the Oakland and Sutherlin meter stations with a two-inch rotary meter at each meter station. Northwest estimates that it would cost approximately $13,190 and $13,900, respectively, to remove and replace the existing meters at the Oakland and Sutherlin meter stations. Northwest states that replacing the obsolete meters would result in a decrease of the maximum station design capacity from 483 dekatherms to 183 dekatherms of natural gas per day at 150 psig at the Oakland meter station and from 900 dekatherms to 550 dekatherms per day at 150 psig at the Sutherlin meter station. Northwest also states that it would still have adequate capacity upon replacing the obsolete facilities to accommodate its existing daily firm delivery obligations to WP Natural of 100 dekatherms and 380 dekatherms at the Oakland and Sutherlin meter stations, respectively.

Comment date: April 27, 1992, in accordance with Standard Paragraph G at the end of this notice.

11. Tennessee Gas Pipeline Company

[Docket No. CP92-392-000]

March 12, 1992.

Take notice that on March 5, 1992, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP92-392-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon interruptible transportation service to Natural Gas Pipeline Company of America (Natural) and both firm and interruptible transportation services to Turnkline Gas Company (Trunkline), all as more fully set forth in the application on file with the Commission amd open to public inspection.

It is stated that Tennessee requests authorization to abandon the transportation services it provides to Natural and Trunkline under Tennessee's Rate Schedules T-68, T-98 and T-127. It is further stated that the services are no longer needed and that the customers have agreed to the proposed abandonments.

Comment date: April 2, 1992, in accordance with Standard Paragraph F at the end of this notice.

12. Williams Natural Gas Company

[Docket No. CP92-403-000]

March 12, 1992.

Take notice that on March 9, 1992, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP92-403-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to utilize facilities originally installed for the delivery of NGPA section 311 transportation gas for other purposes under WNG's blanket certificate issued in Docket No. CP82-479-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

WNG proposes to utilize the NGPA section 311 facilities installed to deliver transportation gas to Vulcan Chemicals (Vulcan) in Sedgwick County, Kansas, for any purpose. WNG states that it has been delivering an average of 13,000 dt of natural gas per day to Vulcan on behalf of Delhi Gas Pipeline Corporation since the facilities were installed. The cost to construct the facilities was $343,630 which was paid from funds on hand, it is stated.

WNG states that this change is not prohibited by its existing tariff and that it has sufficient capacity to accomplish the deliveries specified without detriment or disadvantage to its other customers.

Comment date: April 27, 1992, in accordance with Standard Paragraph G at the end of this notice.

13. Natural Gas Pipeline Company of America

[Docket No. CP92-396-000]

March 12, 1992.

Take notice that on March 6, 1992, Natural Gas Pipeline Company of America (Natural), 701 East 22nd Street, Lombard, Illinois 60148, filed in Docket No. CP92-396-000 a request pursuant to §§ 157.205 and 157.212(a) of the Commission's Regulations under the Natural Gas Act for authorization to operate six existing delivery points interconnecting with local distribution companies to provide jurisdictional services under its blanket certificate issued in Docket No. CP82-402-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Natural states that the total volumes of gas to be delivered to each delivery point after these facilities are authorized to provide jurisdictional services will not exceed the total volumes available prior to such request and authorization.

Comment date: April 27, 1992, in accordance with Standard Paragraph G at the end of this notice.

14. Williams Natural Gas Company

[Docket No. CP92-388-000]

March 10, 1992.

Take notice that on March 3, 1992, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP92-388-000 an application pursuant to section 7(b) of the Natural Gas Act for an order

permitting and approving the abandonment of approximately 25.7 miles of 12-inch pipeline and appurtenant facilities located in Leavenworth County, Kansas and Platte and Buchanan Counties, Missouri, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

WNG states that the 12-inch pipeline to be abandoned was installed in 1929 and certificated in Docket No. G-298 (4 FPC 471, 1943) and that WNG looped this 12-inch line with a 16-inch pipeline in 1955 to provide service to the St. Joseph, Missouri area. WNG states that the 12-inch line is shallow in many areas and presents operational and maintenance concerns. WNG also states that the existing 16-inch line can meet all firm gas commitments in the St. Joseph's area as well as allow for additional growth in demand.

Further, WNG states that it seeks authority to abandon in place approximately 3.1 miles of the 12-inch pipeline and to abandon by sale for salvage approximately 22.6 miles of the 12-inch pipeline and appurtenant facilities.

Comment date: March 31, 1992, in accordance with Standard Paragraph F at the end of this notice.

15. Tennessee Gas Pipe Line Company

[Docket No. CP92-398-000]

March 13, 1992.

Take notice that on March 6, 1992, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP92-398-000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to add two additional delivery points under an existing firm sales service presently provided by Tennessee to National Fuel Gas Supply Corporation (National Fuel), under Tennessee's blanket certificate issued in Docket No. CP82-413-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Tennessee states that it currently provides a natural gas service to National Fuel under the terms and conditions of Tennessee's CD-4 (Northern Zone) and CD-5I (New York Zone) Rate Schedules and the terms and conditions of a gas sales contract between Tennessee and National Fuel dated November 26, 1990. Pursuant to a request of National Fuel, Tennessee proposes to add Hebron (Potter County, Pennsylvania) and Colden (Erie County, New York), both storage facilities, as delivery points under the contract, a daily quantity limit by delivery point of 78,183 Dth and 100,225 Dth, respectively.

Tennessee states that it does not propose to increase or decrease the total daily and/or annual quantities it is authorized to deliver to National Fuel. Tennessee asserts that the establishment of the proposed new delivery points is not prohibited by Tennessee's currently effective tariff and that it has sufficient capacity to accomplish the deliveries at the proposed new delivery points without detriment or disadvantage to any of Tennessee's other customers.

Comment date: April 27, 1992, in accordance with Standard Paragraph G at the end of this notice.

16. Questar Pipeline Company

[Docket No. CP92-400-000]

March 13, 1992.

Take notice that on March 9, 1992, Questar Pipeline Company (Questar), 79 South State Street, Salt Lake City, Utah 84111, filed in Docket No. CP92-400-000 an application pursuant to Section 7(b) of the Natural Gas Act requesting authority to abandon certain interruptible natural-gas transportation and exchange services involving Northwest Pipeline Corporation (Northwest). By mutual agreement between Questar and Northwest, the authorized services proposed to be abandoned by Questar are no longer provided under Rate Schedules X-11, X-13, and X-16 of Questar's FERC Gas Tariff, Original Volume No. 3, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Questar represents that on September 6, 1991, Northwest informed Questar that it desired to cancel the services provided to Northwest under the subject rate schedules. Questar further states that it does not propose to abandon any existing facilities in conjunction with this filing.

Comment date: April 3, 1992, in accordance with Standard Paragraph F at the end of the notice.

17. Sonat Marketing Company et al.

[Docket No. CI86-503-007,[1] *et al.*]

March 13, 1992.

Take notice that each Applicant listed on the Appendix hereto filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for extension of its blanket limited-term certificate with pregranted abandonment authorizing sales for resale in interstate commerce previously issued by the Commission for a term expiring March 31, 1992, all as more fully set forth in the applications which are on file with the Commission and open for public inspection.

Comment date: March 23, 1992, in accordance with Standard Paragraph J at the end of this notice.

APPENDIX

Docket No.	Date filed	Applicant
CI86-503-007	3-10-92	Sonat Marketing Company, P.O. Box 2563, Birmingham, Alabama 35202-2563.
CI87-476-008 [1]	3-11-92	TXG Gas Marketing Company, 313 Frederica Building, Suite 200, P.O. Box 568, 313 Frederica Street, Owensboro, Kentucky 42302-0568.
CI91-36-001	3-10-92	Seminole Gas Marketing, c/o J. V. Trading Inc., P.O. Box 2563, Birmingham, Alabama 35202-2563.

[1] Applicant also requests that the Commission remove the rate restriction on the sale of surplus system supply gas (ISS gas) purchased from its pipeline affiliate, Transcontinental Gas Pipeline Corporation, or, in the alternative, impose the same restrictions as imposed on the pipeline.

18. Transcontinental Gas Pipe Line Corporation

[Docket No. CP92-405-000]

March 16, 1992.

Take notice that on March 11, 1992, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP92-405-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing it to operate as a juristictional facility an existing pipeline in Alabama, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Transco proposes to operate as a jurisdictional facility and to provide jurisdictional services through, including transportation services under subpart G of part 284 of the Commission's Regulations, its Mobile Bay Pipeline. Transco explains that the Mobile Bay Pipeline is a 30-inch diameter lateral which extends 123.4 miles from the tailgate of the Mobil Oil Exploration and Producing Southeast Inc. gas treatment plant (MOEPSI plant) to an interconnection with Transco's mainline near Butler in Choctaw County, Alabama. Transco further explains that the pipeline was constructed in 1988 pursuant to Section 311 of the Natural Gas Policy Act (NGPA) and § 284.3(c) of the Commission's Regulations solely to provide services authorized under Section 311 of the NGPA and Subpart B of the Commission's Regulations. It is indicated that the pipeline provides access to gas produced in Mobile Bay and in the offshore area of Alabama generally.

Transco states that although it originally sought section 7(c) certificate authority for the Mobile Bay Pipeline in Docket No. CP89-523-000, the subject application is intended to supersede and replace the earlier filing.

Transco asserts that the proposed authorization would permit it to perform transportation services through the Mobile Bay Pipeline under its blanket certificate for all potential shippers, not just those able to meet the "on behalf of" requirement of NGPA Section 311. Transco avers that all shippers would have equal access to the pipeline and that, as a result, Mobile Bay area producers and suppliers would have broader competitive and marketing opportunities.

It is explained that the actual cost of the Mobile Bay Pipeline, as of January 31, 1992, is $96,188,017. Transco notes that the pipeline was initially financed through short-term loans and funds on hand, with permanent financing undertaken as part of Transco's overall long-term financing program.

Comment date: April 6, 1992, in accordance with Standard Paragraph F at the end of this notice.

19. Northern Natural Gas Company

[Docket No. CP92-394-000]

March 16, 1992.

Take notice that on March 5, 1992, Northern Natural Gas Company (Northern), 1111 South 103rd Street, Omaha, Nebraska 68124, filed in Docket No. CP92-394-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a transportation service for Amoco Gas Company (Amoco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Northern requests authorization to retroactively reduce the volumes transported for Amoco and to subsequently abandon the transportation service, which was authorized by the Commission in Docket No. CP83-131-000, *et al.*, and carried out pursuant to the provisions of a Gas Transportation and Facilities Agreement between Northern and Amoco dated March 10, 1983, as amended, on file with the Commission as Northern's Rate Schedule T-37. Northern states that in letter agreements signed in February, April and August, 1990, Northern and Amoco have agreed to several decreases in the transportation volumes.

It is stated that in the February 20, 1990, amendment to the agreement, Northern and Amoco agreed to reduce the volumes transported from Matagorda Island Block 623B (MAT 623B) from 61,000 Mcf of gas per day to 28,341 Mcf per day and to reduce the volumes transported from Matagorda Island Block 623A (MAT 623A) from 32,000 Mcf per day to 14,867 Mcf per day. It is requested that both reductions have an effective date of November 10, 1989.

It is stated that in the April 5, 1990, amendment to the agreement, Northern and Amoco have agreed to a further reduction for MAT 623B to 14,079 Mcf per day and for MAT 623A to 7,386 Mcf per day, with proposed effective dates of December 10, 1989. It is stated that in the August 28, 1990, amendment to the agreement, Northern and Amoco have agreed to terminate transportation from MAT 623B and MAT 623A, with a proposed effective date of May 16, 1990. It is stated that by termination notice dated October 4, 1990, Northern and Amoco have agreed to terminate the entire transportation service under Rate Schedule T-37, with an effective date of October 1, 1990.

It is asserted that no gas has flowed under Rate Schedule T-37 since its proposed termination date. It is further asserted that the proposal involves no abandonement of facilities. It is stated that Amoco has terminated the gas purchase cotracts underlying the transportation service and therefore no longer requires the service to serve its customers.

Comment date: April 6, 1992, in accordance with Standard Paragraph F at the end of this notice.

20. Williams Gas Company

[Docket No. CP92-402-000]

March 16, 1992.

Take notice that on March 9, 1992, Williams Natural Gas Company (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP92-402-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to designate an additional delivery point for service to Midcoast Natural Gas, Inc. (Midcoast), under Williams' blanket certificate issued in Docket No. CP82-479-000, all as more fully described in the request which is on file with the Commission and open to public inspection.

Williams proposes to add a delivery point for the transportation of natural gas for Midcoast in Wyandotte County, Kansas. It is stated that the delivery point consists of facilities which were installed under the authorization of Section 311 of the Natural Gas Policy Act. It is explained that Williams proposes herein to utilize the delivery point for transportation under part 284 of the Commission's Regulations. It is stated that Williams has been utilizing the facilities for the delivery of an average 3,000 MMBtu equivalent of gas per day to Midcoast. Williams states that the operation of these facilities has had no impact on its peak day or annual deliveries.

Comment date: April 30, 1992, in accordance with Standard Paragraph G at the end of this notice.

21. Williams Natural Gas Company

[Docket No. CP92-408-000]

March 16, 1992.

Take notice that on March 12, 1992, Williams Natural Gas Company (Williams), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP92-408-000 a request pursuant to §§ 157.205 and 157.216 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.216) for authorization to abandon sales and transportation service for Peoples Natural Gas Company (Peoples), under its blanket certificate issued in Docket No. CP82-479-000, pursuant to section 7(b) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

It is indicated that Peoples by letter dated September 28, 1990, has requested that the July 15, 1989, sales service agreement with Williams be terminated as of January 1, 1991, and that the firm transportation agreement with Williams be terminated as of November 1, 1990. No abandonment of facilities is proposed.

Comment date: April 30, 1992, in accordance with Standard Paragraph G at the end of this notice.

[2] This notice does not provide for consolidation for hearing of the several matters covered herein.

22. Amoco Canada Marketing

[Docket No. CI92-30-000]

March 17, 1992.

Take notice that on March 9, 1992, Amoco Canada Marketing Corp. (Amoco) of 240 4th Avenue SW., Calgary, Alberta T2P2H08, filed an application pursuant to sections 4 and 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate with pregranted abandonment authorizing sales for resale of all categories of natural gas in interstate commerce, including sales of imported natural gas, liquified natural gas, and surplus system supply gas purchased from interstate pipelines under interruptible sales program, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: April 6, 1992, in accordance with Standard Paragraph J at the end of this notice.

23. ENERGY International Marketing Corporation

[Docket No. CI92-26-000]

March 17, 1992.

Take notice that on February 27, 1992, ENERGY International Marketing Corporation (EIMC) of P.O. Box 6690, Kingwood, Texas 77325-6690, filed an application pursuant to Sections 4 and 7 of the Natural Gas Act (NGA) and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate with pregranted abandonment authorizing sales in interstate commerce for resale of natural gas from any source (domestic or foreign), and in gaseous or liquid (LNG) form, to the extent such sales would be subject to the Commission's NGA jurisdiction, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: April 6, 1992, in accordance with Standard Paragraph J at the end of this notice.

24. American Hunter Exploration Ltd.

[Docket No. CI92-28-000]

March 17, 1992.

Take notice that on March 3, 1992, American Hunter Exploration Ltd. (American Hunter) of 2000, 605-5th Avenue SW., Calgary, Alberta T2P 3H5, Canada, filed an application pursuant to sections 4 and 7 of the Natural Gas Act (NGA) and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for an unlimited-term blanket certificate with pregranted abondonment authorizing sales for resale in interstate commerce of all natural gas subject to the Commission's NGA jurisdiction, including Canadian-produced natural gas, all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Comment date: April 6, 1992, in accordance with Standard Paragraph J at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an applicant for authorization pursuant to section 7 of the Natural Gas Act.

Standard Paragraph

J. Any person desiring to be heard or make any protest with reference to said filings should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

BILLING CODE 6717-01-M

[Project No. 10533-002 New Hampshire]

Franklin Hydro Co., Inc.; Surrender of Preliminary Permit

March 17, 1992.

Take notice that Franklin Hydro Company, Inc., permittee for the Franklin Development Project located on the Winnipesaukee River in Merrimack and Belknap Counties, New Hampshire, has requested that its preliminary permit be terminated. The preliminary permit was issued on August 2, 1990, and would have expired on July 31, 1993. The permittee states that analysis of the proejct did not indicate feasibility for development.

The permittee filed the request on February 12, 1992, and the preliminary permit for Project No. 10533 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR part 4, may be filed on the next business day.

Lois D. Cashell,

Secretary.

(B) Market area—$1.5000-$1.99

Docket No. CP88-2-012

Any interested party desiring to make any protest with reference to this sale of natural gas should file with the Federal Energy Regulatory Commission, Washington, DC 20426, within 30 days after issuance of the instant notice by the Commission, pursuant to the order of March 11, 1988. If no protest is filed within that time or the Commission denies the protest, the proposed sale may continue until the underlying contract expires. If a protest is filed, Northern may sell gas for 120 days from the date of commencement of service or until a termination order is issued, whichever is earlier.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP92-140-000]

Transwestern Pipeline Co.; Proposed Changes in FERC Gas Tariff

March 17, 1992.

Take notice that Transwestern Pipeline Company ("Transwestern"), on March 13, 1992 tendered for filing as part of its F.E.R.C. Gas Tariff, Second Revised Volume No. 1, the following tariff sheets:

Effective April 14, 1992

2nd Revised Sheet No. 4A
60 Revised Sheet No. 6
6th Revised Sheet No. 6C
1st Revised Sheet No. 93

Transwestern states that the purpose of its tariff filing is to establish initial rates for firm (FTS-1) and interruptible (ITS-1) transportation service on Transwestern's San Juan Lateral. The proposed San Juan Lateral rates are based on the cost of service associated with the new facilities. Transwestern states that these rates have been developed to be consistent with the rate design agreed to in the settlement filed in Transwestern's general rate case proceeding on June 22, 1990 in Docket No. RP89-48-000, *et al.*

Transwestern requests that the Commission grant any and all waivers of its rules, regulations, and orders as may be necessary so as to permit the tariff sheets submitted by it to become effective April 14, 1992.

Transwestern states that copies of the filing were served upon all of Transwestern's gas utility customers and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before March 23, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in section 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-200103-007.
Title: A/S Ivarans Rederi/Georgia Ports Authority Terminal Agreement.
Parties: A/S Ivarans Rederi Georgia Ports Authority.
Synopsis: The amendment revises the Agreement Rate Schedule.

Agreement No.: 232-011155-001
Title: Wallenius/NYK/MOSK Space Charter and Cooperative Working Agreement.
Parties: Wallenius Lines Nippon Yusen Kaisha Mitsui O.S.K. Lines, Ltd.
Synopsis: The proposed amendment would delete Mitsui O.S.K. Lines, Ltd. as a party to the Agreement. It would also make other nonsubstantive changes.

By Order of the Federal Maritime Commission.

Dated: March 18, 1992.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Montana Bancsystem, Inc.; Notice of Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR

225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 20, 1992.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Montana Bancsystem, Inc., Billings, Montana; to engage *de novo* in making and servicing loans pursuant to § 225.25(b)(1) of the Board's Regulation Y. These activities will be conducted in the State of Montana.

Board of Governors of the Federal Reserve System, March 18, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Norwest Corporation; Acquisition of Company Engaged in Permissible Nonbanking Activities

The organization listed in this notice has applied under § 225.23(a)(2) or (f) of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 2, 1992.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Norwest Corporation, Minneapolis, Minnesota, and its subsidiary, Norwest Insurance, Inc., Minneapolis, Minnesota; to acquire the surety/bond book of business of Richard A. Nelson, and thereby engage in general insurance agency activities pursuant to § 225.25(b)(8)(vii) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, March 18, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

Slippery Rock Financial Corporation; Formation of, Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than April 20, 1992.

A. Federal Reserve Bank of Cleveland (John J. Wixted, Jr., Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. Slippery Rock Financial Corporation, Slippery Rock, Pennsylvania; to become a bank holding company by acquiring 100 percent of the voting shares of The First National Bank of Slippery Rock, Slippery Rock, Pennsylvania.

Board of Governors of the Federal Reserve System, March 18, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

National Institute on Alcohol Abuse and Alcoholism; Meetings

Pursuant to Public Law 92-463, notice is hereby given of the meetings of the advisory committees of the National Institute on Alcohol Abuse and Alcoholism for May 1992.

The National Advisory Council will be performing review of applications for Federal assistance; the Board of Scientific Counselors will review, discuss, and evaluate intramural research programs and projects and productivity and performance of individual staff scientists; therefore, portions of these meetings will be closed to the public as determined by the Acting Administrator, ADAMHA, in accordance with 5 U.S.C. 552b(c)(6) and 5 U.S.C. app. 2 10(d).

Summaries of the meetings and rosters of committee members may be obtained from: Ms. Diana Widner, NIAAA Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration, Parklawn Building, room 16C-20, 5600 Fishers Lane, Rockville, MD 20857, telephone: 301/443-4375.

Substantive program information may be obtained from the contact whose names, room numbers, and telephone numbers are listed below.

Committee Name: Board of Scientific Counselors, NIAAA.
Meeting Dates: May 21-22, 1992.
Place: NIH Campus, Building 10, Conference Room 9, 9000 Rockville Pike, Bethesda, MD 20892.
Open: May 21, 9 a.m.-9:30 a.m.
Closed: Otherwise.
Contact: Theodore Colburn, Ph.D., room 1B58, Building 31, Telephone (301) 402-1226.

Committee Name: National Advisory Council on Alcohol Abuse and Alcoholism.
Meeting Dates: May 27, 1992.
Place: Bethesda Marriott Hotel, 5151 Pooks Hill Road, Bethesda, MD 20814.
Open: May 27, 10:15 a.m.-3:00 p.m.
Closed: Otherwise.
Contact: James F. Vaughan, Room 16C-20, Parklawn Building, Telephone (301) 443-4375.

Dated: March 18, 1992.

Peggy W. Cockrill,

Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 4160-20-M

Food and Drug Administration

Quality Control Standard Requirements Pertaining to Clinical Laboratory Improvement Amendments of 1988; Public Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of a public meeting.

SUMMARY: The Food and Drug Administration (FDA) is announcing that it is holding a public meeting to obtain the views of manufacturers and other interested persons on FDA's implementation of the quality control validation assessment process. This meeting will address FDA's role in implementing the quality control standards requirements of the Clinical Laboratory Improvement Amendments of 1988 (CLIA), as specified in subpart K of 42 CFR part 493 of the laboratory standards regulation which was published in the Federal Register of February 28, 1992 (57 FR 7002). FDA is developing guidance documents for manufacturers on how to prepare and submit applications for obtaining clearance for validated quality control instructions.

DATES: The meeting will be held on April 13, 1992, from 9 a.m. to 5 p.m. at the Bethesda Marriott, 5151 Pooks Hill Rd., Bethesda, MD. To receive the group rate for the hotel accommodations, please reference the FDA meeting. Seating at the meeting will be limited. Call the hotel for information regarding shuttle service from the Medical Center Metro Station.

FOR FURTHER INFORMATION CONTACT: Janis Ohrmundt, Center for Devices and Radiological Health (HFZ-440), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1005.

SUPPLEMENTARY INFORMATION: On February 28, 1992, the Department of Health and Human Services (HHS) published the final laboratory standards rule (with a 60-day comment period) implementing CLIA (Pub. L. 100-578). As required by CLIA, the final laboratory standards rule sets forth quality control, quality assurance, personnel, proficiency test, and other requirements that must be met by all regulated laboratories. With respect to CLIA's quality control requirements, the rule also provides manufacturers of commercial in vitro test devices with the opportunity to submit validated quality control instructions to FDA for assessment. If these quality control instructions are cleared by FDA, clinical laboratories can comply with a significant portion of the rule's quality control requirements by following a manufacturer's FDA-cleared quality control instructions.

CLIA greatly expands Federal regulation of laboratory testing to cover any facility performing testing, assays or examinations on materials derived from the human body for the purpose of providing information for the diagnosis, prevention, or treatment of any disease or impairment of, or the assessment of the health of human beings, and imposes stringent requirements to ensure the accuracy of these tests. In the Federal Register of May 21, 1990 (55 FR 20896), HHS published a proposed rule implementing the laboratory standards provisions of CLIA. Briefly, the proposed rule required that all laboratories in the United States and its territories that examine human specimens meet specific laboratory standards based on the complexity of tests which laboratories perform. (This regulatory scheme is commonly referred to as the "complexity model.") Over 60,000 public comments were received on the proposed rule.

A substantial number of comments advocated integrating FDA's premarket evaluation program for clinical laboratory devices into the CLIA regulatory scheme for laboratories seeking to comply with the laboratory standards. Many of the comments expressed concern over the prospect of layered and burdensome regulations, which would impede the development of new technology for clinical testing. Based on these comments, significant changes were made to the complexity model and the associated laboratory standards. The final laboratory standards regulation establishes three levels of testing complexity: (1) Waived tests—simple tests which have an insignificant risk of an erroneous result, (2) moderate complexity tests, and (3) high complexity tests. Laboratories performing moderate or high complexity tests are subject to specific laboratory standards pertaining to personnel, proficiency testing, quality assurance, and quality control. Laboratories that perform only waived tests are subject to minimal regulation.
